BRITISH COLUMBIA OPERATIONS.

The Bowman Lumber Company, of Revelstoke, have two logging camps and two logging engines at work on Fish Creek, delivering 120,000 to 150,000 feet a day.

Some Duluth capitalists, represented by Dr. Cook and others, were at Grand Forks, B.C., recently negotiating for the purchase of some 25 square miles of timber limits up the North Fork of the Kettle River. They have a cruiser with them for the purpose of cruising the timber. Should the deal go through, Dr. Cook and his associates will erect a large mill and find a market in the new places that are opening along the Kettle River in Nicola Valley.

The Kendall Logging Company, which has been working at Comox, has suspended operations. The men who were working for the company have put in their claims, which amount to $1,900, the logs seized being worth approximately $2,100. The engine, which was only partially paid for, has been taken back by the Chemainus Lumber Company, who had a lien on it, and the E. K. Wood Company, of Bellingham, are said to have a chattel mortgage on the rest of the logging outfit. The company operated on limits owned by the E. K. Wood Company. There are other creditors, but for what amounts has not been learned.

A Vancouver paper recently contained an announcement concerning the taxation of timber lands. It read: "Notices are being issued calling upon the holders of all timber under license to furnish returns as to the value set upon their timber to the tax collectors and assessors. Failing such returns the tax collectors are empowered to assess the values themselves and levy the tax accordingly. It is estimated that there will be raised by this means a revenue of $400,000." The above notice was somewhat misleading, and was further explained by the publication of the following: "We are informed that there are no notices being sent out by the assessor to the holders of licenses of timber lands, because timber lands held under lease or license are exempt from taxation by the act. What is being done, however, is that a form is being sent out to the owners of timber land to be filled up in accordance with the Act, showing the description, value and other particulars of the land they claim to be timber land, so that the assessor may know whether to assess it 2 per cent. as timber land or 4 per cent. as wild land. This form is being sent out in the ordinary course of the assessor's duties in preparation of the roll for 1906, and none are sent to the lessees or licensees of provincial timber lands."

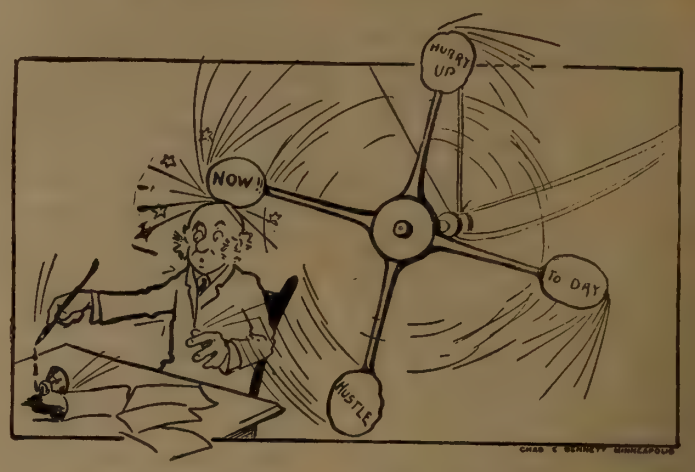
BUSINESS NOTES.

A demand of assignment is reported to have been made upon Isreal Nantel, lumber dealer, Montreal.

David R. Galbraith, lumber manufacturer, Mar, Ont., is announced to have assigned to D. R. Jermyn.

The W. F. Huntting Lumber Company, Vancouver, B.C., report very good business in shingles this summer. They are running night and day.

The Liverpool firm of R. Parker & Company, Limited, in liquidation, has managed to pay no less than 15s 4½d on the pound, a result which will be very satisfactory to all concerned, including the directors.



JUST A GENTLE REMINDER

That's all—a reminder that we can supply your wants in the lumber line.
It's up to you NOW to realize that fact and to open up correspondence with us.
Don't forget that SPRUCE LUMBER is our specialty—and should be yours. Let us tell you why.

Lumber

We have about two million feet of this season's cut for sale—about 75 per cent. White Pine, balance Norway and Spruce. Address

ERRINGTON & ROSS,
Turbine, Ont.

Sale of Burnt Timber

A quantity of pine timber on what is known as Berth B.1, containing 21 sqnare miles more or less, situated South of Woman River Station on the Canadian Pacific Railway 120 miles west of Sudbury, in the district of Algoma, having been damaged by fire, the undersigned hereby calls for tenders for the right to cut same.

Tenders will be received up to and including the 30th day of September next, and must state the rate per thousand feet board measure, including dues, which the tenderer is prepared to pay for the timber, or per thousand feet cubic for whatever proportion of it may be manufactured into waney or square timber, including dues. The timber to be cut during the present winter. Tenders to be accompanied by a marked cheque for $500.00 payable to the Honourable the Treasurer of Ontario. The timber to be sold subject to the Crown Timber Regulations except where varied by the conditions of this sale. The party awarded the right to cut will be required to give a bond with satisfactory sureties for the payment of the price and the due performance of all terms and conditions required by this Department.

The Department does not bind itself to accept the highest or any tender.

Tenders to be marked "Tenders for Burnt Timber," and addressed to the Honourable the Minister of Lands and Mines, Toronto.

F. COCHRANE,
Minister of Lands and Mines.

Department of Lands and Mines,
Woods and Forests Branch,
Toronto, 21st of August, 1905.

N.B.—No unauthorized publication of this Notice will be paid for.

WANTED—A SAWYER WHO CAN FILE and fit his own saws, for small mill in Assinaboia, N. W. T. Apply in first instance to Box 37, CANADA LUMBERMAN, Toronto.

WANTED—BASSWOOD, ELM AND SOFT maple logs, 20 inches and up in diameter, only first class logs accepted. BUFFALO VENEER COMPANY, BUFFALO, N.Y.

WANTED.

SPLENDID CEDAR AND HARDWOOD Timber Limit, up-to-date mill with gunshot feed, trimmers and other full equipment; sufficient timber to run 10 years; mill now in full operation, located on Georgian Bay; good shipping facilities; output practically sold for several years. Box 230, CANADA LUMBERMAN, Toronto.

FOR SALE

Large Tract of Timber

In Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

Nothing has occurred during the past week to weaken the foundation of the lumber market, but on the other hand orders for pine and hemlock are becoming more plentiful and everyone seems satisfied with the conditions and the volume of business. Price lists now being issued show advances in many instances, these being confined chiefly to the lower and upper grades of pine. Common pine remains about stationary. Hemlock, however, is about 50 cents higher than one month ago; 10 and 12 inch, 12 to 16 feet in length, is held at $13.50 at the mills. Mill run tamarac is worth $14 and spruce about $16.

The lath situation is gradually getting stronger. Manufacturers who were recently quoting No. 1 white pine at $3.25 are now asking $3.75. There appears to be a shortage of lath not only in Canada but at nearly all the leading manufacturing centres of the United States, and it is predicted that still higher prices will be seen in the near future.

There is no change in hardwoods excepting that basswood is, if anything, a little weaker and can be bought at the mill as low as $20 for mill run.

QUEBEC AND NEW BRUNSWICK.

The lumber manufacturers at St. John, N.B., are making arrangements to close their mills owing to the shortage of logs. Probably 50,000,000 feet have been hung up, with little likelihood of getting out before next spring. This condition is likely to cause a reduction in logging operations during the coming winter, particularly as the spruce lumber market is still uncertain. Recent developments, however, have been in the direction of an improvement. Inch spruce boards are moving quite actively and the supply at St. John is practically exhausted. The cessation of hostilities between Russia and Japan is likely to benefit the price of spruce deals.

The keenest interest of late has centred in the lath market. The price in New York has reached $4, which is very unusual. St. John manufacturers are getting $2.30, but the indications are that $2.50 will not be considered unreasonably high in the near future. There is also a better tone to New Brunswick cedar shingles, and the standard brands of Extras are moving in satisfactory volume at $3.25 for Boston delivery.

MANITOBA AND BRITISH COLUMBIA.

Lumber is active almost everywhere in the Northwest, but particularly in Winnipeg. There is less complaint of price

cutting than was the case one year ago and profits are better. British Columbia ship-lap is selling readily in Winnipeg at $17 per thousand. Several large sales of birch flooring, 4 to 16 feet lengths, have been made in Winnipeg at $68, with discount of ten per cent. for cash in sixty days. The recent cut in the prices of ship-lap and common lumber made by the British Columbia Coast mills in order to meet the Mountain manufacturers' quotations is having its effect. The Coast lumbermen report a brisk business in this class of material, some of them being already practically cleaned out of the commoner grades. It is also learned that in spite of the slight increase in price, the upper grades are moving satisfactorily and the demand is on the increase.

UNITED STATES.

Wherever lumber shows any change, it is in the direction of higher prices. The conditions are invariably satisfactory. The northern pine trade is of larger volume than one week ago, and this would also apply to southern pine were it not for the scarcity of stock. Lumber is worth about $3 more than a year ago, but buyers still seem eager for the stock, even to the extent of paying from fifty cents to one dollar more than they believe to be the present market price; that is, where the lumber can be obtained, the price is a matter of indifference to certain buyers. There is no evidence of weakness anywhere. A sale of No. 3 white pine, 10 inches wide, was made at Duluth last week at $16.50. At Cleveland prices are higher in accordance with the new list issued last month. Norway piece stuff in No. 2 and 3 boards was advanced from fifty cents to one dollar a thousand, it being the opinion of many persons that there is less norway in the market than at this season for many years. Box lumber is in demand at all the leading manufacturing places. Hemlock continues to make progress. Producers are short of long lengths and prices are likely to be further advanced. No. 2 Pennsylvania stock is selling in Boston at $18.75 and northern as high as $18 in some instances. The volume of the hardwood business is about on a parity with what it has been for the last few weeks, but inquiries are increasing and a larger trade is looked for this month. Oak, ash, birch and beech are strong.

Influenced by the car shortage, red cedar shingles have advanced ten cents per thousand and are showing a much better tone. Wholesale dealers are believed to be in favor of higher prices, as some stocks were bought earlier in the season on the theory that an upward move would be made when the fall activity put in an appearance. Laths are very strong and are quoted as high as $4.50 for No. 1 white pine and $4 for No. 2, Chicago delivery.

GREAT BRITAIN.

If we judge the British lumber market correctly, the holder of Canadian lumber is in a very fortunate position. The general trade of the country is improving and has been helped by the prospects of a good harvest. It is expected that the lumber demand of South Africa will be a little better, while the French buyers are also showing more disposition to operate than they have exhibited since the commencement of the selling season. After a very uncertain period, it is now stated that the White Sea shippers intend to hold for higher figures. Canadian pine is showing more strength, perhaps, than at any previous time this year. Dealers who have stocks are of the opinion that they will be able to realize to good advantage later in the year. The demand for spruce is steadily improving and the best quality is scarce notwithstanding the summer receipts. Bristol Channel importers are reported to have paid £7 5s. c.i.f. for a St. John steamer cargo, while Northwest Coast firms have bought above this figure for a cargo including a considerable percentage of 3 × 11 and 9 inch.

STOCKS AND PRICES.

Prescott Bros. are cutting about 6,000,000 feet of lumber at New Mills, N.B., this season.

The Barquentine Skjold is loading deals at St. John, N.B., for Ireland on account of W. M. Mackay.

The British ship Segura is loading lumber at the Hastings mill, Vancouver, B.C., for Callao. The Barque Don finished loading at the Hastings mill and put to sea last week.

The Long Lumber Company, Hamilton, have secured the order for the timber and lumber required by the Canada Glue Company, Brantford, for their new factory and vat house there. The order was for something over 100,000 feet.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N. B., August 31st, 1905.—The log situation on the St. John river is unchanged; the manufacturers have accepted the inevitable and the manufacturing season of 1905 is to be without doubt the shortest in many years. The middle of September will find all the mills at this port and along the river, with one or possibly two exceptions, shut down for a period that will depend entirely upon the weather conditions of the next two months at the head waters of the St. John. It is generally felt, however, that the season is practically at an end so far as sawing lumber at this port is concerned.

A feature of the trade at this date is the brisk demand for spruce lath. Values in this line are stronger than was the case a month ago and show a tendency toward a higher level in the near future. Shipments during the last two months have more than equalled the quantities sawn and consequently stocks are light; 3,000,000 would cover all available and this amount is divided among half a dozen dealers. In view of the early cessation of sawing, the probabilities are there will be no lath whatever on the local market after October 1st.

At present no quotation could be obtained on spruce slab lath lower than $2.25 (f.o.b. schr. St. John) for non-dutiable and $2.30 for dutiable.

The demand for the higher grades of cedar shingles, after the slight drop in price mentioned a month ago, is steady and the volume of business is about as usual at this season of the year, although it is unlikely that the higher prices of the early summer will be prevalent again in the near future. In the lower grades trade is slack both locally and for shipment. Local dealers depend chiefly upon the provincial trade to dispose of these lower grades and this season has been characterized by sluggishness and rather lower prices than usual. At this date the total stocks of cedar shingles would amount to in the vicinity of 2,000,000 of Extras and Clears and 2,500,000 of the lower grades. Prices on dutiable cedar shingles are quoted at this date (f.o.b. schooner St. John) at: Extras, $2.60; Clears, $2.10; 2nd Clears, $1.70; No. 1's, 90 cents.

One inch spruce boards are being disposed of much more rapidly than they are being manufactured and the large stocks which, owing to the depression that existed during the several months previous, were to be found at the beginning of the season upon almost every wharf in this vicinity, have been depleted until 900,000 ft. would cover all available at this date.

Prices now being quoted range from $10.00 to $10.50 per M sup. feet for dutiable and $12.00 to $12.50 for non-dutiable, f. o. b. schooner St. John.

Freight rates to New York city are quoted at $3.50 on long lumber and to Boston at $3.00, with charters not plentiful and the prospect that if a change takes place in the near future it will be to a higher figure.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

TIMBER LIMITS WITHDRAWN.

At the Board of Trade Building, Toronto, on August 31st, Mr. Peter Ryan offered at auction the sawmills of Tanner Brothers, at Sturgeon Bay, near Waubaushene, together with logs already at the mills amounting to about 6,750,000 feet of white pine, and the timber limits on berths 60, 61, and 119, in Algoma, and two-thirds of berth 110, in the Township of McKinnon, Algoma. A number of prominent lumbermen were present, but they did not seem to covet the property, for only three offers were made. The bidding started at $175,000 and ended at $200,000, at which price the property was withdrawn.

ABOUT MANITOBA AND THE TERRITORIES.

(Special Correspondence.)

Mr. McDonald says that in his travels of Quebec and the Georgian Bay District he saw no spruce to equal the spruce in the Saskatchewan Valley. The spruce is larger in diameter and length than the Eastern spruce. This is the black variety, whereas the Eastern is the white species. The best timber, he says, is found by the Pasqua and the Porpoquine Hills. This district is drained by the Etiomami, Red Deer and Little Swan rivers. The first named is very prolific in poplar. The Saskatchewan Lumber Company have a mill at Crooked River, N.W.T. The Red Deer Lumber Company's plant is at Red Deer Lake, Sask. The Northern Lumber Company have mills at Pine River and Grandview, Man. The Swan River Lumber Company have their mills situated at Fishers Siding, Man. Mr. McDonald states that there is no other timber there except a small percentage of tamarac. In his opinion there will be a great demand for poplar for interior finish, and he thinks it is equal in such cases to basswood.

One of the Northwest limits now on the market is situated in the district of Saskatchewan and tributary to the Red Deer and Canadian Northern Railway. It comprises 156 square miles selected in seven blocks, and, according to a Winnipeg estimator, will yield about five hundred million feet. It is held under license from the Crown, having an annual ground rent of $5.00 per square mile and Crown dues of fifty cents per thousand—to be paid as the lumber is manufactured. The spruce is of excellent quality, some trees running over thirty inches in diameter. An expert who has been over the Northwest Territories considerably says that west of Lake Winnipegosis there is larger spruce than he ever saw anywhere except in British Columbia. The land is level and the timber close to water. Another limit of forty square miles is also on the market. It is estimated to yield eighty million feet of spruce and tamarac of good quality. Logs can be floated from this berth by the Assiniboine River to Kamsack on the Canadian Northern Railway.

Sixty square miles of a timber berth on the shores of Cedar Lake, Sask., together with a number of islands having an area of about thirty-five square miles, is now under option and estimators are out looking over it. It has been estimated to produce about five hundred million feet. The production of this berth can be taken by water to Winnipeg at a small cost.

Mr. S. Ashfield, of the Northwest Lumber Company, Winnipeg, has just returned from a very extensive trip throughout the Territories. He reports business as being splendid in the new districts but quieter in the older localities. He booked orders for over one hundred cars. To reach the new settlements in the Saskatchewan Valley he rode from Prince Albert to Lloydminster in a buckboard. He also travelled from Battleford to Saskatoon calling at the various settlements and driving over the country through the immense wheat fields, which he says are simply magnificent. The Canadian Northern Railway are acting very generously to the settlers in helping them out by running their lumber in on their construction trains. A good many of the farmers are short of binders and binder twine and stand to lose a considerable portion of the wonderful harvest. North Battleford and Lloydminster are both growing very fast, but the latter place is retarded in its building operations by the fact that the C.N.R. holds alternate lots right in the townsite, and as the railway runs down the main street, every other lot is held up, whereas the merchants are very desirous to build blocks but cannot do so owing to the fact that the C.N.R. is holding on to the lots and refusing to sell. Lloydminster is divided by the Meridian passing along the main street. One half the town is in Alberta and the other half in Saskatchewan. There is already a faction fight on, the post office being stolen in the night time and carried from the Saskatchewan to the Alberta side, as the residents in that part of the town thought they would lose the name "Lloydminster" unless they held down the post office.

Mr. C. Bayly, Winnipeg, travelling representative for several B.C. lumber concerns, has just returned from a trip throughout Manitoba and the Territories. He was up as far as Edmonton and Prince Albert. He reports business very quiet at present, everyone seeming to wait for the crop to be marketed. He says the crops all over are magnificent. The shingle market is firm. The Mountain mill men have again made a cut of a dollar under the Coast mills for rough stuff and the latter are to meet them. Mr. Bayly intends to go out on the road steadily until the first of November.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., August 28th, 1905. —Business in connection with the lumber industry is continuing fairly good, without any marked features. The reduction in prices inaugurated by the Coast mills a few weeks ago is still maintained, but is not the cause of any particular increase in orders. The plan of securing compensation for the loss in lower figures by raising the prices of higher grades is not working to disatvantage as yet. In fact, as one of the lumbermen stated yesterday, it would be better if the same diffirence between the price of rough lumber and that of the better qualities prevailed, as more rough lumber was sold. This is the kind that is largely imported from the States and the grade that is always in the hands of the manufacturer the longest.

The supply of logs is good, but the demand only fair. There is little or no demand for cedar. Fir and spruce booms are coming in in good numbers, and are disposed of without considerable delay. Prices have not been altered during the last two weeks.

The export trade is not marked by any feature worthy of note. One or two charters have been reported in addition to vessels now loading at the Hastings mills and at Chemainus. The business is fair but by no means brisk. There is a story to the effect that the Ludgates are arranging for the establishment of a mill on English Bay exclusively for the export trade, but no confirmation is obtainable. There is a likelihood of truth in it, as a large number of Americans are preparing for the future demand by erecting mills on convenient coast waters.

The assignment of Mr. A. Haslam, of Nanaimo, is the largest failure in the lumber industry reported for a long period. The liabilities are expected to exceed $150,000, which includes about $42,000 for wages. The trouble is said to have been the disastrous fire which completely destroyed the plant about two years ago. Mr Haslam is one of the pioneers of the lumber business in British Columbia, and when fire had crippled him he had succeeded by steady energetic effort in creating a large business. He is one of the prominent citizens on the coast, having represented Nanaimo in the Dominion Parliament and was also Mayor of Nanaimo.

Reports from the Interior are that good trade is being enjoyed by the millmen, though an increase is looked for when the wheat crop in the Northwest is thoroughly assured as safe. Forest fires have done a large amount of damage, principally in standing timber. The Elk Lumber and Manufacturing Company, of Fernie, had several thousand feet of cut logs destroyed.

NEW RATE ON CEDAR.

VANCOUVER, B. C., Aug. 31. — The British Columbia Lumber & Shingle Manufacturers Association have reached an agreement with the C. P. R. regarding freight rates, after three day's consultation. The fir rate of forty cents has been granted to Winnipeg for common cedar, such as rough cedar boards, shiplap and dimension lumber. Clear cedar remains the same, fifty cents.

Mixed cedar and fir lumber and mixed shingle and lumber cars will be permitted.

Lumber

We have about two million feet of this season's cut for sale—about 75 per cent. White Pine, balance Norway and Spruce. Address

ERRINGTON & ROSS,
Turbine, Ont.

Sale of Burnt Timber

A quantity of pine timber on what is known as Berth B.1, containing 21 square miles more or less, situated South of Woman River Station on the Canadian Pacific Railway 120 miles west of Sudbury, in the district of Algoma, having been damaged by fire, the undersigned hereby calls for tenders for the right to cut same.

Tenders will be received up to and including the 30th day of September next, and must state the rate per thousand feet board measure, including dues, which the tenderer is prepared to pay for the timber, or per thousand feet cubic for whatever proportion of it may be manufactured into waney or square timber, including dues. The timber to be cut during the present winter. Tenders to be accompanied by a marked cheque for $500.00 payable to the Honourable the Treasurer of Ontario. The timber to be sold subject to the Crown Timber Regulations except where varied by the conditions of this sale. The party awarded the right to cut will be required to give a bond with satisfactory sureties for the payment of the price and the due performance of all terms and conditions required by this Department.

The Department does not bind itself to accept the highest or any tender.

Tenders to be marked "Tenders for Burnt Timber," and addressed to the Honourable the Minister of Lands and Mines, Toronto.

F. COCHRANE,
Minister of Lands and Mines.

Department of Lands and Mines,
Woods and Forests Branch,
Toronto, 21st of August, 1905.

N.B.—No unauthorized publication of this Notice will be paid for.

Full Second Hand Outfit for Circular Mill. THE ONTARIO LUMBER COMPANY, LIMITED, Toronto, Ont.

TIMBER LIMIT FOR SALE

SPLENDID CEDAR AND HARDWOOD Timber Limit, up-to-date mill with gunshot feed, trimmers and other full equipment; sufficient timber to run 10 years; mill now in full operation, located on Georgian Bay; good shipping facilities; output practically sold for several years. Box 230, CANADA LUMBERMAN, Toronto.

FOR SALE

Large Tract of Timber

In Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

TIMBER LIMIT TRANSACTIONS.

W. S. Gore, Deputy Commissioner of Lands and Works, Victoria, B.C., will receive tenders up to September 27th for a lease of a timber limit situated in the vicinity of Northwest Bay, known as Lots 2,211, 2,212 and 2,213, New Westminster district, containing in the aggregate 1,928 acres.

CURRENT TRADE CONDITIONS.

ONTARIO.

The first two weeks of September have witnessed an active movement of lumber. The building requirement is still very large, the fine weather being favorable for outdoor operations. The good end of pine is showing more strength than at any previous time this year, a condition which, in view of the dullness of the British market, is regarded as encouraging. Stocks at the mills are sold up closely and the sawing season will end earlier than usual as a result of the log shortage. There does not seem to be one unfavorable feature which is likely to impair the strength of the market. Hardwoods could easily be more active, but this, in view of the prosperity which characterizes other branches of the trade, is almost certain to come in time. The importation of southern lumber has fallen off on account of its advance and the few dealers who have any stocks are holding prices very firm.

There is still a pronounced demand for white pine lath, which may be attributed in part to the extensive building operations. The present price of $3.75 for No. 1 may seem high, but it is 75 cents less than the price recently decided upon by the manufacturers in the Lake Superior district.

QUEBEC AND NEW BRUNSWICK.

Notwithstanding the labor troubles, building permits were issued in Montreal during the month of August to the value of $607,265, this being a gain of $136,401 over the corresponding month in 1904. There has accordingly been a good local demand for lumber at steady prices. The export trade, however, shows a falling off, which is very noticeable in respect to white pine timber. Shipments from Quebec this year have been 1,076,000 cubic feet, as compared with 1,738,880 feet in 1904. Practically no oak has been exported, while last year 235,520 cubic feet had been shipped by this time. Elm and birch, on the other hand, show a considerable increase over last year.

New Brunswick cedar shingles are showing more activity. The average price for Extras for Boston delivery is probably $3.25, although a few sales of well-known makes are reported to have been made at ten cents above this price.

UNITED STATES.

Taking the lumber trade as a whole, it is doubtful if conditions were ever better. In the activity of white pine, southern pine, hemlock and spruce, there is little difference, all being in exceptionally good demand. The East is buying white pine in

considerable quantities, as the prevailing tendency of prices is distinctly upward and there is little likelihood of prospective buyers being able to purchase lumber at lower prices this year. Although pine has been received in large lots at Buffalo and Tonawanda, the demand has been so great that the yards have not filled up very much. Some of the Lake Superior manufacturers are making sales at one dollar above the list price. The market for spruce is as firm as ever. Orders are being placed at the recent advance shown in our price list, with indications of a steady trade until well into the winter. Hemlock is being bought as a substitute for white pine, the low price being an inducement to use it and keep it in stock. Pennsylvania producers have made another advance in the base price of 50 cents per thousand, while long lengths have been marked up $1 to $1.50.

Shingles generally are firmer and dealers report a steady gain in the movement. As forecasted in a recent issue, white pine lath are still soaring upwards. By recommendation of the price list committee of the Mississippi Valley Lumbermen's Association, prices have been advanced another 25 cents. This brings No. 1 white pine lath up to $4.50 a thousand, mixed to $4, and No. 2 to $3.50.

GREAT BRITAIN.

Many opinions have been expressed regarding the effect on the lumber trade of Great Britain of the cessation of the Eastern war. It was pointed out that as long as the war continued it was not likely that exporters would depart from the cautious attitude they had adopted, as the possibilities of other nations becoming involved in the struggle were by no means remote. The war was also said to be responsible for forced sales by Russian shippers. These factors will now be removed and should cause a better feeling in the lumber trade, but it is a generally accepted view that the basis for a sustained improvement must be found in local conditions. When house building becomes more active, the joiners' strike at Glasgow is settled, and a few other obstacles removed, then the lumber market is likely to give a better account of itself. Some improvement is expected during the next three months, but whether it will be of a permanent character will depend largely upon the developments in the direction mentioned. There is no doubt that importers are recognizing the fact that stocks of Canadian pine and spruce deals are low for this season of the year and that they are not likely to be greatly increased. The Timber Trades Journal reports the sale of a cargo of spruce from St. John, N.B., containing only 72 per cent. of 3 × 11, at £7 5s. c.i.f. Liverpool. At a recent public sale at London a quantity of 3 × 11 inch third quality Quebec pine, 13 feet long, sold at £12 per standard of 1,980 feet, and some first quality Three Rivers pine at £9 10s.

STOCKS AND PRICES.

George Gordon & Company, Cache Bay, Ont., are reported to have purchased the timber on the limits belonging to the estate of the late Thomas Mackie, of Pembroke, Ont., estimated at 105,000,000 feet. The price is said to be in the neighborhood of $500,000 and the logs are to be cut and delivered within seven years.

Following is a comparative statement of timber, etc., measured and culled at Quebec up to September 5th, as reported by the Supervisor of Cullers:—

	1903	1904	1905
Waney White Pine	1,420,040	1,738,880	1,076,000
White Pine	318,920	188,640	133,520
Red Pine	52,560	10,080	1,200
Oak	772,960	235,520	22,280
Elm	407,800	254,120	479,440
Ash	54,320	14,640	9,960
Basswood	160		
Butternut		40	120
Tamarac	140		
Birch and Maple	196,640	114,680	207,640

It is learned from Messrs. S.P. Musson, Son & Company, Barbados, that the only recent transaction in white pine and spruce was the sale of the cargo of the "Annie Smith" from Dalhousie, N.B., consisting of 56,000 feet of white pine boards, 21,000 feet of white pine plank and 22,000 feet of spruce boards, which brought $16.60, $13 and $15.05 respectively. Dealers are fairly well stocked with white pine, and as usual there is only a limited demand for spruce at this time of the year. There have been no recent arrivals of Long Cedar shingles, but the "Annie Smith" brought 1,400,000 extra No. 1 Laying and 50,000 Clear Whites, which were sold at $1.85 and $2.50 respectively. The market is heavily overstocked with the former grade.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, September 5, 1905.—The tone of the market has shown a slight improvement very recently from that of the past three months. However, the change that is looked for before the close of navigation will be of more importance regarding the amount of stock expected to be moved. The English market no doubt has had a very quieting effect on our market here. Taking the strikes and holidays also into consideration, it could hardly be expected that there would be much doing. Now that the holiday season is over and many of the strikes which have been on are being called off, and the English market sees that they have to pay a reasonable price for their stock or do without, we are bound to see better times in the near future.

During the past fortnight, the domestic trade has been looking up and the consumption in this direction can be considered fairly good. Large stocks of white pine and spruce are beginning to move, the greater bulk going to the American market.

Laths and shingles are exceedingly brisk, many of the Ottawa firms having contracted their entire output, chiefly for American shipment.

During the recent depression, the inquiries for white pine have been mostly for the lower ends of the stocks, but recently they have turned to the better grades, and good sidings and strips have been purchased freely in fairly large quantities, the prices ruling high.

Regarding the hardwood trade of this Valley, basswood and elm are moving somewhat better than earlier in the season, and considering the amount of stock now at the mills in these lines, an advance in price may be looked for at an early date. Birch and ash continue to be freely inquired after and as stocks are very low in these lines, principally in ash, there may be an advance looked for in price.

The shipments to the English market from this district are very limited, the inducement from the other side being hardly sufficient to awaken any interest in that market; however, in the face of this, many authorities predict that there will be quite an improvement before the close of navigation.

Some of the firms are now beginning to operate up river, but find that men are very scarce. It is altogether likely that the cutting will not be heavy until after the harvest, when men will be more plentiful. Wages are running between $28 and $30 for good log cutters.

FIRES.

Blue & Deschamps, saw mill owners, Rossland, B. C., recently suffered loss by fire.

It is estimated that 32,000,000 feet of timber was burned by a forest fire which swept the country north of Rossland, B.C.

The Elk Lumber & Manufacturing Company's saw mill at Fernie, B. C., was destroyed by fire on September 7th. The estimated loss is $100,000, of which more than half is understood to be covered by insurance. The mill was equipped with modern machinery. The origin of the fire is unknown. This company have been unfortunate of late, as a large number of logs were recently burned by a forest fire.

THE GLASGOW MARKET.

The following comment on the Glasgow market is extracted from Edmiston & Mitchells' monthly timber circular:

WHITE PINE.—The import consists of 1500 loads of waney and 350 loads square pine. The demand has been rather better during the month, there having been several fairly good lines placed direct to consumers. Prices are fairly steady, and stocks, while increasing, are not excessive.

OAK.—The import during the month consists of 1100 loads. One or two large enquiries are now pending for large squared Quebec oak, which will considerably reduce the stock of this class. States oak is still plentiful and is moving off slowly.

ELM.—There has been an import of about 900 loads, and the stock, while accumulating, is quite moderate. There has been rather a lull in enquiries during the month, though there have been a few small sales at full prices.

QUEBEC BIRCH.—The import of logs has not been large during August, and it is just as well that this is so, as the import has been rather overdone this summer, and prices are considerably weaker than when the season opened. Of planks, there was an import of about 140 standards, which were disposed of from the ship's side.

ASH.—The import for August is the largest for some time past, and amounted to 280 logs. The most of these were old and inferior, and the bulk found its way into store, consequently. Values are

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

DEALS, &C.—There has been a considerable import during the month, and prices have, in several cases, been shaded to effect sales "ex quay" and save storage charges. Stocks of most qualities and sizes, though not heavy, are quite ample for prospective requirements. Current values are as under:

Broad First Pine Deals—£33 to £35; 11-inch, £30 to £32; ends and non-dimensions, £23 to £25.

Second Pine Deals—11-inch and up, £18 to £20; ends and non-dimensions, £13 to £14 10s.

Third Pine Deals—11-inch and up, £11 10s to £14; ends and non-dimnesions, £9 10s to £10 10s.

Red Pine Deals—9 and 11-inch, £9 to £10; narrows, £7 to £8.

First Pine Sidings and Strips—9 to 10 inch, £23 to £24; 11 to 12 inch, £25 to £26; 13 to 14 inch, £27 to £28.

Spruce Deals—9-inch and up, £8 to £8 15s; 7 and 8 inch, £7 5s £7 10s.

New Brunswick Pine and Spruce—9 inch and up, £7 15s to £8 5s; 7 and 8 inch, £7 to £7 5s.

Fox, Allan & Company, lumber and general store, Hawkshaw, N. B., have assigned.

The James Drake Lumber Company, of Bad Throat Lake, Winnipeg, is announced to have assigned.

The rate of stumpage on the New Brunswick Railway Company's land will not be changed this year. This was decided at the annual meeting of the company held recently.

According to recent advices from British Columbia, the Government has taken action regarding the export to Puget Sound of timber cut from provincial lands by seizing, on Jervis Inlet, a boom of logs belonging to J. S. Emerson. Mr. Emerson is closing down all his northern hand-logging camps and paying his men off. He will later on open two camps on Crown granted lands which he possesses, and will export timber cut from them.

The failure of Andrew Haslam, saw mill owner, of Nainamo, B.C., is one of the most important which has occurred in British Columbia for some years. Mr. Haslam assigned his saw mill, sash and door factory and timber limits to A. E. Lees of Vancouver, a former partner; Wm. Manson, of Nanaimo, accountant, and Perry D. Roe, manager of the Canadian Pacific Lumber Company, Port Moody. The liabilities are approximately $150,000, and as assets there are besides the mill and a sash and door factory, 13,000 acres of timber limits at Jervis Inlet, Elk Bay, north of Seymour Norrows, and at Theodosia Arm. These limits have something like eighteen years yet to run and included in the liabilities are arrears of stumpage and dues to the Government amounting, it is said, to $12,000. In the amounts are also included a very large amount for wages, some ranging back a long period, in all reported to be $42,000. Recently a number of workmen entered a lien under the Woodmen's Act, for wages which will give them, since the new law came into force, three months' wages. Mr. Haslam is one of the pioneers of the country and enjoys a reputation for strict integrity. The business he has just assigned dates back to Hudson's Bay days in Nanaimo, and was acquired from the company by one Carpenter. Mr. Haslam was pretty badly crippled in his financing two years ago, when his mill was destroyed by fire just after he had arranged to extend his trade with the Northwest.

Sale of Burnt Timber

A quantity of pine timber on what is known as Berth B.1, containing 21 square miles more or less, situated South of Woman River Station on the Canadian Pacific Railway 120 miles west of Sudbury, in the district of Algoma, having been damaged by fire, the undersigned hereby calls for tenders for the right to cut same.

Tenders will be received up to and including the 30th day of September next, and must state the rate per thousand feet board measure, including dues, which the tenderer is prepared to pay for the timber, or per thousand feet cubic for whatever proportion of it may be manufactured into waney or square timber, including dues. The timber to be cut during the present winter. Tenders to be accompanied by a marked cheque for $500.00 payable to the Honourable the Treasurer of Ontario. The timber to be sold subject to the Crown Timber Regulations except where varied by the conditions of this sale. The party awarded the right to cut will be required to give a bond with satisfactory sureties for the payment of the price and the due performance of all terms and conditions required by this Department.

The Department does not bind itself to accept the highest or any tender.

Tenders to be marked "Tenders for Burnt Timber," and addressed to the Honourable the Minister of Lands and Mines, Toronto.

F. COCHRANE,
Minister of Lands and Mines.

Department of Lands and Mines,
Woods and Forests Branch,
Toronto, 21st of August, 1905.

N.B.—No unauthorized publication of this Notice will be paid for.

WANTED.

in S. E British Columbia, estimated to contain 500 million feet, on a good river. Will be sold at a low price if disposed of quickly—one-third cash, balance on time. For details apply to Box 308 CANADA LUMBERMAN, Toronto.

FOR SALE AT A BARGAIN—NO. 3 HAMILTON Carriage Steam Feed, 7½" cylinders and all connections, circular outfit complete with iron husk, mandril, etc. Two boilers 22 feet long, 4 feet in diameter, six boilers 20 feet long and 4 feet in diameter, two 14" flues in each. Full Second Hand Outfit for Circular Mill. THE ONTARIO LUMBER COMPANY, LIMITED, Toronto, Ont.

TIMBER LIMIT FOR SALE

SPLENDID CEDAR AND HARDWOOD Timber Limit, up-to-date mill with gunshot feed, trimmers and other full equipment; sufficient timber to run 10 years; mill now in full operation, located on Georgian Bay; good shipping facilities; output practically sold for several years. Box 230, CANADA LUMBERMAN, Toronto.

FOR SALE

Large Tract of Timber

In Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

FOUR HUNDRED THOUSAND FEET narrow pine lumber for sale. Apply to D. CLARK, Powassan.

FOR SALE
TIMBER AND SAW MILLS

900 MILLION FEET OF STANDING TIMBER, the last available big blocks in Eastern British Columbia, with convenient transportation to North West Territories. Prices from 20c. per thousand feet up; finest kind of Larch, White and Yellow Pine, Spruce, Fir, Cedar. Also two Saw Mills, going concerns, one of which is making a net profit of $2,000 per month. A party with $25,000 can secure the latter. For full particulars apply WATTS & Co., Wattsburg, British Columbia.

CURRENT TRADE CONDITIONS.

ONTARIO.

Orders for pine and hemlock lumber are on the increase and before the close of the building season the supply of dry stock promises to be reduced to a very low point. Both manufacturers and dealers express complete satisfaction with the situation, which seems to be steadily growing stronger. That prices could be further advanced is generally admitted, but it is considered the part of wisdom to discourage undue inflation which might later on restrict the consumption. Retail dealers in Toronto are finding their facilities taxed to the utmost to supply the demand for building lumber, and no change is looked for in the near future. The first fall of snow is likely to mark the cessation of work, although some falling off in activity may naturally be expected before that time.

In the hardwoods we cannot report any improvement. The weakest feature is basswood, for which the market is very limited. Prices are this week marked down one dollar. Holders of stock are probably asking more than our quotations, but practically no sales are being made at the higher prices. Basswood at current values is cheap and some recovery would seem to be in order. Whether this will take place before next spring is uncertain, but we do not think it can be delayed beyond that time unless operators should, unwisely, take out a large stock of logs the coming winter.

QUEBEC AND NEW BRUNSWICK.

The strike of carpenters which was inaugurated in Montreal in the Spring was terminated last week. This should have a beneficial effect upon building operations. Lumber continues to be consumed in large quantities. The situation in the Maritime Provinces has not improved to any extent in respect to the log supply. It was thought that the recent rains would bring out about 15,000,000 feet of logs stranded in the St. John river between Grand Falls and

Fredericton, but the latest reports are to the effect that the river has risen only a few inches and that prospects for moving the logs are not bright. Spruce lumber is firmer in price on account of the cessation of sawing operations by the mills. There is an exceptional demand for spruce throughout the New England States, whereas the supply of American stock at St. John is said to be less than 3,000,000 superficial feet. British specifications are not much in demand, but the tendency of prices is to harden. New Brunswick cedar shingles are stronger under the stimulus of an increased movement. Shippers are now asking $3.35 for Extras for Boston delivery and $2.95 for Clears. The supply of both these grades is light, while a number of the mills are shutting down for the winter.

MANITOBA AND BRITISH COLUMBIA.

The harvest of the Canadian Northwest has mostly been garnered, and an estimate of an official of the Northwest Grain Dealers' Association places the total production at 91,000,000 bushels of wheat and 67,000,000 bushels of oats. This assures the prosperity of the Northwest for another year at least. As the grain is marketed the lumber demand will expand. This, coupled with the building of the Grand Trunk Pacific Railway and the construction of over two hundred miles of new track by the C.P.R., means a period of great activity for the lumber trade. The demand should be sufficient to keep all the Canadian mills busy, but apparently the growth of the western market has invited increased competition, the Great Northern Railway having reduced its freight rates to permit of the Washington mills getting a share of the trade.

The local demand for lumber in British Columbia is very good and most of the mills are busy. Building at Vancouver is active. Shingles are moving moderately at the prices adopted a short time ago.

UNITED STATES.

The strong position of the United States lumber market may justly be attributed in part to the extensive building operations. Twenty-seven of the leading cities show an increase in building for August of 2,628 buildings and $17,109,988 in cost, or 48 per cent. over the same month a year ago. During the month permits were taken out for buildings aggregating $52,320,811. All kinds of lumber are firm, but yellow pine is showing exceptional strength, notwithstanding that it has advanced about 25 per cent, since a year ago. Wholesale dealers at Buffalo and Tonawanda are endeavoring to advance the price of white pine gradually till it is on a par with what has to be paid for it at the mills. Cutting-up stock is said to be getting in light supply. The demand for spruce lumber is buoyant. Mills are refusing orders and the basis of $22 for 9 inches and $24 for stock over 9 inches is regarded as purely nominal, as shippers are getting higher prices. The prediction is made that wide cargoes, which are selling in New York at $28, will reach $30 before the winter. The hardwoods are showing more life. Maple has advanced to $22, 16 and $9 in the rough at lake ports, while Western maple flooring has been advanced $1.50 per thousand to a basis of $39 for clear at New York points. The demand for birch and ash is good, but the supply is plentiful.

Lath prices are still climbing and are now probably the highest ever reached. No. 1 white pine lath is quoted at $5 for Chicago delivery; hemlock, $4; norway, $4.50; basswood, $4 .It is said that stocks of all kinds of lath are not over 50 per cent. of what they were at this time last year. Spruce lath was selling in New York one month ago at $3.75, while to-day the market is quoted at a range of $4 to $4.52.

GREAT BRITAIN.

Prices of timber and lumber in the British market continue steady, with but very slight indication to advance even in the face of the strong statistical position. Spruce has hardened slightly, as previously reported, and bids fair to seek a higher level before many weeks, but there seems to be an entire lack of that speculation which gives life to the market. Liverpool has this year received more lumber, comparatively speaking, than London, but stocks at both of these important centres are lower than a year ago. What is classed as prepared boards showed a stock at London on August 31st of 7,045,000 pieces, but all other classes of lumber were in lighter supply. The import of pine deals from the St. Lawrence has been only 375,000 pieces, whereas for the same period last year 578,000 pieces had been received. London had received, up to August 31st, 1,374,000 pieces of spruce deals, as compared with 1,638,000 pieces last year. The Liverpool import of pine deals is given as approximately 21,000,000 feet, as against 26,000,000 feet in 1904. The importation of birch planks has been very heavy and it is likely to be found difficult to maintain prices.

A. A. Tuthill's large sash and door factory at Moncton, N.B., was burned last week.

The sash and door factory of Gignac & Beland, Quebec, was partially destroyed by fire last week, the loss being $2,500.

STOCKS AND PRICES.

The Charlton Sawmill Company, Collingwood, Ont., last week received another raft of logs, containing 45,000 pieces, or upwards of 2,000,000 feet.

The Canadian Timber and Sawmills, Limited, Trout Lake City, B. C., have started up their planer for the purpose of planing 300,000 feet of lumber that has already been sawed. As soon as this lumber is planed it will be marketed. The Company are also figuring on cutting up the 4,000,000 feet of logs which they have in their booms in Trout Lake, and it is very probable that they will carry on operations continuously. In their timber limits are some large tracts of as fine cedar as can be found in the interior of the province. Cedar commands a good price, and the cedar limits are among the most valuable assets of the Company.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.

ST. JOHN, N.B., Sept. 16th, 1905.—Since last writing there have been some heavy rains along the St. John river, but, as reports from the up-river districts are meagre and contradictory, it cannot be learned at this date whether or not there has been a sufficient rise of water to bring out any important quantity of logs. The feeling in manufacturing circles in regard to the matter is of a decidedly pessimistic nature and the opinion is freely expressed that there will be no general resumption of sawing until the first of the spring drives are rafted and have reached St. John, which will mean the first of June next.

The end of next week will see all the local mills closed down with the exception of two, which two are the property of one firm who have sufficient logs available to keep them in cut for the balance of the season.

Estimates place the quantity of logs hung up at 75,000,000 feet, probably two-thirds of which are in the main St. John above Grand Falls. This quantity embraces the much greater part of the logs got out last winter and also a large quantity of those of the year before.

One important effect of this general hang-up will be curtailment in the gross volume of logging contracts made this Fall. Already lower prices and smaller operations are being talked of, particularly in regard to provincial stock. This curtailment is quite natural when it is considered that most of the mill-owners of the St. John river and city districts have enough logs hung up to keep their mills in cut for the whole of an ordinary manufacturing season and some have even more than would be required for that purpose.

The American long lumber market continues in the prosperous condition described last month and with no indication of weakness; rather the manner in which the receipts are taken care of lead to the conclusion that any change would be in the way of higher prices. At present there is no important quantity in this line enroute from this port and local stocks are light; 2,250,000 superficial feet would easily cover all available at this date.

Barring a slim possibility of the log drives reaching the booms during the next two months, all the indications lead to the belief that the quantity mentioned will be about all the American lumber to be marketed this year from this direction.

Local prices ars fully as strong as has been the case during the last month and no anxiety to sell is apparent. No lower quotation in this line could be obtained just now than (on a specification of say a twenty foot average length): 10's and 12's, $19 to $19.50; 9's, $17; narrows, $14; scantling, $12.

Freight rates to New York City on long lumber are still quoted at $3.50.

Conditions in the New Brunswick wood goods trade in the English markets have shown little change, although locally there seems to be a feeling of optimism and a belief that the near future will bring prices more favorable to the seller than those now prevalent. While the fact that there has been no change in prices is admitted, it is claimed the demand is stronger, and, since the cessation of the

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

war in the east, a better tone is apparent. Perhaps the most potent factor in this better feeling is the fact that stocks of New Brunswick spruce in the principal distributing centres of the United Kingdom are much lighter than has been the case for several years at this particular season. Prices mentioned last month will still apply, viz., $11.75 to $12.25 per M. sup. ft. on a specification containing say 50 per cent 7's and 8's, 35 per cent 9's and 15 per cent 11's and up, ⅔'s price for fourths and ends, f. o. b. steamer St. John.

Since last writing freight rates to the United Kingdom have shown a considerable advance. Charters have been made at forty shillings to the West Coast, and the opinion of most of those interested is that a further advance is no unlikely.

MEETING OF HASLAM CREDITORS.

A meeting of the creditors of A. Haslam was held at Nanaimo, B.C., on September 12th. W. Manson was elected chairman and William Leighton secretary; and Mr. C. A. Crosbie, supervisor for the Royal Bank, E. Quennell, Nanaimo, and R. Hamilton, of the Wm. Hamilton Manufacturing Company, were appointed inspectors. The meeting then endorsed the appointment of the assignees. A statement of the assets and liabilities was presented, showing the liabilities to be nearly $183,000 and assets nearly $46,000, consisting of book debts, logs, real estate, machinery at camp, trade paper discounted and the steamer Alert, all of which is secured to certain creditors by mortgage or lien. The rest of the property, not valued, includes the sash and door factory and sawmill, with all appurtenances, logging camp outfits and 12,947 acres of timber limits, leased, with a term of eighteen years yet to run. This land is estimated to yield 100,000,000 feet of cedar, 225,000,000 feet of fir and 8,000,000 feet of hemlock.

In explaining his position, Mr. Haslam said his losses were made up chiefly of the following items: Loss on logging camp by defective machinery, etc., $30,000; loss on the Jervis Inlet claim, on which he had spent $5,000, and on suit in which he was decided not to be the owner and in which judgment was given for $10,000, $15,000; real estate losses, $23,500; loss on running the old mill while trying to secure a site for a new one, $27,000; interest on borrowed money, $15,000. These, with other losses, figured up a total of about $183,000. He regretted very much the necessity for making the assignment, but these heavy losses left him no alternative, and after considering matters carefully he had concluded that with assistance he would make the following offer: To pay preferred claims and three months' wages in full, and give thirty cents on the dollar to the rest of the creditors within ninety days.

This proposal was discussed for some time, during which it appeared that the Royal Bank of Canada was secured by a mortgage in its claim of $35,000. Finally a motion was passed accepting Mr. Haslam's proposal provided he could get the consent of all creditors by signature to such proposal. The meeting then adjourned.

TIMBER LIMIT TRANSACTIONS.

W. S. Gore, Deputy Commissioner of Lands and Works, Victoria, B. C., is asking for tenders up to October 11th for a lease, under the provisions of section 42 of the "Land Act," for the purpose of cutting timber therefrom, of a timber limit situated in the vicinity of Knight's Inlet, known as Lots 347a and 348a, Group 1, New Westminster District, containing in the aggregate 2,220 acres.

MAPLE LUMBER.

All the good inch maple in the north country, says the Hardwood Record, Chicago, is pretty well sold, up to medium dry stock. The Michigan Maple Company, which controls a large portion of the output of hard maple, has recently advanced the price on all thicknesses of No. 1 and 2 common $1. This action really shows little advance in general maple values, but the change was made to equalize the manifest discrepancy between the price of No. 3—which under National rules is only required to cut twenty-five per cent., and which has found a ready sale at $8 for some time—and No. 2, which needs must show fifty per cent cutting and which heretofore has been listed at $9 at common Michigan producing points. The present Michigan list on hard maple is $22 for firsts and seconds, $16 for No. 1 common and $10 for No. 2 common. There is not very much thick maple in first hands, the larger portion of it having met an advance sale mainly with Chicago jobbing houses. The trade in this stock running in five, six, eight, ten, twelve, fourteen and sixteen quarter has been a little slow during the past sixty days, but now there is every indication of a marked improvement in the demand. The holders of this class of stock will unquestionably reap a very handsome profit from their spring purchases. The immense sale of inch maple during the season is largely traceable to the extraordinary demand that has prevailed for maple flooring.

CUT IN LUMBER RATES.

On September 18 the Great Northern Railway made a cut on lumber and shingles into points in the Canadian Northwest. The new rates are forty and fifty cents per hundred pounds on lumber and shingles respectively, and the result will be that a market in the territory affected will be afforded to mills on Puget Sound. The district affected by the new rates is Brandon, Portage la Prairie, Hartney, Headingly, Carman and all intermediate points. The old rate from Seattle to Portage la Prairie on fir lumber was fifty-six cents, and on cedar shingles fifty-seven and a half cents.

LUMBER CONDITIONS AT LONDON.

Under date of September 4th, Messrs. Churchill & Sim refer to the London market as follows:

The pine deal market in London has been disappointing in August. The supplies have been fairly large, very costly, and very difficult to move into consumption. Prices have given a little where there has been any attempt at pressure, but for the most part sellers are quietly waiting for some signs of a demand. For spruce deals the market has been firmer in August, more in sympathy with other markets and the general improvement in all whitewood than from any increase in the demand in London. This movement looks like gathering force as the autumn proceeds, unless checked by shipments from Riga. Elm and ash timber are a point or two better since July. Birch has been selling cheaply in consequence of an over supply. Oak and yellow pine timber are without change.

From the St. Lawrence the importation has been: Pine deals, 375,000 pieces, against 578,000 pieces in 1904; spruce, 943,000 pieces, against 1,099,000; birch planks, 104,000, against 61,000.

From New Brunswick and Nova Scotia: Pine deals, nil pieces against 54,000 pieces in 1904; spruce, 431,000 pieces against 539,000; birch planks, 226,000 pieces against 103,000.

The stock of timber and lumber in the Public Docks on August 31st for two years was:

	1905. Pieces	1904. Pieces
Foreign Deals	1,696,000	1,915,000
Battens	2,372,000	3,216,000
Boards	10,780,000	10,982,000
Wainscot Logs	173	553
Pine Deals and Battens	951,000	1,156,000
Spruce ditto	777,000	930,000
	Loads	Loads
Oak Timber	921	823
Fir Timber	661	1,056
Oregon Pine	3,633	4,418
Oak Timber	1,302	1,588
Birch Timber and Planks	5,991	5,063
Elm and Ash Timber	641	1,150
White Pine	671	594
Red Pine	94	271
Pitch Pine Timber	13,867	22,686

LUMBER RECEIPTS AT TONAWANDA.

The receipts of lumber by vessel at the Tonawandas during the month of August last were as follows: North Tonawanda, 56,519,000 feet; Tonawanda, 13,379,632 feet, making the total receipts of the market, 69,898,632 feet. The receipts for August, 1904, were 64,482,191 feet, or 5,416,441 feet less than the corresponding month of this year.

The total receipts of lumber by vessel at this port up to September first this season amount to approximately 250 million, as compared with 209 million during the same period of 1904, which gives the current year a lead over last year of between 40 and 41 million feet.

Lumber

We have about two million feet of this season's cut for sale—about 75 per cent. White Pine, balance Norway and Spruce. Address

ERRINGTON & ROSS,
Turbine, Ont.

Sale of Burnt Timber

A quantity of pine timber on what is known as Berth B.1, containing 21 square miles more or less, situated South of Woman River Station on the Canadian Pacific Railway 120 miles west of Sudbury, in the district of Algoma, having been damaged by fire, the undersigned hereby calls for tenders for the right to cut same.

Tenders will be received up to and including the 30th day of September next, and must state the rate per thousand feet board measure, including dues, which the tenderer is prepared to pay for the timber, or per thousand feet cubic for whatever proportion of it may be manufactured into waney or square timber, including dues. The timber to be cut during the present winter. Tenders to be accompanied by a marked cheque for $500.00 payable to the Honourable the Treasurer of Ontario. The timber to be sold subject to the Crown Timber Regulations except where varied by the conditions of this sale. The party awarded the right to cut will be required to give a bond with satisfactory sureties for the payment of the price and the due performance of all terms and conditions required by this Department.

The Department does not bind itself to accept the highest or any tender.

Tenders to be marked "Tenders for Burnt Timber," and addressed to the Honourable the Minister of Lands and Mines, Toronto.

F. COCHRANE,
Minister of Lands and Mines.

Department of Lands and Mines,
Woods and Forests Branch,
Toronto, 21st of August, 1905.

N.B.—No unauthorized publication of this Notice will be paid for.

FOR SALE

Large Tract of Timber

In Central Ontario

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

Tenders will be received by the undersigned, Assignee of the Estate of Balsden & Blewett, Insolvents, up to and including the 10TH DAY OF OCTOBER, 1905, for the purchase or lease of:

1.—The planing mill on the west side of Flora Street, St. Thomas, formerly operated by said Insolvents, the lot on which it stands, machinery and all stock therein, or

2.—For the mill machinery and lots on which it stands, or

3.—For the purchase of the manufactured stock and material thereon, as per stock sheet,

And also for an office safe, nearly new, and in first-class condition.

For any further information apply to assignee.

Dated at Sheriff's Office, Court House, St. Thomas, this 25th day of September, 1905.

DUGALD McCOLL,
Sheriff and Assignee.

SEVEN MILLION FEET BURNED.

Just as we go to press it is learned that a fire in the mill yards of the Rathbun Company at Gravenhurst, Ont., on September 26th, destroyed about 7,000,000 feet of lumber. There was some insurance.

The Empire Lumber Company, Limited, Revelstoke, B.C., has gone into voluntary liquidation, F. E. Sine being the liquidator.

CURRENT TRADE CONDITIONS.

ONTARIO.

The most notable feature of the lumber market is the remarkable demand for building material, not alone in the cities, but in the country districts as well. This will continue until checked by winter weather, for there are many buildings which have only been commenced. Hemlock and the lower grades of pine are getting the call. The mills have very little dry lumber, but jobbers are carrying a liberal stock, which they expect to work off to good advantage. Prices may be said to be firm, with a hardening tendency. The demand for hardwoods has not shown much improvement, although some of the mills in Western Ontario report a liberal movement. It does not seem probable that consumers are holding off in the hope of breaking prices, which are now comparatively low, but the fact remains that trade is dull. The result of present conditions will likely be a restricted input of logs the coming winter.

Inquiries for lath are on the increase. American dealers are looking to Ontario, prices in the Lake Superior district having advanced to a much higher point than here. The mills are expected to enter the winter with fewer lath than has been the case for many years. In Toronto it has been difficult to raise the retail price, dealers who had a supply purchased below the present market price apparently being willing to give the consumer some of the benefit.

QUEBEC AND NEW BRUNSWICK.

The spruce lumber market is showing considerable strength and conditions appear to be very favorable for holders of stock. The demand from Cuba, South America and the United States is gradually increasing, while the supply of lumber is very light. The recent rains do not appear to have greatly improved the prospects for getting out the logs on the St. John river, and it is generally believed that nearly all logs now in the river will be hung up until next spring. Of the ten mills in the vicinity of St. John, five are now closed down, and of the other five only one has any quantity of logs on hand. The season is thus ending six weeks before the usual time. Operations in the woods promise to be exceptionally light.

UNITED STATES.

The past week has been an eventful one for the lumber trade. The market has broadened and many price advances have been put into effect. The most important action, perhaps, was taken by the Mississipi Valley manufacturers, who have issued a new list taking effect September 15th by which all two inch stock has been advanced from 50 cents to $1.50 and timber from $1 to $1.50 a thousand. Some descriptions of No. 1 and No. 2 boards were advanced 50 cents and No. 3 boards 50 cents to $1, with the exception of 4 inch and wider, which were marked up from $1 to $2. No. 5 boards were raised $1, 10-inch D select finish $1.50, 8-inch 50 cents, C and better norway, 12-inch and wider, and shop common, $1.50, and thick finish from $1 to $3.50. Lath prices are fixed as follows: No. 1 white pine, $4.50; mixed, $4; No. 2, $3.50; 32-inch, $2. At wholesale centres white pine has also been advanced, our Buffalo and Tonawanda list this week showing considerably higher prices for cutting up stock, box lumber and some grades of barn. The demand for many of the lower grades is in excess of the supply. At a meeting of the price list committees of the Pacific Coast and Southwestern Washington associations, held on September 15, the secretary stated that reports from 150 mills showed an average of 48 days behind their orders. It was decided to advance the price of vertical grain flooring, fir ceiling, drop siding, bevel siding, finish, common boards, joists, and scantling and lath. Similar action has been taken by the Wisconsin Hardwood Lumbermen's Association, although the advances were confined to rock elm and red and white oak. The maximum advance was $4 on 2½ inch and thicker rock elm.

The demand for hardwoods in the east is improving. Rough maple is somewhat overstocked, but birch is selling very readily and the prospects for basswood are said to be brightening. Lath are retaining their strength, No. 1 white pine being quoted as high as $5 f.o.b. Wisconsin Valley points. Hemlock lath are now listed at $3.25 f.o.b. Wausau, Wis.

GREAT BRITAIN.

The Board of Trade returns show that general trade throughout Great Britain is in a very satisfactory condition. During the month of August the imports were valued at £46,862,991, an increase of £4,453,084, while the exports reached the record figure of $29,517,836, an increase of £3,157,956. This healthy condition cannot but benefit the lumber business, which has continued quiet longer than was expected. There are now indications of good business during the winter months. Light imports of Canadian pine and spruce continue to be the rule, and buyers are being urged to cover their requirements before the season is too far advanced. Again it is reported that spruce prices have advanced. Several cargoes are said to have been sold at Cardiff at £7 10s per standard, which price nearly approximates that of red deals. The shippers who are engaged in the spruce trade are asking higher prices for cargoes to arrive, and will store the lumber until able to realize a fair profit. There is not a large demand for Quebec oak.

The first vessel to arrive from Labrador with spruce deals reached Liverpool a few days ago. The lumber is said to be of a quality to compete favorably with the New Brunswick product.

STOCKS AND PRICES.

As a consequence of the burning of the mill of the Elk Lumber Co. at Fernie, B. C., the various logging camps in connection therewith are now shut down.

A quantity of birch planks from St. John, N. B., were sold at auction at London, England, on September 14th, the price realized ranging from 6d. to 8½d. per foot.

Clarke Bros. last week loaded the schooner Enterprise with 600,000 feet of lumber at Bear River, N.S., for Buenos Ayres, and the schooner Hector at Bridgewater with 550,000 feet for Cuba.

The Scott Lumber Company, Fredericton, N.B., will start woods operations on the Upper St. John river early in October. They will take out about 12,000,000 feet for the Victoria mill and 4,000,000 feet for the Magaguadavic mill.

The Davison Lumber Company, of Bridgewater, N.S., recently sold 2,500,000 feet of lumber to be shipped to the River Plate market and 600,000 feet for the United States, the prices received, we understand, being very satisfactory. It is the intention of this company to manufacture upwards of 40,000,000 feet annually.

CANADIAN LUMBER SHIPMENTS.

From Halifax, N. S.: Steamer Gulf of Ancud, for London, 56,952 ft. hemlock deals, value $545; 31,000 ft. birch deals, value $335, by Furness, Withy & Co., agents.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., Sept. 16th, 1905.—Those engaged in the logging industry are much exercised just now over the action of the Government in seizing a boom of logs belonging to Mr. J. S. Emerson, which it was proposed to ship to the United States. It is the old story which has been the trouble ever since the amendment was made to the Land Act in 1901. Among other clauses inserted was one which read that "all timber cut on provincial lands must be manufactured in the province." Loggers and even the Government officials held that this did not prohibit export, and the fact that timber was constantly exported was the reason why the timber men did not test the law in the courts as was proposed when it was first announced. Hon. R. F. Green, Chief Commissioner of Lands and Works, takes the view that the law does prohibit, and ordered the seizure of the logs. Now the matter will come before a justice of the supreme court for decision. In the meantime, the business is somewhat held up, especially that of the hand loggers, of whom a large number were cutting timber. The clause in dispute has been the subject of much discussion during the past three years, and while the Government strenuously denied that any logs were being exported, it was a well known fact, in short the inspector here was cognizant, that cedar was constantly shipped.

There is no market here for cedar, the rough particularly, just now, while it will bring from $6 to $8 per thousand in the State of Washington. Consequently, shipment has been steady. There is a fair demand for fir, the prices ruling from $5.50 to $7. Altogether, business is in fairly good shape.

Ald. Heaps, the senior member of the firm of E. H. Heaps & Company, lumber and shingle manufacturers, was successful the other evening in having a resolution passed in the City Council to have that body support the request of the Board of Trade and the lumbermen for a duty on lumber imported from the United States. Representations are to be made to the Tariff Commission next week, and as a result of the motion the Vancouver City Council and the city solicitor will both be present to urge the necessity of a duty.

Forest fires have been very bad in the interior this summer, though the coast has suffered less this year than last. The Elk Lumber and Manufacturing Company, of Fernie, was the biggest loser, camp buildings, logging sleighs and 3,000 logs having been burned. The loss, not counting the damage to green timber, will be about $5,000. Since then the mill and plant has been destroyed by fire, with a loss of $60,000.

A combination of Puget Sound millmen is said to have been arranged for the purpose of manufacturing rough and finished lumber in large quantities at Vancouver. Mr. J. S. Emerson, who was recently prevented by the Provincial Government from exporting logs he had cut under hand-loggers' licenses, is said to be the originator of the idea. Mr. Emerson will, it is said, bring suit against the Government for the recovery of his seized logs. If the Government should win the action and it should be determined by the courts that no logs may be exported, then the syndicate of which he is a part will take steps to manufacture the lumber at Vancouver, and rumor says that prices will be cut below those now ruling. How any profit is to be made by manufacturing and selling lumber below $10 per thousand feet can scarcely be imagined.

Certain Vancouver saw mills which have been manufacturing shingles as a side line in a small way, will, according to report, go out of the business and devote their attention entirely to lumber. These manufacturers will still sell shingles, but they will purchase their stocks from the shingle mills at reduced prices, and by this plan will secure a reduction in their insurance rates, as shingle mills are classed as an extra hazardous risk.

The shingle situation in British Columbia is steady, due to the action of the manufacturers in establishing a selling agency. This has proved beneficial to the trade and it is expected that the arrangement will be

continued for another year. It was estimated on April 1 last that 125,000,000 shingles that had been bought at the low prices were in stock in the East, and that another 125,000,000 had been contracted for at the same prices, or a total of 250,000,000 shingles. The average annual output of British Columbia is 400,000,000 shingles, so that the production of the mills in the province this year had to be curtailed accordingly. The manufacturers have stood firmly to their agreement. In April, May, June and July of this year 70,000,000 shingles were disposed of at the advanced prices as new business, and it is estimated that in the following four months there will have been another 70,000,000 disposed of, making the total 140,000,000. The early cheap contracts are being filled in about the same proportion as the new business and will probably be cleaned up before the end of the year. There will always be plenty of shingles manufactured to supply the demand, but it appears that the over-production which has been so ruinous to the business in the past is not likely to occur under the present arrangement.

At a secret meeting of representatives of the Puget Sound logging interests held at Seattle, Wash., it was decided to advance the price of logs 50 cents a thousand.

W. B. Lawrence, planing mill, etc., Maple Creek, N.W.T., is announced to have assigned to A. Burnett.

The timber limits and saw mill property of Andrew Haslam, Nanaimo, B.C., are being offered for sale by E. M. Yarwood, solicitor for the assignees. Tenders will be received up to October 31st.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, September 23, 1905. — The tone of the lumber market continues to be strong with every indication of a steadily increasing demand during the coming two months. White pine is being offered more freely and at firm prices. Shipping cull sidings are in keen demand, and many special bills are being asked for in connection with building operations.

Large stocks of spruce are continuing to move to the American market at fair prices.

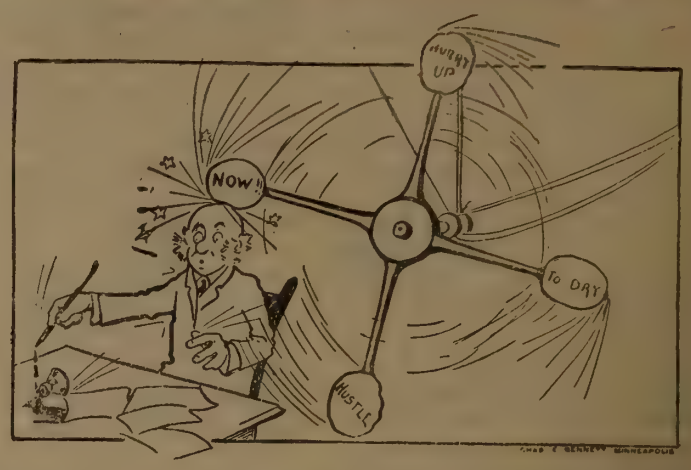
Birch and ash continue to be in keen demand, especially in the American market, with prices ruling high, and on account of the comparatively low stocks in these lines, prices are expected to go higher.

Basswood and elm have had an upward tendency during the past month, and basswood is being more freely inquired for and better prices are being looked for before the close of navigation. Although the hardwoods are not moving as briskly as pine and spruce, yet prices are firm and more activity is likely to be seen before long.

Lath and shingles continue to be exceedingly brisk and the demand exceeds the supply owing to the very extensive building operations.

The shipments to the English market are still very limited, but a slight improvement from this source is looked for at an early date.

Some buyers are under the impression that prices will yet go lower for this and next years' business—but this seems almost impossible on account of labor; if labor continues as scarce as it is at the present time, lumber is almost sure to take a sharp advance.



JUST A GENTLE REMINDER

That's all--a reminder that we can supply your wants in the lumber line.
It's up to you NOW to realize that fact and to open up correspondence with us.

CURRENT TRADE CONDITIONS.

ONTARIO.

There is no abatement in the demand for lumber for building purposes, which is still of large proportions. No falling off is likely until cold weather hampers outdoor operations, and until then pronounced activity is almost certain to prevail. The building permits issued in Toronto to the end of September numbered 2,100, of an approximate value of eight million dollars. The factory consumption of lumber is not altogether satisfactory, although probably showing a gain as compared with last year. Conditions generally are healthy. Michigan buyers have been more numerous of late in the Georgian Bay district, but on account of the steady demand all season, stocks are considerably broken. More or less lumber, however, is constantly changing hands, and the prices are indicative of strength. The greatest demand in pine is for No. 1, 2 and 3 common and box and mill culls. Birch may be said to be leading the hardwoods, which are only moderately active. There has been some good buying by Buffalo dealers, but the supply is plentiful. Some disposition is reported to acquire British Columbia shingles at prevailing prices, as if production is curtailed during the winter months an advance seems more probable than a decline. White cedar shingles are selling slowly, even though offered about fifty cents below red cedars.

QUEBEC AND NEW BRUNSWICK.

The statement of timber received at Quebec up to the end of September shows a considerable decrease as compared with the corresponding period last year. Of white pine there has been received 1,167,240 cubic feet, as against 2,020,160 feet in 1904, or a decrease of about 75 per cent. Square pine and oak show almost as great a falling off, while elm timber alone is responsible for an increase of importance, the receipts being nearly double those of last year. Prices generally are firm, although some pressure is being exerted upon elm values. Long spruce lumber is moving actively for the United States market and enquiries for British specifications are on the increase. New Brunswick cedar shingles are unchanged, although a greater number of manufacturers are now holding their quotations at $3.35 for Extras for Boston delivery.

MANITOBA AND BRITISH COLUMBIA.

The lumber market of the Canadian Northwest has reflected to some extent the improved conditions prevailing in in the State of Washington, where prices were recently advanced. The advantage

which may accrue to the Canadian manufacturer from such action is that arising through the American mill men discontinuing their policy of slaughtering their surplus lumber on the Canadian market. Orders for lumber and shingles are being placed more freely by retailers in the rural districts in anticipation of the demand for improvements which will doubtless be undertaken as the immense wheat crop is disposed of. Collections are reported to be a little slow, but an improvement is expected in the near future.

UNITED STATES.

The present situation is decidedly in favor of the seller of lumber. Most manufacturers are sold largely in advance and are not pushing for business, which would seem to point to a firm market for the balance of the year. White pine shipments from the Lake Superior district during the month of September were in excess of the same month last year, and this remark will doubtless apply to all shipping centres. Chicago wholesalers have recently sent out new lists in which a further advance is shown on most items.

Buffalo and Tonawanda dealers put a new price list in force on the first of the month which shows a considerable advance on the common grades. The hemlock business is equally as satisfactory as pine. In Chicago hemlock piece stuff is selling at $17 for 2 x 4, 2 x 6 and 2 x 8, 12 and 14 foot lengths, while 16 foot is 50 cents higher. The spruce lumber trade of the Eastern States is in a flourishing condition and most of the mills are oversold. Hardwoods are reported to be picking up, with a fair demand for oak, birch, elm and maple.

The advance in red cedar shingles has been the feature of the market. At Washington points the "Star" brand is quoted at $1.50 per thousand, while "Clears" are held at $1.70. At Minneapolis quotations range from $2.40 to $2.45 for "Stars" and 2.85 for "Clears". In Buffalo red cedars have experienced a boom and few dealers have a supply. It is claimed that within six weeks "Clears" have advanced 38 cents, "Perfections" ten cents, and "Eurekas" five cents.

GREAT BRITAIN.

The reports from the British market this week are a pleasant relief from the depression which has been chronicled for more than a year past. A much healthier feeling seems to pervade the general business of the country, and it is freely predicted that a gradual improvement in lumber will follow. Reports from the manufacturing centres are encouraging and the shipbuilding industry is well employed. The only barrier to much greater activity in the near future is the dullness of house building, which is perhaps the main factor in the lumber demand. There is no doubt, however, that the market has turned the corner for the time being at least, and that the course of business during the next few months will be upon broader lines. The attention of the lumber trade, so far as the Canadian supply is concerned, has been largely centred upon spruce. The expected upward movement has shown itself in an unmistakable manner and prices are fully five shillings per standard higher. An ordinary specification can readily be sold at £7 7s. 6d. c. i. f. Liverpool, and for the better specifications, especially with a fair percentage of 3×11, competition is keen. Spruce deals seem destined to advance still further, as the stocks are light and not likely to be greatly increased during the short time between now and the close of navigation. Ireland has been buying more liberally of late.

STOCKS AND PRICES.

Seven schooners were last week loading lumber at Stetson, Cutler & Company's mill at St. John, N.B., for New York.

T. T. Lantalun last week sold at St. John, N.B., about 400,000 laths, being the cargo of the condemned schooner "Malabar." Stetson, Cutler & Company were the purchasers, at $2.70 per thousand.

With the exception of No. 2 flooring, logs on Puget Sound were advanced fifty cents on October 1. This decision was reached at a representative meeting of loggers, held in the offices of the Washington Logging & Brokerage Company on September 9. At the present time the demand for logs is strong and there is a comparatively small surplus in storage on Puget Sound. Loggers say the situation is such as to justify the fifty cents' increase. The new schedule will be as follows:

Up to 40 foot merchantable....	$ 7.50 M.
42 to 50 foot merchantable....	8.50 M.
52 to 60 foot merchantable....	9.50 M.
62 to 70 foot merchantable....	10.50 M.
72 to 80 foot merchantable....	12.50 M.
82 to 90 foot merchantable....	14.50 M.
92 to 100 foot merchantable....	16.50 M.
Flooring up to 40 feet.....	9.00 M.
Flooring No. 2 up to 40 feet.....	5.00 M.

Following is a comparative statement of timber, masts, etc., measured and culled at Quebec up to 3rd October, as reported by the Supervisor of Cullers:

	1903 C Feet	1904 C Feet	1905 C Feet
Waney White Pine...	1,618,920	2,020,160	1,167,240

AUSTRALIAN LUMBER IMPORT.

The Australian import of lumber last year was as follows:

Undressed lumber, 11,481,552 feet from Canada and 68,524,670 feet from the United States.

Dressed lumber, from Norway 41,901,583 feet; Sweden, 8,739,497 feet; United States, 3,576,661 feet; Canada, 104,770 feet.

CANADIAN LUMBER SHIPMENTS.

From Halifax, N. S.: Steamer Angola, for Havana, Cuba, 13,069 ft. pine lumber, value $222; 20,159 ft. spruce lumber, value $302, by T. A. S. DeWolf & Co., agents. Steamer Ocamo, for Demerara, 38,000 ft. lumber, value $600, by Pickford & Black, agents.

From Montreal: Steamer Tunisian, for Liverpool, 30,875 pcs. boards, deals and ends, 123 bdls. shooks. Steamer Dominion, for Liverpool, 39,590 pcs. boards, deals and ends. Steamer Milwaukee, for Liverpool, 40,659 pcs. boards, deals and ends, 3,589 bdls. maple squares, 1,100 bdls. staves, 4,631 bdls shooks, 1,230 pcs. lumber, 800 doors. Steamer Kildona, for London, 1,318 pcs. lumber. Steamer Ontarian, for London, 27,996 pcs. boards, deals and ends. Steamer Montrose, for London, 8,785 pcs. deals, 2,400 pcs. lumber, 1,351 bdls. lumber. For Antwerp, 7,123 pcs. boards and deals. Steamer Montcalm, for Bristol, 31,130 pcs. boards, deals and ends. Steamer Marina, for Glasgow, 15,212 pcs. boards, deals and ends. Steamer Sicilian, for Glasgow, 73 logs, 32,704 pcs. boards, deals, etc. Steamer Angola, for Tampico, West Indies, 1,091 pcs. lumber. For Vera Cruz, 2,156 bdls. shooks, 3 bdls. hardwood. Steamer Philadelphia, for Liverpool, 184 pcs. lumber, 15,675 pcs. deals, 7,505 bdls. and 902 pcs. squares.

From St. John, N. B.: Schooner Harry Knowlton, for City Island, 169,310 ft. spruce deals, 73,935 ft. spruce scantling, 21,650 ft. hemlock scantling, 350,000 laths. Schooner Manuel R. Cuza, for Bridgeport, Conn., 121,970 ft. plank, 65,389 ft. scantling, 8,232 ft. boards, 500,000 laths. Schooner Annie Gus, for Quincy, Mass., 97,079 ft. boards. Schooner R. Carson, for Salem, 1,501,000 cedar shingles. Steamer St. John City, for London, 62,758 ft. spruce deals and ends, 65,994 ft. birch scantling and deals. Schooner Rewa, for Boston, 76,719 ft. plank, 66,782 ft. scantling, 60,349 ft. boards. Schooner Georgia, for City Island, 274,736 ft. deals. Schooner Adelene, for City Island, 252,587 ft. deals. Schooner Sallie E. Ludlam, for City Island, 278,657 ft. deals. Schooner Frank and Ira, for Salem, 1,300,000 cedar shingles.

INVESTIGATING BRITISH COLUMBIA TIMBER.

Mr. C.R.W. Douglas, of the Blanchard Lumber Company, Boston, has recently been in British Columbia. "I am here," said Mr. Douglas when interviewed, "to look into the lumber and shingle industry. We expect before long that it will pay to ship lumber by cars from Vancouver to Boston. We are now buying in Vancouver considerable consignments of lengths and widths that cannot be supplied at home. Swift & Company, of Cincinnati, recently bought in Vancouver 400,000 feet of rough dimension lumber. This was purchased for $9, and the freight was $24 a thousand, and still we had to get it here because our supply of big timber is getting smaller and smaller.

"We are fighting in New England to have the duty taken off lumber entering the United States and we expect it will be taken off. One thing we do know is that the price of lumber is going up so rapidly that we must come to the coast for it.

"It may be premature, but perhaps there is no harm in announcing what is on the boards in the East. There are to be central distributing points in the Eastern States at the different seaport cities for Pacific coast lumber. It will be shipped there by rail and steamer, and then be distributed all over the Eastern States. I have secured a rate around the Horn of $16.50, the duty is $2, and with $9 lumber (such a price can be secured here for big lots), it would bring the price to $27.50. In Boston spruce is now sell-

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

ing for $23. In 1898 it was $11.40 a thousand. Thus in seven years it has more than doubled in price. It is generally conceded that the time is very close when the price will be $30. Thus my visit to prepare for the inevitable. I have been told by experts that the British Columbia spruce is superior to that which we are now using in Boston.

"British Columbia shingles have a great name in New England. Your shingles can be disposed of at $3.20 in opposition with the very highest class shingles from Puget Sound. We are able to handle British Columbia shingles as the duty is not so serious an obstacle as it is in the case of lumber. But we are fighting to have the duty taken off shingles also."

TIMBER LIMIT TRANSACTIONS.

The timber limits, saw mill and other lumber property of W. C. Wells, Palliser, B.C., has been purchased by the Dickason-Goodman Lumber Company, of Kansas City, Mo., who will take possession this month. It is understood that the new owners intend to establish a chain of independent lumber yards throughout the Northwest.

The Wolverine Cedar Lumber Company, of Menominee, Mich., are reported to have purchased a timber limit on the Spanish river, in Ontario, estimated to contain upwards of 100,000,000 feet. The limit was bought from the Eddy & Flynn Lumber Company, of Saginaw, and the price paid is said to have been $5 per thousand feet.

W. S. Gore, Deputy Commissioner of Lands and Works, Victoria, B.C., will receive tenders up to Wednesday, October 25th, for the lease of three timber limits situated on Vancouver Island. One limit contains 11,141 acres, comprising lots 143, 148, 149, 184, 625, 626, 648, 650, 651, 652, 653, 662, 663, 664 and 665, Clayoquot district; another contains 1,702 acres, comprising lots 666, 667 and 668, Clayoquot district, and the third contains 9,395 acres, comprising lots 654 and 656, Clayoquot district, and lots 18, 19, 34, 35 and 36, Nootka district.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., Sept. 30th, 1905.—The prospects for getting logs from the up-river districts remains very discouraging. In the meantime little is being done in the way of manufacturing deals. Four mills are sawing, but it is probable that two of these can only run a few days longer.

In the short lumber market the flourishing condition of trade in spruce lath continues to be a feature. Local stocks are being rapidly depleted and no important quantity is likely to be put upon the market from this port during several months to come, unless a decided and immediate change takes place in the log driving situation. The encouraging reports from all lath distributing centres, together with the scarcity of the article have stiffened local values, and, upon what quantities are available, no lower quotation could be obtained than $2.40 to $2.45 for dutiable and $2.65 to $2.70 for non-dutiable, f.o.b. schooner St. John.

Cedar shingles are moving briskly but so far prices show little tendency to climb, the supply having been to date fully equal to demand. Local stocks of high grades are low (2,000,000 would easily cover the quantity), but the poorer grades have been sluggish and therefore somewhat plentiful. The demand in the provinces for these lower grades has been brisker during the latter part of September and the manufacturers confidently expect to cut their stocks down to normal without difficulty before the end of the year. There are in stock of these low grades at this date three and one-half millions.

Non-dutiable cedar shingles are quoted at this date, f.o.b. schooner St. Johns at: Extras, $2.85; Clears, $2.35; 2nd Clears, $1.85; No. 1's, 95 cents.

Dutiable cedar shingles: Extras, $2.55; Clears, $2.05; 2nd Clears, $1.170; No. 1's 95 cents.

The two latter prices are those at which sales in these lines are being made for consumption in the provinces.

The cedar logs now being sawn were mostly held over from last year and there are about enough available to enable the manufacturers to finish out in this line an average manufacturing season. This cedar is practically all provincial; therefore the product of same will be dutiable.

One inch merchantable spruce boards are in good demand and the heavy quantities in stock at the beginning of the season have been greatly depleted. Local values are firmer than was the case a month ago. No quotation could be obtained to-day lower than $12.50 to $12.60 for non-dutiable and $10.50 to $10.60 for dutiable, f.o.b. schooner St. John.

The quantities of one inch merchantable spruce boards on the different wharves would aggregate from 1,250,000 to 1,400,000 feet, with the prospect of this quantity being practically all that will be produced this fall.

The ruling rates of freight by schooner are as follows: Boston, shingles, 30 cents; Boston, long lumber, $3.00; New York City, lath, 70 cents; New York City, deals, $3.50; Sound ports, shingles, 37-½ cents; Sound Ports, long lumber, $3.25.

BRITISH COLUMBIA LETTER.

(Correspondence of THE CANADA LUMBERMAN.)

VANCOUVER, Sept. 27th, 1905.—With the bad weather which has prevailed during this month, millmen are beginning to look for a scarcity of logs. Heavy rain has fallen off and on for three weeks, a September condition which is a precedent. Heretofore this month has sometimes been all fine weather, and at others fairly so, but this year the rain has been very heavy. A well known millman, who is also interested in the logging business, stated yesterday that the indications are that logs will be scarce. The demand for them has been pretty good and with a prospect of continuance. If the weather keeps on at the present rate logs will go up in price.

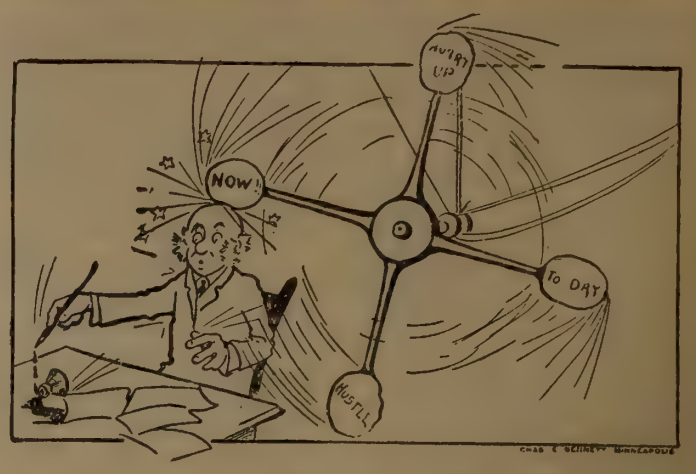
Nothing particular has since been heard of the action of loggers to test the provincial government law regarding export, which was the subject of much discussion when Mr. J. S. Emerson's boom of logs was seized as a starter. Mr. Emerson said he would cut timber here and cut prices, but this is hardly regarded as a possibility.

The shingle business continues bad. This is one part of the industry which has been in poor shape for a considerable time, and there does not seem any relief in the immediate future. On the other side of the line, an attempt has been made to boost shingle prices, but this has been done by the brokers in an effort to bolster up the industry, which is just about as bad as here. Acting under arrangement with the manufacturers of shingles exclusively, the mills which cut both lumber and shingles in the city will confine their operations to lumber, so as to give the other men a chance. The prices of shingle bolts have increased during the past couple of weeks, having gone up to $4.10 and $4.15 per cord, a jump of about 25 cents.

Other prices are maintained. Lumber in not changed owing to the agreement effected among the manufacturers some time ago, and logs are firm because of the bad weather.

Loggers are again protesting against a further reserve being granted to the Western Canada Pulp and Paper Company, which has already a large reserve. The lumbermen look at the pulp manufacturers something in the same way as the farmers in the Northwest regard the ranchers. The pulp men blanket whole sections to obtain the right kind of wood for pulp purposes, and included in the reserves are generally large quantities of merchantable fir, spruce and cedar.

The disposal of the Palliser mills by Mr. W. C. Wells, M.P.P., to Messrs. Dickason and Goodman, of Kansas City, is another indication of the steady migration of the big American lumber manufacturing firms into Canada. Nearly half of the sawmilling interests in the province are now in the hands of Americans, whose methods will make a great difference in the trade of the country. The Dickason-Goodman Lumber Company proposes to install a chain of yards through the Northwest, selling direct to the consumer. This has been in contemplation by other mills, and if carried out extensively will sound the knell of the retailer's business, except in small places.



JUST A GENTLE REMINDER

That's all—a reminder that we can supply your wants in the lumber line.
It's up to you NOW to realize that fact and to open up correspondence with us.
Don't forget that SPRUCE LUMBER is our specialty—and should be yours. Let us tell you why.

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads, one of which is about to be extended through the centre of the property. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, ormore if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

Quote delivered price F.O.B, Buffalo or at point of shipment. Can use almost any length. For further particulars apply THE DAVID GILMOUR DOOR CO., Buffalo, N. Y.

CURRENT TRADE CONDITIONS.

ONTARIO.

The weather throughout Ontario has been favorable for outdoor work and building operations have continued unabated. Lumber is moving freely from the yards to consumers, the volume of business being considerably in excess of one year ago. Some grades of white pine are in light supply and in a position to be advanced, but it is unlikely that prices will be materially changed during the winter months. It is now said that Canadian manufacturers are getting prices at the mills almost equal to the wholesale quotations at Albany and some other Eastern points. There are no indications of weakness, and consumers are disposed to stock up to some extent in anticipation of a shortage before next spring. Dimension lumber is about the strongest thing on the white pine list.

Hardwoods do not show that life which is so characteristic of pine and hemlock. Many dealers are turning their attention from the hardwoods to pine, finding that business is thus more easily obtained. There is, however, a fairly good demand for birch, elm and ash.

QUEBEC AND NEW BRUNSWICK.

The shipment of lath to the United States continues very active, with the price tendency upward. This has made up in part for the unsatisfactory condition of the shingle market, although at the present time the outlook for the latter product is much improved. Some manufacturers are asking as high as $3.40 for extra cedars, but sales are still being made at $3.30 by the smaller mills.

In lumber, long stock is receiving the call, short stuff being somewhat dull. There has of late been some buying of British deals, but the high freight rates have been against any advance in prices.

MANITOBA AND BRITISH COLUMBIA.

The lumber business of the West is not booming, but a very satisfactory trade is reported from all districts. Dealers in Winnipeg report increasing activity, especially in Alberta and Saskatchewan. With a record crop to bring in plenty of money, the farmers are contemplating increasing their buildings and retailers will stock up to meet the demand. The building trade for next year looks bright and lumber will benefit accordingly. Prices are practically unchanged, but quite firm. There is a strong demand in British Columbia for fir logs, which are selling at $7.50 per thousand feet, and in some quarters it is predicted that an advance to $9 will take place during the winter. This does not indicate lower prices for lumber.

UNITED STATES.

During the month of September the building permits taken out in twenty-five of the principal cities of the United States amounted in value to $44,280,595, against $29,121,328 for the corresponding month of 1904. This is an increase of 52 per cent. and indicates to some extent the exceptional demand for lumber for building purposes. Dealers in New York report that there is more business offered than they can take care of, the demand being greater than it has been for some years. It is apparent that lumber prices will not decline in the near future, as all over the country business conditions are singularly favorable. The demand for the common grades of white pine is as dominant as ever, although all grades are showing activity. Orders for spruce are very plentiful notwithstanding the high price basis which has been established. There has been some improvement in hardwoods, oak, birch and rock and soft elm leading in point of demand. There is also an average movement of maple and basswood, but as the supply is very plentiful there has been no response in the direction of higher prices.

Shingles are firm and conditions much as last reported. Spruce lath is stronger, the average price for Boston delivery being $3.85 for 1½ inch and $4.00 for 1⅝ inch. The receipts of shingles at Buffalo and Tonawanda have been 210,638,000, as compared with 112,109,000 a year ago.

GREAT BRITAIN.

Statistics show that the quantity of lumber waiting to be marketed in Great Britain is exceptionally small. The stock in the Surrey Commercial Docks at London is smaller in every description, Canadian white pine deals showing a reduction of 170,259 pieces as compared with one year ago, and spruce deals 91,630 pieces. The demand is improving, although slowly. The better qualities of pine have been in fair request of late and buyers are more willing to meet the prices asked by dealers. Flooring is unusually strong, some shippers asking as high as £8 17s. 6d. for mixed white c.i.f. London and Liverpool. Quebec waney pine is firm in price but the supply is plentiful. The Liverpool stock on September 30th stood at 166,000 cubic feet, which is slightly more than a month previous. Reference to the spruce market is made elsewhere.

STOCKS AND PRICES.

A. E. Jessop, Secretary-Treasurer of the Revelstoke Lumber Company, Revelstoke, B. C., says that their cut this year was about 5,000,000 feet, consisting of fir, cedar and spruce, two-thirds being cedar.

F. McGibbon & Sons, of Sarnia, Ont., have been awarded the contract to furnish all the lumber required for the new stations, freight sheds and platforms of the Guelph-Goderich extension of the C. P. R. There will be in the neighborhood of fifteen stations on the new line, together with freight sheds, platforms and other buildings.

About fifty men were employed at Mitchell's boom, Fredericton, N.B., during the past week, and 453 joints of logs were rafted. The lot was made up of about 4,000,000 feet, and is mostly off the Cunliff and Aitken drives, having all been sold to the Stetson, Cutler Company, of St. John, by whom it is to be sawed. Regarding the cut on the upper St. John, a prominent lumberman says he does not believe there will be as heavy a cut this winter as last. There are others who differ with this opinion, as although there are 40,000,000 feet or more of stranded lumber in the river, there is none in the booms this year, and in the fall of 1904 about 30,000,000 feet were left in the booms.

SPRUCE IN ENGLAND.

The sharp rise in freight rates from the Canadian ports, as may be expected, has had the effect of enhancing spruce values. We hear that a cargo of Labrador spruce, and another of Campbellton, have been sold to the Bristol Channel at prices which show a return of £8 c.i.f. for the 7 in. and up, but in each case the specification was of a better class than usual. We hear of another sale to the same district of a Grand Pabos cargo at a few shillings less money. For a fairly large Miramichi cargo of Snowball's manufacture, the specification of which is nothing out of the ordinary, we hear that shippers are asking as high as £8 5s., an announcement which will stagger consumers who have still contracts to place. It is a long time since such prices were asked for spruce, but shippers appear to be fairly sure of their market, and are acting accordingly. Although spruce scantlings have been shipped far too freely this season, we hear that an effort has already been made to reduce the allowance to 15s., but buyers are not likely to give up their time-honored allowance of £1 without a fight.—Timber Trades Journal.

TIMBER LIMIT TRANSACTIONS.

J.C. Patterson, of Moncton, N.B., is asking for tenders up to Monday, 30th inst., for two lots of land situated at Shanklin, Parish of St. Martins, N.B. Lot No. 1 contains 110 acres, of which about 100 acres are heavily timbered with spruce. Lot No. 2 contains 160 acres, of which about 120 acres are well timbered, principally spruce.

The Wm. Richards Company, Limited, of Chatham, N.B., had a special meeting last week, at which the transfer of the Miramichi property to the International Paper Company was agreed upon to take place on December 31, 1905, if certain details can be arranged. The Richards Company are carrying on the business as usual. They are making contracts and have 150 men in the woods. The company's total cut will be about twenty-two million feet.

Mill men in need of a circular resaw are referred to the advertisement of John Harrison, Burlington, Ont., which appears in the "Wanted and For Sale" Department of this issue.

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., October 9th, 1905.— Lumber manufacturers in the interior have come to realize that something must be done in the way of fixing a fair price on their output and maintaining it. All season a few have been selling at lower prices than the others, with the result that now the industry in the interior is in somewhat of a demoralized condition. Until the crop question was settled on the prairie, retailers were buying slow and beating down figures, but since prosperity has been assured to the consumers of lumber in the Northwest the market has not righted. Those who cut were mostly forced to do so, because of the necessity of cash for payments, and it was because of this reduction that the coast manufacturers made the cut of $2 or $3 in rough lumber, making it up on the higher grades. The millmen claim that the retailer has been making good money on the sale of lumber, while he himself has been selling just about at cost of production.

Prices of logs are stiffening, though announcement has not yet been made of a material increase. With the advent of fine weather after the wet and cold of September, more timber will be taken out of the woods.

John Murray, timber ranger for the provincial government, returned yesterday after seizing one large boom of logs up the coast. These were cut from provincial lands and were confiscated because of a very strong suspicion that they were to be exported. They belonged to J.S. Emerson, of this city. Those interested are a little slow in taking the action proposed, that of testing the law in the courts and settling the question about which there is much dispute.

The export trade has been fairly good this season from Vancouver, in comparison with last year. At present four ships are loading at the Hastings mill, and one is in the harbor waiting for a tug; she will get away in a day or so. Almost steadily since the first of the year three or four boats have been taking on lumber at this mill for foreign ports, including Japan, South America, South Africa and England.

Visiting ministers of the Laurier government at New Westminster during the progress of the Dominion Fair were greatly taken with the "ready-made" house exhibit of the B. C. Mills, Timber and Trading Company. This comprised five houses, and Hon. Sidney Fisher, who among others inspected them, saw great opportunities for trade with them in the districts now being rapidly settled in the Northwest.

Business locally with the mills has been good, the Pacific Coast Lumber mill having been working over the ten hours during the past two weeks. Additions are being made to stocks with the anticipation of a greater demand in the winter, when preparation will be made by Northwest retailers to put in a supply.

Vancouver Island timber limits are being looked after these days, and several prospective sawmills are contemplated. The timber on the west coast of the Island is very fine, and Americans are getting in on the ground floor.

Ties, No. 1 and 2; 10,000 Cedar Fence Posts; 1" and 1¼" Basswood; 2" and 3" Maple; cut in 1904; excellent shipping condition. 1905 cut contains Pine, Hemlock, Basswood, Maple, Elm and Ash lumber and 10,000 cords Slabs. LILLICRAP, TATE LUMBER CO'Y., Lakefield, Ont

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads, one of which is about to be extended through the centre of the property. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, ormore if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

Address Box 323, CANADA LUMBERMAN,
Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

Lumber conditions could not be better. The only complaint here is in respect to the shortage of cars for the movement of stock, which is causing the trade serious inconvenience. Manufacturers of white pine lumber report an unusually strong demand. Some of the largest Michigan firms who purchased conservatively earlier in the year have come into the market for considerable Georgian Bay lumber, and this, with the splendid local demand, has made the situation very strong. Conditions in the Ottawa Valley are much the same as in Western Ontario. Although the Ottawa mills have this year cut more stock than usual for the domestic and United States trade, the quantity which will be carried into the winter is not likely to be above the average.

Dealers in Toronto are working at high speed, having more orders on their books than they can conveniently execute, as quick delivery is universally requested. The planing mills are turning out finishing stock in large quantities, but are unable to supply the demand. Considerable finishing material, including flooring, has been shipped to Western points.

Hemlock is selling very readily. In some quarters a further advance is talked of, but the trade are by no means unanimous that such action is wise, inasmuch as it might lead to the substitution of other lumber when anything cheaper could be obtained. The lath market shows no signs of weakening notwithstanding the prevailing high prices.

QUEBEC AND NEW BRUNSWICK.

The spruce lumber market is in an exceptionally strong position in respect to every class of stock excepting British deals. Manufacturers continue to receive numerous inquiries for lumber for shipment to New York, Boston and other eastern points, where prices are very high. For Boston delivery nine-inch spruce is quoted at $23, while the price for over nine inch is $25. Some of the leading shippers are refusing orders except on a basis of $24 and $26, so that it is reasonably sure that the market will not decline this year below the lower quotations above given. It is predicted that before the close of the year spruce lumber will be selling at $30 per thousand in New York. Under the stimulus of such favorable conditions in the large consuming centres of the Eastern States, the local market is hardening and the manufacturers are looking forward to more profitable business next year. There has been a further rise in spruce lath, of which there is believed to be an inadequate quantity to go through the winter. Cedar shingles are in moderate demand, with a fair supply. Prices of Extras for Boston delivery range between $3.25 and $3.40, with Clears at $2.85 to $3. There is a scant supply of Clears.

MANITOBA AND BRITISH COLUMBIA.

The lumber trade of Western Canada has shown no material change during the past week. There is a very fair demand for lumber of all kinds and the tendency of prices is to harden. The city of Winnipeg is now asking for tenders for sufficient lumber to meet the requirements for the balance of the year, the firm which had the contract having exceeded the quantity agreed upon and refused to supply more lumber except at an advanced price. Dealers in country districts are stocking up liberally in anticipation of a good winter trade. That there is considerable activity in British Columbia is shown by the fact that 216 timber licenses were issued by the local Government during the month of September. It is understood that a contract will shortly be placed for seven million feet of timber for the Grand Trunk Pacific Railway, and it is hoped that this order will be secured by Canadian mills.

UNITED STATES.

The demand for lumber in the United States shows no indication of falling off in the near future. On account of the high range of prices there is a disposition on the part of some dealers to refrain from purchasing for future delivery, but so much lumber is required for immediate consumption that this disposition has not visibly affected the demand. The white pine trade is limited in many instances by the ability to supply the stock. Prices continue very strong and as stocks are light no important recessions are anticipated. The spruce market is in an unsettled condition owing to the shortage in the log supply and consequent steady advance for the past three months. While in Boston the general market may be said to be on a basis of $23 for nine inch and under, and $25 for over nine inches, some dealers are said to be asking as high as $25 and $27. Spruce clapboards have not shared in the general improvement to any extent and are still selling on the basis of $42 for extras, $40 for clears and $32 for second clears. Hemlock is very firm. The price range in Chicago is from $15 to $17. There has been some increase in the demand for hardwoods. Oak, ash and birch are good sellers. Buffalo has received a considerable quantity of Michigan maple, which has been against the market. There is also too much basswood offering to permit of an advance in price at the present time.

GREAT BRITAIN.

The outlook for the lumber market in Great Britain is distinctly brighter. The improvement in the shipbuilding trade, due to the large number of new contracts recently placed with Clyde builders, gives promise of being maintained for some considerable time to come. There has arisen during the past two or three weeks a marked enquiry for spruce. Its position is now stronger than at any other time this year. A St. John cargo was recently sold at £8 c.i.f. London, it having been an exceptionally good specification, namely, 50 per cent. 3 × 9 and a fair proportion of 3 × 11. The recent auction sales have also reflected the improvement in spruce, third quality regulars bringing £9 5s. per standard. In some quarters a famine in certain lengths of spruce is predicted before next year's shipments arrive. White pine deals are also showing an expanding demand, accompanied by a disposition to store stock in anticipation of higher prices later on. Red pine deals are also considered good property. There is an upward tendency in birch planks, of which the stocks for immediate shipment are light.

STOCKS AND PRICES.

The City of Winnipeg, Man., is asking for tenders for a supply of lumber.

The largest tow of logs ever brought across the Lake of the Woods from Rainy river was towed by the steamer Mather for the Keewatin Lumber Company last week. It comprised upwards of 3,000,000 feet of lumber.

The Long Lumber Company, of Hamilton, Ont., have purchased a large stock of logs at Novar, Ont., and will start cutting at once. They have also been successful in securing the contract for 300,000 feet of spruce for the new buildings to be erected in Toronto by Fairbanks Morse Canadian Manufacturing Company.

Messrs. Clairmonte, Man & Company say of the Barbados market: There has been no arrival with lumber during the fortnight. White pine continues in full supply, but spruce will soon be wanted. Last sale of white pine on the spot was at $22.60 per M. for merchantable and $16.60 for second quality. Last sale of spruce was at $21 per M for merchantable, and $15.05 for second quality, but it is now worth more. Last sales of Gaspe long cedar shingles were at $4.70 @ $5.66 per M, as to quality. Cedar laying, last sales $1.84 @ $1.92½ per M.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

ST. JOHN, N. B., Oct. 16th, 1905.—Conditions in the log-diving situation have shown no improvement since last writing, and as the usual time for closing of navigation approaches, the conviction becomes more deeply rooted each day that, with no logs at St. John and few at the booms at Fredericton, manufacturing cannot be resumed on the usual scale earlier than June next, when the first important ratts from the early drives will reach St. John. During the last six weeks the opinion has been freely expressed that little more would be done this fall in the way of manufacturing, but coupled with this opinion was always the hope that fall rains would bring out logs enough to keep the mills in cut during at least April and May, but as the weeks passed and no rain came, even this hope has been abandoned and the local manufacturers have now realized that nothing short of a miracle will prevent the long season of inaction as described above.

The eager demand for northern lumber for shipment to the United States continues, and if possible is more marked than was the case a month ago. Local values in this line have reached an unprecedented figure and what the immediate future will bring forth can only be conjectured. Reports from the up-river district of Maine show that conditions bearing upon the getting out of logs are very similar to those now existing along the St. John

EVERYTHING IN LUMBER AND TIMBER
DRESSED AND IN THE ROUGH
THE McLENNAN LUMBER CO., LIMITED
MONTREAL QUE.
Office and Yard, 571 DORCHESTER ST. P.O. Box 116

All indications point to a supply far short of the demand, and the situation now has every promise of a lumber famine in the Eastern States.

Local stocks of "American" deals are light; from 1,500,000 to 1,700,000 would cover the available. When this quantity has gone forward there is little probability of further offerings during the remainder of the season.

No lower quotation could be obtained upon "American" merchantable spruce deals (of say a twenty foot average length) than the following, f.o.b. St. John: 10's and 12's, $20.50 to $21; 9's, $19 to $19.50; Narrows, $15 to $15.50. 2x3, etc., merchantable (non-dutiable) spruce boards, $12.50 to $13 f.o.b. St. John.

Charters are being made at $3.50 per M. sup. feet on long lumber to New York City, with little prospect of change.

The more optimistic tone lately assumed by the Canadian wood goods trade in Great Britain has had as yet litttle if any effect upon local transactions in this line. Little is being done, shipments have been light during the past month, and with comparatively light stocks and production greatly curtailed, the winter promises to be marked by a greater than usual lethargy. Specifications consisting of 50 per cent. 7's and 8's, 35 per cent. 9's, and 15 per cent. 11's and up, are worth from $12 to $12.25 per M. sup. feet (⅔ price for fourths and ends) f.o.b. steamer St. John. Local stocks in this line aggregate in the vicinity of 3,000,000 sup. feet.

Freight rates to the West Coast are quoted at 42½s. per standard, with the probability of a further advance in the near future.

SPRUCE IN ENGLAND.

We mentioned some weeks ago that as the Autumn advanced spruce would follow suit, and we would see a marked increase in the price of this class of goods. Judging by recent events, says the Timber Trades Journal, of London, England, we think we have justified ourselves in the views we then expressed of the future outlook.

From all ports on this coast we hear of more trade, and the better feeling mentioned by us is still maintained, and shows an advance on the prices then ruling. We are informed that £7 7s. 6d. c.i.f. has been paid in Northern ports for a Bay of Fundy steamer cargo, whilst in the same direction a Miramichi steamer cargo is reported to have brought more than the foregoing figures. These sales are bringing cargoes yet to come along down to a minimum, but shippers are still enhancing their ideas, and are confident that before the season finally closes they will not have much difficulty in getting their own prices. Whilst on the subject of enhanced prices, readers must not all think it is extra profit for the shipper. There is now the heavy extra autumn premiums to be paid underwriters, and also there is the extra high rate of freight to be taken into consideration, for freights have rapidly risen during the last few weeks. We know 45s. was freely offered by shippers for a 1,000 standards steamer to load at St. John, and 47s. 6d. was also offered for Miramichi, but owners could not be persuaded to accept these rates. Shippers who have any stock they require to move, or contracts yet to fulfill, are bewildered as to where to obtain tonnage, even at 10s. above the rates ruling during the summer months.

SEIZURE OF LOGS.

VICTORIA, B. C., Oct. 10.— The Provincial Government has seized six large booms of logs that had been sold to United States mills and were being exported. The Legislature has announced that no timber shall go into United States, and that Americans must manufacture here if they use British Columbia timber.

It is understood that some of the logs seized by the Government belonged to J. S. Emerson.

The box factory of J. P. Abel, 116 De Gaspe street, St. Louis, Montreal, was burned recently.

The dry kiln in connection with the mill of E. H. Heaps & Company, at Cedar Cove, B.C., was destroyed by fire last week. The loss is about $10,000.

The portable saw mill belonging to Crate & Sparham, of Smith's Falls, Ont., and being operated on their timber limit near Franktown, was destroyed by fire a few days ago.

THE LOG MARKET.

"Logs will this winter advance to the highest price known to the trade on this coast." This statement was made by Mr. J. S. Emerson, the well known logger of Vancouver, B. C.

"I look for a price of $9 per thousand for fir logs before the winter is over," he continued, "and for that reason I am storing my booms to await the rise. I have figured out that by holding my booms for a few months I can make a lot more money than if I sold them now, and really there is no quicker way of making money than by allowing the logs to remain in the water.

"At present there is a strong demand for good fir logs at $7.50 per thousand. This is a much better price than obtained last year, when the loggers practically had to beg the millmen to take their product at from $6 to $6.50 per thousand. Last fall, and it is generally the case every fall after a fine summer, there was a surplus of logs. This year, however, the mills have been using more logs than usual, with the result that the market is practically bare at the present time.

"All the mills have tugs out along the northern coast keeping tab on the loggers, and wherever they see a boom in the water they snap it up. Bad weather is coming on, and the production in the woods will fall off greatly within a few months, but the demand for lumber will continue strong, with the result that the market will be absolutely bare in a short while. Then prices will jump, and the man with the logs will be on top. I shall have the logs.

"Clear cedar lumber logs are now selling for $10.50 per thousand. There is no demand for anything but the best cedar logs."

TIMBER LIMIT TRANSACTIONS.

The Vancouver Lumber Company, of Vancouver, B. C., have purchased considerable standing timber up the coast from the British Columbia Land and Investment Company. This timber was held under old leases of long standing. The same company has also purchased from J. C. Keith his Jervis Inlet holdings amounting to seven square miles of timber held under seven special licenses and containing about 30,000,000 feet. The timber was sold for about $3.50 an acre.

ACCOMPLISHED ALL THAT WAS EXPECTED.

Messrs. Errington & Ross, of Turbine, Ont., write under date of October 16th: "Please discontinue our advertisement in the CANADA LUMBERMAN, as it has done all that we expected."

The saw mill of R. Eade at Arner, Ont., was destroyed by fire last week.

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

Information given by addressing—

JAS. C. POND, Wis. Cent. R. R. Milwaukee

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry, Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads, one of which is about to be extended through the centre of the property. The company are prepared to sell this timber in blocks ranging from 5,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

FOR SALE—RED BIRCH, HEWED SQUARE, 12 inch and up, 12 feet to 16 feet long. Apply BOX 325 CANADA LUMBERMAN, Toronto, Ont.

WANTED, HARDWOOD SALESMAN TO cover Ontario and New York State, must be experienced and acquainted with trade, good salary to the right man. Address BOX 324 CANADA LUMBERMAN, Toronto, Ont.

A LARGE MILL IN THE EASTERN TOWNSHIPS cutting annually 2 million ft. birch lumber for English Market would like to find some one who could work up waste stock into chairs, etc. Renting part of mill with power for the purpose Address GREAT NORTHERN LUMBER CO., LTD., Scotstown, Que.

WANTED, NORWAY PINE, ALSO WHITE Pine—quantity No. 3 and No. 4, 1-inch, 1¼-inch and 1½ inch. Quote us f.o.b. Chicago. AMERICAN BOX COMPANY, Chicago, U.S.A.

I WANT TO BUY A SECOND-HAND SAW MILL that will cut from 15 to 25 M per day of 10 hours. Must be good and sound, with Lath Machine, Trimmers, Double Edger, etc. Address A. McBEATH, Kippen, Ont.

WANTED—LARGE QUANTITY OF 1-INCH Maple, must grade commonandbetter, state quantity, very best price and shipping point. Apply M. McBURNIE, care CANADA LUMBERMAN, Toronto, Ont.

WANTED—A MAN WITH A GOOD PORTABLE mill to saw lumber in the county of Hastings during the winter and spring of 1906 and succeeding one or two seasons. Address BOX 326 CANADA LUMBERMAN, Toronto, Ont.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this journal. Address, CANADA LUMBERMAN, Toronto.

WANTED.

LATHS BY CAR OR VESSEL, ANY QUANTITY, large or small, up to 10,000,000, 1½" or 1⅝". Address C. S. WENTWORTH & CO., 147 Milk Street, Boston, Mass.

SAWMILL PROPERTY FOR SALE, INTERIOR of British Columbia; favorably situated on railway, with good water facilities, 1,440 acres good timber; very convenient; capacity of mill 20,000 per day. Apply J. M., care CANADA LUMBERMAN, Vancouver, B. C.

WANTED—BIRCH, ASH, BASSWOOD, ELM, Oak logs, strictly 1st quality, carload lots, 10 inches and up. A small % of 15 to 20 inches taken, steady trade. Quote delivered price F.O.B, Buffalo or at point of shipment. Can use almost any length. For further particulars apply THE DAVID GILMOUR DOOR CO., Buffalo, N. Y.

WANTED.

IN NEW ONTARIO, A BUYER OR A PARTNER with capital, to take half interest in water power Saw mill and lumber busines. A large amount of timber adjacent to mills; this is a snap; will sell outright or half interest. Address HARRIS & Co., Day Mills, Ont.

TIMBER LIMITS FOR SALE

ON THE RESTIGOUCHE RIVER, N.B.

A large tract of wilderness land well timbered with spruce, cedar and hardwood, principally spruce of virgin growth, situated on the Restigouche about 20 miles above Tide Head; easy of access and can be operated with little expense. A rare chance for those wanting to embark in the manufacture of lumber. For further particulars apply to O. SMITH, Campbellton, Restigouche Co., N.B.

The saw mill of the Upper Yukon Consolidated Company at Caribou was destroyed by fire on October 14th. The mill had a daily capacity of about 30,000 feet and the loss is estimated at $50,000.

CURRENT TRADE CONDITIONS.

ONTARIO.

Manufacturers are have every confidence in the white pine market, which they believe shows strong evidence of continued firmness. The desire of American dealers to acquire stock even at the present high price is doubtless due to the falling off in the supply from the Lake Superior district, where there is very little lumber that has not passed out of first hands. Buffalo and Tonawanda wholesalers have been ready buyers of all the lower grades, which have been leading in point of demand all season. There is a constant enquiry for mill culls, which bring from $11 to $14 at the mill, according to location. Dead culls are worth from $7 to $9.

There is not much animation to the hardwood trade and prices are somewhat irregular. Mill run basswood, for instance, is held by some manufacturers at $20, while others are offering it at $18 and claim that even at this figure buyers are not plentiful. The salvation of the hardwood trade would seem to depend to some extent upon the extent of logging operations this winter. If the output is not greatly curtailed so as to permit of the existing stock of lumber being worked off, it may be difficult to maintain prices at the present low basis, and this notwithstanding the fact that the cost of manufacture warrants an advance.

QUEBEC AND NEW BRUNSWICK.

Some of the St. John mills have resumed operations, a raft of 1,000,000 feet of logs having arrived from the booms and about 2,000,000 feet more being expected. There is no hope, however, of getting out the many millions that are hung up on the Upper St. John river, and accordingly there will be a great scarcity of lumber next spring. There has been much activity in shipping to the United States, the figures for the three

months ended September 30th being $573,175.17, as compared with $336,178.64 for the corresponding time in 1904. These periods represent the shipments of lumber, clapboards, shingles, lath, pulp wood, etc. There were received at Boston in one week recently 24 schooners from the provinces loaded with lumber, shingles and lath. The demand continues active and the available supply seems to be steadily decreasing. The shingle market, on the other hand, lacks snap, which is the only reason why prices are not higher, as the supply is light. Extras are still offered at from $3.30 to $3.40 for Boston delivery.

MANITOBA AND BRITISH COLUMBIA.

The developments of the past two weeks have been in the direction of establishing higher prices for the lumber output of British Columbia. The coast mills, it will be remembered, cut the price of rough lumber for delivery to the Northwest to $17 because the Mountain mills had reduced prices with the object of capturing the Northwest trade. There was an actual loss in selling lumber at this price. The manufacturers of the province, therefore, held a meeting in Vancouver recently and agreed to sell at one price, namely, $19 per thousand. This agreement is looked upon with favor by the manufacturers and is likely to be followed by a further advance in the near future, as the business is not yet profitable. Orders are more plentiful and as the crops from the Northwest agricultural districts is likely to show up well, prospects are brighter than they have been for the past year. Dealers who purchased rough lumber at the minimum price of $17 will now be able to realize a good profit.

UNITED STATES.

The stability of the lumber market of the United States has not been impaired. As the fall advances the demand seems to grow more urgent, with the result that many dealers have more orders on their books than they can fill. The northern pine situation is exceptionally strong. The extensive purchases of a Chicago dealer have been no small factor in sustaining prices, as it is said that about one-half of the total Lake Superior production has thus been absorbed. Such a condition does not inspire much hope of lower prices during the winter months. A strong demand continues at Buffalo, Tonawanda and New York, which points practically reflect the conditions existing throughout the whole Eastern States. Box and No. 1 and No. 2 barn are in short supply. Hemlock sells very readily and in some districts the demand is greater than the supply. A slight change for the better has occurred in the hardwood trade. Orders are more plentiful and prices a little firmer. There is a splendid call for plain oak, ash and birch, while elm, basswood and maple do not show as much life.

White pine and norway lath are eagerly inquired for. Chicago wholesale dealers are shipping white pine lath in mixed cars at $5.25: No. 2 white pine at $4.50, No. 1 norway at $4.75, No. 1 hemlock at $4.50, and No. 2 norway at $4.25.

GREAT BRITAIN.

The improved conditions recently noted are becoming more marked. Inquiries for lumber are increasing notwithstanding the advance in prices which has taken place during the past few weeks. Transactions in spruce are quite numerous. The prevailing prices for spruce in the docks are £10 per standard for 3×9 inch second quality, £9 5s. for thirds, and £8 10s. for fourths. Importers are also willing to pay higher prices for stock to be delivered. Two cargoes from St. John, with about 60 per cent. seven and eight inch, changed hands recently at about £7 17s. 6d. per standand, and it is stated that for a small cargo from one of the Baie Chaleur ports, with 60 per cent narrow stock, £8 2s. 6d. c. i. f. has been declined. The position of Quebec spruce in London and Liverpool is reported to be very strong. In second quality, 3×9 inch, there has been a rise of 5s. to 10s. during the past few weeks. The white pine market is firm but does not show the activity which characterizes the spruce trade. Birch lumber is said to be slated for an advance in the near future, the supply being light. Waney pine timber, on the other hand, is sluggish, the high price having greatly restricted consumption and induced the use of substitutes as far as possible.

STOCKS AND PRICES.

John Brooks has moved his portable saw mill from Kent county to Brooklyn, N. B., to saw for Charles Pickard. He expects to cut 1,500,000 feet.

A considerable quantity of timber will be required for a new wharf to be constructed at St. John, N. B., for which D. C. Clark has secured the contract. The timber to be used will consist chiefly of hemlock, red pine and southern pine.

The Big Bend Lumber Company, of Arrowhead, B. C., have started a large logging camp at Fourteen Mile, below Revelstoke, and another extensive camp is to be put in at Fosthall Creek. The company figure on putting in three more camps the coming winter, making five in all.

When blown-down white pine timber will bring $7.50 per thousand, and norway $6.50, the value of pine stumpage in the north can be appreciated. It also, in a way, explains why No. 6 boards are selling for about $6.50 on the docks at Duluth.

Two large rafts of pulp wood, which were being towed from Musquash to Mispec, N. B., went to pieces between Cape Spencer and Black Point and drifted out to the open sea. The rafts belonged to the Inglewood Pulp Company and contained about 1,000,000 feet, practically all of which will be lost to the company.

ST. JOHN LUMBER SHIPMENTS.

According to figures obtained at the office of the United States Consul, the lumber shipments from the port of St. John, N. B., to the United States during the three months ended September 30th were much greater in value than those for the like period in 1904. The figures in detail are given below:

FROM NEW BRUNSWICK LOGS.

	1904.	1905.
Long Lumber..	$ 36,293.74	$124,877 54
Lath	70,807.37	96,688.86

Grand Totals..	$336,178.64	$573,175.17
Increase, 1905 quarter		$236,996.53

TIMBER LIMIT TRANSACTIONS.

The sale of the 800 acre lot of timber land at Memel, N.B., belonging to James C. Wright, which was made by public auction last August to Warren Downey for $16,050, has been declared off and the property was sold last week to W. Malcolm Mackay, of St. John, at private terms. Peter J. McClelan, of Riverside, will have control of the property and will conduct the lumbering operations, which will be commenced at once. Mr. McClelan owns an adjoining property at Memel of about 690 acres, and the two properties make one of the most valuable timber areas in the province.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., October 23rd, 1905.—Conditions in the lumber industry in British Columbia are very good at present, and especially does this pertain to the coast mills. Local demand is brisk, Northwest trade is better than for many months, and the export business continues on a fairly large scale. In the last letter reference was made to the large number of ships which were loading at the Hastings mill, and figures which have since been made public show that this year will be one of the best in export the Hastings mill has had for some time. Approximately 40,000,000 feet will be sent to various parts of the world. At the Chemainus mills, also, ships are constantly taking on cargo for foreign ports.

Local mills are working full time with orders. This is the time of year when trade with the middle west is good, and added to this is the great local consumption of lumber. Building has been going on apace in Vancouver this year, which will be one of the best on record. Heaps & Company, The Royal City Mills, the Pacific Coast Lumber Company, the Rat Portage Lumber Company and the Vancouver Lumber Company are all very busy with local orders.

Prices are firm, without change. An advance is looked for in logs, but this may be stood off for a while owing to the coup[illegible] weeks of very fine weather which has followed the wet September. Many logs will have been put in the water to supply the demand which shows as yet no signs of decreasing. Loggers are very confident that a sharp jump will be made before long in the price.

The continued poor condition of the shingle business is the only bad feature in connection with the industry. While prices do not alter to any extent, the demand is comparatively slack, without much prospect of immediate improvement.

Much activity is displayed on Vancouver Island. Americans are to the fore in securing large tracts of timber for sawmill purposes, and when they erect mills they will cut for the export trade. Work is progressing on the plant of the Seattle Cedar Lumber Manufacturing Company near Clayoquot. This will be a shingle mill having the capacity of 380,000 shingles every ten hours.

The E. H. Heaps Company had a bad fire last Tuesday when their dry kilns were burned with something over $10,000 loss, partly covered by insurance. The men at the mill, with the brigade, worked several hours in saving the rest of the mill. Just at the time that the alarm was given, Mr. E. H. Heaps was proposing the health of his son's bride, the wedding having taken place that afternoon.

The Elk Lumber and Manufacturing Company, whose mill at Fernie was burned down recently, announced that the rebuilding would take place at Hosmer, some miles from its former site. The C.P.R. offered inducements to this end, but the company has since decided to erect its new mill at Fernie. The structure will be of steel, and as nearly fireproof as it is possible to make a saw mill.

NEW FREIGHT TARIFF.

The new C. P. R. lumber tariff on eastbound shipments from British Columbia, the conditions and terms of which were arranged in Vancouver several weeks ago, at a conference between representatives of the mills and C. P. R. freight traffic officials, took effect on November 1. The principal concession made by the railway to the lumbermen is the granting of the fir rate of forty cents per hundred pounds into Manitoba to rough cedar shipments which at present take a fifty-cent rate. The fir rate of fifty cents to Fort William is also to be dropped to forty-five cents. Mixing of fir and rough cedar and shingles in cars is also permitted at respective carload lot rates.

SPRUCE IN ENGLAND.

One week seems to bear a very close resemblance to another with regard to spruce, says the Timber Trades Journal of September 21st. The season can now be said to be practically at an end, as the steamers to clear with the large deck loads have all sailed from their loading ports (the Canadian law prohibiting their departure after the 12th inst.), and as far as we can learn, are practically all disposed of, the latest sale being a 1,700 standards St. John cargo, containing 70 per cent. 7 in. and 8 in., with about 5 per cent. 3 × 11, at a fraction under £7 17s. c.i.f. to a Bristol Channel port. We should say that this compares

LUMBER AND LATH
CACHE BAY, Ont.
C. P. R. 26 miles West N[illegible]h Bay

favorably with the sale reported in our last issue of a steamer cargo to the same district, this latter cargo containing 50 per cent. 3 × 9 and 10 per cent. 3 × 11, at £8 c.i.f. The iron and steel industries in the Midlands report active trade. This should have a tendency to give a healthy tone to the consumption of spruce at the Bristol Channel ports, and there is sufficient enquiry about to encourage the hope that still better reports will be forthcoming. In the North-West districts we have heard of no new sales to report, but judging from the visible activity in this neighborhood, we should say that spruce maintains the enhanced prices merchants paid.

ADVANCE IN LUMBER PRICES.

Representatives of the lumber industry from all over the province of British Columbia held a meeting at Vancouver on October 23rd, when it was agreed to maintain a regular schedule of prices. For some time past there has been war between the manufacturers of the interior and the coast, as a result of which the coast men reduced the price of rough lumber from $19 and $20 to $17. This practically put a number of the interior mills out of business. Now a satisfactory and harmonious basis has been arrived at.

Rough lumber has been restored to $19, and is selling at that price uniform throughout the province. Because of the stiff price of logs and the almost sure increase which is to come, millmen claim that this has necessitated a $1 per thousand raise on all kinds of lumber.

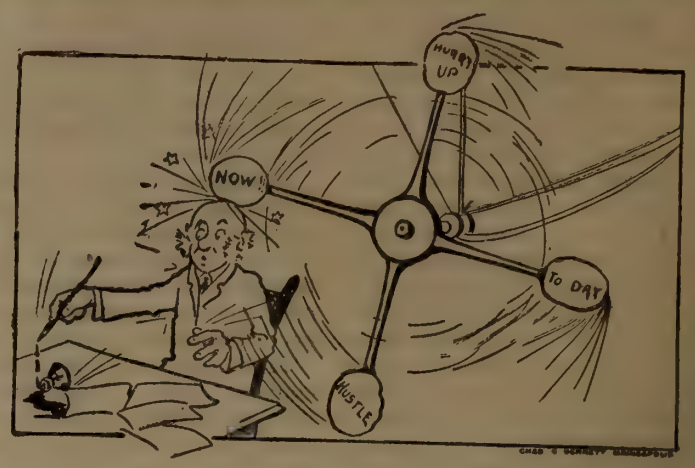
In addition to the local members of the British Columbia Lumber and Shingle Manufacturers' Association who were present at the meeting, those from the interior were: Mr. F. W. Jones, manager of the Columbia River Lumber Company, Golden; Mr. Peter Lund, manager of the Crow's Nest Pass Lumber Company, Wardner; Mr. George P. Wells, of Palliser; and Mr. E. A. Watts, of Cranbrook.

In addition to the matter of prices, subjects of general interest to the industry were also discussed.

BUSINESS NOTES.

The assignment is announced of the Detroit Box Company, Detroit, Mich. The list of creditors reaches seventy-five and the total liabilities $68,104.41. One or two Canadian firms are interested.

Mr. Justice Perdue has made an order appointing the National Trust Company receivers of the Manitoba Lumber Company, which carried on business at Winnipeg, Roland, Carman and elsewhere. The application was made at the instance of the Foss Lumber Company. It is claimed that the directors have sold out their stock, that the concern is insolvent and the assets of the company are now being sold without there being any board of directors in charge.



JUST A GENTLE REMINDER

That's all—a reminder that we can supply your wants in the lumber line.
It's up to you NOW to realize that fact and to open up correspondence with us.
Don't forget that SPRUCE LUMBER is our specialty—and should be yours. Let us tell you why.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

TIMBER LIMITS FOR SALE

ON THE RESTIGOUCHE RIVER, N.B.

A large tract of wilderness land well timbered with spruce, cedar and hardwood, principally spruce of virgin growth, situated on the Restigouche about 20 miles above Tide Head; easy of access and can be operated with little expense. A rare chance for those wanting to embark in the manufacture of lumber. For further particulars apply to O. SMITH, Campbellton, Restigouche Co., N.B.

The stock of the estate of Balsden & Blewett, planing mill, etc., St. Thomas, Ont., has been sold to H. Lindop, at 62 cents on the dollar.

CURRENT TRADE CONDITIONS.

ONTARIO.

White pine lumber prices are uniformly strong. The good end, which was somewhat neglected earlier in the season, has now fallen into line as the result of the improved outlook in the British market and an increasing demand from the Eastern States. Recent price lists show a sharp advance in the upper grades, which is regarded very favorably in view of the fact that the quantity of these grades held at the mills is larger than of the lower grades, of which there is a very light supply. The mill price of inch No. 1 pine cuts and better is $49, and 1½ to 2 inch No. 3 cuts and better, $40. The common grades have remained about stationary during the past fortnight, but good buying has been in evidence and there is no pressure of stock on the market. There is no disposition, however, to advance prices to the limit of possibilities, as such action would sooner or later curtail the consumption. There is no cessation of the activity in building operations and the prediction has been made, in reference to the city of Toronto, that the extent of building next year will be even greater than this season.

White pine lath is still the strongest feature on the list. Most of the mills are now asking $3.75 for No. 1 pine of standard length, although this grade is still retailing in Toronto at from $3.85 to $4. There is not a strong demand for shingles, which are selling at unchanged prices.

QUEBEC AND NEW BRUNSWICK.

The situation as to spruce lumber shows no alleviation. Orders from the Eastern States are being refused on account of inability to supply the stock. There is every reason to believe that prices will witness a further advance, as there is no probability of supplies being increased during the winter months.

Several vessels are loading at Nova Scotia ports for South America and the West Indies. New Brunswick shingles are showing more activity and many of the sales of the past week have been made on a higher basis. Extras may be said to be established at $3.35 for Boston delivery. Lath are scarce and the demand brisk.

UNITED STATES.

Lumber is being moved as rapidly as possible from the mills to the distributing centres, the activity in shipping having caused a sharp advance in freight rates, which now rule at $4 a thousand from Lake Superior to Buffalo and Tonawanda. Dealers seem anxious to get forward as much lumber as possible on account of the urgent demand. Business is much larger than at the corresponding time one year ago. A new wholesale list was issued in Chicago last week in which advances of from 50 cents to $1 were made on 6-inch fencing strips, stock boards, piece stuff and timbers. The White Pine Association at Buffalo is understood to be about to adopt a new list, which will doubtless show some advances. The tendency of the spruce market is towards still higher prices. A few days ago the price at Philadelphia was advanced $2 on the entire list. Boston prices are now strong at $24 for 9 inch and under and $25.50 for 10 and 12 inch random lengths, 10 feet and up, but some wholesalers are holding their stock at $1 above these figures. The hemlock trade is very satisfactory. In the east prices are strong on a basis of $19.50 a thousand. The finishing demand is responsible for more activity in the hardwoods. Oak, birch and ash are selling quite liberally. There is also a moderate movement in maple and basswood, but prices are comparatively weak.

The movement to close down the shingle mills of the state of Washington is making satisfactory progress, about 90 per cent. of all the mills having signed. Prices of red cedars are no more than steady. White cedars are in better demand and Extras are quoted at $3 wholesale at Buffalo. The lath demand continues to expand and is not likely to fall off until the cessation of building operations. No. 1 white pine are selling in Chicago at $5 in carload lots and No. 1 hemlock at $4.25 to $4.50.

GREAT BRITAIN.

As the importing season draws to a close, the healthy condition of the British lumber market is more generally admitted. Stocks are exceptionally small, and the demand is improving. The spruce market continues very firm, with higher prices for special dimensions. A Liverpool correspondent states that £8 5s. has been obtained for 7 and 8 inch by 3 inch, £9 for 9 by 3 inch, and £10 for 11 by 3 inch. There is not a large trade in white pine, but on the other hand no weakness is apparent. Red pine is improving and prices have advanced about 8s. since midsummer. Flooring is strong and many of the larger shippers are asking 5s. advance on the prices of a month ago.

STOCKS AND PRICES.

The barque Lingard sailed last week from Yarmouth, N. S., for Rosario, South America, with 984,000 feet of lumber.

The Dickson Company, of Peterboro', Ont., have put in six camps this winter in Cavendish and Austruther townships.

Ritchie Bros., of Aylmer, Que., have given the contract of clearing out their Eardley limits this winter to Mr. Riddle, of Eardley.

J. W. Short, of Kenora, Ont., has put in three tie camps. The Mackey Syndicate are putting in two camps in the vicinity of Shoal Lake.

Thomas Hickey, of Marysville, B. C., has been given a contract to get out 2,000,000 feet of logs for the Kimberley Milling and Manufacturing Company. The company will get out 3,000,000 in addition.

The Alfred Dickie Lumber Company, of Stewiacke, N. S., are prepared to let a contract for cutting about 1,500,000 feet of lumber this winter with a portable mill.

Two rafts of logs, comprising 7,000,000 feet, the property of the Rat Portage Lumber Company, were scattered during the recent rough weather on Rainy Lake, near the C.N.R. bridges, but most of them were recovered.

Indications point to higher prices for slack cooperage stock, as the market has recently been cleared of considerable low grade stuff. Jobbers at Buffalo quote first-class dry elm flour barrel staves at $8.50 to $9, heading at 5½ to 5¾ cents, and 6-foot hoops at $9.50 to $10.

The Gatineau log drive reached its destination near Gatineau Point last week. When the drive started from Maniwaki, towards the end of August, there were 300,000 logs to be brought down, and of this number 100,000 were in the final sweep. These figures are considerably in excess of those of 1904, and it is estimated that the contractor handled one and a quarter million logs for the different concerns during the year.

Some 3,500,000 logs were sawn by the mills in the vicinity of Three Rivers, Que., during the season now closing. Of this number, about 2,000,000 were sawn by the Three Rivers mills. The remaining 1,500,000 were sawn by the Grand Mere and Shawinigan Falls mills. About 2,500,000 logs of last winter's cut remain undriven in the Upper St. Maurice and its tributaries. It is estimated that some 5,000,000 logs will be made on the St. Maurice the coming winter.

Most of the New Brunswick lumber operators have crews in the woods. It is estimated that the cut will be somewhat less than last year. Wages are ruling high, $32 in some cases being paid for good men. Before the shutting down of the mills some operators wanted to send in early men to the woods, and they had to bid high in wages. This, together with the fact that the men are getting a higher rate in Maine this year than last, has tended to make the wages on the Miramichi higher.

It is expected that rafting operations at the Mitchell boom at Fredericton, N.B., will be completed some time this week. Since October 7th, when work was resumed, about 5,000,000 feet have been rafted and towed to St. John. The boom company do not expect to winter any logs in either the Douglas or Lincoln booms. At the present time there are about eight million feet of logs hung up in the main river between Grand Falls and Kilburn, and there are about twenty million at different points above the Falls. There is little chance now of getting these logs into the booms this fall, and there is danger of them going out with the ice in the spring.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company, under the date of October 21st, refer to the lumber market as follows: We have no arrivals to report in either white pine or spruce, in consequence of which our market has assumed a somewhat better tone, and although there is still a fair supply of former in some dealers' yards, others are getting bare, and we think one or two corgoes, especially of merchantable quality, would sell readily at remunerative prices, while second quality would also do well in view of the scarcity of spruce. This last named description is in very light stock, and first arrivals, especially of shipping, should realize good prices, as cooperages require this for headings.

The cargo of the schooner "Bravo" from Paspebiac, consisting of 840,000 shingles, principally Long Cedar, realized in the vicinity of $4.20; while for a small batch of extra quality a slight advance was paid. A few dimension which she brought down, and which were wanted, brought $4.21, $6.07, $7.80 and

Schooner Island City, for New York, 133,297 ft. deals and scantling, 83,021 ft. pine boards, 50,426 ft. spruce do, 252,000 staves.

THE HARDWOOD MARKET.

General hardwood conditions throughout the United States, so far as the selling qualities of hardwoods go, are eminently satisfactory to all interested in the trade, says the Hardwood Record. On the contrary, quite a number of lines of hardwoods are in short supply, notably plain oak, ash and chestnut.

The most serious condition that confronts trade activity in hardwoods at this writing is the annual car shortage, which seems to be more severe right now than at any time in previous railroad transportation history. Individual railroads are from 500 to 5,000 cars short of requisitions, and this state of affairs will undoubtedly last until the large grain and cotton movement ceases. Railroad men figure that lumber is not a perishable commodity, neither is it one for which adequate storage room cannot be provided, and therefore they say lumber can wait. General movement of freight of all classes is slow at this time on account of the congested condition of nearly every line of railroad. Even fast passenger trains are repeatedly held up, owing to freight blockades.

There is nothing to note in special accretion or decline in the values of any hardwood. Trade is going on steadily with a fair volume, and there is an excellent prospect that stocks will be nearer cleaned out of first hands by January 1 next than ever before in the history of the lumber trade.

An application is reported to have been made for a winding-up order for the Preston-Bell Furniture & Lumber Co., Fort Frances, Ont.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

St. John, N. B., Oct. 31st, 1905.—The quiet in spruce manufacturing circles in this vicinity continues. There is absolutely no prospect now of any important quantity of long lumber of any description being available before June 1st next at the earliest. The output of shingles has also been materially curtailed during the last week by the cessation of operations at one of the largest mills. While rafting operations have been carried on by the Fredericton Boom Company during the last three weeks, the probable quantity of logs secured by each manufacturer does not warrant the starting of the mills this fall.

This state of inaction is particularly unsatisfactory just at this time because of the increasing strength of the markets in most of the more important lines.

Cedar shingles, which have been rather draggy all through the year, have been in better demand during October and all indications point to a greater volume of business during the next month, although this condition is different from what is ordinarily the case, the late fall being marked by little stimulus in this line owing to the approaching end of the building season in the New England States. The higher grades are particularly strong; local stocks of clears and extras are practically cleaned up and enough orders booked to take care of the output of the next six weeks, which will mean the end of the season for the most important cedar mills.

Local values in extras and clears are slightly firmer than was the case a month ago; on the few that are for sale no less quotation could be obtained at this date than $2.95 on non-dutiable extras, and $2.45 on non-dutiable clears, f.o.b. St. John.

For the lower grades the demand is somewhat slow and stocks are consequently rather heavy. These stocks of low grades consist chiefly of dutiable shingles, to which the United States markets are practically barred on account of the duty, viz., 30 cents per thousand. For this reason the local manufacturers depend almost entirely upon the provincial trade to dispose of this class of goods, but this trade during 1905 has been below the average, hence the end of October finds in the vicinity of 4,000,000 of the lower grade shingles at the local yards. 2nd Clears have been selling at $1.75 and No. 1's at 95 cents per. M. f. o. b. St. John.

The flourishing condition of trade in lath continues a feature and the situation shows no indications of a weakening of the high figures now prevalent; rather the tendency seems to be toward even higher prices. Local stocks are light; 3,000,000 would cover all available and this quantity is shared in by half a dozen dealers.

No lower quotation could be obtained on spruce lath at this date (f. o. b. St. John) than from $2.85 to $2.95 for non-dutiable and from $2.60 to $2.70 for dutiable.

Charters by schooner to New York City on lath are being made at 70 cents per M and to Boston on shingles at 30 cents per M, with all indications pointing to the probability of these figures being maintained during the balance of the season.

Reinhold Anderson, lumber dealer, Pinewood, Ont., has assigned.

The shingle mill of the Fraser River Lumber Company at New Westminster, B.C., was destroyed by fire on October 24th. The loss is $12,000 and the insurance $7,000.

The lumber barge "Vesta" was recently burned to the water's edge at St. Michael's Bay, an indenture of Georgian Bay. It was a large vessel and owned by W. J. Pulling, of Windsor, Ont.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local condition s anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this Journal. Address, CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

The remarkable strength of the white pine situation is still universally admitted. Dealers report difficulty in finding suitable stock to fill orders, as there is a very small quantity of the lower grades in first hands. There is also a scarcity of thick stock in the higher grades, also twelve-inch export boards. Shipping to the United States is quite active, and this, with the phenomenal local demand, is keeping dealers and manufacturers very busy. Unfortunately, as much cannot be said for the hardwoods, which are moving rather slowly, with prices very irregular. Birch has been a good seller all season at firm prices, but there is still a plentiful supply of dry stock at the mills. There is no improvement in the demand for basswood, which apparently is being almost entirely neglected by consumers. In order that the basswood market may be sustained and prices held at even the present low basis, it will be necessary to curtail the production of logs this winter. Common and better basswood is said to have been offered during the past fortnight as low as $18 at the mill without finding a purchaser.

White pine and white cedar shingles are very quiet, and, as far as can be estimated, are losing ground through the competition of the red cedars. Lath prices show no indication of weakening.

QUEBEC AND NEW BRUNSWICK.

Very favorable reports come to hand from the Eastern Provinces. The better grades of lumber are being bought up for export and the local grades for local consumption. In view of the strong statistical position, an advance in prices is taken as a foregone conclusion. There has been heavy buying of spruce for export to the Eastern States, where prices have advanced much more sharply than in Canada, with the result that buyers have turned their attention to this side. Stocks are being rapidly cleaned up, and in some localities very little can now be purchased. There is now some prospect of getting out the 8,000,000 feet of logs stranded on the St. John river between Grand Falls and Kilburn, but many lumbermen are of the opinion that unless the logs can be driven to the booms it would be advisable to leave them where they are rather than have them hung up at some point where they would be certain to go out with the ice in the spring. The demand for New Brunswick cedar shingles is fairly active and prices a little firmer.

MANITOBA AND BRITISH COLUMBIA.

The lumber market of Western Canada is in a more healthy condition than for some time past. The demand is increasing and the supply at the mills and in wholesale yards is diminishing. The Mountain Lumber Manufacturers' Association, at a meeting last week, discussed the question of advancing prices, but decided to take no action before the annual meeting in January, when it is probable that a higher price list will be adopted. The shingle demand is very good, but stocks at the mills are still heavy.

UNITED STATES.

Orders plentiful and stocks hard to get, explains the situation in respect to the white pine market of

the United States. The volume of business is restricted by the inability of manufacturers and dealers to supply the stock. There has been received at Chicago this season a total of 1,821,415,000 feet of lumber, as against 1,352,292,000 feet in the corresponding period of 1904, a gain of nearly 500,000,000 feet. Tonawanda receipts are 55,000,000 feet in excess of last year. These figures reflect the strong demand which has prevailed all season. Building operations in Chicago have been 50 per cent. greater than in 1904. The dealers there have issued the new list making an advance in 6-inch fencing, 8, 10 and 12-inch stock boards, timber, joists and scantling, and lath. The price of No. 1 white pine lath in car loads is $5.25; No. 2, $4.50; No. 1 norway, $4.75; No. 2, $4.25; No. 1 hemlock, $4.50; No. 2, $3 75.

The hardwood demand is largely from manufacturers, which is taken to indicate that they are carrying light stocks. Ash is moving freely and the furniture manufacturers are taking considerable quantities of low grade birch. The outlook for basswood also seems to be more promising, as several manufacturers report having made large sales during the past month.

GREAT BRITAIN.

The outlook for the lumber trade of Great Britain seems to be more promising than at any previous time this year. Consumption is gradually increasing as the result of a better general trade throughout the country. A Liverpool report says: "Prices in nearly every direction are on an upward move and a glance at the statistics of import, consumption and stock will show all round a much improved condition compared with that of last year and even with that of last month."

The stock of Canadian pine deals in the public docks at Liverpool on October 31st was 821,000 pieces, as compared with 1,161,000 pieces in 1904. The spruce stock was 897,000 pieces, as against 1,124,000 pieces last year. Pine timber also shows a diminished supply, the quantity of stock being 557 loads as compared with 868 loads in 1904. The greatest improvement has been in spruce, which has advanced steadily for the past two months. A recent sale of Nova Scotia spruce deals was made at a shade over £8 per standard c.i.f. Liverpool. In hardwoods, birch may be said to be leading, although there is a very satisfactory demand for oak planks.

STOCKS AND PRICES.

J. Walter, of Strathcona, Alberta, purposes taking out 8,000,000 feet of logs this winter.

E. W. Hogan & Sons, of Fort William, Ont., intend taking out 75,000 ties this winter.

The Cedar Valley Mill Company, of Fernie, B. C., are logging with a crew of thirty men. They expect to operate the mill continuously next season.

Thomas Leask and J. J. Grady have secured about 10,000 acres of timber limits in the vicinity of Erickson, B.C., where they purpose building a saw mill.

Donald Fraser & Sons, of Fredericton, N.B., will cut about the usual quantity of logs this winter, notwithstanding that they are wintering about 10,000,000 feet. Their mills at Plaster Rock, Baker Brook and Cabano are now sawing shingles.

The Miramichi Lumber Company, which recently acquired the timber limits and lumber property of Wm. Richards, of Chatham, N. B., have sent large crews into the woods and expect to get out about 22,000,000 feet of logs. They are operating on the Taxes river, Cain's river, and Sisters and Rocky brooks.

The Rat Portage Lumber Company, of Kenora, Ont., will not take out a large quantity of ties this winter, as one or two firms in the Lake-of-the-Woods district have a considerable stock on hand. John W. Short has three tie camps in operation, one at Gull Bay, another at Sabaskong, and the third on the Little Traverse. D. L. Mather has several camps on Vermillion Bay.

In view of the large demand for building material, logging operations in the northern part of Manitoba are quite active this winter. T. A. Burrows has one camp in the Riding Mountains and two in the Duck Mountains, the timber to be floated down the Valley river, and one near Lake Singoosh, the timber to be sawn there this winter. The Hanbury Manufacturing Company, of Brandon, have a camp on the Shell river. Mr. Sinnot has a camp in the Duck Mountains and Mr. Harper one in the Riding Mountains. The total output of logs by the above camps is expected to exceed 20,000,000 feet.

Breckenbridge & Lund, of the Crow's Nest Pass Lumber Company, of Wardner, B. C., are establishing three camps on the St. Mary's river, one about four miles above Marysville and the other two miles above Matthews' creek. They expect to cut about 6,000,000 feet of timber this winter and will drive the logs down into the Kootenay river and on to Wardner. Logging will also be done extensively on Cherry creek and Skookum Chuck by the Crow's Nest Pass Lumber Company. About 40 timber locations on Skookum Chuck, Kootenay district, have been surveyed this fall and applications filed for licenses to cut timber in this district. As these will probably all be granted, Skookum Chuck will present a very busy scene this winter. The district around the mouth of White river is also receiving the attention of the loggers and about 18 applications have been made for permission to cut timber in that district. St. Mary's lake is another objective point for loggers this year.

THE GLASGOW MARKET.

According to Messrs. Edmiston & Mitchells' monthly timber circular of October 31st, business during the past month has shown considerable activity, transactions have been numerous in wood goods of nearly all kinds, and this, too, in spite of a smart advance in prices in some instances. In sympathy with the rise in freights, spruce has advanced sharply, and the same may be said of pitch pine to an even greater extent, while still higher prices are predicted in the near future. The statistical position on this side certainly favors this view, and it only requires active trade conditions to see stocks at an altogether abnormally low point for the beginning of the winter season. For Quebec pine deals there also has been more demand recently, but prices have not advanced to any extent, though the tendency is an upward one. Apart from the foregoing, the only other goods in special demand have been oak planks, attractive parcels of which are scarce, and as wagon builders in this district are pretty fully employed, the demand is likely to continue brisk.

WHITE PINE.—The import consists of about 800 loads waney pine per liners from Montreal. The demand during the month has been rather better, and some fairly good lines have been placed, chiefly in waney pine deckwood. Stocks are ample. Prices are firm.

OAK.—There has been no import during the month. Enquiries have been more numerous, and deliveries from ponds, both of Quebec and States oak, have been good. Stocks are still rater heavy. Prices are steady.

ELM. — Enquiries during the month have been few, and any sales effected have been chiefly in second class timber. Prices continue firm. Stocks are moderate.

BIRCH (Quebec). — The October import, which was trifling, was disposed of from the ship's side, a small lot of about 18-inch average bringing 2s. 3d. per foot "ex quay." While there is a fair stock of logs on hand, they are mostly of indifferent quality, and shipments of good, fresh timber would meet with a ready sale. Of Quebec planks, there were one or two imports, some of which were sold "ex quay" at round about £10 15s. to £11 per standard "ex quay," and some

Office and Yard, 571 DORCHESTER ST. - - P.O. Box 116

stored. In New Brunswick birch, there has been no business of importance done during the month, though there are several enquiries for logs averaging about 14 to 15 inches.

ASH.—The market is bare of good logs, and a few small shipments of these would meet with ready sale. The nominal value of 15-inch average is round about 2s. 3d. per foot.

DEALS, ETC.—Business has been fairly active during the month. The imports continue on a moderate scale, and buyers are showing a little more eagerness to secure their requirements before the season closes. Stocks of deals of all kinds are low. Prices of pine goods are unaltered. Spruce is firmer. Current values as under:—Broad First Pine Deals.—£33 to £35; 11-inch, £30 to £32; Ends and Non-Dimensions, £23 to £25 10s. Second Pine Deals.—11-inch and up, £18 10s. to £21; Ends and Non-Dimensions, £13 to £14 15s. Third Pine Deals.—11-inch and up, £11 10s. to £14; Ends and Non-Dimensions, £9 10s. to £10 10s. Red Pine Deals.—9 and 11 inch, £9 10s. to £10 10s.; Narrows, £7 10s. to £8 10s. First Pine Sidings and Strips.—9 to 10 inch, £23 to £24; 11 to 12 inch, £25 to £26; 13 to 14 inch, £27 to £28. Spruce Deals.—9 inch and up, £8 10s. to £9 5s.; 7 and 8 inch, £7 10s. to £8. Lower Port Pine and Spruce.—9-inch and up, £8 to £8 10s.; 7 and 8 inch, £7 5s. to £7 15s.

THE HASLAM PROPERTY.

The tenders for the timber limits, saw mill and sash and door factory of A. Haslam, Nanaimo, B. C., were opened on November 1st.

The highest bid received for the entire property was $65,050, put in by J. S. Emerson of Vancouver. But three bids for the property as a whole were received. The second highest was that of George Bertram for $65,000, while the third bid, that of George Williams & Company, of Nanaimo, was for $64,000.

In the tenders for single parcels of timber land held under lease and subject to an annual rental to the Government of ten cents an acre, one good bid was received from W. F. Huntting, of Vancouver, who offered $20,250 for parcel No. 6. This parcel comprises lots 996 and 1585, on Vancouver Bay, Jervis Inlet, and contains 2373 acres carrying 20,000,000 feet of fir, 7,000,000 feet hemlock and 50,000,000 feet of cedar. The price offered by Mr. Huntting was at the rate of $8.53 an acre. The limits lie two and a half miles from salt water and are reached by a railway line already laid.

For two other parcels, namely, Nos. 3 and 4, much smaller bids were made. For parcel No. 3, lying between Otter Cove and Elk Bay, Discovery Passage, Vancouver Island, and containing 835 acres with a likely yield of 12,000,000 feet of timber, only $1.25 an acre was bid by T. Jerome.

Parcel No. 4, containing 3182 acres on Theodosia Arm, three and a half miles from salt water, and carrying 66,000,000 feet of fir, 33,000,000 feet of cedar and 15,000,000 feet of hemlock, brought a bid of $3.52 an acre from F. L. Miller, and one of $3.15 from T. Jerome.

Owing to the low bids, the assignees decided to call for new tenders, to be in by Monday, November 6th. The new tenders were as follows: Ladysmith Lumber Company, $72,450; R. D. Merrill, $72,250; Chemainus Lumber Company, $71,700; Palmer & Company, $71,000; J. S. Emerson, $70,000; Armstrong & Morrison, $68,000; Jerome & Co., Seattle, $69,000; Geo. Williams & Co., $58,000. The assignees decided to accept the tender of the Ladysmith Lumber Company. J. W. Coburn, manager of the Ladysmith Lumber Company, states that it is the intention of his company to put the mill in first-class condition and resume operations at the earliest possible date. It is understood that the sum realized will pay little more than the preferred claims.

MOUNTAIN LUMBER MAUFACTURERS' ASSOCIATION.

A meeting of the Mountain Lumber Manufacturers' Assaciation was held at Nelson, B. C., on Monday, November 6th, at which the following were present:

F. W. Jones, Columbia River Lumber Company, Golden; A. Leitch, East Kootenay Lumber Company, Cranbrook; W. F. Gurd, Cranbrook; J. G. Billings, Yale Columbia Lumber Company, Nelson; Otis Staples, Bayard; T. A. Ludgate, Big Bend Lumber Company, Arrowhead; Peter Lund, Crow's Nest Pass Lumber Company, Wardner; A. E. Watts, Wattsburg Lumber Company, Wattsburg; Leslie Hill, Canadian Saw and Timber Mills, Trout Lake; C. F. Lindmark, Revelstoke Lumber Company, Revelstoke; C. Archibald, Kootenay Shingle Company, Salmo; Messrs. Bowman and Shine, Bowman Lumber Company, Revelstoke; W. C. Koch, Slocan Lake; C. D. McNab, Standard Lumber Company, Cranbrook; J. S. Deschamps, China Creek Lumber Company, Rossland; J. A. Dewar, Porto Rico Lumber Company, Ymir, and G. P. Wells, secretary.

The meeting discussed reorganization with a view to extending its field of usefulness, and as the Association now possesses a permanent office and secretary, it was felt that it would be in a better position to act as a medium of information. The question of advancing the price of lumber wss considered, but it was decided to defer action in that connection until the annual meeting,

which will be held on January 8th. It was decided to organize a uniform system of grading of lumber and other rules which would facilitate business. A conference was held with F. W. Peters, C.P.R. western freight traffic manager, and H. Macdonell, assistant freight agent, relative to rates to new territory in the North-West. It is understood that a satisfactory agreement was reached.

TIMBER LIMIT TRANSACTIONS.

The W. F. Huntting Lumber Company, of Vancouver, B. C., have just completed the purchase of 7,000 acres of timber limits adjacent to Jervis Inlet, about 160 miles up the coast. The vendor was J.C. Keith. The area in question is in proximity to a smaller tract purchased some time ago by the Vancouver Lumber Company and the timber is principally cedar, which will be used for the manufacture of shingles The purchasers do not propose to undertake logging operations there at present, having other sources of supply for their immediate requirements.

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

Information given by addressing—

JAS. C. POND, Wis. Cent. R. R. Milwaukee

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

FOR SALE—100,000 FT. HEMLOCK, TO BE cut to order. Address P. O. 6, Care "LUMBERMAN," Victoriaville, P. Q.

CEDAR FOR SALE — 10,000 PCS. ROUND Cedar 8-16 and 25 feet long, at the Spanish boom. Also cedar, pine and spruce lumber for sale here at Larchwood. JAMES McCREARY, Larchwood, Ont.

FOREMAN—MILLWRIGHT OPEN FOR ENGAGEMENT, A 1 references, 15 years experience in saw mill construction, up-to-date methods. Address BOX 327 CANADA LUMBERMAN, Toronto, Ont.

FOR SALE, A GOOD SAW MILL, CAN SAW from 15 to 25 thousand per day, with everything complete, nearly new. Apply to ROBERT STEWART, Vasey P.O., Ont.

FOR SALE

A QUANTITY OF CEDAR AND HEMLOCK R. R. Ties, No. 1 and 2; 10 000 Cedar Fence Posts; 1" and 1¼" Basswood; 2" and 3" Maple; cut in 1904; excellent shipping condition. 1905 cut contains Pine, Hemlock, Basswood, Maple, Elm and Ash lumber and 10,000 cords Slabs. LILLICRAP, TATE LUMBER CO'Y., Lakefield Ont

WANTED

Canadian Lumbermen, Limit Holders and Mill Men to supply a steady demand for dry, wormy pine timber; also short butt logs for immediate shipment to be cut by portable mills or otherwise, so that useless waste is not handled.

Worm holes, splits, shakes, knots and small amount rot not objected to. All to be cut into one inch lumber and about the following dimensions, in lengths of 8 to 16 feet and small per cent. shorter lengths, 4,6,8,10,12 inches wide and up.

We are open to contract with right parties for a steady supply of about a car load a week to start with.

Quote prices free on cars.

THE DAVID GILMOUR DOOR CO.,
579 Tonawanda St.,
Buffalo, N.Y.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

BOOK-KEEPER WANTED—FOR LUMBER Office in County Town. Apply Box 328, CANADA LUMBERMAN, Toronto.

FOR SALE—RED BIRCH, HEWED SQUARE, 12 inch and up, 12 feet to 16 feet long. Apply BOX 325, CANADA LUMBERMAN, Toronto.

WANTED.

LATHS BY CAR OR VESSEL, ANY QUANTITY, large or small, up to 10,000,000, 1½" or 1⅝". Address C. S. WENTWORTH & CO., 147 Milk Street, Boston, Mass.

WANTED—A MAN WITH A GOOD PORTABLE mill to saw lumber in the county of Hastings during the winter and spring of 1906 and succeeding one or two seasons. Address BOX 326 CANADA LUMBERMAN, Toronto, Ont.

HAVE YOU ANY STOCK WHICH YOU wish to sell? If so, make the fact known to probable buyers by placing an advertisement in the Wanted and For Sale Department of this journal. Address, CANADA LUMBERMAN, Toronto.

WANTED — HARDWOOD LUMBER INspector and yard man. Must be A1 inspector of Hardwood with experience. To the right man there is a position open with us at good salary and good chance for advancement. WILSON LUMBER COMPANY, LIMITED, 1 Spadina Avenue, Toronto, Ont.

FOR SALE AT A BARGAIN—NO. 3 HAMILTON Carriage Steam Feed, 7½" cylinders and all connections, circular outfit complete with iron husk, mandril, etc. Two boilers 22 feet long, 4 feet in diameter, six boilers 20 feet long and 4 feet in diameter, two 14" flues in each. Full Second Hand Outfit for Circular Mill. THE ONTARIO LUMBER COMPANY, LIMITED, Toronto, Ont.

MACHINERY FOR SALE

We have for sale the following second hand machinery, in good condition. Write us for full particulars and prices of any machine.

1 26" × 32" engine, box frame, slide valve on top of cylinder, driven with rock shaft.
2 No. 3 single cutting band mills, made by Prescott Co.
2 Two block carriages with Prescott offset, made by Prescott Co.
1 Two block Garland carriage.
1 Boss shingle machine, made by Mowry.
1 Hall shingle machine.
4 Perkins Grand Triumph shingle machines.
3 Drake hand shingle machines.
4 Perfection power shingle machines.
1 Double block shingle machine, Perkins make.
1 Drag saw.
1 Knee bolter.
1 Perkins Class A cut-off.
2 Wheel jointers.
2 Knot saw frames.
7 Shingle packers.
1 Heading trimmer.
2 Rich automatic saw sharpeners.
1 Independent condenser.
1 Portable boiler and engine, boiler with 32" fire box, and 28—3" tubes, 12 h p., engine 8 × 12.
1 Greenlee No. 1 improved automatic cut-off machine, with countershaft.
1 Friction feed complete, frictions 15" wide.
1 36" standard Leffel water wheel
1 Upright boiler 70" × 32" with sixty 2" tubes.
1 " " 54" × 32" with ninety 1½" tubes.
1 10" × 16" twin engine, steam feed, complete.

THE WM. HAMILTON MFG. CO., LIMITED
Peterborough, Ont.

FOR SALE—100,000 FEET DIMENSION Spruce Timber, to be delivered on first snow roads, viz, 6 x 6, 7 x 7, 8 x 8, 9 x 9, average in proportion about sizes. Lengths 18 to 32 feet. Address "LUMBERMAN," P. O. 6, Victoriaville, Que.

FOR SALE—250 M. FEET 1", 1¼", 1½", 2", 3", 4" Hard Maple first class stock, 2" Hard and Soft Elm, ⅝", 1" Basswood, Cherry, White Ash, Pine and Hemlock, on C P.R., near Ingersoll. This season's cut. Write for quotations to W. F. GALLOWAY or W. PARTLO, Ingersoll, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

Nothing has transpired during the past week to turn the tide of lumber activity. The weather has been fine, building operations have continued in large volume, and conditions generally have favored the consumption of lumber. Never before, perhaps, has there been such a liberal demand at this season of the year for pine and hemlock lumber. Prices are consequently stiffening, and especially on the lower grades. Some dealers are accumulating pine stocks in anticipation of a shortage and higher prices before next spring. The hardwoods, on the other hand, are suffering from neglect, and there seems to be very little buying beyond immediate requirements. Under such conditions it is satisfactory to know that prices are not declining. This is about all that can be hoped for until the demand shows an improvement. Basswood is offering at prices which, if carried over until the spring, would likely show a fair profit, but dealers are averse to tying up capital in this lumber until the market becomes more promising.

QUEBEC AND NEW BRUNSWICK.

The trade of the Eastern Provinces is developing upon very satisfactory lines. Manufacturers and dealers are kept busy supplying the local and American demand, and more business could be secured if the supply were more plentiful. Prices of birch timber at Quebec have appreciated two cents per cubic foot, and now range from 22 cents for 14 inch average to 40 cents for 18 inch, these being the minimum and maximum figures. There is an urgent demand for spruce lumber for shipment to the United States, and with most of the mills closed down and their supply of logs exhausted, lower prices for spruce lumber between now and next June seem almost out of the question. There is not much doing in British deals, which are worth $13 at St. John.

UNITED STATES.

"We are having a good trade and prices are advancing", is the reply given by an Albany firm to our inquiry as to market conditions. Notwithstanding the near approach of winter, there seems to be no abatement in the demand for lumber, which is showing more strength from a price standpoint than at any previous time this year. Canadian pine which was selling in Boston one month ago at $26, is now quoted at $28.50, an advance which is somewhat remarkable for this season of the year. Nearly all the lower grades of pine are advanced in our quotations this week. Buffalo and Tonawanda are carrying light stocks of No. 2 and No. 3 barn and a few thicknesses of cuts, and, owing to the sharp advance in lake freights, a number of dealers will be compelled to leave considerable of the stock which they intended to bring forward at the mills until next spring. As high as $4 per thousand feet has been paid as freight from Duluth to Buffalo. Spruce lumber is going into the winter almost in famine condition and the mills are now booking orders for delivery next spring. Frames are quoted in Boston at $24 and $26, with many sales being made above these figures. The four-foot clapboards are quoted at $42 for extras, $40 for clears and $32 for second clears. Spruce lath is very scarce and erratic in price, but most sales of 48-inch are being made at $4.50 per thousand for 1⅝ inch and $4.25 to $4.35 for 1½ inch. There is no market for 32 inch.

GREAT BRITAIN.

The exporting season from Canada is now practically closed and British importers have discovered that the heavy consignment of lumber which earlier in the season was predicted for the late fall months has not materialized. This is an indication of confidence on the part of shippers. The winter shipments by the regular liners from St. John and Halifax are also likely to be restricted owing to the sharp advance in inland freight rates, caused by the record grain crop. Such shipments as do reach the British market are almost certain to cost more than the stock now on the market, and in this way act as a stimulant to prices. Spruce continues to be firmly held. A cargo is said to have been sold recently for the Bristol Channel, the price realized being about £8 10s. per standard for a specification containing 30 per cent. of 11 inch. At a recent auction sale in London 3 × 9 inch third Quebec spruce realized £9 5s. per standard, and the fourth quality £8 10s. Fourth quality pine, 3 × 11 inch, brought £9 15s. Some New Brunswick birch has recently changed hands at a slight advance upon previous quotations.

STOCKS AND PRICES.

The Davison Lumber Company are loading 1,000,000 feet of lumber at Bridgewater, N.S., for Europe.

L. J. Howe, Deputy Commissioner of Lands, Winnipeg, Man., will receive tenders up to Tuesday, 28th inst., for Timber Berth No. 42.

John Fenderson & Company, of Sayabec, Que., have a stock of about 8,000,000 feet of spruce and 2,500,000 feet of pine, all boards. On Salmon Lake they have also a fair stock on hand.

Hon. F. J. Sweeney, Fredericton, N.B., will sell by public auction on Wednesday, 29th inst., a two square mile timber berth on the south branch of the Canaan river and a two mile berth in the parish of Canterbury.

A. B. Smith, manager Telegraph Department, Grand Trunk Pacific Railway, is asking for tenders up to December 1st for supply of 30,000 green cedar telegraph poles, 28,000 to be 25 feet long, 1,000 30 feet long, and 1,000 35 feet long.

On November 11th lumbering operations at Springhill, N. B., were concluded for the season. Including bank logs, about 10,000,000 feet were handled at Springhill this season, which amount is below the average. There is now estimated to be 7,000,000 feet of logs hung up between Fredericton and Grand Falls, not including about 3,000,000 feet of bank logs which could not be rafted this year owing to low water.

The Bangor Commercial says that the log output on the West Branch will be as heavy during the coming winter as it was last. Many of the operators started early and are now going on smoothly. If the season is favorable the probability is that the cut will not be far from 30,000,000 feet. Last winter the logs which came down river amounted to 27,000,000 feet. This is of course exclusive of the logs belonging to the Great Northern Paper Company.

The Wisconsin Hemlock Manufacturers' Association have adopted the following prices for two inch piece stuff: 2 x 4, 6 ft., $11; 8 ft., $12; 10 ft., $15; 12 and 14 ft., $14; 16 ft., $15; 18 ft., $17.50; 20 ft., $18; 22 and 24 ft., $19; 2 x 6, 6 ft., $11; 8 ft., $12; 10 ft., $13; 12 and 14 ft., $13.50; 16 ft., $14.50; 18 ft., $18.50; 20 ft., $16.50; 22 and 24 ft., $19; 2 x 8, 6 ft., $11; 8 ft., $12; 10 ft., $14.50; 12 and 14 ft., $14; 16 ft., $14.50; 18 ft., $16.50; 20 ft., $17; 22 and 24 ft., $19; 2 x 10, 6 ft., $11; 8 ft., $12; 10 ft., $13.50; 12 and 14 ft., $14.50; 16 ft., $15; 18 ft., $18.50; 20 ft., $16.50; 22 and 24 ft., $19; 2 x 12, 6 ft., $12.50; 8 ft., $13.50; 10, 12 and 14 ft., $15.50; 16 ft., $16; 18 ft., $16.50; 20 ft., $17.50; 22 and 24 ft., $20.

COOPERAGE STOCK CONDITIONS.

The Sutherland, Innes Company, of Chatham, Ont., say:

There has been some little brightening up in the sky of the cooperage stock market during this month, as consumers, more especially of No. 1 stock, are running heavier than they have done for some time. Prices, however, have not been affected to any extent, and manufacturers are still tumbling over each other to sell stock at prices below the cost of production.

The only articles which have at all felt the effect of the increased consumption are hoops, and these have stiffened up somewhat in price, although as a general thing right through the year, hoops have been in good demand and at fairly remunerative prices.

There is no doubt that the present rush will continue for some time to come, and it is only a question of a short time when better prices will be obtained for No. 1 stock, and enable the manufacturers to get back at least new dollars for old ones.

The outlook for lower grade stock is not very bright, especially for 28½ inch and shorter staves and mill run and No. 2 heading. The demand for this class of material is comparatively light for this season of the year. No. 2 30-inch staves have stiffened up a little in price, and they certainly should bring very much better prices than they are bringing at present, as the stocks of No. 2 30-inch staves in the country are as low as they have been for a long time, with the exception of 1903.

Some of the manufacturers have already begun to figure on purchasing timber for another season, but find they are unable to purchase at anything like a price which will show a profit on the present basis of prices. The only thing, therefore, they have to do is simply wait until the holders of timber will get down to prices where they can afford to buy, and it will certainly help the cooperage market generally to curtail the output in any case.

While the slack barrel stock market is still in an unsatisfactory condition, it is the very opposite regarding tight barrel stock. Manufacturers of tight barrel stock are obtaining good prices for material, and the demand in some cases is much greater than the supply, more especially in the higher grades of liquor stock.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company, under date of November 4th, refer to the lumber market as follows: "The fortnight under review has again been barren of arrivals and dealers' yards are beginning to get bare of white pine. We hear that a cargo of this has been contracted for at $25.50 for merchantable and $21 for second quality. A couple of cargoes of this would undoubtedly meet with a ready sale at about these figures, but merchantable is more enquired for. Spruce is virtually out of stock and first arrivals of this description should do well, especially for shipping. A portion of the shingle cargo of the "Drusie" was placed in the vicinity of $4.37 for Long Cedar, and $3.40 for Laying Cedar Clears; but 128,000 Long Cedar to ourselves were stored, shippers requiring higher prices. Our market for both descriptions is well supplied, as on account of the very dry weather, demand has been light."

THE HASLAM SAW MILL PROPERTY.

Vancouver, B. C., November 14th, 1905.—Springing from the ashes of the Haslam estate, Nanaimo, B. C., a new company will arise in a few days, to be known as the Nanaimo Lumber Company, formed to operate the saw mill at Nanaimo and to exploit the timber limits lately belonging to A. Haslam.

J. S. Emerson, who with the Ladysmith Lumber Company purchased the mill and limits at the recent sale, returned from Victoria, where he met Manager Coburn, of the Ladysmith Company, and arranged for the incorporation of the new concern with a capitalization of $150,000, which will be fully paid up at once. A meeting for the election of officers will be held next week. The mill will be started running again in about a week and, without shutting down, a comprehensive scheme of renewal will be carried out that will practically make a new mill of it.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

Vancouver, B.C., November 13th, 1905.—There is no gainsaying the fact that the lumber industry in all its branches is in good condition this fall. The demand for lumber is brisk, mills are busy, and the scarcity of logs, which, while not stringent has been existant for some time, has created considerable activity. Locally the mills are going full time, and advices from Vancouver Island are that the manufacturers there are very pleased with the situation. Mr. J. W. Coburn, head of the Ladysmith Lumber Company, which purchased the assets of Mr. Andrew Haslam, stated on Saturday that the Nanaimo mill would be in operation possibly this week, as he needed it to cut lumber for orders which he had, and which would not be supplied for some time had he only the Ladysmith mill to furnish product. In the interior, conditions are also good. The Bowman Lumber Company, which some time ago took over the interests of the Empire Lumber Company at Revelstoke and Comaplix, is erecting a large mill at the latter point, the old plant having been found to be too small. The Big Bend Lumber Company, which has been operating a 70,000 feet feet daily mill at Arrowhead, has let the contract to the Waterous Company to put in a plant to double the capacity. The Big Eddy mill near Revelstoke is being rebuilt with all possible speed, as is the new steel structure of the Elk Lumber and Manufacturing Company at Fernie.

Prices are at the figure decided upon a couple of weeks ago, but there will be an increase in the spring. While no announcement is made locally concerning that point, at the meeting of the Mountain Manufacturers' Association, held in Nelson last week, it was unanimously decided to make a raise, probably at the beginning of the year.

The excitement caused by the extensive seizure under the orders of the timber inspector, R. J. Skinner, had aroused considerable interest in the case when it came up for hearing on Saturday last. The tugs, donkey engines and booms at Greenway Sound, belonging to Mr. J. S. Emerson, of this city, were seized on the strength of the statement he made that the logs were to be exported. The Act reads "that all timber cut from leased lands must be manufactured in the province," and it was argued that the logs had not been exported. The judge held that the seizure might only be possibly justified if a tug had been attached, and ordered the release of the timber. He decided a point which has long been a contention, that the Act applied to hand-loggers the same as other leased land.

Universal regret among millmen is expressed because of the accidental death of Mr. C. B. Tait, manager of the Fraser River Lumber Company, who fell down stairs in his house at New Westminster on Sunday morning, 5th instant, and inflicted fatal injuries. He was a native of New York state, and leaves a daughter, the wife of Mr. T. F. Paterson, of this city, who is interested in the Paterson Timber Company and the Canadian Pacific Lumber Company at Port Moody; two sons, three sisters, Mrs. R. Hurst, and Mrs. James French, of Vancouver, and Mrs. A. Perry, Burk's Falls, Ontario; and three brothers, W. L. and David Tait, of Vancouver, and Andrew Tait, of Orillia, Ontario.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

St. John, N. B., November 15th, 1905.—The last raft of logs from up-river leaves Fredericton on this date, operations at the booms having ended for the season. The end of next week will find the few local mills which have been sawing shut down for the season, with one exception. The owners of this latter plant have enough logs at St. John to last them until mid-December.

The total output of the local mills (which, under normal conditions, would amount to from 110,000,000 sup. feet to 120,000,000 sup. feet of long lumber) has this year been much smaller than the average; from 20 to 25 per cent. of the above figures would come very near the actual shortage. The late opening of navigation last spring had the natural effect upon the length of the manufacturing season, but the most potent factor has been the extreme scarcity of logs during the last three months.

Owing to the large quantities of logs which are hung in the up-river districts and which will without doubt be available for next season, the logging operations of local manufacturers will not be as large as would have been the case had the river been driven clean during the spring of 1905. To give actual figures in this regard is an impossibility at this date, but, in the opinion of some of those interested, this winter's operations will total from 20 to 25 per cent. less than would be the case under ordinary circumstances.

The beginning of the most important operations in the woods on the St. John river has been later this fall than has been the case for several years; many of the contractors have made a start only during the last few days.

The local feeling in regard to the market for English spruce deals seems to be of a decidedly optimistic character, but these expectations have to do chiefly with the future—to be exact, the sale of deals for spring delivery. At present writing

trade in this line is at a standstill. Practically no English deals are offering, such quantities as are to be seen on the different wharves about the city having already been disposed of to be shipped at some later date by the winter liners. Shipments from this port during the winter months promise to be light and will consist chiefly of rail-shipments from inland points.

The indications at the present time are that no lower quotation could be obtained upon a specification of English spruce deals, consisting of say 50 per cent. 7's and 8's, 35 per cent. 9's and 15 per cent. 11's and up, for spring delivery, than $12.75 to $13 per M sup. feet, f.o.b. steamer St. John.

Re freight rates: 45s per standard early in the month and more recently 47½s to the West Coast has been asked, but with nothing going forward. As far as is known, 42½s per standard has been the highest actually paid to date.

W. F. Lawrence, planing mill, Maple Creek, N.W.T., is announced to have assigned to F. Burnett.

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee. Minneapolis or to Lake Superior points via Ashland, Wisconsin.

DON'T BUY PULPWOOD

until you have had my quotations. Best market prices on spruce and poplar pulpwood furnished on request.

GEO. F. WHALEN
PORT ARTHUR, ONT.

CURRENT TRADE CONDITIONS.

ONTARIO.

Reports from all sections of the country tell of a good pine and hemlock trade and but little falling off in the demand for building material. The month of November, however, experienced more than usual activity, and it is probable that the next two weeks will witness a curtailment consequent upon the approach of the winter season. In Toronto building is still active, which is sustaining the retail demand for lumber. The mills are moving stock by rail as rapidly as possible, but the inability of the railways to supply a sufficient number of cars is causing much inconvenience.

Prices of lumber are quite as firm as last week and promise to continue on a strong basis, as the aggregate quantity of pine and hemlock stock in first hands is very moderate. The hardwood trade is rather featureless. The recent discussion of the comparatively low price of basswood has, it is said, caused a little buying in some

quarters, but values show no inclination to advance. Lath are strong and the white pine variety very scarce. "It is impossible to find a firm who have a stock on hand" is the report which reaches us from Ottawa.

QUEBEC AND NEW BRUNSWICK.

More general strength characterizes the lumber market of the Eastern Provinces than at any previous time this year. Negotiations in connection with next year's business suggest the probability of shippers asking higher prices for waney pine timber, while there is also a disposition to hold birch timber for better prices. As the British market has now fallen into line, there is no weakness anywhere, and indications point to an all-round improvement in trade. There has been a sharp advance in freight rates from St. John by the winter steamers, as, owing to the better demand, shippers are anxious to send forward as many deals as possible. The spruce shipments from that port up to the end of October were 140,436,544 superficial feet, as compared with 152,738,255 feet in 1904. The birch shipments were 6,188,709 feet, as against 4,802,545 feet last year. There has been a good demand for birch planks at very satisfactory prices.

MANITOBA AND BRITISH COLUMBIA.

There is little falling off in the demand for lumber for building purposes and most of the mills have a considerable number of orders on their books. There is plenty of stock, however, to supply the requirements, and, statements to the contrary notwithstanding, no price changes are likely to be witnessed during the next few weeks. It may be that later on the mills will be compelled to advance their quotations owing to the high cost of logs. Fir logs are now selling in Vancouver at from $7 to $8.50, and as the supply is by no means plentiful, higher prices in the near future are predicted. It is understood that the British Columbia Lumber & Shingle Manufacturers' Association are considering the advisability of closing down the shingle mills for two months simultaneously with the Puget Sound mills. This would enable the surplus product to be worked off.

UNITED STATES.

The lumber demand is still quite insistant and apparently there are plenty of people who are willing to buy lumber at present prices for other than immediate requirements. The condition of stocks is such as to remove any hope of lower prices during the winter months, while if the consumption should continue at the present enlarged volume, it is not unlikely that some classes of stock at least will be advanced before the spring. Nearly all the northern pine product has passed out of first hands, and still the railroads and car builders are in need of stock. There is hardly any limit to the price that can be obtained for spruce for prompt delivery, but the average price may be said to be $26 for 10 and 12 inch dimension and $24 for 9 inch and under, Boston delivery. Hemlock is strong, prices for piece stuff in the Saginaw Valley ranging from $13 up, according to length. The hardwood situation is still somewhat unsatisfactory, but appears to be slowly mending. Wisconsin dealers report a good demand for maple, rock elm and birch, and basswood is doing better than earlier in the year, although that is not saying much.

A sharp advance in the price of red cedar shingles is predicted as the result of the expected shutting down of the Washington mills. The demand in the east is strong and stocks light. Clears are reported to be selling in Boston and Tonawanda at $3.25 wholesale.

GREAT BRITAIN.

The improvement in the tone of the British market has been maintained and the outlook for business is much brighter than during the summer months. The market has apparently taken a turn for the better, the light stocks no doubt being an important influence in bringing about this change. The stock of pitch pine at Liverpool, for instance, is only 346,000 cubic feet, as against 815,000 cubic feet last year, while at Manchester it is only 178,000 cubic feet, as against 439,000 cubic feet last year. Shippers are asking from 67s. 6d. to 70s. per load as aginst 52s. paid last year. Spruce and whitewood are still on the rise and eagerly sought after. The shortage in these lumbers is also very marked and promises to be still more pronounced before new arrivals next year. For 3 × 11 inch unassorted spruce, £9 10s. per standard was recently realized at auction, the 3 × 9 inch bringing £9 5s., prices which are considered as very satisfactory. There is a splendid demand for birch planks at advancing prices, and the scarcity of sawn laths at the mills in Sweden has caused a sharp rise in the prices of these goods. Some shippers are asking 10½d. c.i.f. London.

No business for next year has been closed so far as can be learned. It is reported that some agents are asking an advance on this year's opening prices, while importers claim that the present retail prices will not permit them to give even as much as they did last winter.

STOCKS AND PRICES.

Buffalo jobbers quote first-class elm flour barrel staves at $8.50 to $9; basswood heading, 5½ to 5¾ cents, and coiled hoops, $9.50 to $10 for 6-foot.

Charles Hawkes, of Lower Cape, N.B., has taken the contract to cut the lumber on the Turner property at Germantown for William Mackay, of St. John, N.B.

The improvement in value of spruce deals in Great Britain is now reflected in hemlock. An advance of fully 15s. per standard has been recorded during the last two months; £6 c.i.f. for ordinary specification has been done, North-west Coast port.

The Sims Lumber Company, of Sault Ste. Marie, Ont., have contracted with Kerr Bros., of Calumet, Mich., for the delivery of 200,000 feet of pine logs during the winter.

There are fourteen inches of snow on the upper St. John river, in New Brunswick. One hundred million feet is the estimate of the cut. The average wages are about $26 to $28 per month.

The Port Renfrew Logging Company, which for the last couple of years has conducted logging operations at San Juan, west coast of Vancouver Island, B.C., have suspended work there and dismantled their camps, all the timber on the limits having been cut.

The lumber market at Boston, says the New York Lumber Trade Journal, has been moderately active during the first half of the month and throughout the list values are firmly held. The fine weather has been a great help to business. Spruce still causes the greatest comment, and it is almost impossible to make quotations to cover the market. Yards have very small stocks. Wholesalers have taken orders for delivery during February and later. For prompt shipment $25 and $27 are quoted, and in a few instances even higher prices have been paid. Spruce laths are in active demand. Even mill men have been in town looking for supplies. It is reported that one mill has asked as high as $5 for 1⅝-inch by rail, but $4.50 is the top price reported paid. A few sales of 1½-inch are reported as having been made at around $4.50 for quick delivery. The hemlock situation is

much firmer. Prices of eastern have stiffened up quite a little since the advance on Pennsylvania. Eastern is in good demand and hard to get.

SPRUCE LATH HAVE SOARED.

For the past few months there has been almost unprecedented activity in spruce lath at advancing prices and the present indications are that the top has not yet been reached. Boston and New York have been bidding for the supply, the prices at these points being $4.50 to $4.60 for 1⅝ inch, $4.25 to $4.35 for 1½ inch, and $4 for 1⅜ inch. Many buyers, however, have paid the same price for 1½ inch as for 1⅝ inch in order to get supplies.

Shipments of lath from New Brunswick have been limited only by the capacity of the mills. Every mill owner who has had the equipment has been sawing laths and several new mills have been put into commission. It is estimated that there will be produced in New Brunswick and Maine this winter about two hundred million of lath. The Scott Lumber Company, of Fredericton, N. B., are installing two machines in their new mill, each of which will have a capacity of about 35,000 per day. This company are reported to have closed contracts for from eight to ten million to be shipped into the interior of Connecticut.

As showing the exceptional activity which prevails in this branch of the lumber industry in New Brunswick, it may be stated that 15 mills will be in operation in Carleton County. These are: Marshall Smith, Summerfield, Stickney & Brooks, Gordonsville, B. F. Smith, Florenceville; H. H. McCain, Stickney Brook; B. R. Clark, Coalstream; E. Sayre, Hartland; J. K. Flemming, Hartland; Baird & McFarlane, Little Presque Isle; Allen McElroy, Waterville; Albert Hayden, Newburg; Smith Bros. & Perley, Upper Woodstock; J.K. Fleming, Debec; Mr. McElroy will operate a mill at Gratton, and Mr. McElheney at Richmond, while a firm composed of George R. Burtt, D.H. Keswick and B. F. Smith are erecting a mill at Cross Creek, near Hartland.

The present prices warrant the manufacture of lath from almost any kind of timber, although small growths of spruce is the kind usually sought after. A considerable quantity of 24 and 30-inch spruce lath has been worked up from odds and ends about the mills too short for any other use except pulp, but these sizes have not met with favor in the Boston and New York markets.

In view of the present small stock of lath throughout the Eastern States, the result of a phenomenal building season, it is probable that high prices will continue during the winter months, but the probability of the market becoming overstocked through the stimulus to production which has been given by the high prices should not be overlooked by manufacturers.

BRITISH COLUMBIA SHINGLE SALES

As is generally known, the Export Lumber and Shingle Company and the Union Lumber Company act as selling agents for the shingle production of a number of British Columbia manufacturers. The attached statement is a copy of the official report of the two selling companies of the business done by them up to October 1st, 1905:—

Sheet No. 5.—Report No. 18.

EXPORT LUMBER AND SHINGLE COMPANY, LIMITED.—SUMMARY OF BUSINESS TO OCTOBER 1ST.

Old orders shipped to Sept. 1st		45,275,000
" " " during Sept		3,073,000
Total, October 1st		48,348,000
NEW BUSINESS—		
Full car shipments to Sept.		23,870,000
" " " during Sept		3,514,750
		27,384,750
Part car shipments to Sept. 1st		6,413,000
" " " during Sept		1,120,500
		8,223,500
Local Sales to September 1st		6,442,750
" " during September		1,019,250
		7,462,000
Total to October 1st		43,070,250
Grand Total Oct. 1st		91,418,250

Comparison of total business to October 1st by Union Lumber Company and Export Lumber and Shingle Company:

NEW BUSINESS—	
Union Lumber Company	61,015,000
Export Lumber Company	43,070,250
OLD BUSINESS—	
Export Lumber Company	43,348,000
Union Lumber Company	35,789,500
A total of	188,222,750

There are several mills outside of the selling agencies, these being the B.C. Mills, Timber & Trading Company, which would dispose of about 15,000,000; the Brunette Mills, Westminster, which would dispose of, say, 17,000,000; the Surrey Mills, which would sell another 5,000,000; the Tynehead Mill, which would add 3,000,000 to the total; the Hazlemere Mills, which would sell 2,000,000; and Hunting & Lee, which would dispose of 20,000,000—or say in round figures 62,000,000, which would bring the grand aggregate up to 250,300,000 shingles approximately.

TIMBER LIMIT TRANSACTIONS.

The International Paper Company, of New York, are reported to have purchased a large tract of timber lands in the Miramichi district, New Brunswick, from the Richards Estate. The price is given as $750,000.

The British Columbia Land and Investment Agency, of Vancouver, last week closed the deal transferring 6,000 acres of timber lands to the Vancouver Lumber Company. The timber is situated on the coast eighty miles north of Vancouver.

BIRCH PLANKS.

Birch planks, says the Timber News of Liverpool, Eng., have gone the notch higher, a good line having been placed to London at £8 10s. c.i.f. for shipment from St. John promptly, we understand. Sales have been made to Liverpool, where freights generally are a shade lower, at £8 5s. c.i.f. for St. John shipment, with Halifax a shade lower than this price. Glasgow has not as yet responded to improved values. We are inclined to think that £8 10s., c.i.f., is the high-water mark, and that shippers and manufacturers will not be wise in trying to force c.i.f. values above this figure, which gives them a fair return, otherwise the impetus which high prices give to production may put supply above demand and cause the inevitable. Concessions for spring shipments will likely be made, but it is too early, with the data we at present have, to form an opinion, as much will depend on the winter and what quantity of logs can be got out and hauled to the mills.

We hear a good deal of no consumption. It will therefore be interesting to give and compare the figures for the 10 months of this year with the two previous years for the port of Liverpool, as culled from the brokers' stock sheets. The figures given are: Consumption, 572,000 cub. ft. for this year, 289,000 cub. ft. for last year, and 487,500 cub. ft. for 1903, an increase of almost double the preceding year and 85,000 cub. ft. in excess of 1903—strange, but authentic. The indications, with the improved state of the tinplate trade (who are large consumers of hardwood for boxes) and of trade generally, are more favorable than at this period last year, and it is well to bear this in mind. Prices are 20s. higher than this period last year, which must also be kept in mind.

We hear of a sale of Quebec birch to London, small average, at an advance on last year's prices.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

PORT ARTHUR, ONT.

CURRENT TRADE CONDITIONS.

ONTARIO.

The seasonable weather has been helpful to the lumber business and as yet there is little indication of the slackening in demand which is usually experienced during the months of November and December. There is a very ready market for nearly all kinds of lumber, and particularly for white pine and hemlock. Buyers seem to have come to the conclusion that there will be no weakening of prices during the winter, and are preparing against advances that are likely to take place in the spring. Accumulation by dealers is more apparent than for some years past, which is taken to indicate a marked degree of confidence in the stability of the market. Finishing material is receiving the call, the planing mills being crowded with work. The statement by one of the largest dealers in Toronto that he would welcome a period of lessened activity is an indication of the extent to which their resources have been taxed during the building season.

The supply of lath is not being increased, and the scarcity of the white pine variety has resulted in substitution to some extent. Hemlock lath, for instance, are now finding a good demand on the basis of $3 at the mill for No. 1. Shingles are quiet, although some orders have recently been placed for B.C. cedars.

QUEBEC AND NEW BRUNSWICK.

The demand for lumber in Montreal continues steady, as a considerable quantity is still being consumed for building purposes. During the month of November permits were taken out for new buildings costing $340,576. Most of the saw mills throughout the province of Quebec are closed for the season, and shipments are being made from yard stocks. The statement of timber measured at Quebec this year shows that the

quantity of waney white pine, square white pine and oak was not much more than half that of last year, while there was a substantial increase in the quantity of elm and birch timber. The quantity of elm timber received at Quebec this year was 484,720 cubic feet, as compared with 262,800 cubic feet last year. Notwithstanding this large production, prices of elm timber show no particular weakness.

The interest of New Brunswick manufacturers is at the present time chiefly centered on spruce lath, which have reached the phenomenal price of $3.75 f. o. b. St. John. There is some activity in the "Extra" and "Clear" grades of cedar shingles, but the lower grades are quiet. "Extras" are worth $2.50 at St. John. Manufacturers show a disposition to carry over stocks in the hope of better prices in the spring.

MANITOBA AND BRITISH COLUMBIA.

Reports of an improved trade in lumber reach us from Western Canada. Most of the mills are working to their full capacity and have orders on hand to keep them busy for some time to come. The demand from the farmers of the Northwest, as the result of the good crops, is showing itself, while a large quantity of material is being consumed in railway construction work. Vancouver mills are said to have recently received orders for upwards of seven million feet of railway building material, but the report has not been confirmed at time of going to press. The placing of orders by retail dealers for next season's supply is taken to indicate that the probability of an advance in prices is receiving consideration. A Brandon dealer is quoting the following prices: No. 1 dimension, $18; other grades, $14 and $16; good boards, $18; other grades, $13, $14 and $15; No. 1 shiplap, $20; good cedar shingles, 6 inch clear butts, $2.50.

The shingle manufacturers of British Columbia held a meeting last week to consider the closing down of the mills during the months of December and January, but it is understood that the proposition did not meet with favor.

UNITED STATES.

Following the action of the Southern Lumber Manufacturers' Association in advancing prices on 12 inch boards and shiplap, fencing, flooring, siding, etc., the Wisconsin Valley manufacturers are about to issue a new list which it is understood will advance the price of white pine lumber from 50 cents to $2 per thousand feet. Sales have been made at the higher quotations for some weeks and the new list will bring the prices in line with what the manufacturers are actually receiving for their stock. Trade in white pine is almost buoyant, and it is expected that this demand will continue until checked by severe weather. Buffalo and Tonawanda advices state that there have been extensive purchases of 12 inch boards for export to Europe, and that, nothwithstanding an advance of $3 on No. 1 and No. 2 barn recently, bringing the respective quotations up to $33.50 and $29.50, the demand is reported still in excess of the supply. At Boston also there has been brisk inquiry for white pine stocks, which has resulted in the advances on uppers and barn boards shown in our Boston quotations this week.

Spruce lath prices are irregular owing to the high basis of values which has been established during the past month. Sales of 1⅝ inch are reported to have been made in Boston at $3.80, while other dealers are quoting from $3.60 to $3.70. New Brunswick cedar shingles are a little stronger, Extras being worth $3.40.

GREAT BRITAIN.

It is quite evident that British buyers are willing to pay more for lumber than even a few weeks ago. Those who believed that a lower range would be established and deferred making purchases in the hope that they might take advantage of rock bottom prices, have realized their mistake and are now stocking up for the winter and early spring requirements of their trade at present prices, which represent a considerable advance. In view of the light stocks at all the important importing centres, the trade would seem to be in a sound condition and not susceptible to attempts in the direction of lower prices unless something particularly unfavorable should occur. The resignation of Premier Balfour, the requisition made to Sir Henry Campbell-Bannerman to form a new cabinet, and the almost certainty of an early election, may have a tendency to unsettle business temporarily as well as to cause the adoption of a cautious policy on the part of buyers. The business interests of the country, however, do not appear likely to suffer as the result of any new fiscal policy which may be adopted.

STOCKS AND PRICES.

The Canadian Pacific Lumber Company, of Port Moody, B.C., are reported to have secured the contract for the supply of about 4,000,000 feet of timber and lumber for the Grand Trunk Pacific Railway.

The Ontario Government have granted the following timber permits: Fort William Contracting Company, to take out ties at English River; R. McDonald, Oliver, to take out ties in the territory west of Marks Township; W. Miller, Port Arthur, to take out ties at Fire Steel River; J. & G. Whalen, Port Arthur, to take out piles in McGregor Township; Thomas Stevenson, to take out ties on Whitefish River.

The logging industry in British Columbia is in a very satisfactory state, from the logging point of view, prices being somewhat high for logs of good quality. The average prices prevailing at present are $9 for No. 1, $7 for No. 2, and $5 for No. 3 delivered at the mill. If the winter weather is bad it will retard logging operations and the above prices are likely to be considerably exceeded, but if the weather continues fair, large quantities of logs will be put in the water, as a number of new firms have started operations. Good timber located within easy access on the coast is getting very scarce and the day of the small logger is nearly ended.

Messrs. S. P. Musson, Son & Company review the Barbados market as follows: "We have again to report an entire absence of arrivals, and meantime stocks are rapidly disappearing, consequently the prospects for first arrivals of both white pine and spruce are exceptionally good. There is very little in the market to meet the usual demand for cooperage purposes at this time of the year. Merchantable lumber of both descriptions would do better than second quality, but the latter would still meet with a ready sale. There have been no further receipts of shingles, but stocks of both Long and Laying Cedar are ample for all requirements."

The annual statement of the Fredericton Boom Company shows that the quantity of logs rafted on the St. John river this season was much less than last year. There were rafted 940,199 pieces, apportioned as follows:

	Feet.
Hemlock	249,680
Cedar	8,577,170
Pine	1,652,960
Spruce	59,039,589
Total	69,519,399

WANEY AND SQUARE TIMBER.

Following is a statement of timber measured through the office of the Supervisor of Cullers, Quebec, during the year 1905:

Description.	Pieces.	Cubic Feet.
Waney White Pine	20,437	1,210,920
Square White Pine	3,781	137,440
Red Pine	26	1,200

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

ST. JOHN, N.B., December, 2, 1905. —There is little life in the lumber trade in this vicinity either in the the way of shipping or manufacture ing. Logging operations in the up-river districts are in full swing and reports from all sections indicate ideal logging weather conditions.

The flourishing condition of the United States markets continue to be the most conspicuous feature of the trade. The spruce lath market still shows an eager demand and the prevalent prices are phenomenally high. Sales have been made in this line during the last month at figures which have netted $3.75 at St. John, a figure which it is said has not been equalled since the civil war. No important quantity of lath is available at this port just now, practically everything in this line having been shipped clean. Indications point to the fact that many small portable mills throughout the province will be engaged during the winter in the manufacture of lath from the round wood. Lath of this kind are, under ordinary circumstances, worth 25 cents less than slab lath. Shipments from operations of this kind at inland points are usually made by rail direct to the United States, while from mills near the coast shipments are invariably made by schooner, via St. John. Contracts have been made by the owners of some of these operations at figures ranging from $2.40 to $2.65 per M delivered at St. John.

Trade in N.B. cedar shingles has been nominally brisk during the past month barring the low grades, which are very draggy. Values in "Extras" and "Clears" were a shade firmer during November than was the case during the previous month, but prices in this line showed none of the tendency to soar for which other lines which are marketed in the United States have been lately remarkable. Two and one-quarter to two and one-half millions of higher grades would cover all that remains to be put on the market this year, with all the important shingle manufacturing plants shut down for the season. Low grade shingles are more plentiful, stocks in this line aggregating to from five to five and one-half millions. Of this quantity the much greater part will be held in stock during the winter with the expectation that the local trade will be of sufficient volume in the early spring to entirely absorb them.

At this date dutiable "Extra" shingles are worth, f.o.b. St. John, $2.50 per M, and dutiable "Clears" $2.00 to $2.10 per M.

Foreign shipments of low grades have been extremely light during 1905, the demand seemingly running almost exclusively to high grades. The local market for low grades has also been very disappointing and prices have been steadily hammered all through the season. At present writing 2nd Clears may be bought at $1.70 per M and No. 1's at 90 cents per M, f. o. b. cars or schooner, St. John.

Prevalent freight rates on short lumber are as follows:

New York	Lath	$ .70
Sound Ports	"	.65
" "	Shingles	.32-½
Boston	"	.30

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., November 28, 1905.—Those lumbermen who are not strangers to the practice of invoking the aid of Heaven, are praying for the present fine weather to continue, so that the supply of logs will not be diminished. "Orders are piling in," was the remark of a prominent lumberman the other day, "and if wet weather or the usual heavy fall fogs set in, the supply of logs would be seriously interfered with, and it is probable that several mills would have to close down."

Some millmen go so far as to state that conditions were never better. One thing, they are good, and few mills but what have all they can do at present. A number of orders for timbers for bridge building are reported to have come from the Grand Trunk Pacific and Canadian Northern, of which the Canadian Pacific Lumber Company has secured four million feet. The Haslam sawmill at Nanaimo, taken over by the Ladysmith Lumber Company and J. S. Emerson, in half interests each, started last week, and is running full time to cut six million feet of bridge timber.

Another instance of how things are is shown by an incident which occurred last week. Mr. A. H. Henderson, superintendent of the shipyards of the White Pass & Yukon Railway Company at White Horse, was in the city to purchase the regular large supply of lumber required by the company. The Hastings mill is about the only one which has wharves up to which northern steamers may draw, and when Mr. Henderson applied there to have the timber specially cut, he says he found the company so busy with the export trade that they did not care particularly for the order. As a result of conditions here, Mr. Henderson left on Friday for Seattle, where he will buy the necessary lumber.

Prices are being maintained for lumber, and as yet there is no further talk of increase, though the first of the year may see an advance. Logs are higher, with figures ranging from $7 to $8.50, and are stiff at that. The price of logs is governed by the supply, and a week's bad weather, which is very liable at this time of year, would run it up. So far, the weather has been very favorable. Little or no snow has

allen, fogs have been absent, and he disadvantages of the heavy rain n September are being evened up.

Reports from the interior are also optimistic, and centres of lumber industries, like Revelstoke and Cranbrook, are looking forward to prosperous times. J.P. McGoldrick and G. A. Lammars, of Stillwater, Minnesota, are back in the province again. A couple of years ago they secured a site at Nelson, and were about to build a mill, when the deal was broken off through adverse action of the Nelson city council. Since then they purchased the Fox mill at Spokane, a very large plant, and have also invested in 55 square miles of timber on Moresby island, near Port Simpson. Now they represent a company which has acquired a mill site at Fairview and extensive timber interests on Kootenay lake and streams tributary.

Two booms of logs, one belonging to the Pacific Coast Lumber Company and the other to J. Whittaker, of Vancouver, B. C., were lost in a storm last week as they were being towed by a tug off Sechelt. The Pacific Coast boom contained about 300,000 feet of timber.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

WANTED—LARGE QUANTITY OF 12x12, 8x10 and 6x10, also 2", 3" and 4" plank. Terms cash. Address Box 337, CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

Pine and hemlock lumber is receiving the attention of buyers to a greater extent than is usual at this season of the year, and this notwithstanding the high values that have been reached. It is apparently the opinion of the trade that the foundation of the market is very firm, as dealers are more concerned about where stocks can be obtained than the prices which they have to pay. There has been no general advance during the past week, although box lumber may be said to be a little firmer on account of the steady drain upon yard stocks. The mills are carrying very little white pine, while contracts have already been closed for some of next season's production at prices about $1 higher than one year ago. There is a very fair hemlock trade, which could be increased if the supply were more plentiful.

Unfortunately, the strong position of pine and hemlock does not apply to the hardwoods, the prices of which are irregular. There are large stocks of birch and basswood, much of which can be purchased at low prices, while on the other hand, dealers who have been carrying stocks purchased at higher prices appear to have every confidence that the hardwood market will recover and are therefore not disposed to sacrifice their stock. For this reason the asking prices frequently show a variation of as much as $4 per thousand feet for the same grade. This much may be said in favor of holding hardwood lumber for higher prices, that the present market price gives the manufacturer little profit, and this may bring about a marked curtailment in the production.

The lath market has developed further strength owing to the limited

supply. Mills on the Georgian Bay district are asking $3.75 for No. 1 white pine, while the mill price at Sarnia is $4.25. Retail dealers in Toronto are still selling at from $4 to $4.25 from stock which they have been carrying and which was purchased below the present market price.

MANITOBA AND BRITISH COLUMBIA.

There has been no change in lumber prices in the West since the discount sheet was issued in October. Prices are still firm in all grades and the trade are looking for an advance after the first of January. The Mountain manufacturers of British Columbia state that they have about 50,000,000 feet less stock on hand than at the same time one year ago. With the prospects of a much larger demand next season, there is reason to expect an advance in prices which will give the manufacturer a fair profit. "Perfection" shingles are selling at $2.50 per thousand and No. 2 at $1.85 f.o.b. North-west points taking a 50 cent rate from the Coast. This is the wholesale price to retail dealers or commission men.

Unfavorable weather in Manitoba, Saskatchewan and Alberta has caused a falling off in the demand for both lumber and shingles and it will be difficult to book orders until after the turn of the year.

UNITED STATES.

Lumber orders in the United States are still very plentiful. If the demand is more urgent in one section than in another, it is in the East, where stocks are scarce. White pine at New York has advanced and some sizes are almost out of the market. The supply of barn boards at Buffalo and North Tonawanda is decidedly limited, especially Nos. 2 and 3 in 6 and 8 inch widths. While prices are unchanged from last month, it is not unlikely that the White Pine Association will decide upon some advances in the near future, as it is thought that certain grades are still too low. The demand for white pine is likely to continue until checked by severe weather. The hemlock trade is buoyant; purchases are being freely made at present prices, which represent an advance of $3 as compared with one year ago. Philadelphia dealers recently advanced the price one dollar per thousand. Although the base price at New York is $20, sales are being made at $1 above the market. Hardwoods are in fairly good demand, but are not likely to show much activity until the new year. Soft elm and rock elm find a ready sale in Chicago, New York, and Buffalo, and at the latter place the supply is scarce. Prices of maple and basswood are not strong, although the demand of late has shown a slight improvement.

The shingle market is firm owing to the closing of the Washington mills for two months. Eastern dealers are not taking many orders for red cedars but are turning their attention to white pines, although the supply of this variety is also very light. Lath continues strong in Buffalo. No. 1 white pine is held at $5 and No. 1 hemlock at $4.50, and at these prices there is a good demand.

GREAT BRITAIN.

The betterment in the tone of the British lumber market has been sustained, with some classes of lumber showing exceptional strength. Among these are spruce and birch, while there is also an increasing demand for small boards of all kinds. Contracts have been closed for spring delivery at prices which the importers would not entertain a few weeks ago. Spot prices are higher owing to the improved demand and light stocks. At a recent auction sale spruce realized the following prices: 12 ft. 3 × 4 in. second quality Quebec, £10 5s. per standard of 1,980 ft.; 11 ft. 3 × 9 in. second Montreal, £9 10s.; 10 to 15 ft., 3 × 9 in. St. John unsorted, £9, and a shorter average £8 10s. to £8 15s. These prices show that the advance has been quite marked since midsummer. Pine is also firmer and more active. Some attention is being given to hemlock owing to its relative cheapness, and a larger consumption may be expected in the near future.

STOCKS AND PRICES.

W. E. & C. E. Kelsey, of North Tonawanda, New York, are importing considerable white pine from Canada.

The Wolverine Cedar Company, which recently purchased a tract of timber in the vicinity of Webbwood, Ont., have six camps in operation this winter, employing 400 men.

Since navigation opened this year a total of 444,000,000 feet of lumber was received at Tonawanda by vessel, which is an increase of 42,000,000 over the corresponding period of last season.

The Moulthrop Lumber Company have 8,000,000 feet of lumber on the dock at John's Island, Ont., but all of it has been sold and is awaiting shipment. They have 2,000,000 feet of logs in the boom.

LUMBER SUPPLY FOR TORONTO.

The City Council of Toronto have recently awarded contracts for the annual supply of lumber, etc. There were two tenders for the supply of pine and hemlock lumber and timber, as follows:

	Tender No. 1.	Tender No. 2.
PINE.		
1 to 6-in.,	23 50	22 97
12 x 12-in., 12 ft. long	24 00	23 97
12 x 12-in., 16 ft. "	24 00	23 97
12 x 12-in., 20 ft. "	29 00	26 00
12 x 12-in., 24 ft. "	30 00	26 00
HEMLOCK.		
1 to 6-in.	17 50	16 97
12 x 12-in., 12 ft. long	16 50	16 97
12 x 12-in., 16 ft. "	16 50	16 97
12 x 12-in., 20 ft. "	20 50	17 97
12 x 12-in., 24 ft. "	22 50	19 00

The above prices are per thousand feet board measure. The contract was awarded to Reid & Company (Tender No. 1).

Reid & Company were the only tenderers for supply of cedar paving posts and were accordingly awarded the contract at 18¾ cents per post.

The contract for lumber for repairs to wharves and bridges was awarded to Arthur Bryce.

A WORD FOR HEMLOCK.

Now that spruce has got to what some people, not without a certain amount of reason, are disposed to look upon as a fancy price, we are rather surprised to find, says the Timber Trades Journal, of London, Eng., that no effort is made to push hemlock into larger use. The probability is that, coming from the same district, it pays the shipper to keep in the background a wood which would to some extent compete with spruce and so lower the capital return which shippers must now be netting out of cargoes of this latter wood. The old adage about the effects of giving a dog a bad name has a certain measure of applicability in regard to hemlock. It is a wood which possesses many valuable attributes. It is clean grown, and a good wood to use in damp situations, being of great durability. It is obnoxious to rats and insects. Of course, we do not say but what hemlock has not its bad points. It has a low shearing strength, and if it displayed less of the tendency to snap off at the smallest provocation, it would probably find more favor with dock contractors. Another obstacle is the irregular character of the supply. A matter of 50 or 75 standards will perhaps be included in an occasional cargo of spruce. With St. John spruce standing at anything over £8 c.i.f., a good many people will be looking out for something cheaper. There is hemlock—why not give it a trial? There ought to be plenty of money in it for the shipper at about £5 10s. or £6 c.i.f.

NEW BRUNSWICK OPERATIONS.

Fredericton, N.B., December 9th, 1905.—Conditions for lumbering on the upper St. John have been excellent this fall and good progress is reported from all the camps. There is but little information to hand as to how much the total cut on the St. John will amount to, but it has been placed at close to 100,000,000 feet.

Wages as a rule are very good.

They are much better than last year. Good men, for what are known as the "long routes," have been secured for $26 and $28 per month, while in some cases they have been paid as high as $30 and $32. Cooks are drawing from $40 to $45 per month. Men have not been procurable of late unless from $28 to $30 per month is paid.

Concerning the operations which have been looked after for so long by the late William H. Murray, it is generally understood that the executors will continue the operations precisely as he had them mapped out.

There are 25,000,000 feet of logs hung up in the main river at points above Grand Falls, and some 8,000,000 stranded further down between Bristol and Kilburn. The position of the 8,000,000 feet of logs below Grand Falls is none too safe, even if they remain where they are until spring, but as for the big drive above the falls, little difficulty is likely to be experienced in saving them, unless the weather conditions next spring are extraordinary.

THE BRITISH COLUMBIA SHINGLE SITUATION.

Developments in connection with British Columbia shingles are being watched with much interest by Eastern dealers, in view of the reported purchase of four hundred car-loads of shingles for shipment to Boston and other eastern points. It appears that Mr. R.W. Douglas, of the Blanchard Lumber Company, Boston, has been on the Coast for several weeks investigating the shingle market and the possibilities of securing shingles at a price which would permit him to market them at a profit in the Eastern States. He has visited several of the mills in British Columbia and Washington, but it was learned from an official source that the deal had not been concluded a few days ago. It is not improbable, however, that an order for four hundred car loads of shingles will be placed by Mr. Douglas and that it will be divided between the British Columbia and Washington mills. This order would represent about 80,000,000 shingles and would no doubt be regarded as an important market influence.

The comparatively low price of B.C. shingles, coupled with their excellent quality, is gradually creating a wider market for them. Representatives of the A. C. Dutton Lumber Company, of Springfield, Mass., are now in British Columbia and are reported to have placed an order with Vancouver mills for 4,000,000 red cedar shingles. This company are large importers of New Brunswick cedars, and the fact that they are at least negotiating for a supply of red cedars would seem to indicate that the latter are growing in favor among Eastern consumers.

A delegation of shingle manufacturers from Washington last week conferred with representatives of the B.C. Shingle Manufacturers Association in respect to the closing down of the mills for two months. While the B.C. manufacturers are understood to favor a curtailment of production, no concerted action was taken. Some of the mills, however, are now closed for repairs and it is probable that nearly all of them will close for different periods ranging from two to six weeks between now and the end of January, for the purpose of making repairs, stock-taking, etc.

By agreement, over 90 per cent. of the shingle mills of Washington are now closed and will remain closed until February 1. The conditions that led to this action have been: First, annual recurrent of lack of demand for shingles during the winter months; second, usual disorganization of working forces during the Christmas and New Year's holidays; third, necessity for overhauling plants and making repairs; fourth, the car shortage. The shut-down will decrease the output of the mills about 1,500,000,000 shingles, or 7,890 cars.

The following review of shingle conditions is furnished by our Winnipeg representative: While there are not many shingles moving at the present time, it is not on account of the price, but the severe winter weather we are having. It is impossible for dealers to use shingles at this season of the year, or in fact for the next few months. We cannot understand why Coast manufacturers expect to sell either shingles or lumber during the winter months in Manitoba or Northwest points, as the dealers state that it is impossible for them to move stock during the severe weather, and no matter what kind of inducements are offered they will not buy shingles at this season of the year. Nearly all the dealers for some time past have been letting down their stocks as low as possible in order to take stock and close up their year's business at the end of December. In some cases they place orders in January and February for March shipments, but we find very few cases where they want the stock moved out until March. We have seen shipments come in earlier, but the dealers find it very difficult to unload, as it is often frozen into a solid block and requires special machinery to unload it.

We expect prices on shingles to be advanced next year, as there have been new tariffs issued and the freight rates are higher on shingles at a great many North-west points that formerly took the same rate as fir.

We look for a very great increase in the sale of shingles next season

on account of so many new points opening up along the new lines of railway. Coast manufacturers sold last year about 250 million shingles, and nearly half of this output was sold in Manitoba and the Northwest Territories.

There is no demand for American shingles in this market, as they cannot compete in either price or grade. There have been very few American shingles sold in this market during the past year.

TIMBER LIMIT TRANSACTIONS.

An offer has been made to the Keewatin Lumber and Manufacturing Company for their timber limits in the district and their mill site at Keewatin, Ont., by Messrs. Shevlin & Matthews, of Minneapolis, and a short date option has been given them to examine the limits and the property.

The assets of Israel Nantel, lumber dealer, Montreal, are to be sold.

Hutchison's saw mill at Prince Albert, N.W.T., was destroyed by fire recently. The loss is about $8,000.

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

SAW MILL MACHINERY FOR SALE, 75 horse power. Apply to J. E MURPHY LUMBER CO., Marksville, Ont.

FOR SALE—100,000 FT. HEMLOCK, TO BE cut to order. Address P. O. 6, Care "LUMBERMAN," Victoriaville, P. Q.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

CEDAR FOR SALE — 10,000 PCS. ROUND Cedar 8-16 and 25 feet long, at the Spanish boom. Also cedar, pine and spruce lumber for sale here at Larchwood. JAMES MCCREARY, Larchwood, Ont.

FIRST CLASS VENEER PLANT FOR SALE at Parry Sound, or will sell a one half interest to a party who understands veneer and can manage the business. ECHO BAY LUMBER CO., Echo Bay, Ont.

FOR SALE, A GOOD SAW MILL, CAN SAW from 15 to 25 thousand per day, with everything complete, nearly new. Apply to ROBERT STEWART, Vasey P.O., Ont.

FOR SALE—250 M. FEET 1", 1¼", 1½", 2",3", 4" Hard Maple first class stock, 2" Hard and Soft Elm, 5/8", 1" Basswood, Cherry, White Ash, Pine and Hemlock, on C.P.R., near Ingersoll. This season's cut. Write for quotations to W. F. GALLOWAY or W. PARTLO, Ingersoll, Ont.

LUMBER WANTED

WE WANT A CONTRACT FOR LARGE quantities of Plain Red or White Oak 1 x 3 and wider, as wide as possible, 32 and 63" long, to be cut from green bolts or logs and shipped when thoroughly weather seasoned. Address W, CANADA LUMBERMAN, Toronto.

FOR SALE

One second-hand Engine Lathe, 32 inch swing, 22 foot bed, with face plate and chuck combined, steady reft and counter shaft—to be sold cheap to replace with new tool.

Also one second-hand Tubular Boiler 3 feet diameter, 12 feet long. Apply

ST. JOHN IRON WORKS, Ltd.

P. O. Box 391. - Vulcan St., St. John.

FOR SALE: ABOUT 3 CARS OF 3" AND 1 car 2" White Maple. Winter cut. Address ANDREW KNOX, Box 22, Norwood, Ont.

WANTED—BLACK ASH AND BIRCH. ASH 1", 1¼" and 1½" in 1sts and 2nds and No. 1 common. Birch in squares 4x4" and larger. Also a fair quantity of Elm squares 4x4" and larger. Apply W. B. BARTRAM & Co., Ottawa, Ont.

WANTED.

LATHS WANTED FOR SHIPMENT BY car this winter. Either 1⅝" or 1¼", standard Spruce, Butted 4 ft. Address C. S. WENTWORTH & CO., 147 Milk Street, Boston, Mass.

FOR SALE — 100,000 FEET DIMENSION Spruce Timber, to be delivered on first snow roads, viz, 6 x 6, 7 x 7, 8 x 8, 9 x 9, average in proportion about sizes. Lengths 18 to 32 feet. Address "LUMBERMAN," P. O. 6, Victoriaville, Que.

FOR SALE.—SAWMILL, BUILT THREE years ago on Cecebe Lake, 9 miles from Burk's Falls, capacity from 12 to 15 M. Convenient for shipping lumber on scows. Address WM J. PALMER, Cecebe P. O., Parry Sound Dist., Ont.

FOR SALE—GOOD SAW MILL PLANT, AND Hardwood Timber Limit, containing about 35 million feet, also a Pine Limit with about 15 million feet. All close to mill on water, good shipping facilities. For particulars address Box 335 CANADA LUMBERMAN, Toronto.

MILL PARTNERSHIP WANTED

EXPERIENCED MAN WITH CAPITAL wishes to acquire partnership in small saw mill in interior of B.C. on railway, might buy outright if satisfactory arrangements could be made Address PARTNERSHIP, CANADA LUMBERMAN, Vancouver office.

FOR SALE AT A BARGAIN—NO. 3 HAMILTON Carriage Steam Feed, 7½" cylinders and all connections, circular outfit complete with iron husk, mandril, etc. Two boilers 22 feet long, 4 feet in diameter, six boilers 20 feet long and 4 feet in diameter, two 14" flues in each. Full Second Hand Outfit for Circular Mill. THE ONTARIO LUMBER COMPANY, LIMITED, Toronto, Ont.

MACHINERY FOR SALE

We have for sale the following second hand machinery, in good condition. Write us for full particulars and prices of any machine.

1 26" x 32" engine box frame, slide valve on top of cylinder, driven with rock shaft.
2 No. 3 single cutting band mills, made by Prescott Co.
2 Two block carriages with Prescott offset, made by Prescott Co.
1 Two block Garland carriage.
1 Boss shingle machine, made by Mowry.
1 Hall shingle machine.
4 Perkins Grand Triumph shingle machines.
3 Drake hand shingle machines.
4 Perfection power shingle machines.
1 Double block shingle machine, Perkins make.
1 Drag saw.
1 Knee bolter.
1 Perkins Class A cut-off.
2 Wheel jointers.
2 Knot saw frames.
7 Shingle packers.
1 Heading trimmer.
2 Rich automatic saw sharpeners.
1 Independent condenser.
1 Portable boiler and engine, boiler with 32" fire box, and 28—3" tubes, 12 h p., engine 8 x 12.
1 Greenlee No. 1 improved automatic cut-off machine, with countershaft.
1 Friction feed complete, frictions 15" wide.
1 36" standard Leffel water wheel
1 Upright boiler 70" x 32" with sixty 2" tubes.
" 54" x 32" with ninety 1½" tubes.
10" x 16" twin engine, steam feed, complete.

THE WM. HAMILTON MFG. CO., LIMITED
Peterborough, Ont.

WANTED TO PURCHASE FOR DELIVERY in 1906, 2,000,000 ft. hemlock. THE PATTERSON-TILLEY CO., Hamilton, Ont.

WANTED—1", 6/4" AND 2" BLACK ASH, 6/4" and 2" Basswood, all common and better, dry. Box 326, CANADA LUMBERMAN, Toronto.

WANTED—SQUARE BEECH, 12 INCHES or up, 12 feet to 16 feet long. Apply Box 336, THE CANADA LUMBERMAN, Toronto.

WANTED—LARGE QUANTITY OF 12x12, 8x10 and 6x10, also 2", 3" and 4" plank. Terms cash. Address Box 337, CANADA LUMBERMAN, Toronto.

FOR SALE — LUMBER MILL ON GEORgian Bay, in first class order, capacity 70,000 per day, and two limits on North Shore. Apply ESTATE OF TANNER BROS., Waubaushene.

FOR SALE, 1,200 ACRES PINE, OAK, ASH, elm, bass and hemlock, run over 5 M to acre, and a good mill and site, very convenient, easy lumbered, good market, easy terms. Box V, Thessalon.

FOR SALE — 75,000 FEET 1 IN. BIRCH, 25,000 feet 2 in. Birch. Entire product of logs cut and piled six months; best shipping conditions; snap for some one if shipped before December 31. Box 330 CANADA LUMBERMAN, Toronto, Ont.

FOR SALE

10,000 ft. 6/4" Birch 1st and 2nds.
10,000 ft. 4/4" Birch Common and Better.
6,000 ft. 6/4" Hard Maple 1st and 2nd.
7,000 ft. 5/4" " No 1 Common.
25,000 ft. 4/4" Soft Elm, Crating stock.

BENNETT FURNISHING CO, London, Ont.

CEDAR SHINGLES WANTED FOR SHIPment this winter. Ten carloads of Extras, standard manufacture and grading. Please quote lowest price less 5 per cent commission and 2 per cent. for cash, delivered Boston rate of freight. Address, CHARLES S. WENTWORTH & CO, 147 Milk Street, Boston, Mass.

FOR SALE

NEXT SEASON'S CUT OF HEMLOCK, PINE, BIRCH and Maple Lumber, also orders taken for Veneers and Handles; will also saw one million feet of logs at price per M feet. Shipment by Rail or Vessel. Correspondence solicited. T. H. DECEW & Co., Bruce Mines, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The mills have closed down and the white pine production for this year is at an end. The stocks now in the yards will be all that will be available to meet the requirements until sawing operations are resumed next spring. The question has frequently been asked of late whether the quantity of white pine will be sufficient, and the opinion has been expressed that a decided shortage would develop before next midsummer. There has been such a phenomenal demand that it has been impossible for either dealers or manufacturers to accumulate any stock. This condition points to higher prices, although as an offset it may be said that among the more conservative people in the trade there is a disposition to discourage any further advance. "Prices are high enough" is a remark that has been made more than once during the past two months.

The hardwood market is in the hands of the log producers, and upon their action will depend to a large extent whether prices improve or become further demoralized. We say demoralized, for the reason that some manufacturers are offering stock at fully $5 per thousand less than others. The present low prices should stimulate the consumption of hardwoods, and if the log production this winter is curtailed, we anticipate some recovery in prices. If, on the other hand, the crop of logs this winter should be heavy, we would not be surprised to witness a still lower range of values.

QUEBEC AND NEW BRUNSWICK.

The lumber trade is showing some evidence of getting on a winter

basis. This is due not so much to lack of demand as to the scarcity of stock. The United States market has absorbed nearly all the suitable lumber and consequently for the next few months shipments will be light. Prices continue very firm notwithstanding that some classes of lumber are at the highest point ever reached. There is not likely to be any reaction before next spring, but, if logging conditions should be favorable this winter and the drives reach the mills safely, prices may settle down somewhat.

There is still great activity in lath circles. Small manufacturers have realized exceptionally high prices for stock for shipment to New York and Boston, where the demand is in excess of the supply. Cedar shingles are quiet on the basis of $3.35 to $3.45 for Extras on Boston freight rate.

UNITED STATES.

The favorable conditions governing the lumber trade of the United States still prevail. During the month of November permits were issued in 32 cities for buildings costing $41,365,518, as compared with $33,547,140 in the corresponding month of 1904. This is a gain of 23 per cent. and shows that the building requirements have been an important factor in this year's lumber business. There has also been a heavy consumption of car material. Dealers are anticipating their requirements for the early part of next year and are placing orders quite freely at current prices. Not for many years have the conditions in the closing days of the year been so favorable to the holder of white pine, southern pine, spruce, and hemlock stocks. Beyond some unexpected disaster, it does not seem that anything can transpire to weaken the market during the next few months. Box lumber is scarce at Buffalo, Tonawanda and New York, and prices have an upward tendency. Pennsylvania producers of hemlock have advanced the price 50 cents for all points from Buffalo to Albany, making the base price for Buffalo $17.50.

There is a considerable inquiry for hardwoods, which is likely to bring about a more active trade after the turn of the year. Plain red and white oak has the call at the present time. Chicago dealers are said to be taking some basswood in stock in the hope of better prices late. on.

GREAT BRITAIN,

The position of the British lumber market is admitted to be very strong owing to the light stocks. At Liverpool the shortage of Quebec pine deals as compared with one year ago is about 6,000,000 feet. Spruce deals from New Brunswick and Nova Scotia also show a large diminution, but the stock of Quebec spruce deals is almost as heavy as one year ago. The supply of Quebec square pine is only 23,000 cubic feet, as compared with 76,000 and 128,000 cubic feet in 1904 and 1903 respectively. Oak, elm, ash and birch timber are likewise in short supply. With the demand improving there is reason to expect a further advance in prices. Spruce continues to improve. A quantity of 3 × 9 inch fourth quality, from Quebec and Montreal, was recently disposed of for shippers' account at £8 15s. per standard in dock, while at a recent auction sale 3 × 9 inch second quality brought £8 15s., and 3x8 third quality in 12 feet lengths £8 10s. There is more inquiry for pine deals. Prices at Hull are £35 to £36 per standard for first quality, £21 for second quality, and £12 10s. for third quality. Very little business for next season has as yet been closed, but it is understood that shippers are asking an advance of 10s. per standard on last year's prices.

An order has been granted for winding up the North Bruce Lumber Company, of Toronto. Mr. Schmitendorf has been appointed liquidator.

STOCKS AND PRICES.

The Scott Lumber Company will cut about 6,000,000 lath at their mill at Fredericton Junction, N.B., this winter.

The Alfred Dickie Lumber Company have about 8,000,000 feet of deals to be hauled this winter from Stewiacke to Stewiacke Station.

Tenders are invited by the Department of Public Works, Ottawa, up to Tuesday, January 2nd, for the supply of timber required by the Welland Canal and its branches during the year 1906.

The Scott Lumber Company, of Fredericton, N.B., will cut about 8,000,000 feet of logs this winter, which will be manufactured next season together with about 14,000,000 feet which they are carrying over.

Harry Taylor, of Pokiok, N.B., has made arrangements for the operation of a lath mill on the waters of the Bellvedere during the winter months. He will keep four machines going during day and night, and it is understood that the laths will be handled by Stetson, Cutler & Company, of St. John.

The St. John River Lumber Company are arranging to carry on immense operations this coming season. They will bring out, it is said, somewhere in the vicinity of twenty-four million feet, and besides that they are reported to have seven million feet tied up in Black River, and a million tied up in the Allegash, with another drive hung up on the St. Francis. Should the ice go out with a rush in the spring the company may have trouble in catching a good deal of their lumber at their mill, which is situated on the American side of the St. John River, about thirteen miles above Grand Falls, N.B.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., December 11th, 1905.—Pacific Coast millmen are not very anxious to cut big timbers for the Grand Trunk Pacific Railway Company. Many enquiries have been made, and an order has been placed with the Canadian Pacific Lumber Company for four million feet. But the price offered is too low for the manufacturers to snap at the business. Ten dollars a thousand is the figure, and the mill must guarantee that the timber does not weigh over 3,200 pounds, while it goes to 3,400. A reduction is made for this, which with the other costs, such as commission, etc., leaves about $8.60 for the mill. This is very low, especially with logs scarce and high in price, and, consequently, the business yet has not reached any proportions.

"Logs have been so scarce that I went over to Washington to purchase some for our mill at Nanaimo," Mr. J. S. Emerson said this morning. "I secured about 5,000,000 feet. The prices were $5 for rough, $7.50 for merchantable, and $9 for flooring. The market is very stiff just now, although cedar logs are a little weak."

The Haslam mill at Nanaimo, which is now operated by the Nanaimo Lumber Company, controlled conjointly by the Ladysmith Lumber Company and Mr. Emerson, is cutting timbers for the C. P. R., and has just sent a carload or two to Mexico, to the order of the Government there.

Mr. Emerson has also in contemplation the erection of a saw and shingle mill on Burrard inlet, near the establishment of the Canadian Pacific Lumber Company at Port Moody.

Word comes from the interior that the big Staples mill at Bayard has closed down, and also the Crow's Nest Lumber Company's mill at Wardner. These are two of the largest in the Kootenay.

Shingle manufacturers have had to curtail their output owing to the scarcity of shingle bolts. "The market now is fairly good," Mr. E. H. Heaps remarked this morning, "but with bolts up 75 cents per cord there is likely to be a stiffening of the prices about the first of the year. XXX now sell at $1.70, but another 10 cents will in all probability go on in a few weeks. Conditions are improving, though for some time past they have been very bad. There is lots of room for improvement, for the shingle part of the industry has suffered more than the other."

Office and Yard, 571 DORCHESTER ST. - - P.O. Box 116

Washington shingle men waited on the manufacturers here to ask that the mills here shut down in co-operation with the mills of Washington. The latter have been closed for sixty days, and Messrs. Dan W. Bass, president of the Shingle Mills Bureau; R. W. Douglas, E. T. Nobles, L. H. Baldy and H. W. Vanderhoof came to Vancouver to present the request for co-operation. Some of the mills here are not operating, but the shut-down is not general. The reasons are the scarcity of bolts and the market conditions, and the mills are taking advantage of the opportunity to do the annual overhauling. No definite action was decided upon as a result of the visit of the delegates of the shingle manufacturers of Washington.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

ST. JOHN, N. B., December 15th, 1905.—But little is being done in lumber shipping circles in this vicinity and schooners are daily going into winter quarters. This circumstance is due principally to the fact that charters to the United States are daily becoming scarcer, as all lines marketed in that direction are practically cleaned up.

"American" merchantable spruce deals have been phenomenally strong during the last two months. Sales have been made at figures for which it is hard to find a parallel. A fair estimate of all these figures leads to the conclusion that the following prices would be about the average of those realized:

10 and 12 inch,	$20.00 to $20.50	per M
9 inch,	18.00 to 18.50	" "
6 and 8 inch,	15.50 to 16.00	" "

(f.o.b. schooner St. John)

So far as this port and river are concerned there will be nothing put upon the American market before June 1st next, or at the very earliest, mid-May. This is owing to the fact that, with navigation of the river closed for the year, there are no logs of any description nearer than Grand Falls, that there will be none available at St. John before the first rafting of the spring drives, which cannot reach this port before May 1st at the earliest (as mentioned in previous letters), and that all the product of the past season's sawing has gone forward, barring some fairly large stocks of "English" deals and some small parcels of other unimportant lines.

Logging operations for local manufacturers upon the Aroostook river, where are cut most of the American logs sawn at this port, will be this winter, according to all indications, slightly heavier than has been the case for several years past, but not sufficiently so to point to any strong confidence that the boom in the United States markets will be carried over into next year. The general impression in this regard seems to be that, in the spring, with the long season of manufacturing in prospect, there is a probability that the high figures which have been prevalent in the above markets during the last few months will not be sustained either in long lumber or lath. At any rate, there is no apparent anxiety on the part of local people to load up, at figures higher than the usual, either with raw material or the manufactured product. It is generally felt that the recent soaring of prices has been rather unnatural and born of unlooked for conditions, the chief of which was the scarcity of logs at the chief manufacturing centres of Maine and New Brunswick. This, coupled with marked activity in building circles of the New England States, could lead to but one result—extreme eagerness to buy and consequently remarkably high prices. It is improbable that after June 1st next there will be any scarcity of logs and thus will be removed one of the most vital causes of the recent stimulation of the United States markets.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company furnish the following review of the Barbados market: "The fortnight has once more been marked by the entire absence of arrivals, and with stocks rapidly diminishing, the market is in an exceptionaly strong position for both white pine and spruce, as the demand for cooperage purposes has set in and there is very little here to meet requirments. The market for shingles virtually remains as last advised, the demand having been very light and stocks of both long and laying cedar being ample for all requirments."

NEW BRUNSWICK LUMBERING OPERATIONS.

Extensive operations are being carried on in New Brunswick this winter on behalf of the smaller mills. At Point Wolfe, C. T. White is getting out his usual cut. At New Ireland, Wilbur & Wilbur are operating on a large scale and C. I. Prescott is working a few camps in the same locality as well as at Lumsden, about eight miles from Albert. At Midway, McLellan Bros. have set up their portable mill and Charles Hawkes and Theodore Stevens are lumbering nearby. W. J. Carnwath, of Riverside, has two large crews in the woods. Silas Benjamin is getting out logs at Lower Cape. Downey Bros. are lumbering at Caledonia, Boyce and Rufus Milton at Curryville, and Dobson Bros. at Stevescote.

In the vicinity of Shogomoc the principal operators will be Steven Madden, who will cut about half a million, part for himself and the balance for A. Grant; B. F. Ingraham, about 100,000 feet; James Ritchie & Sons, 200,000; Fox Brothers, probably 100,000, and A. Grant, 100,000.

LOG SCARCITY IN BRITISH COLUMBIA.

Fir logs have become very scarce in British Columbia, with the result that some of the millmen are turning their attention to Puget Sound as a probable source of supply. J. S. Emerson, acting on behalf of himself and the Nanaimo Lumber Company, recently purchased 5,000,000 feet of good fir logs on Puget Sound, the first boom of which, containing approximately 800,000 feet, is expected to reach Nanaimo this week.

Fir logs of average quality are worth $8.50 per thousand feet in British Columbia, and clear cedar $10.50. On the Sound the supply is greater although by no means plentiful. Ruling prices there are $5 per thousand for rough fir, $7.50 for merchantable, and $9 for flooring.

During the month of November there were applications for thirty licenses to cut timber on British Columbia Government lands. Thus from the first of the year there has been no variation from the steady demand for timber.

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

Owen Sound, Ont.

Massey Harris Co., Limited
TORONTO - CANADA

Will write a few more contracts for No. 1-2 Hard Maple or Birch 3½×6×14 No. 1-2 Red Birch 3 and 3½×8×14 Delivery spring or summer 1906, 1907 and 1908. Write stating quantity can supply and delivery date. Further particulars will be given on application.

FOR SALE

Lumber Yard, Planing Mill, Sash and Door Factory.

Cottage and Stable, 22 Lots 33 × 120 on Railroad Siding. Best location in City, Population 10,000. Sell whole or half interest. Address, BRANDON, Manitoba, Box 399.

The Haskell Lumber Company, of Fassett, Que., have secured nearly 10,000,000 feet of logs, including pine, spruce, cedar, hemlock, basswood and birch. They are now completing their mill and will commence sawing operations in the early spring.

CURRENT TRADE CONDITIONS.

ONTARIO.

This is inventory time, when lumbermen usually give more attention to the closing up of the year's business than to getting orders. The resources of the manufacturers, however, have been so taxed of late that they have much stock yet waiting shipment, and consequently there is more than the usual activity. The usual winter falling off has been almost infinitesimal, so great has been the demand for white pine and hemlock lumber. There are no large blocks that have not been contracted for, and the broken condition of yard stocks would indicate a scarcity before spring. The United States market is still absorbing large quantities of the middle and lower grades. The purchase of the 1906 mill cut of McLachlin Bros., Arnprior, referred to elsewhere, is no doubt the beginning of other important contracts which will be closed within the next few weeks. Dry hemlock is practically out of the market, and orders are being received for green stock.

Hardwoods are almost at a standstill. There are no signs of immediate improvement in either demand or price, but if the log production is curtailed, a few weeks might bring about a wonderful change in this respect.

Lath continues to be a feature of great interest. Some manufacturers have been asked to name a price for their 1906 output, which would indicate that a few buyers at least anticipate a continuance of the strong market next year.

MANITOBA AND BRITISH COLUMBIA.

The condition of the lumber and shingle market of Western Canada is moderately satisfactory. Business is good for this season of the year. Agents of the Grand Trunk Pacific Railway are now in British Columbia for the purpose of placing orders for bridge timber, ties, etc., but the prices which they are willing to pay do not as a rule appeal to the manufacturers, who have lost too much money in the past by selling their output at the cost of production. The trade with builders in Winnipeg, Vancouver and Victoria is still good, with prospects of a large demand in the spring.

The shingle market is in an uncer-

tain condition owing to the fact that the selling agreement of the coast mills terminates at the end of the year. While it would seem to be in the interest of the manufacturers to continue the agreement and thus keep the production within reasonable bounds, the indications at time of writing are that it will be dissolved. Regardless of what transpires, however, we expect shingle prices to be sustained, for there is now a very small margin of profit in the business.

UNITED STATES.

The holiday season does not seem to have greatly interfered with the lumber business this year. There continues to be considerable activity and buyers are making inquiries about next year's stock. Some dealers who have this year met with difficulty in securing a supply of lumber have gone into the woods and purchased logs, which they will have manufactured under contract. The call for box lumber is quite urgent. If the weather should continue favorable to building and out-door operations, there is not likely to be an immediate falling off in demand, but severe winter weather, accompanied by snow storms, would no doubt unfavorably affect the volume of trade. The expected advance in prices at the regular monthly meeting of the White Pine Association of Buffalo and Tonawanda did not materialize, but the position is one of decided strength. Spruce is firm and in scant supply, and most of the New England mills are now closed down. Sales are being made above the list prices.

The hardwood trade is better than one year ago, although it shows no such life as pine and spruce. Maple and basswood are overstocked and there is not much hope of higher prices until the supply is reduced by a curtailment in production and increased consumption. It is believed, however, that there will be a good demand for hardwoods the coming spring, as the prices at which they are selling should appeal to the buyers.

Chicago wholesalers are asking $5.25 for No. 1 white pine lath f.o b. cars Chicago, and $4.50 for No. 1 hemlock. Because of the unusual stringency in the supply of white pine, considerable basswood and white cedar lath are being disposed of. The tendency of shingles is towards higher prices, and with production at a very low point, the market is not likely to weaken before spring.

GREAT BRITAIN.

While the strong statistical position of the British market is generally admitted, there is a disposition on the part of importers to defer the placing of contracts until the new year. Shippers are generally asking an advance on last year's prices, and this the importers are not inclined to pay until they feel certain of an increased consumption. At some ports there is considerable activity. Travellers in the Birmingham district are asking the following range of prices for St. John spruce: 3 × 6 inch, £8 7s. 6d. to £9 5s. per standard; 3 × 7, £9 7s. 6d. to £9 17s. 6d.; 3 × 9, £10 to £10 10s.; 3 × 11, £11 5s. to £11 15s. Cargoes have recently changed hands at from £8 to £8 5s. c.i.f. London, the latter price being realized for a small steamer with something like 60 per cent. of 7 and 8 inch.

Importers are showing more willingness to contract for hemlock, which is worth about £6 5s. c.i.f. Hardwoods are, if anything, a little stronger. We understand that a few sales of birch have been made at an advance of 1d. per cubic foot on last season's opening prices.

STOCKS AND PRICES.

It is reported that several Eastern dealers of white pine have contracted for the product of mills for the next two years, and on the present basis of values.

George Taylor, of Grand Forks, B.C., has been given the contract to get out 2,000,000 feet of logs for the Kettle River Lumber Company. The logs will be cut on the limits up the North Fork.

The Dominion Park Company, Street Railway Chambers, Montreal, are asking for tenders for the supply of about 1,000,000 feet of rough and dressed spruce and pine lumber to be used in the construction of an amusement park at Longue Pointe.

The schooner C. S. Holmes has been chartered by the Nanaimo Lumber Company, Nanaimo, B. C., to carry lumber from that place to Mexico. This will be the second time in the history of Nanaimo that lumber has been shipped by water from that port.

E. H. Lemay, of Montreal, has purchased the entire output of white pine to be manufactured during the year 1906 by McLachlin Bros., of Arnprior, Ont. The amount will probably exceed 50,000,000 feet. This is one of the most important contracts which has been closed for some time and is regarded as indicative of the strength of the lumber market.

The receipts of lumber at Tonawanda this year totalled 465,139,603 feet, an increase of 50,000,000 feet over the year 1904. The total would have been still larger if vessels in sufficient number could have been secured during the later portion of the season to bring down all the stock that the dealers had purchased and intended moving before the close of navigation.

COOPERAGE STOCK.

The Sutherland-Innes Company, manufacturers of cooperage stock, Chatham, Ont., say: "This month we can report a considerable improvement in the cooperage stock situation. The demand for No. 1 stock is now fairly brisk, and prices have jumped up from 50 cents to 75 cents per 1000 on staves and one-half cent per set on heading, and about 50 cents per 1000 on hoops, although in some instances even more than this. We are looking for a still further increase in prices on staves and heading. Hoops we do not think there will be very much advance in, as they can be produced very quickly and in sufficient quantities to take care of the market. The principal demand at the present time is for sugar and flour barrel stock.

"All No. 1 stock generally is in very fair demand, and if the present consumption continues it will not take long to clean up the stock at the mills. There is also considerable demand for cement stock, but No. 2 stock is still comparatively dead. The indications are, however, that No. 2 stock will also begin to move rapidly inside a month. The situation has been in a bad condition for so long, that it is with much pleasure we are able to report a change for the better, and it looks very much as if the change would be permanent.

"The tight barrel stock situation is also in very good shape. Tight barrel stock of all kinds is in good demand, in fact, the demand is almost in excess of the supply, in certain lines very much in excess of the supply, and it is almost impos-

Beer, quarters	22c.

HOOPS.

Tierce	$12.50 @ $13.50
Pork	9.00 @ 10.00

THE GLASGOW MARKET.

Messrs. Edmiston & Mitchells, Glasgow, Scotland, say:

There have been gratifying indications of trade improvement in the city and neighborhood and timber has benefitted along with other industries. While the improved conditions no doubt owe very much to the great shipbuilding activity on the Clyde, still the general demand seems to have revived somewhat within the past month or two, it is satisfactory to relate. In some items the demand has exceeded the supply, notably so in the case of spruce, pitch pine and teak, the import of which has been unusually meagre of late, and, as a consequence, values have moved up sharply, and, so far as can be judged, are likely to continue high for some time.

A gratifying feature of late has been the increased demand for Quebec 3rd pine deals, practically all of which arriving recently found ready sale from the ship's side, whereas earlier in the season similar goods had, in nearly all instances, to be stored. The scarcity of imported shelving pine boards partly explains the improved demand. Quebec 1st and 2nd pine deals have also been enquired for, but sidings, which are more plentiful, have been rather pressed for sale.

American hardwoods have been moving away pretty freely, with the exception, perhaps, of quartered oak boards, the high prices of which have tended to restrict the consumption, and have caused a run on plain oak as a substitute.

The position of the market, as a whole, can be unhesitatingly described as very firm, with a tendency to higher, rather than lower, prices.

WHITE PINE.—There has been no import during the month. The demand has been fairly active, and deliveries from ponds have been rather better than usual. Stocks are still ample. Prices are firm.

OAK.—The demand has been quieter this month, and there have been no sales of any importance. There are, however, one or two big enquiries pending, which will bye-and-bye tend to reduce the stock somewhat. Prices are firm.

ELM.—Enquiries have been more numerous, and there have been some sales of small parcels at satisfactory prices. Stocks are moderate.

QUEBEC BIRCH.—The November import consists of 78 logs and 150 loads of planks. An active demand exists for logs, and good prices can be secured for such, but planks have been coming forward pretty freely of late, and a lot of them have gone into store, the asking price not having been obtainable in all cases "ex quay." Sales of planks have been made at from 16d. to 17d. per foot.

ASH.—No logs came to hand during November, and there are none on hand now for sale. No better proof of the scarcity of ash can be advanced than the fact that the logs in store, which were nearly all old and inferior, have been cleared up without trouble, at quite satisfactory prices.

DEALS, &C.—The import has been on the usual moderate scale, and the bulk of the pine and spruce deals arriving per "Liners" have been disposed of ex quay. Sidings have been arriving too freely, and the greater portion have gone into store. Stocks all over are light. Prices are firm. Current values are as under:—

BROAD FIRST PINE DEALS—£33 to £35; 11-inch, £30 to £32; ends and non-dimensions, £23 to £25 10s.

SECOND PINE DEALS—11-inch and up, £19 to £21; ends and non-dimensions, £13 10s. to £15.

THIRD PINE DEALS—11-inch and up, £11 10s. to £14; ends and non-dimensions, £9 10s. to £10 10s.

RED PINE DEALS—9 and 11-inch, £9 10s. to £10 10s.; Narrows, £7 10s. to £8 10s.

FIRST PINE SIDINGS AND STRIPS—9 to 10 inch, £23 to £24; 11 to 12 inch, £25 to £26; 13 to 14 inch, £27 to £28.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

A LUMBER SHIPPER AND YARDMAN. one who is well posted in all kinds of lumber. State age, experience and salary. Apply to MAITLAND, RIXON & COMPANY, Owen Sound, Ont.

LUMBER STATISTICS.

The publishers of the CANADA LUMBERMAN have sent out a large number of blank circnlars to lumber manufacturers throughout Canada for the purpose of securing the necessary data for our annual review of the lumber trade. many of these circulars were returned promptly, but a considerable number of manufacturers have not yet supplied the information asked for. We hope that we may receive the hearty co-operation of the trade in our efforts to compile annual statistics and that those who have not filled out and returned the circulars will do so immediately.

If any of our readers can furnish additional statistics from their district, they will be very much appreciated.

CURRENT TRADE CONDITIONS.

ONTARIO.

The past week's business in lumber has not been large, as travellers have been off the road and there has been a disposition everywhere to take a few days' relaxation. White pine and hemlock men have experienced a season of great activity, with the demand during the fall months seemingly overtaking the supply. The advent of winter will cause a temporary lull, but it is likely to be of short duration. A brisk spring trade is now predicted and the question most discussed is how the stock of white pine can be made to meet the requirements. The mills are practically sold out and stocks carried by dealers are not large. The situation with hemlock is similar. It is in good demand, and we understand that some sales of the 1906 cut have been made at an advance on recent prices. The only danger to the market seems to be a possible

overproduction of logs. Weather conditions have been very favorable for logging operations and there will no doubt be a heavy input of hemlock. The cut of white pine is not likely to vary much from last winter, while the feeling of the hardwood trade is that there should be a marked curtailment in the production of logs. In one district, for instance, it is estimated that the cut will be fully 50 per cent. less than one year ago. A number of the smaller operators have their funds tied up in lumber and are therefore not in a financial position to take out logs this winter even if they felt disposed to do so.

MANITOBA AND BRITISH COLUMBIA.

The close of the year finds the lumber market of Western Canada in a fairly prosperous condition. The stocks of retailers are not large and buying for the spring trade has already commenced to some extent. In Winnipeg, where buildings to the value of $11,000,000 were erected last year, there is still a good demand for finishing material. The building requirement is also an important factor in the demand at Vancouver. The interest of manufacturers is now centred on the log supply, as the scarcity previously referred to has become more pronounced. The high prices prevailing, however, will no doubt stimulate production and bring about some relief in the near future. In sympathy with the advance in the price of logs, the tendency of lumber values is to stiffen.

UNITED STATES.

The Southern Lumber Manufacturers' Association, at a meeting at St. Louis on December 27th, decided to advance all classes of lumber from $1 to $3 per thousand feet. The minimum advance was made on No. 3 boards and 8 and 10 inch boards and shiplap, and the maximum advance on No. 2 common flooring and ¾ inch ceiling. The Northwestern Hemlock Manufacturer's Association took similar action at Milwaukee on December 28th, when the entire hemlock price list was advanced $1 with the following exceptions: 22 foot and longer, advanced $2; No. 3 piece stuff and 10 inch boards and products, advanced 50 cents. The strength of the lumber market, as evidenced by the above, is phenomenal. Sales of white pine lumber for the coming season are quite numerous. Some 4,000,000 feet of No. 3 and better was recently sold at Duluth at $26.50, which is the top price yet recorded for that grade, while 6,000,000 feet of Norway was contracted for at $20. Prospects are considered bright for an exceptionally busy winter and much attention is already being given to the acquisition of stock to meet the spring demand. Hardwoods are in the Eastern States, but advices from Wisconsin are to the effect that there is an increased enquiry for basswood, birch and maple. Log run birch brings about $17 at the mills in Wisconsin.

GREAT BRITAIN.

Excepting the falling off coincident with the holiday season, the lumber trade of Great Britain continues to show activity and in some kinds of stock there has been an advance. The small lots of spruce from Halifax, N. S., have been sold at £7 17s. 6d. c.i.f. for the usual specification. The shipments offering during the past month have not been of large volume nor are they expected to be heavy during January. Little business for next year has as yet been done. It is understood that shippers of pine are demanding higher prices than last year, and this the importers are not disposed to pay. It is probable, however, that after waiting for a month or six weeks, they will conclude that they must meet the views of the Canadian manufacturers and shippers if they are to secure the stock, as the demand at home and in the United States is steadily increasing.

STOCKS AND PRICES.

George W. Murray has secured the contract for all the interior hardwood finish for the new C.P.R. Hotel at Winnipeg.

The Huntsville Lumber Company are paying $7 per thousand feet board measure for hemlock logs delivered on Big East River and Lakes Vernon, Fairy and Peninsular.

The Turner Lumber Company, Limited, of Toronto, have sold 5,000,000 feet of common and better lumber from their stock at Cutler, Ont., to White, Rider & Frost, of North Tonawanda.

Lumbering operations in St. John county, N.B., this winter are quite active. James Lowell, M.P.P., who is operating in the vicinity of South Bay and Grand Bay, expects to take out 1,500,000 feet. C. E. Gregory, at his Nereis camp, has 50,000 pieces yarded. Stetson, Cutler & Company and John E. Moore also have large crews in the woods in that county and have commenced hauling.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN)

VANCOUVER, B.C., December 26th, 1905.—The placing of orders for timbers for all the three big western railway companies is adding to the business of the local mills. Trade is fairly good as it is, and it is expected that orders will be coming in for timbers for a couple of years. Already mills are cutting for the C.P., G.T.P. and the Canadian Northern Railways. Mr. A. McMillan, member of the firm of the McDonald-McMillan Company, of Winnipeg, who have contracted with the Grand Trunk Pacific for the building of the company's bridges, trestle work, etc., was in the city last week in connection with the letting of contracts for timber, and with him was Mr. T. S. Bonsfield, inspector for the railway. In addition to the contracts let to the Canadian Pacific Lumber Company and the Nanaimo Lumber Company, the Rat Portage Lumber Company and Messrs. Cooke and Tait are also cutting timbers for the Grand Trunk Pacific.

"These orders have all been placed at list prices," said Mr. T. F. Paterson, of the Canadian Pacific Lumber Company, this afternoon. "The figures run from $10 to $14 per thousand according to lengths, and all of the mills have been offered business. The present orders are only drops in the bucket, and until the railways are completed they will keep coming in."

Bad weather of the past couple of weeks has accentuated the scarcity of logs. They are now selling as high as $7 in the camps, and there will likely be a raise in the price of lumber, as the manufacturers will be forced to ask a higher figure since the raw material is so high. It is not considered probable that the weather conditions will be very favorable for another month at least, and this has a great deal to do with the supply of logs in the winter. The price, too, is very stiff, even at the increased figure, and the Nanaimo Lumber Company is importing logs for its mill.

Shingle bolts are also climbing in price, owing to the same reason. They are now 25 per cent. higher than a month or so ago, and if they keep up the price of the finished article may be forced up also. The shingle market all through the year has not been good, but there is an improvement since the American mills shut down. The demand is not from Canada, but from the other side, and notwithstanding the duty on Canadian shingles entering

the United States, the manufacturers here are shipping there.

The Robertson Lumber & Transportation Company, of Portland, Ore., who some time ago proposed to organize a local company to ship logs by raft to Hongkong and Shanghai, now have in view the shipment of logs to California. The intention is to approach the Legislature at its session next month to take off the prohibition of export of logs to assist the promoters in the enterprise.

THE BARBADOS MARKET.

Messrs S. P. Musson, Son & Company say: "We are again without any arrivals this fortnight, and in consequence the market is becoming more and more bare of all descriptions. A cargo of white pine which was sold to arrive some time ago is now due, and we hear of a large vessel being on the way with part cargo for this port, consisting of spruce and white pine. We have sold a small cargo of spruce to arrive at $22.50 for shippers, and we think that another cargo of this description would bring a similar rate. In the absence of spruce, there will no doubt be a good demand for white pine, and first arrivals of this will do well. There have been no receipts of shingles, but we hear that a million of Cedar Laying are coming down on the vessel which is bringing the white pine alluded to above. In the present condition of the market, we expect a rather low price will be obtained for them. Long Cedar are in ample supply for present requirements."

GRAND TRUNK PACIFIC TIMBER CONTRACTS.

Agents of the contractors building the Grand Trunk Pacific Railway have recently been in British Columbia with the object of placing orders for timber, lumber, etc., for the construction of the road. As previously mentioned, an order for about 4,000,000 feet was placed with the Canadian Pacific Lumber Company, of Port Moody, B. C., and it is understood that the full market price was obtained. The McDonald-McMillan Company, of Winnipeg, contractors for the building of all bridges and trestle work on that part of the Grand Trunk Pacific line running from Portage la Prairie west to Touchwood Hills, a distance of 270 miles, are said to have placed additional orders, one contract alone calling for the furnishing of 15,000,000 feet of fir bridge timber. Most of this will be supplied by the Coast mills, but a portion will be secured in the Kootenay district. It is said that this contract was secured in competition with the Puget Sound mill men.

A contract for the piles necessary in bridge and trestle building is also reported to have been placed with the mills in Southeastern Kootenay points along the route of the Crow's Nest Pass Railway. Fully a hundred car loads of piles will be required.

Mr. T. F. Paterson, secretary of the Canadian Pacific Lumber Company at Port Moody, was asked regarding a report that local mill men were not anxious to obtain contracts from the Grand Trunk Pacific people because of the low rates being given for timber.

"Our firm has taken an order for four million feet,' said Mr. Paterson, "and I can say that the contract was exactly on the market list at the present time. As a matter of fact, the list is more likely to show an increase in price during the next few months rather than a drop in the rate. I can understand that local mills, looking for an increase in prices, may not wish to tie themselves up to very large orders just now. If the weather is bad logs will be scarce and prices will necessarily go up."

REDUCED FREIGHT RATES.

A important reduction in lumber rates has taken place as a result of a joint tariff just issued by the Great Northern and Canadian Northern Railway Company effective on the line of the Nelson and Fort Sheppard railway between Nelson and Waneta, and part of the Fernie branch between Swinton and Gateway. The new tariff gives a 33 cent rate from the points mentioned into Winnipeg and a number of Manitoba points. Heretofore the shippers along the line had to pay a local rate of 5 cents per hundred as far as Nelson, when the C. P. R. took charge of the shipment at the 33 cent rate. It is understood that lumber and shingles for the Northwest and Mani oba competitive points will be hauled all the way by the Great Northern. The reduction amounts to from 60 cents to $1 per thousand feet.

The receipts of lumber at Chicago in 1905 were approximately 2,200,000,000 feet, the largest on record with the exception of the year 1893, which reached 2,250,000,000 feet. It is estimated that northern pine comprised about 35 per cent. of the total receipts.

TIMBER LIMIT TRANSACTIONS.

The transfer of the Mirimachi lumbery property of the William Richards Company, Chatham, N.B., to the Miramachi Lumber Company took place in New York on December 31st. The purchase price is in the vicinity of $700,000.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

Electric Power at $12.50 per annum per horse power. If not sold outright we would do business with a man with Five to Ten Thousand to invest and act as manager. Address Box 345, CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

The demand for white pine and hemlock lumber was never stronger during mid-winter than at the present time. The open winter has permitted building operations to proceed almost without interruption, and consequently retail stocks which were expected to carry well into the spring are already badly broken. Dealers are showing keen interest in the market and are somewhat concerned about their supplies for the coming season. United States buyers have already contracted for a portion of the 1906 production of the Georgian Bay mills and other large deals are now pending. Such transactions as have been closed show an advance on last year's prices of from $1 to $2 per thousand feet for log run. The future of prices will depend to some extent upon the success of logging operations. The weather up to the present time has been favorable for cutting, but if the winter should prove to be mild with little snow, there will be danger of the log input being curtailed. This would bring about a further advance in prices, whereas if a large crop of logs should reach the mills there may be some difficulty in maintaining present prices. So far as the present is concerned, however, the market could not be stronger.

Hardwoods are not being sacri-

ficed as recklessly as a few weeks ago. The general curtailment in logging operations has created a better feeling, as it is recognized that a decreased production next year will be a great help to the market. Many of the smaller concerns are cutting no logs this winter; at Powassan, for instance, where three concerns were operating last winter, no logs are being cut and the mills will be idle during the coming season. There is a considerable stock of 1½ and 2 inch maple on hand at the mills, but the inch stock has practically cleaned up by the flooring factories.

White pine lath show no perceptible weakness notwithstanding the high price. All kinds are readily saleable. A quantity of No. 3, for instance, was recently sold at an Algoma shipping point at a phenomenal figure.

THE EASTERN PROVINCES.

The year is starting out with bright prospects for the lumber trade of the eastern provinces. The annual trade returns show that the wintering stock at Quebec is exceptionally light, that of square pine being the smallest on record. An increase is shown in only one item, namely, elm timber, the supply of which is 360,531 cubic feet, as compared with 322,778 cubic feet one year ago. The stock of spruce deals is 553,243 superficial feet, as against 822,575 feet one year ago. The Miramichi stock is estimated to be twenty millions less than last year. In view of the revival in the British market and the prospects of a continuance of a large trade with the United States, the outlook for 1906 would seem to be very hopeful. Weather conditions have been very favorable for logging operations and the cut promises to be equal to or above the average. This, with the logs that were hung up last summer, should give the mills a plentiful supply of raw material. It is estimated that the log production on the Miramichi river this winter will be 80,000,000 feet.

UNITED STATES.

The White Pine Association of Buffalo and Tonawanda last week adopted a price list making an increase on a number of the better grades as well as on barn and box boards and scoots. The North Carolina Yellow Pine Association have announced an advance of $1.50 on bill stuff, following the finished lumber advance of $2 made a short time ago. Advances at this season of the year are unusual and are the result of the extremely healthy conditions governing the lumber market. Sales of lumber have recently been made at Duluth at top prices, this including a large lot of No. 3 shorts, 6 feet and under, 4 inches and wider, at $15.25, and a quantity of No. 3 and better from ordinary logs at $21.75, which is equivalent to about $20 for log run. Buyers are plentiful and the view is quite generally held that a marked shortage of stock will be experienced before the spring. The outlook is for another active building season, in which case there is likely to be a further appreciation in pine and hemlock values.

There is not much activity in hardwoods, although prices are holding firm. Michigan maple manufacturers are reported to have advanced their prices on rough maple to $23 for firsts and seconds, $16 for common and $10 for culls. Birch is said to be getting scarce in New York and at other eastern points, with prospects of higher prices before the spring.

The scarcity of lath has not been alleviated. The high prices have stimulated the production of spruce, balsam and cedar lath and this may in time affect the market, but at the present time the undertone continues uniformly strong. The shingle trade is quiet and not likely to show much activity for two or three months.

GREAT BRITAIN.

Signs of activity in the British market are now apparent, although few transactions are taking place. Buyers are somewhat disposed to accept shippers' prices, believing that they are warranted by conditions, and the next two or three weeks will likely witness the closing of some important contracts. The stock lists for the close of the year have reached us for Glasgow only, and here a decrease is shown in second, third and fourth quality white pine deals, red pine deals, Quebec spruce deals, and New Brunswick spruce deals. The stock of New Brunswick spruce deals is only 1,695 standards, as compared with 7,677 standards at the close of 1904 and 6,438 standards in 1903. Quebec elm timber is in slightly larger supply.

Broad first pine deals are selling at £33 to £35 per standard, and 11-inch from £30 to £32, while second quality are bringing £19 to £20 for 11-inch and up. Red pine deals are worth £9 10s. to £10 10s. for 9 and 11-inch. Quebec spruce deals are held at £9 to £9 10s. for 9-inch and up and £7 15s. to £8 5s. for 7 and 8 inch.

STOCKS AND PRICES.

Huff & Carter have tie gangs working on their limits on the Vermillion river, in the vicinity of Edmonton, Alta., and expect to cut 50,000 ties.

Messrs. Clairmonte, Man & Company say of the Barbados market: "There has been one arrival with lumber during the fortnight; both white pine and spruce are wanted. Last sale of former, to arrive, at $25.50 per M for first, and $21.50 for second quality. Last sale of spruce, $23.10 as it runs. Last sales of Gaspe long cedar at $4.26 to $4.37 per M, as to quality. Cedar laying, last sales $1.70 to $1.73. Spruce laying, no late sale."

ADVANCE IN B.C. SHINGLES.

VANCOUVER, B. C., December 30th, 1905.—The anticipated increase in the price of shingles was made this week, when the manufacturers of this city agreed to raise the figure for No. 1 shingles 15

cents to outside points. As pointed out previously, bolts are scarce and have gone up 75 cents per cord, and it is for this reason that more is being asked for the finished product. The price of No. 2s was reduced 5 cents.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

ST. JOHN, N.B., Jan. 2nd, 1906. —Since last writing there has been considerable activity in shipping circles, several parcels of "English" deals having gone forward by the winter liners. Beyond this the lumber trade in all lines has been as quiet as is usual at this season of the year.

Advices from logging operations in the up-river districts tell of favorable conditions and all indications lead to the conclusion that no difficulty will be experienced in filling contracts. In the lower counties operators have been until now somewhat hampered by the remarkable lack of snow which, while it is ample for yarding purposes, is not sufficient for hauling on roads.

The local feeling in regard to the market for New Brunswick spruce in Great Britain continues to be of a decidedly optimistic nature. There is practically nothing for sale in this line at this port such quantities as are to be seen on the different wharves (totalling to in the vicinity of three and one half millions of feet) having been closed out to local commission houses. With the shipment of these lots, which will in all probability go forward in small parcels by the winter liners from time to time until cleaned up, the local dealers and manufacturers will be out of the market until, at the earliest, June next. With the bright prospects for good business in this line during 1906, it is, of course, keenly regretted by those interested that they are not in a position to take advantage of the stimulus of trade and also that the coming manufacturing season will be so materially curtailed. The ideas of those who will have "English" deals to dispose of when the sawing season does begin, are apparently fixed upon higher prices in the line, and the indications are that no lower quotation on "English" deals of 1906 cut could be obtained, on a contract specifying say 50 per cent. 7's and 8's, 35 per cent. 9's and 15 per cent. wides, than from $13 to $13.25 per M sup. feet, f. o. b. steamer St. John.

The American markets are attracting considerable attention and developments in this direction are eagerly awaited. While there is no pronounced indication that the high prices prevalent during the last few months will not be sustained, a felling of caution is easily discernible.

Spruce laths have fluctuated considerably during the last few weeks but at any time during that period could have been sold f.o.b. St. John at $3.25 per M (non-dutiable) and in some cases there is no doubt that sales could have been made at $3.50 to $3.75. Very little is offering in lath in this direction. Several temporary mills are engaged in the out-lying districts in manufacturing lath from the round wood, but no important quantity will be available from these sources before mid-March.

Freight rates to the United States are rather uncertain, as sailings are few and will continue so for some time to come, there is practically no current rate; 70 cents per M on lath to New York has been the rule but it is probable that an increase of 5 cents or even 10 cents would be asked at this date.

THE BRITISH COLUMBIA SHINGLE SITUATION.

Mr. A. McNair, of Vancouver, B. C., upon being interviewed, said that the shingle situation, although it had improved in the last year, was still far from satisfactory, and would have to be still further improved before it would be remunerative. The increased price of shingles has been forced upon the mills as a result of the increased price of raw material, shingle bolts having advanced seventy-five cents, and cedar logs being very high. And while the raw material is much higher in price it is also much harder to obtain, thus greatly increasing the expense and difficulties in making shingles. On the other hand the situation had improved somewhat on account of some of the shingle mills being destroyed by fire during the year and a good many shingle machines being put out of use, and not replaced, thus lessening the danger of overproduction. There was a slightly better demand from the east, the shutting down of the mills on the United States Pacific coast having prevented overproduction and removed the danger of American shingles being dumped on the Canadian market. The fact that half the mills in British Columbia close down about December 1st for 60 days also lessened the danger of overproduction. Thus the shingle business will be on a rather better footing in 1906 than it was in 1905, for the curtailment of the production all season and the fact that dealers anticipating lower prices allowed their stocks to run down, has left a rather limited supply of manufactured shingles in sight.

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

Information given by addressing—

JAS. C. POND, Wis. Cent. R. R. Milwaukee

Massey Harris Co., Limited
TORONTO - CANADA

Will write a few more contracts for No. 1-2 Hard Maple or Birch 3½×6×14. No. 1-2 Red Birch 3 and 3½×8×14. Delivery spring or summer 1906, 1907 and 1908. Write stating quantity can supply and delivery date. Further particulars will be given on application.

CURRENT TRADE CONDITIONS.

ONTARIO.

Prices of white pine lumber are firmer than one week ago, in sympathy no doubt with the higher list recently adopted by the White Pine Association of Buffalo and Tonawanda. The recent advance in prices has seemingly encouraged buyers, and for duplicate orders the sellers have in many cases advanced their prices from $1 to $3 per thousand. The open winter has contributed in some degree to the exceptional strength which the pine market has shown, but the predominant influence is the widespread conviction that there will be a shortage of stock before spring. The feeling in the Ottawa Valley district, as far as can be judged, is that there should be an advance in common lumber. "We expect to get an advance on the common grades, which are now out of line with the rest of the stock," was the remark of a prominent manufacturer to the writer. Logging conditions in the Ottawa Valley, as well as in the Georgian Bay district, have been favorable, although better work could have been done with keener weather and a firmer bottom for the roads.

Opinions are much divided as to the outlook for hardwoods. The large stocks of birch and basswood are against any immediate recovery in prices, although we believe that those who have the patience to carry their hardwoods for two or three months will be rewarded.

QUEBEC AND NEW BSUNSWICK.

The mills continue to receive inquiries for spruce lumber for shipment to the United States, but few of the manufacturers have any stock suitable for that market. So far as sawing operations are concerned they will for some months to come be confined to the smaller mills. Prospects for the coming season, however, are considered as the brightest, as with the improvement which has taken place in the British market there promises to be a very brisk demand for spruce lumber. Woods operations are being carried on very successfully and some of the operators are already counting on having an increased stock of logs for next year. Among these are the Bay Shore Lumber Company, the O'Neil Lumber Company and A. F. Bentley. New Brunswick shingles are quiet, with no change in quotations.

UNITED STATES.

A good demand for lumber is reported from all sections of the United States, although shipments are being hampered by the lack of transportation facilities. Every other condition is satisfactory. Large sales of norway and white pine have recently been made in the Lake Superior district at top prices, as a shortage is anticipated before the spring. Already some items are difficult to buy. Box lumber is in very light stock at Buffalo and Tonawanda, while white pine flooring strips 1×4 and 1×6 is the scarce item at Toledo, Ohio. Pennsylvania manufacturers have again advanced the price of spruce lumber, bringing the base price at Boston to $21.50. The scarcity of hemlock boards in the New England States is helping the sale of spruce. Hardwoods appear to be

in better request. A correspondent states that before the new cut is in shipping condition all the dry stock will be gone. The demand for basswood is said to be increasing, the low price at which it can now be purchased having at last tempted buyers. Maple is quiet, with prices not strong and a considerable supply of thick stock at the mills.

GREAT BRITAIN.

The new year in Great Britain has begun with exceedingly open weather, which is favorable for the continuance of outdoor work, and as a consequence the movement of lumber ie quite large. The publication of the statistics of stock on hand has helped the market, the decrease being somewhat greater than was generally expected. The stock of pine deals in the public docks at London, for instance, show a decrease of 258,553 pieces as compared with one year ago, while in spruce deals the decrease is 173,616 pieces. To show the relation of the decrease to the total stock we quote the figures for two years, given in pieces:

	1904	1905	Decrease
White pine deals	462,629	204,076	258,553
White pine battens	194,692	135,707	58,945
Spruce deals	449,814	276,198	173,616
Spruce battens	459,147	381,610	77,537

Liverpool stocks also show a marked decrease in Quebec pine deals, New Brunswick and Nova Scotia spruce deals and square and waney board pine. The stock of Quebec pine deals is lower than it has been for three years. For pine 10 per cent. advance on last year's prices is being asked and obtained, while the advance on spruce is even greater with every prospect of its being maintained.

STOCKS AND PRICES.

J. J. Sweeney, of Melrose, N.B., has a contract to saw about 1,000,000 feet of lumber for Frank Maxwell, of Sackville.

LaPage & Pigeon are taking out 2,000,000 feet of logs on Stormy Lake, having recently purchased a saw mill at Wabigoon, Ont.

John Murchison, of Nanaimo, B. C., has opened up a logging camp on Gabriola Island and expects to cut over a million feet of logs this winter.

It is understood that Taber, Cameron & Company, of Tacoma, Wash., are about to engage in logging operations at Gambier Island, Howe Sound, and expect to cut about 60,000 feet per day.

It is estimated that there will be a large cut of logs on the Spanish river this winter. Gillies Bros. have eleven camps in operation and expect to cut about 50,000,000 feet on their Cobalt limits.

F. S. Jones, Superintendent of Electric Light, Fort William, Ont., will receive tenders up to January 25th for the supply of two hundred 40-foot poles and one hundred 45-foot poles to be delivered f.o.b. cars Fort William.

George J. Kinnaird, secretary-treasurer of Edmonton, Alta., is asking for tenders up to Wednesday, 31st inst., for supply of 900 electric light and telephone poles. Particulars may be obtained from J. H. Hargreave, Public Works Commissioner.

Duties collected on Canadian lumber at Tonawanda, N. Y., during the year 1905 amounted to $115,265.36. This is the largest amount ever collected on Canadian lumber at that port. The second largest year was 1904, when a trifle over $100,000 was collected.

R. & T. Ritchie, of Aylmer, Quebec, are taking out a stock of logs this winter which they will saw into lumber for themselves during the coming season. Last year they sawed under contract for the Hull Lumber Company and the Estate of R. Hurdman.

TIMBER LIMIT TRANSACTIONS.

A timber limit of three square miles, at the head of the south branch of the Newcastle river, in New Brunswick, will be sold at the Crown Land Office, Fredericton, on January 24th. The applicant is the Sayre & Holly Lumber Company.

J. D. McArthur, of Winnipeg, has purchased the timber limits and mill of the Moyie Lumber and Milling Company, Moyie, B. C., the consideration being about $150,000. The limits are estimated to contain 200,000,000 feet of pine, fir, cedar and birch timber.

Holland & Graves, of Byng Inlet, Ont., have bought from Eddy & Glynn the Township of Mackenzie, in the Georgian Bay district, which contains about 100,000,000 feet of pine timber. The price paid is reported to have been about $500,000. It is said that in 1896 Holland & Graves sold this identical tract to the Delta Lumber Company for $225,000. The Delta Lumber Company in 1898 sold the tract to Eddy & Glynn for $270,000, and the latter have now sold it to its first owners for more than double the price for which the latter originally sold it.

ADVANCE IN FIR LOGS.

The Washington Logging and Brokerage Company, of Seattle, recently issued a new price list advancing logs measuring more than forty-two feet in length and twenty-eight-inch top diameter. There is a slight advance on logs of twenty-seven inches top diameter, but the principal changes are on twenty-eight inches and over. The advance ranges from 50 cents to $5.50 per thousand feet, the new list being as follows:

Twenty-seven-inch top diameter and under—Up to 40 feet, merchantable, $7.50 per M; 42 to 50 feet, $8.50 per M; 52 to 60 feet, $9.50 per M; 62 to 70 feet, $11 per M; 72 to 80 feet, $13 per M; 82 to 90 feet, $15 per M; 92 to 100 feet, $17 per M.

Twenty-eight-inch top diameter and over—Up to 40 feet, merchantable, $7.50 per M; 42 to 50 feet, $10 per M; 52 to 60 feet, $11.50 per M; 62 to 70 feet, $13.50 per M; 72 to 80 feet, $16 per M; 82 to 90 feet, $19 per M; 92 to 100 feet, $22 per M.

Up to 40 feet, flooring, $9 per M; up to 40 feet, No. 2, $5 per M.

Leon Gagne, jr., wholesale lumber dealer, Montreal, is announced to have assigned.

Frank Julian, lumberman, Revelstoke, B. C., is reported to have assigned to William H. Pratt.

D. M. Jermyn, of Wiarton, Ont., has been appointed permanent liquidator of the North Bruce Lumber Company, of Toronto. The company had been in business a little over a year and recently assigned with liabilities of about $16,000.

BRITISH COLUMBIA SHINGLES.

As has been previously announced in the columns of the CANADA LUMBERMAN, the price of British Columbia red cedar shingles has been advanced fifteen cents per thousand for No. 1 clear and lowered five cents for No. 2. The cause of this increase is due entirely to the increased cost of the raw material, shingle bolts having advanced from 75 cents to $1.00 per cord, which advance more than represents the rise in the price of the shingles. The prices prevailing during 1905 were cut so close that when the higher prices for shingle bolts came into force, it was found absolutely necessary to do something in order to secure to the manufacturers reasonable returns on their investments. Hence the advance in shingles.

Prices for shingles on the American side have also gone up for the reason that the mills there have been shut down for the past six weeks, and will continue closed until February first. The prices on the American side for "clears" which in 1905 were from $1.50 to $1.65 per M. are now $1.80 to $2.00, while "Stars" are now $1.60 to $1.80 as against $1.25 to $1.35 formerly. The shingle manufacturers in Washington, like their Canadian cousins, made nothing on their investments in 1905 and the rise was absolutely necessary in their case also.

Several of the B. C. mills have been shut down for as much as two months this winter on account of the scarcity of bolts, and as a result stocks at the mills for spring shipments are somewhat low, and the manufacturers expect this year's business to be more favorable than has been for some time past.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., January 8th, 1906. — "There will hardly be another advance in the price of shingles," was the remark this morning of Mr. J. G. Woods, shingle manufacturer, when asked about the condition of the market. "The raising of prices for our product is not regarded as the most desirable thing at any time, but circumstances compelled the increase of 15 cents, which after all is only the price shingles used to be. Bolts are exceedingly scarce, in fact, we had to shut down on Friday owing to none being available. If the weather is very unfavorable, and the best is not looked for at this time of year, they will be scarcer. Therefore, the outlook is not as satisfactory as one would wish."

Manufacturers of lumber are looking for a good season. "The output for 1906 should prove to exceed anything yet," declared Mr. T. F. Patterson, of the Patterson Timber Company, and secretary of the Canadian Pacific Lumber Company at Port Moody. "I would not be surprised if the billion mark were reached. This will be caused by the very good crops of last year, which will give the farmers building money, and to the extensive railway building which is going on both in this province and the western provinces."

Logging conditions have not changed since last report. Logs are still a scarce article, the price being maintained at the increased figure, namely, $5.50 for rough, $7.50 for merchantable, and $9 for flooring. Unless conditions are the most favorable during the next two months, another increase in price is looked for.

The Mountain Lumber Manufacturers Association held its quarterly meeting at Nelson yesterday, when the lumber tariff of prices was revised, but little altered. It was thought at the last meeting that a raise of $2 per thousand would have been made yesterday, but it was decided to put off the increase until March. Mr. J. G. Scott, manager of the Pacific Coast Lumber Company, Vancouver, and Mr. H. J. de Pencier, manager of the mill at Barnet, went up from this city to represent the coast lumbermen, as any increase will have effect also on the coast. The officers appointed were: Mr. F. W. Jones, Golden, president; Mr. J. A. Dewar, Nelson, vice-president, and Mr. G. P. Wells, secretary.

Mr. J. S. Emerson has retired from the presidency of the British Columbia Loggers' Association, owing to his interests at Nanaimo, having declined the honor for this year, though pressed to accept. The officers elected at the meeting held last week were: President, Capt. Theo. Magnesen, Van Anda; vice-president, H. Whitaker, Sechelt; secretary-treasurer, W. J. Patterson; executive committee, J. Fisher, D. Essen, Charles Thulin, W. H. Higgins, Nels Morin, J. M. Mackinnon, C. A. Mackinnon, A. C. Fraser, H. E. Gilley and George Glassford.

GOOD RETURNS.

Messrs. Chas. S. Wentworth & Co., wholesale lumber merchants, Boston, write: "We have received very good returns from our advertisement in the WEELKY CANADA LUMBERMAN so far and feel called upon to compliment your paper."

J. S. FINDLAY - OWEN SOUND, ONT.

A SPLENDID ROUTE.

The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.

The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.

The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.

This line offers the best route between Chicago, St. Paul, Milwaukee, Minneapolis or to Lake Superior points via Ashland, Wisconsin.

FOR SALE

600 M feet of lumber, Elm, Bass, Black Ash and Birch; 250 M feet now cut, 350 M feet to cut to order. Apply BOX 342 CANADA LUMBERMAN, Toronto, Ont.

LUMBER AND LOGS WANTED

PINE AND HEMLOCK LOGS AND LUMBER of all kinds wanted, large or small quantities. Box 341 CANADA LUMBERMAN, Toronto, Ont.

WANTED TO PURCHASE, FOR DELIVERY during summer of 1906, a quantity of Soft Elm 4/4", 6/4" & 8/4". State price and point of shipment, also quantity you could deliver of each thickness. Address COX, LONG & Co., LIMITED, Room 2 Hope Building, Ottawa, Ont.

WANTED

A LUMBER SHIPPER AND YARDMAN, one who is well posted in all kinds of lumber. State age, experience and salary. Apply to MAITLAND, RIXON & COMPANY, Owen Sound, Ont.

FOR SALE CHEAP.

SAW MILL IN FIRST CLASS ORDER, 40 h.p. boiler, engine, shafting, pulleys, belting, saws, everything complete, capacity 15 to 20 M ft. in 10 hours, 100 acres of land, some timber. For price write N. D. SEAMAN, Sauble Falls, Ont.

FOR SALE

About Two Thousand Acres of splendid timber land, consisting of large block of heavily timbered cedar and hemlock, balance maple and other hardwoods, with fully equipped saw and shingle mill now running. Small cash payment, balance taken in lumber at market price. Immediate possession and stock of logs if desired. Apply, Box 348, CANADA LUMBERMAN, Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The volume of lumber moving is large for the month of January. There has as yet been no interruption to building operations in Southern Ontario and consequently the drain upon retail yards has been heavy. This will mean an early spring demand from the retailers, which suggests the question whether the light supply of white pine now in the hands of manufacturers and wholesalers will be sufficient to meet the requirements. Present conditions, it may be said, indicate a shortage and higher prices. There is a disposition in some quarters, however, to proceed conservatively, on the ground that prices are already high enough and nearing the prohibitive point. Some principals have accordingly given instructions to their men to buy sparingly, but at the same time to pick up anything which may seem in the nature of a bargain.

Logging operations are suffering from mild weather. There is some snow in the northern pine districts, but the weather has not been cold enough to make good roads either for taking in supplies or getting out logs, and if these conditions should continue, the output will be greatly curtailed. In the hardwood sections very little logging has been done. There is no sleighing in Western Ontario as far north as Walkerton, and it is probable that the production of hardwood logs will be not more than 50 per cent. of the usual cut. This should bring about higher prices for lumber, and especially for basswood, prices of which are too low as compared with those ruling in the United States.

As an indication of the strength of the lath market, it may be said that a sale was this week made of No. 2 lath to be cut during the coming season at $3.50 f.o.b. Algoma mill point, taking 19 cent rate to Pittsburg.

QUEBEC AND NEW BRUNSWICK.

The strength of spruce in the Eastern States has been reflected to some extent throughout the Maritime Provinces, and at the present time there is a disposition to regard the outlook for 1906 as hopeful. Perhaps clapboards represent the commodity which is least in demand at the present time, but as the production has been very moderate prices are not likely to suffer. Cedar shingles are bringing from $3.35 to $3.50 for Boston delivery, the latter price being for the production of manufacturers who are known to make a high grade shingle. There is not much activity and no particular change in either demand or price is looked for during the next month or six weeks.

MANITOBA AND BRITISH COLUMBIA.

Lumbermen of Western Canada are anticipating an active trade during the coming season. Some dealers are already placing orders in anticipation of an early spring demand, but the general disposition seems to be to wait until February or March before giving the business to the mills. This policy, however, does not always produce the most satisfactory results. The tendency of both lumber and shingle prices is upwards, as owing to the scarcity and increased cost of logs, an early advance in prices is almost inevitable. It is yet too early to estimate the extent of the demand this year, but it is significant that the aggregate value of buildings in Winnipeg for which permits have been granted up to this date is considerably in excess of the figures of the corresponding period of last year, and that in nearly all western cities and towns like conditions exist. This means a large consumption of lumber during the first six months of the year at least.

UNITED STATES.

The lumber situation in the United States cannot be character-

ized otherwise than exceptionally strong. Southern pine probably leads in point of demand, followed by white pine and spruce. The higher scale of prices adopted by the White Pine Association of Buffalo and Tonawanda is being readily paid, the consumer apparently having come to the conclusion that conditions warrant the step. In the Lake Superior district prices are about $3 higher than a year ago, No. 6 boards, which is the very lowest grade, bringing $7. Chicago dealers last week sent out new lists showing an advance of $1 on practically all items. While there is a light supply generally of white pine, the scarcity of box lumber is pronounced and likely to lead to still higher prices. Everything in the spruce line sells very rapidly, as a considerable quantity is being used for building purposes. There is also a large call for hemlock and in New York a scarcity of 2×4 inch, 18 and 20 feet. Wisconsin hemlock is held at $15 to $16 in lengths up to 16 feet, while 18-foot lengths are $1 more.

The condition of the hardwood trade was carefully considered at the meeting of the Hardwood Manufacturers' Association of the United States held at Louisville, Kentucky, on January 16th. The reports presented show that the stocks of hardwood on hand at the mills are smaller than one year ago. It was decided to fix the price of inch firsts and seconds basswood at $34 f.o.b. Ohio river points, while for log run maple the following prices were agreed upon: 1 inch, $20; 1¼ and 1½ inch, $22; 2 inch, $23. For log run soft elm the prices fixed were: 1 inch, $21.50; 1¼, 1½ and 2 inch, $23.50.

GREAT BRITAIN.

The general elections in Great Britain have, naturally, not been helpful to business, and under the circumstances it is satisfactory to know that the lumber demand continues steady and prices firm. Buyers still seem a little dubious about the reported falling off in shipments from Canada, but if the buoyant market which now exists in the United States should continue, they are likely to be given some strong evidence during the coming year. Unless all signs fail, British importers must pay higher prices for Canadian pine and spruce if they are to secure as much stock as in former years. It is stated that over £8 per standard c.i.f. has been paid in the Bristol Channel for a parcel of St. John deals per the winter liners containing 10 per cent. 3x11 inch and 15¼ feet average length. For special Irish specifications $8 15s to £9 is being asked, but importers are not contracting liberally at these figures. Shippers are asking and receiving higher prices for waney pine, birch and elm, the light stock in Quebec having placed them in a strong position in respect to 1906 shipments.

STOCKS AND PRICES.

The Richards Lumber Company, of Campbellton, N.B., expect to get out about 6,000,000 feet of logs this winter.

B. F. Smith, of Woodstock, N. B., has just sold 100,000 feet of birch lumber to the Massey-Harris Company, Toronto.

Musgrave & Company, 159 Hollis street, Halifax, N.S., are desirous of purchasing one million laths for shipment in February.

Clark Bros., of Coldstream, N. B., and F. E. Sayre & Company and J. K. Fleming, of Hartland, N.B., have been operating their lath mills to their full capacity. It is understood that the price of spruce lath is slightly weaker.

The Carney Lumber Company, of Owen Sound, Ont., have sold to the Hines Lumber Company, of Chicago, the entire cut of their mill for the season of 1906. The cut is estimated at 20,000,000 feet and the consideration is between $400,000 and $500,000. Most of the lumber will be shipped to Chicago.

Geo. Read, of Campbellton, N.B., and T. R. Campbell, of Salisbury, are setting up a portable mill at Crandall's Siding on the Moncton and Buctouche railway, to saw logs for George McSweeny & Company, of Moncton, who are operating quite extensively in that section during the present winter.

In Chicago No. 1 white pine lath are now quoted at $5.25 and No. 1 at $4.75. The mill price is now firmly established at $4.50 for No. 1 white pine, $3.75 for No. 2, and $2.30 for No. 3.

The barque "Weathersfield" has completed loading her cargo of 850,000 feet of lumber at the Fraser River Saw Mills, New Westminster, B.C., and sailed for New Zealand. The ship "American Cushion" has just loaded 1,250,000 feet of lumber at Chemainus for Sydney, Australia, and the ship "Glenevan" is about to load lumber at Vancouver, B.C., for Melbourne, Australia.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

ST. JOHN, N. B., Jan. 16th, 1906. —The lumber trade in this direction is undergoing the usual mid-winter period of quiet. Some parcels of deals, most of which come from points outside the city, are going forward weekly by the winter liners, but beyond this very little is doing.

Reports from the United States markets indicate a season of inaction such as is usual during and following upon the holidays. Until now so far as is known this lack of activity has been accompanied by no weakening of prices.

The trade in that direction continues to attract a great deal of attention from local dealers and speculation is rife as to what the next three months will bring. The operations of buyers are marked by much caution and it is quite apparent that even the most experienced are somewhat at a loss as to what to expect. In the meantime the favored policy seems to be one of non-commitment.

The condition of trade in Eastern wood goods in the markets mentioned and the prices prevalent during next spring and summer will no doubt depend to an important extent upon the supply of logs at the mills in Maine and New Brunswick and the prospects in that regard. Not before the opening of navigation in the rivers (which will take place about the 25th of April) can any idea be formed as to whether 1906 will be a successful driving season. At that date a

A SPLENDID ROUTE.
The Wisconsin Central Railway is justly termed the "Sportman's Line" because it reaches into and through the very heart of the choicest hunting grounds in America.
The very best wild fowl shooting of the entire North is reached ONLY by this line. Hundreds of beautiful lakes abounding in wild rice and celery attracts myriads of ducks and geese and afford the finest kind of cover and the choicest shooting to be found the country over.
The Wisconsin Central Railway caters especially to the sporting public and during the various seasons for hunting and fishing furnishes daily information to its patrons as to local conditions anywhere along its lines upon application to the nearest ticket agent. It also arranges its train service with special reference to the convenience and comfort of sportsmen, and its employes are constantly on the alert to make travel over their lines pleasant and comfortable.
This line offers the best route between Chicago, St. Paul, Milwaukee Minneapolis or to Lake Superior points via Ashland, Wisconsin.

forecast might be made, but with the uncertainty of the many conditions which have to bear upon this important feature, a forecast at that date even would be a mere guess. Only when the logs are in safe water could it be said without doub. that this material drawback to a normal season's cut had been removed. When this fact has been made plain there remains to be seen its effect on prices of the United States markets and before it is a certainty it would be hard to figure in regard to prices during 1906. Of course, the logs referred to are those cut and manufactured on the rivers of Maine and on the Maine side of the St. John to be sawn in New Brunswick.

To date the logging season has been marked by a little better than average success. Operators on the American side of the St. John report favorable conditions in nearly all directions, although in some parts snow has been somewhat scarce until recently. This drawback has been remedied by a heavy fall during the last week.

So far, therefore, probabilities point toward an ample supply of logs to be sawn for the United States markets during the coming season, but, in view of the conditions mentioned above, it can readily be seen to what extent the element of uncertainty enters into the situation.

Estimates of the total quantity of "American" logs to be cut on the St. John this season range from 65 to 75 millions of feet, but the general opinion seems to be that the smaller quantity is nearest the actual figures.

The quantity of "American" spruce deals at this port just now is too small to be important.

WINNIPEG CONDITIONS.

WINNIPEG, Jan. 8th, 1905.—There has been considerable talk about an advance in lumber prices in Winnipeg, but as yet the retailers have made no advance. D. E. Sprague stated that he had heard of no change. The Rainy River Lumber Company stated that they would not advance present prices. J. M. Chisholm, wholesale dealer, said that B.C. fir had advanced about $1 per thousand, but pine was stationary, and the Manitoba mills had not advanced prices. T. D. Robinson said he believed the mills would make an advance in prices in the near future. From enquiries in other directions it was learned that some dealers consider that the advance of $1 on B.C. fir will be followed by a general advance all round.

FREIGHT RATES ON LUMBER.

A conference took place between the Ottawa Valley lumbermen and the representatives of the railway companies last week regarding the freight rates on lumber from Ottawa to New York. Until quite recently the charge was $3 per thousand feet, and the change has been made to 11 cents per hundred weight, which, it is claimed, is equal to the lineal foot rate. The lumbermen claim that no two scales weigh alike, so that there would be no definite way of knowing in advance what the freight charges would be. As lumber is sold by foot measurement, they claim it is much more advantageous to have freight charged on the same basis.

The lumbermen said they simply would not pay on the tonnage basis, and intimtated that if the railways make the change all the lumber would be forwarded to New York by boat, and is necessary a special line of boats could be secured for that purpose. The question will be considered further at a meeting of the Canadian Freight Association in Toronto this week.

BRITISH TIMBER SALES.

The following prices were realized at an auction sale held by Churchill & Sim, London, England, on January 11th:

PINE.—Ex. Montcalm, from Quebec—12-13 ft. 3 x 10 in. first quality, £24 15s. per standard; 12-13 ft. 3 x 8, £22 10s.; 12-13 ft. 3 x 7, £22 10s.; 10-11 ft. 3 x 10, £24; 10-11 ft. 3x 9, £23 10s.; 10-11 ft. 3 x 8, £20 15s.; 10-16 ft. 3 x 5-9, £22 10s. TIMBER PRODUCTION IN ONTARIO.

Returns of the quantity of timber cut in the province of Ontario during the season of 1904-05 show a slight falling off in the output as compared with the previous year. The cut of pine logs totalled in all 625 million feet board measure. Of square timber, 1,066,989 cubic feet was taken out, and the output of pulpwood was 73,000 cords, while the railway ties cut numbered 2,064,501.

On the total cut, the dues accrued and payable to the Government aggregate up till December 31st last $1,142,842.92. This is somewhat in excess of the accrued dues of 1904, which were $1,062,810.

During the season of 1903-04 the total cut of saw logs was 663,124,892 ft. That of white pine square timber was 1,963,938 cubic feet, and of pulpwood 29,833 cords.

The lumber yard and plant of the Manitoba Lumber Company at Carman, Man., were entirely destroyed by fire last week. Some lumber was burned, the total loss being $20,000.

Seiling's saw mill at Eagle Lake, Ont., together with 100,000 feet of lumber, was destroyed by fire on January 20th.

The assignment during the past week of A. F. Bury Austin, lumber merchant, Montreal, was learned with regret by the trade at large. Mr. Austin has done a large domestic and export business. His liabilities are placed at $90,000, the Bank of Ottawa being the largest creditor. Several Ottawa lumber manufacturers are interested for small amounts. The assets consist chiefly of lumber at Pembroke, Ont., Aylmer, Que., and other points.

GRAND HOO-HOO RALLY.

Don't forget the great Hoo-Hoo gathering in Winnipeg on February 10th during the Curling Bonspiel Tournament. Visiting Hoo-Hoo and lumbermen should note the date.

Frank Julian, shingle manufacturer, Revelstoke, B.C., has assigned.

Best of references furnished as to character, business ability, etc. Address communications in first instance to Box 350 CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

There is an unusual winter requirement for lumber. The retail demand is good and wholesale buyers are plentiful. The market is decidedly strong and much speculation is being indulged in as to how far prices will advance as the result of the mild winter and lack of snow in the woods. Our advices from the Ottawa Valley and certain sections of the Georgian Bay district are to the effect that the bush work is all stopped and the snow nearly all gone. Even if the weather should become favorable, there is certain to be a material shortage of logs. The seller of lumber has, therefore, everything in his favor at the present time. Quotations given one month ago are being withdrawn, and, when new lists are issued, an advance made of from $2 to $4.

There is a very active demand for hemlock and some fair sized stocks have recently changed hands. As an indication of prices, we might mention the sale of some ten-inch stock at $13.50 on a high freight rate; 2 inch, 10 to 16 feet, at $12.50, and 2 inch in 18 feet lengths, at $15. The advance in spruce and whitewood is a source of strength to hemlock.

Although the shingle market is seasonably quiet, a few sales of white pine are being made at very satisfactory prices. Occasional orders are also being booked for B.C. red cedars at the new scale, which is $3.60 for XXXXX, 5 to 2 inch, and $3.05 for XXX, 6 to 2 inch, for Ontario delivery.

QUEBEC AND NEW BRUNSWICK.

The lumber trade throughout the Eastern Provinces is quiet, as only a few of the mills have any suitable stock for the United States market and the shipments to Great Britain are confined to the regular liners from St. John and Halifax. The market, however, is particularly firm and it is universally expected that considerably higher prices will rule during the coming season. The lack of snow has greatly interfered with logging operations and it is also likely to be an adverse factor in stream driving. The cut of logs is certain to be light, while there is no telling what proportion of the cut will reach the mills. It is only natural, therefore, that holders of stock should be inclined to retain possession in the hope of being able to realize a large profit in the spring or summer. New Brunswick cedar shingles are unchanged at about $3.40 for Extras on Boston rate of freight, but lath are being offered in larger quantities and the market is somewhat easier.

MANITOBA AND BRITISH COLUMBIA.

The outlook for the lumber trade in Western Canada is steadily improving. The demand upon retail yards has left their supply somewhat scant and there is every reason to expect a good spring trade. Price cutting is now little heard of, while on the other hand advances are in some instances being asked. The quotations of the Mountain manufacturers of British Columbia are now more in line with those of the Coast mills, but considering the cost of production, are still low, and a further advance seems fully warranted. The stocks at the mills, however, are quite

large, and it is doubtful whether any change will be made in the near future. Of 250,000,000 feet estimated to have been cut last year by the Mountain mills, about 85,000,000 feet is still on hand.

UNITED STATES.

The Northern Pine Manufacturers' Association, at its annual meeting at Minneapolis on January 23rd, decided upon the following advances: All piece stuff, $1.50; 8 inch No. 2 boards, 18 and 20 feet, $2; all other sizes of boards and products, $1; fencing, all sizes and lengths, $1.50; B select and better, inch and thicker, $3; No.3 shop, thick, $2. The stock of lumber on hand in the Mississippi and Wisconsin valleys was shown to be 1,303,132.611 feet, compared with 1,361,406,206 feet in 1905 and 1,504,465,890 feet in 1904. In view of the large market, it was considered that these advances were very moderate. The maple flooring manufacturers have advanced their prices to $37.50 for firsts and seconds, Chicago delivery. The above statements, better than anything else, show the healthy condition of the lumber market. White pine, southern pine, spruce, hemlock and hardwoods are all strong. The advances lately made at Buffalo and Tonawanda have been well sustained. There is, however, as might be expected, a disposition to search for lumber which will take the place of white pine wherever possible, and this is creating a larger market for hemlock and spruce, prices of which may go still higher. Spruce logs in the Kennebec river are $2 higher than they were a year ago.

GREAT BRITAIN.

There is a fair amount of business being done in British lumber circles. Some buyers are responding to the advanced figures which are now asked by shippers from all countries. The position of pine and spruce remains practically unchanged, the demand being moderate and stocks very light. Quebec shippers of spruce are said to be asking 7s. 6d to 10s. advance on the opening prices of last year, and it is learned that sales have been made at this advance. This brings the basis about £9 per standard for 3x9 inch third quality. Birch timber is exceptionally firm at about 1d per foot above the opening prices of last year. The demand for oak planks for wagon building is broadening, while the shipments from America have fallen off on account of the increased local consumption.

STOCKS AND PRICES.

Shaw Bros., of Dauphin, Man., are cutting 2,500,000 feet of logs in the Riding Mountains this winter.

The Phoenix Mill, Fredericton, N.B., has resumed operations and is manufacturing shingles for the United States market.

Stetson, Cutler & Company last week shipped 1,250,000 laths from St. John, N.B., to New York, by the steamer Lady Eileen.

James Burgess & Sons, of Grand Falls, N.B., have closed a contract to supply a considerable quantity of lumber for the Massey-Harris Company, Toronto.

G. P. Wells, secretary of the Mountain Lumber Manufacturers' Association, estimates that the cut of 45 mills belonging to the Association was about 280,000,000 feet last year.

J. S. Emerson recently contracted in Puget Sound for a quantity of logs to be imported into British Columbia, to be sawn at the Nanaimo Lumber Company's mill at Nanaimo. The scarcity of fir logs in British Columbia made it possible for Mr. Emerson to see a profit in such a purchase.

The shipments of spruce deals, etc., by F. E. Neale from Northern New Brunswick during the season of 1905 were as follows:

Miramichi.....	21,231,824	sup. feet.
Campbellton	9,916,055	"
Dalhousie.....	1,531,526	"
Richibucto.....	886,355	"
Bay Chaleur....	1,535,045	"
Total	35,100,805	"

The Davison Lumber Company, of Bridgewater, N. S., expect to manufucture about 40,000,000 feet of lumber this year. Their logging railroad is now in operation, and timber cut down in the morning is hauled 12 to 15 miles over a railroad by noon and sawed into lumber before night. They recently built a steam pond which enables them to operate their mill all winter.

A remittance of $1.00 has been received from Chester, Nova Scotia, postmarked Jan. 11th. Will the sender please give us his name so that we may be able to credit the money.

BRITISH COLUMBIA TIMBER.

There is some activity at present in timber circles in British Columbia and several sales are pending.

A large deal was put through by E. L. Kinman, of Revelstoke, who held several large leases of valuable timber limits up the Fraser, comprising in all over ten thousand acres. These he has sold to Charles D. Brewer, of Duluth, and his associates for a figure stated to be $30,000. It is believed that Mr. Charles A. Dyer, a timberman of Everett, is associated with Mr. Brewer in the deal.

A number of American lumbermen are in British Columbia at present negotiating for the purchase of leases which are held by local men at various points along the coast.

QUICK DELIVERY OF B. C. FIR.

The Pacific Coast Lumber Company, of Vancouver, B. C., through their Ontario representative, Mr. W. J. Lovering, Toronto, have just filled one of the largest orders for building timber which has been given in Ontario for some time. It consisted of three-quarters of a million feet of B. C. fir, requiring 43 cars for its transportation. The timber was furnished to the Gallivan Building Company for the extensive works of the Plymouth Cordage Company now under construction at Welland, Ont. We understand that the complete bill was cut and shipped during the month of December, and was most satisfactorily and expeditiously delivered by the C.P.R., a number of cars coming through from the point of shipment to destination in the record time of sixteen days.

The shipment above referred to shows that it is possible to secure B. C. timber with very little delay, in fact, it can now be obtained more quickly than southern pine. For this reason more orders are finding their way to British Columbia, and it is very satisfactory to know that the disposition of the manufacturers there is to fill orders as promptly as possible. This, coupled with the apparent willingness of the C. P. R. to provide quick transportation, should mean a still greater volume of business in future for the British Columbia mills.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

Vancouver, B.C., Jan. 22, 1906. —Shingle bolts just now are so scarce they are unobtainable, and in many instances mills are unable to get the raw material to cut with. "The bad weather has further increased the scarcity of bolts," one of the millmen remarked this morning, "and it is not improbable that this feature will continue for several weeks. The demand for shingles is fairly good, but as bolts cannot be had, what are we to do? As high as $5 per cord has been paid, and this is about the record price, and paid only when they are absolutely necessary."

Logs have also continued scarce for the same reason, with the result that they are up another 25 cents or 50 cents per thousand. It is not likely that the supply will be increased to any material extent until spring sets in. So scarce are they that Vancouver Island mills are importing from the American side, the principal importers being the Nanaimo Lumber Company.

As a result of the decision of the Supreme Court that the Land Act did not prohibit the export of timber cut under hand loggers' licenses, the Government on Thursday introduced a new amendment, which is far more explicit in its terms. This new measure, it is felt confident, will set all doubt in the matter at rest, and absolutely prohibit exportation.

A local company, behind Mr. H. R. Robertson, of Portland, is applying to the legislature for permission to export logs in rafts, the intention being to ship them to California. As the premier and the chief commissioner have both expressed themselves opposed to the exportation of logs in any form, it is hardly probable the desired permission will be granted.

"The demand for lumber is not particularly good just now," Mr. T. F. Paterson stated this morning. "The spring orders have not yet begun to come in from the Northwest, and stocks are beginning to pile up. If it had not been for the orders for railway timbers which have been placed with several mills in the province, the season would have been about as dull as a year ago. As it is, these orders have been the mainstay of many establishments this winter. Prices on railway timbers have been increased, the general average being about $1 per thousand on all grades. This has not been done because of the demand, but because of the increased and maintained price of logs."

Though there has been some talk in the newspapers of late of an in-

crease in the price of general lumber, and while it may be necessary in the near future, no action has yet been taken by the Association. It is unlikely that anything will be done before March.

THE OUTLOOK IN BRITISH COLUMBIA.

The outlook for the lumber manufacturers of British Columbia appears much more encouraging than was the outlook for 1905 a year ago. While the cost of manufacture, and prices of logs, shingle bolts, and raw materials generally, have greatly increased, corresponding advances have been made in the various manufactured lines.

Although this is ordinarily the quiet time of the year, the large amount of unsolicited orders that are coming in, indicate a very healthy condition of trade. The demand for all lines will undoubtedly be good, and for heavy timbers for railway construction there will probably be an unusually heavy demand. Prices on railway materials have been recently advanced $1.00 on lengths up to 32 feet and 50 cents on longer lengths.

The demand for edge-grain-flooring has steadily improved. British Columbia manufacturers have been doing considerable missionary work introducing this flooring, which is essentially a high-class material, and in many of the large eastern centres architects are quite freely specifying edge-grain flooring in preference to their former choice.

Since the middle of last year, when prices of lumber began to advance owing to the increase in the price of logs, the foreign demand has been good. For the first half of this year practically all the export mills on the Pacific Coast are fully booked with orders, and many are refusing business for early shipment, partly through excess of orders, and partly owing to scarcity of logs, the supply being short on account of bad weather for operating camps.

The shingle business also bids fair to redeem the failure of the past few years. True, the slight increase in the selling price hardly covers the increased cost of production, but the closing down for the past two months of the Puget Sound mills has enabled the mills to get their old stocks reduced.

We regret that a mistake should have occurred in the advertisement of the Mageau Leblanc Lumber Company, Sturgeon Falls, Ont., in the Want Department of our Weekly Edition. The words "Three Million Feet of White Pine" should have been inserted instead of the words "Three Million Feet of Red Pine."

HEMLOCK BOARDS

THREE MILLION TO FIVE MILLION wanted for the new England Market for shipment during the year 1906. Boards to be P I S to ⅞ inches, 5 inches and up wide. Lengths, random, 8 feet and up long, or clipped, 12 feet, or 10, 12, 14 and 16 feet. Will take shipments either by rail or sail. CHARLES S. WENTWORTH & Co., 147 Milk Street, Boston, Mass.

CURRENT TRADE CONDITIONS.

ONTARIO.

Scarcity of stock is the key-note of the present situation in respect to white pine and hemlock. This is one of the reasons for the present high prices, as there must be a considerable consumption of lumber between now and the time when the new cut will be available. There is a temporary cessation in the retail demand as the result of the colder weather, but so far as can be judged from present appearances, another year of exceptional building activity is to be experienced. There is little prospect, therefore, of a decline in lumber prices. The input of logs is almost certain to be smaller than if the month of January had been cold.

As intimated last week, there is a very general feeling that hemlock lumber is worth more money. There is a growing demand for this lumber which it is claimed is not reflected in current values. Hardwoods are quiet, but no stock is being sacrificed as was the case a few months ago. The difficulty which has been experienced in cutting and hauling logs has been responsible for a stronger feeling of confidence among the manufacturers and the coming year promises to witness higher prices, and especially for birch and basswood.

QUEBEC AND NEW BRUNSWICK.

Comment upon the spruce lumber market is futile at the present time, so much depends upon the success of the winter's logging operations. If a large crop of logs should reach the mills, it might require exceptionally favorable conditions in other directions to maintain prices. On the other hand, if the production of logs should fall short or any quantity be hung up in the streams, the inevitable result would be higher prices. The present demand for spruce is good, a favorable feature of the trade being an increase in inquiries for South American specifications. There are no new developments in the shingle market, but the tendency of prices is in the direction of strength.

UNITED STATES.

There does not appear to be a weak spot in the entire lumber market of the United States. White pine continues to be bought in large quantities. About 10,000,000 feet of No. 3 and better was sold at Duluth last week to eastern parties at $26.50 a thousand, which was the highest price ever paid for lumber in that market. No. 4 boards are selling at $15.50 and No. 5 at $11.50. The Northwestern Hemlock Manufacturers' Association last week advanced the price $1 on all items of lumber and 50 cents on lath, bringing the latter up to $4 on Wausau rate of freight. According to statistics gathered by the Association, the visible stocks of hemlock lumber on hand in Wisconsin and Upper Michigan are 100,000,000 feet less than a year ago. This shortage is expected to give a pronounced stimulus to the spring demand. The base price of Eastern hemlock is $18.50 at Boston and

Buffalo, $20 at Pittsburgh and $21 at New York. An improved demand is reported for hardwood, with oak, ash and birch leading. The export trade in hardwoods is expected to show an improvement over 1905.

GREAT BRITAIN.

The elections in Great Britain have been a disturbing influence to trade generally and late reports do not speak so encouragingly of the position of the lumber market. On account of the light demand the small quantity of stock which has been received has not been readily absorbed, with the result that prices are, if anything, a shade easier, and more particularly in respect to spruce. The latest transactions of this lumber are said to have been at £7 15s. per standard c. i. f. Liverpool for stock by the regular liners from St. John and Halifax, although it is also stated that a large parcel was recently sold at £7 10s. While these figures would seem to indicate a weak market, they are offset by the closing of important contracts for stock from Norway and Sweden at an advance of from 15 to 20 shillings over the prices ruling one year ago. The greater part of the business done has been transacted in the Midlands, on the North-East Coast, and in Scotland. A quantity of red pine of second quality from Montreal was recently sold at auction on the basis of £10 5s. per standard for 3 x 11 inch, 10 to 18 feet. There is a good demand for oak timber and a moderate movement of birch, planks of the latter wood being held at £8 to £8 5s. per standard.

STOCKS AND PRICES.

Tenders are invited by C. J. Brown, City Clerk of Winnipeg, Man., up to Tuesday, February 27th, for the supply of from 2,000,000 to 3,000,000 feet of lumber required during the current year.

The contract for supplying the ties, telegraph poles, and fence posts for the Midland Railway from the international boundary to Portage la Prairie, Man., has been awarded to John L. Hyland & Company, of Winnipeg.

The Moyie Lumber Company, Moyie, B. C., which is now controlled by J. D. McArthur, of Winnipeg, are planning for extensive operations. Some 3,000,000 feet of logs is to be cut up Lamb Creek, but at present difficulty is being experienced owing to the great depth of snow.

THE LUMBERMEN'S ASSOCIATION OF ONTARIO.

The annual meeting of the Lumbermen's Association of Ontario was held in the Queen's Hotel, Toronto, on February 2nd, Mr. J. B. Miller, the president, being in the chair. Others present were: John Waldie, R. Laidlaw, W. A. Charlton, W. B. Tindall, Dwight J. Turner, W. B. McLean, W. J. Smith, W. C. Laidlaw, O. J. Donogh, F. Waldie, W. J. Hetherington, W. E. Bigwood, Robert Watt, W. P. Bull and T. S. Young, Toronto; Thomas Charlton, Collingwood; H. J. Bartlett, Orillia; C. A. Barclay, Brougham; J. W. Maitland, Owen Sound; R. Cook, Berlin; George Thomson, Goderich; William Laking and Thomas Patterson, Hamilton; W. D. Lummis, Sarnia; James Playfair, Midland.

PRESIDENT'S ADDRESS.

That part of the annual address of the president referring to trade conditions was as follows:

"The conditions of the lumber trade at the present time are better than they have ever been in its history. Everything which the lumberman manufactures is in good demand and bringing good prices. As an offset against these high prices, of course, is to put the increased cost of stumpage, and also the largely increased cost of logging, caused by high wages and prices for everything used in the operation, and by the fact that he is compelled year by year to go further back to get a cut of logs, and, although it would appear as if the lumberman were making a great deal more money than in the past, by the time all these additional charges are taken into consideration he finds that he is not so far ahead at the end of the season as he had hoped for.

"The production of white pine is decreasing very rapidly in the United States, and is barely holding its own in Canada.

"The stocks on hand at the mills this fall are lower than has ever been known, and the sales for future delivery greater, so that the present advance in prices over last year, amounting to about $3 in the average as near as it can be got at, is fully justified.

"Hemlock, the next important wood to pine in this country, has not been as fully appreciated in the past as it should have been, but I am glad to say that people are at last awakening to the importance of this wood, and the chances are that before the summer is over the price will have advanced to an extent that the quality of the wood justifies. The Hemlock Association of Michigan and Wisconsin have practically controlled the price for some years. Their base price last season was about $13 per M. About a month ago this was advanced to $13.50, and this week a further advance was made to $15, which is, I consider, no more than this lumber should bring.

"A year ago there were a great many complaints against the railways in regard to the supply of cars, but I am pleased to report that this year the lumbermen have been better treated, and the supply of cars has been more ample.

"Although there have been different meetings and much discussion in regard to the question, nothing has yet been done in reference to a duty on lumber coming into Canada, and from the present appearances, I cannot hold out much hope that the Government will take any immediate action in this matter. The Dominion Parliament will not meet until some time in March, and it will no doubt be late in the summer before full consideration is given to the report of the Tariff Commission, until which time nothing will be known as to the probable action of the Government in regard to not only the duty on lumber, but the tariff on all other commodities."

There was an interesting discussion on the subject of staking of cars, and it was unanimously agreed that a committee should be appointed to work in conjunction with the Transportation Committee of the Canadian Manufacturers' Association in placing the matter before the Railway Commission with a view to compelling the railways to provide the necessary car equipment for the shipment of lumber, as is done with grain and other products. It was shown that it is now costing the lumbermen about $2.50 to equip a car with double strips and twelve stakes. Mr. Donogh said that twenty-five years ago cars were run on the northern line equipped with permanent stakes.

Among other subjects discussed was the terms of sale. On motion of Mr. John Waldie, it was resolved that the recognized terms of the Association should be 2 per cent. off in 15 days, 1 per cent. in 30 days, or net in 90 days. Some of the members were in favor of limiting the time allowed for the face value of the invoice to 60 days instead of 90 days.

The election of officers resulted as follows: President, J. B. Miller, Toronto; First Vice-President, W. J. Sheppard, Waubaushene; Second Vice-President, W. J. Smith, Toronto; Secretary-Treasurer, W. B. Tindall, Toronto; Board of Management, J. B. Miller, W. D. Lummis, R. Laidlaw, W. J. Smith, F. Waldie, Robert Watt, W. J. Sheppard, Dwight J. Turner, W. P. Bull, W. J. Ard, W. B. McLean and George Thomson.

NEW BRUNSWICK LETTER.

(Correspondence of CANADA LUMBERMAN.)

ST. JOHN, N.B., Jan. 31st, 1906.—The lumber trade in this direction is marked by the uneventfulness usual at this time of the year. Interest is centred almost entirely upon the conditions bearing upon the getting out of logs. The month just ended has been remarkable because of an entire lack of snow in the lower counties and an almost unbroken mildness. Operations in these sections are practically suspended. Further up river on the Tobique, the Aroostook and the farther north branches of the St. John, conditions have been fairly favorable during the past month, but the continued mildness is having its effect and in some sections operators are experiencing considerable difficulty because of the scarcity of snow.

The market for New Brunswick spruce in Great Britain continues to show indications of an increase in demand and of firmer prices in the near future. At this date, according to information from unquestionable sources, stocks of New Brunswick lumber in Great Britain are remarkably light, much lighter than has been the case for several years. Now that the elections are over a general stimulus of trade is looked for. That Canadian lumber will be affected is beyond question and it is felt that the fact that the supplies in this line at the chief distributing centres of the United Kingdom are small will have, should the expected stimulus take place, a pronounced effect upon prices.

On this side the water conditions all tend toward the same end. Local stocks are light, one and one half millions of sup. feet would cover the quantity. Information from the most important centres of the province tells of similar conditions. From the St. John mills, for reasons mentioned in previous letters, no important quantity will be ready to go forward before June 1st at the earliest.

In accordance with the above summary of conditions, local parties most interested are sanguine of marketing their "English" lumber to better advantage during the coming year than was the case last year. While ideas differ as to what figures will be prevalent, the general trend of opinion leads to the conclusion that no contract for "English" spruce deals for summer delivery, containing say 50% 7's and 8's, 35% 9's and 15% wides, could be made at less than from $12.75 to $13.25 per sup. feet, f.o.b. steamer St. John, two-thirds price for fourths and ends.

During the past month receipts at the other end have been, while in small parcels, considerable in quantity, and because of the light demand usual at this time of year, prices have no more than held their own.

Freight rates to the West Coast range from 37s. 6d. to 38s. 9d. per standard, with all indications pointing to the lower figure as more probable to be the reigning rate and a probability that offerings in this line may be lower in the near future.

THE BARBADOS MARKET.

Messrs. S. P. Musson, Son & Company's market report of January 13th says: There have been no arrivals during the fortnight, but sales to arrive have been effected for the cargo of the schooner "Lewanika," consisting of 300,000 feet of white pine, about half each shipping and second quality, at $26 and $22, and the cargo of the "Arthur H. Wight" from Trinidad, consisting of 80,000 feet of white pine and 20,000 feet of hemlock, was sold at $26.03 and $22.03 for merchantable and second quality white pine, and $20.40 and $17.06 for shipping and second quality hemlock. These will virtually only supply pressing requirements, and further arrivals would probably fetch similar rates. Spruce lumber is wanted for crop requirements, and a couple of cargoes would be readily saleable in the vicinity of $22 for shipping. No arrivals of

shingles have taken place, but dealers are well supplied with both long and laying cedar, and in consequence of the continued dry weather demand is very light.

TIMBER LIMIT TRANSACTIONS.

It is reported that William Shannon, of Vancouver, B.C., has disposed of practically all his timber holdings in British Columbia to a group of Minnesota capitalists. These include about 30,000 acres of timber lands and a mill site at Port Harvey, and the consideration is said to have been $80,000. The new owners are understood to have secured extensive contracts for the supply of timber for the Canadian Northern and Grand Trunk Pacific Railways.

Thomas Prefontaine, jr., has registered as the proprietor of the lumber business of T. Prefontaine & Company, Montreal.

ADVERTISER, HAVING GOOD CONNECtions with the trade throughout Western Ontario, would like position as salesman, on commission basis, for some reliable British Columbia firm of shingle manufacturers. Best of references furnished as to character, business ability, etc. Address communications in first instance to Box 350 CANADA LUMBERMAN, Toronto.

HEMLOCK BOARDS

THREE MILLION TO FIVE MILLION wanted for the new England Market for shipment during the year 1906. Boards to be P I S to ⅞ inches, 5 inches and up wide. Lengths, random, 8 feet and up long, or clipped, 12 feet, or 10, 12, 14 and 16 feet. Will take shipments either by rail or sail. CHARLES S. WENTWOTH & Co., 147 Milk Street, Boston, Mass.

Tenders for Pulp Wood Concessions.

Tenders will be received by the undersigned up to and including the 18th day of April next for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

February 3, 1906.

Lumber yard, office, trucks, etc.; capacity eight to ten million feet. Situated in Sarnia, Ont. G. T. R. Siding through premises. 500 ft. practically new docks on river front. Box 236, Sarnia, Ont.

ADVERTISER WHO HAS A LARGE ESTABlished trade in the lumber business, having been connected for twenty years with one house in the States handling mostly Canadian White Pine, Spruce and Hardwoods for the local and export trade, wishes to represent a good house for the sale of their output. CLARENCE A. MURRAY, 18 Broadway, New York, N. Y.

FOR SALE CHEAP

One Million X White Pine Shingles, seasoned. Imperial Lumber Company, Limited, 309 Pacific Building, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

The past week has been more favorable for work in the woods and operators have made some progress, but there is still much uncertainty in regard to the log supply. Much hauling is yet to be done, and even with ideal conditions, a considerable quantity of logs is almost certain to be left in the woods. The course of lumber prices is largely dependent upon the weather, with the one restriction that there is a very slight prospect of a decline under any circumstances. The building permits issued in Toronto this year are in excess of those for the corresponding period of 1905, and similar conditions exist at many other provincial points. Hemlock promises to find a large market this season, and with light stocks in the hands of manufacturers, the present strength of prices should easily be maintained. Hardwoods are not moving very actively, but the volume of enquiries suggests an early spring trade of satisfactory proportions.

THE EASTERN PROVINCES.

The lack of snow in the woods has been a serious drawback to logging operations in Quebec, New Brunswick and Nova Scotia. Many contractors are likely to lose heavily, and unless conditions should change greatly for the better, there will be a very meagre supply of logs for the coming season. Lumber prices are consequently strong. Very little stock has been sold for export to

Great Britain, as shippers do not feel disposed to take the risk of a sharp advance in prices. There is no change in the shingle market, most of the sales of New Brunswick white cedars being around $3.40 for extras for Boston delivery.

UNITED STATES.

The lumber demand in the United States is heavier than a year ago notwithstanding the higher prices. It is predicted that this will be the banner year, as the orders booked during the first six weeks make a most encouraging showing. There will doubtless be a large consumption of lumber for building purposes, but as the harvesting season approaches it would not be surprising if conservatism should be shown until the result of the crops is known. At the present time everything is in favor of the seller. At Minneapolis January shipments of white pine were 21,000,000 feet, as compared with 16,000,000 in December and 17,000,000 in January, 1905. Hemlock is perhaps showing more strength than any other lumber. For 2x4 to 2x10, in 10, 12 and 14 foot lengths, the price at Saginaw, Mich., is $16 per thousand; 16 foot lengths are $17 and longer lengths 50 cents higher. Boards are strong at $17.50. In Buffalo the base price is $18.50, with talk of an advance.

The better feeling in regard to the hardwoods is likely to bring about higher prices. Basswood stocks are said to be getting short. The new list of the Wisconsin Hardwood Lumbermen's Association went into effect on February 1st, the prices for inch log run being as follows: Ash, $23; birch, $19; basswood, $20; soft elm, $20; soft maple, 1 to 2 in., $16.

GREAT BRITAIN.

Open weather in Great Britain has encouraged the consumption of lumber and the deliveries from the docks at London have been about 1,000,000 feet greater than last year. Prices show no material variation. Quebec shippers are asking fully 10s. advance on last season's opening prices and we are advised that considerable lines have been placed at the following prices: Fifth quality, £7 7s. 6d to £7 10s. per standard of 1980 feet, according to proportion of narrows; fourths, 3 x 9, £8 5s to £8 10s; thirds, 3 x 9, £9 to £9 5s, according to proportion of 12 inch and longer. Shippers are anticipating a further advance, but this will no doubt be strongly opposed by importers, who do not appreciate to the full extent the shortage in the supply of Canadian stock. The Timber News says that owing to heavy liner shipments and pressure to sell, values of New Brunswick spruce have eased off, especially at London and Liverpool, where sales have been made at £7 12s 6d and £7 6s c.i.f. This weakness is regarded as but temporary. Hemlock deals are firmly held by shippers, who are asking about £6 10s c.i.f., but no sales at this price have been reported. Some sales of birch and elm timber have been made, but both shippers and buyers of waney pine are playing a waiting game; 3s 8d per cubic foot for 19 inch average is about the basis for first-class timber.

STOCKS AND PRICES.

L. Laforest, of Sudbury, Ont., has secured a contract to furnish 90,000 ties for the James Bay Railway.

Logging operations in the vicinity of Grandview, Man., have been carried on this winter under most favorable conditions. T. A. Burrows expects to take out 12,000,000 feet in the Duck Mountains.

L. K. Jones, Secretary of the Department of Railways and Canals, Ottawa, is asking for tenders by Saturday, February 24th, for the supply of British Columbia fir dimension timber for the Rideau Canal.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, Feb. 10th, 1905. — Lumbering, as with other prominent trades in this district, has reached a condition when experiences do not count for much in predicting the future of the trade. Looking back three years it is recalled that all the prudent men of the lumbering industry felt that prices had become so high that there would soon be a reaction. Wiser men of the trade thought it was well to hold back and let those who wished to do so go extensively into the lumbering business. Contrary to the expectations of veteran lumbermen of Ottawa there has been a steady advance in prices and increased briskness of trade ever since 1902, such as was never witnessed by them before. However, the men of most experience are still holding back somewhat, while those newer in the trade are keeping up the aggressive policy they began a few years ago. Then they were looked upon as plungers but they have come out the biggest winners and have set a pace that with continued prosperity will create conditions quite unique. The market today is at its highest and the stocks are the lowest. Everything points to a season of the keenest activity and local lumbermen believe that the year 1906 will be a record breaker. This is the view despite the fact that about five years ago it was considered that the English trade was the backbone of the market and men said that if the export to England fell off the trade in Canada would sustain a heavy blow. But last year the English trade was listless—even flat. Nevertheless, the lumber merchants of the Ottawa district did not seem to be affected beyond a temporary dullness in sales. To-day, the manufacturers are little concerned whether they sell on the English market or in the United States. There is little doubt that the average cut can be sold in the local markets and in the United States at better prices than could be realized for the full cut if sold in England.

The local and United States demand now so completely control the prices that there has so far this year been very little lumber sold in the English market. The buyers across the sea contend that prices have reached such a high notch that they cannot handle anything like the quantity of Canadian lumber they imported in the past.

The local lumbermen report operations in the woods going on more satisfactorily since the recent cold snap set in, and in the Ottawa Valley the average quantity of logs may be secured. The earlier part of the season up to the last thaw was unusually fine for log making, but on the whole January was a poor month for drawing.

One of the greatest drawbacks the Ottawa lumbermen meet with is the unsatisfactory handling of logs on the Ottawa river. Instead of improvement and dispatch, most firms complain that the driving of logs is continually growing slower so that a small manufacturer has little chance even though he owns a limit and a saw mill. He is not able to work them to any advantage owing to the poor methods of bringing logs down the main stream. For instance, last year and the year before large quantities of logs were delivered at the foot of Lake Temiskaming in June or July and none of them reached the Otta-

wa mills the same season. The lumbermen affirm that the delay is not due to the small capacity of the Ottawa river but to the inefficiency of the company in charge of the driving operations. To show what can be done on the Ottawa river, it is pointed out by lumber merchants of the Capital that square timber rafted up at the foot of Temiskaming river was delivered in Quebec in six or eight weeks. Logs, of course, move more slowly than the rafted timbers, but it is contended that there is no excuse why at least two-thirds or three-quarters of the logs delivered at the Ottawa river in June or July should not have arrived in Ottawa the same season. The delay costs the trade $150,000 or $200,000. These figures are arrived at by local lumbermen who base their calculation on the deterioration of lumber when it lies over and the loss in interest on their money. The lumbermen assert that the logs cut in the winter should be sawn the following season. Some improvement has taken place in recent years in the driving facilities on the Ottawa river but they are not enough to keep pace with the development in the lumber industry, resulting in increased output and greater consumption of logs.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., February 5th, 1906.—"We are hopeful for a good season," was the remark of S. A. Mundy the other day. He was in the city on a short business trip from Three Valley, where the Mundy Company's large sawmills are located, near Revelstoke. "It looks as if the demand for lumber will be first-rate in the season about to open, and up-country mills are preparing for the best."

F. A. Dudgeon, manager of the Bowman Lumber Company, which has mills at Revelstoke and Comaplix, was also in the city last week, and he, too, speaks favorably of the prospects.

There is a feature of the entry of large American lumber manufacturers into the industry here which will compel some action on the part of the mannfacturers at the coast. That is the establishment of retail lumber yards in the Northwest, the Otis Staples Company, which has mills at Bayard, near Cranbrook, having secured large retail yards in Calgary, and being about to open in other towns. "We cannot ignore this," a prominent Vancouver millman remarked, when asked what effect it would have on the industry. "While we do not want to establish retail yards ourselves, we will be forced to if other of the large mills do so. Such a move requires large capital, for it practically means floating the money for farmers. And, yet, this is what we have been doing right along. Mr. Staples is the only one who has taken important action, nevertheless the outcome is not lost sight of."

Conditions are not much changed from two weeks ago. Mills are expecting orders from the Northwest, but these are hanging back. Were they put in earlier it would mean activity for the mills in what is generally a dull season, and would enable better delivery on the product. Prices are hovering in the balance, and as logs do not seem to be getting any more plentiful, the anticipated rise may shortly be made. Further than that, no statement will be made by officials of the B.C. Lumber and Shingle Manufacturers' Association.

The local legislature is wrestling with the amendment to the Land Act intended to positively prohibit the export of timber. There are no ambiguities about the phraseology of this Bill. Consideration is now being given a clause to allow the export of piles, masts, and similar timber as is really completed, but it will be impossible for hand loggers to export as has been the case up to the present. Loggers and others are opposing the passing of the Bill, but it will very likely have a good majority in the House.

BIDS FOR RAILWAY CONSTRUCTION.

The Commissioners of the Transcontinental Railway, Ottawa, are asking for tenders up to March 12th for the construction of two sections of the road, as follows:

(1) District "F." From a point designated on the plans of the said Commissioners at or near the City of Winnipeg, to a point known as Peninsula Crossing, near the junction point of the Fort William branch of the Grand Trunk Pacific Railway, a distance of about 245 miles.

(2) District "B." From a point designated on the plans of the said Commissioners, at the north end of the Quebec Bridge and Railway Company's bridge in the vicinity of the City of Quebec, to a point near LaTuque, a distance of about 150 miles.

The check deposits for the above work are $400,000 and $225,000 respectively.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

CEDAR FOR SALE — 10,000 PCS. ROUND Cedar 8-16 and 25 feet long, at the Spanish boom. Also cedar, pine and spruce lumber for sale here at Larchwood. JAMES McCREARY, Larchwood, Ont.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned.

THREE MILLION FEET LUMBER, ABOUT half of which is 1905 cut, balance this year's stock. One third Hemlock, balance Maple, Birch, Beech, Elm, Ash, Basswood, Pine, Cedar, Spruce, Tamarac, etc. Good quality. J. J. THOMPSON, Midhurst, Ont.

FOR SALE

BARGAIN IN TIMBER AND FARM LAND, close to Lake Ontario, G.T.R. About 40 acres large timber, Oak, Maple, Birch, etc., part of several hundred best sandy loam farm land. Splendid buildings, good fruit; large stream; good roads, Niagara district—with $15,000 money can be doubled. Investigate. Write THOMPSON, 17 Queen St., St. Catharines, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

Inquiries for lumber continue to come in quite liberally and prices remain remarkably firm. The large amount of building which has been done this winter has maintained the demand and resulted in a steady drain upon stocks, and the problem now most discussed is whether the shortage which is developing will be the means of bringing about still higher prices. The weather for the past two weeks has been favorable for logging operations in the northern part of the province, but some of the hardwood districts are still suffering through unfavorable conditions for getting out logs. Indications still point to a supply of logs quite inadequate to keep the mills in operation all season, and with the consumption at a high point prices of lumber are almost certain to continue firm. Dealers are still picking up small blocks of pine and hemlock, in the hope of being able to turn over the stock to advantage in the near future. A dealer who last week purchased about a million feet of pine gives it as his opinion that there will this year be an unusually large consumption of lumber for building purposes. There have been no new

developments in the lath market, and while prices are still firm, the more conservative operators are not contracting for the new cut to any extent.

EASTERN PROVINCES.

The uncertainty of the log supply is strengthening prices of square and waney timber and an advance is being asked by the Quebec shippers. The chief advance shown in our quotations is in waney pine of large average and red pine. The market for spruce lumber is somewhat quiet, as there is very little stock offering and holders are not anxious to sell. Future prices depend very largely upon the input of logs.

The lath market has weakened, prices having declined from the abnormal basis which was reached about the end of last year. While opinions as to the immediate course of the lath market are widely different, there seems little doubt that those manufacturers who placed their cut under contract in the fall months pursued a wide course, as equivalent prices could not be obtained at the present time.

UNITED STATES.

The conditions of the lumber market show no material change as compared with a week ago. Indications point to a large spring demand and firm prices, with a probable advance in some classes of building lumber. Box lumber is quite scarce and in urgent demand. Our Buffalo list this week shows an advance in thick selects, fine common, the lower grades of cutting-up stock and all grades of barn and box boards. In the hardwoods ash and birch have been advanced. There has been a distinct improvement in the demand for hardwoods since January and it is believed that holders of lumber will be able to realize better prices this year. The cheaper grades of basswood are selling quite freely owing to the scarcity of white pine box boards. There could be a better demand for birch from the furniture manufacturers, but this will probably develop when the spring months are entered upon. Hemlock is higher. Pennsylvania producers last week issued a new list putting the base price up $1, which makes it $19.50 for Buffalo, with an extra fifty cents for 2 x 4, 10, 18 and 20 feet, and for all 3 x 4. There is more than the usual activity in shingles, prices of which are tending towards firmness.

GREAT BRITAIN.

British trade is gradually reviving, and there is a strong undertone which augurs well for improvement later in the year. The light stocks cannot be overlooked, as compared with a year ago they show a substantial decrease. The following figures represent the stocks in the public docks at London on February 1st, 1905 and 1906 :

	1905–pcs.	1906–pcs.
Foreign deals	1,916,000	1,418,000
Foreign battens	2,929,000	2,445,000
Pine deals and battens	1,222,000	873,000
Spruce deals and battens	1,220,000	764,000
Rough boards	4,200,000	3,845,000
Prepared boards	8,179,000	6,941,000
Total	19,666,000	16,286,000

These figures show a decrease of almost 3,400,000 pieces compared with the quantity of lumber on hand one year ago. The trend of both pine and spruce is gradually upwards. It is understood that shippers are asking £12 to £12 5s per standard c.i.f. for third quality pine. The longer lengths of spruce, such as 16 feet and up 3 x 11, 18 feet and up 3 x 9, and 20 feet and up 3 x 7, are being constantly enquired for, and there is also a fair demand for 3 x 4 inch scantling.

STOCKS AND PRICES.

Gillies Bros., of Braeside, Ont., have established camps on that part of their Cobalt limit from which prospectors have been excluded and expect to take off most of the timber this winter.

George Lux, of Beaton, B. C., has a contract to put 3,000,000 feet of logs into the Fish river for the Bowman Lumber Comgany, of Revelstoke, B.C. W. Leonard has undertaken to cut 4,000,000 feet of logs on Salmon creek for the Arrowhead Lumber Company, of Arrowhead, B.C.

Messrs. S. P. Musson, Son & Company say of the Barbados market: The market still continues very moderately supplied, but a couple of cargoes of white pine and spruce contracted for some time ago are about due, and with others reported to be on their way, dealers are very diffident in making further contracts, expecting to buy more advantageously of the spot cargoes. Spruce and hemlock would probably sell to better advantage than white pine, but in the absence of former descriptions, the latter is bound to be in demand for crop requirements. The market is fully stocked with shingles, as the demand has been exceedingly light this season.

Messrs. Denny, Mott & Dickson, London, Eng., report as follows: The demand for waney pine has been quiet, but prices have stiffened in face of the higher rates in Quebec for next season's requirements. Elm has presented no special feature, but the price is firm. Oak is somewhat better in tone, owing to a slightly improved enquiry. Spruce deals are quiet, and the views of shippers for forward supplies are generally considered as unjustifiably high, with the consequence that little cargo business has been done.

Messrs. Churchill & Son, London, Eng., say: The pine deal market in London has shown more life than for some time past, and stimulated by the position in Canada, prices here have advanced. For spruce deals also the London market is better, skepticism as to the solidity of present quotations from the other side being rather on the wane. More business has therefore been possible buyers yielding to a very slight easing in quotations for shipment. Prices for all the Canadian hardwoods and for white pine timber are also rather on the increase in the London market.

SALE OF TIMBER LIMITS.

There was a large gathering of lumbermen at the sale of the timber limits of the Lumsden Estate at Ottawa last week. One of three parcels offered was sold. W. H. Lewis weilded the hammer and the first parcel put up was that known as the Hay Bay limits on the Ottawa river, comprising 96 square miles. The bidding started at $100,000 and went up at a thousand a bid to $188,000. There was no higher offer and, this amount not reaching the reserve bid, the parcel was withdrawn.

Then parcel 2 was put up. This is known as the Snedden and Beauchene limits, comprising 166½ square miles on the upper Ottawa. The bidding started at $100,000

and went in leaps of $5,000 to $200,000, when it was knocked down to Norman G. Guthrie, barrister, acting in the joint interest of the Hawkesbury Lumber Company and the W. C. Edwards Company.

Parcel three, twenty-five square miles on the Kippewa, was offered but there were no bidders.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N. B., February 14th, 1906.—Since last writing but little has occurred to break the monotony prevalent in lumber circles. The attention of those interested is fixed to a very great extent upon the conditions bearing upon the getting of logs, which conditions are causing considerable anxiety and which become less favorable day by day.

In the far up-river districts the snow has been decreasing steadily and in the lower counties there has been practically no snow on the roads all through the winter. In this latter section a few inches has fallen during the week, but the weather is very temperate and it is rapidly disappearing.

With the season drawing to an end there is a probability that, owing to the lack of hauling upon the roads, a tremendous quantity of logs will be left in the yards both in the lower counties and (what is far more important) in the up-river sections.

Since last writing the local spruce lath trade has shown a degree of uncertainty that can be traced to the hesitation of buyers, a hesitation born of a general lack of confidence in the immediate future of the lath market. Values are less firm than was the case a month ago. It is hard to name a figure that would apply generally; prices vary somewhat in accordance with the opinions of those interested in the transaction. One feeling in regard to the lath trade seems to be shared in universally—that of pessimism, and opinions in this regard range from prophecies of a decided slump in the near future and a schedule of prices lower than those of last year, to a conviction that, while prices will be lower than at present, no figure will be touched lower than normal.

The threatened strike in building circles in New York City, should it materialize, will no doubt paralyze business in that direction; the indications are having a derogatory effect.

While all this uncertainty lasts the tone of the lath market is day by day growing less favorable to a sustaining of values, recent sales having been made at figures ranging from 50 cents to $100 less than those paid in early January.

Locally, nothing is offering in lath for immediate delivery. For delivery during the summer indications lead to the conclusion that non-dutiable slab-lath could be bought at this date for from $2.25 to $2.50 per M f.o.b. St. John.

Freight rates to New York City on lath are quoted at 70 cents per M, offerings more frequent than charters and a consequent tendency toward lesser figures in the near future.

WANEY AND SQUARE TIMBER.

The following in respect to waney and square timber is found in the Timber Trades Journal, London, England:

Of 1st quality Quebec waney pine, it is reported that there has not been enough made for next season's shipment even to supply the limited demand on this side, and prices have advanced 2d. per foot f.o.b. during last year. Of the moderate wintering stock of oak, a large proportion is reported as not up to the standard of first-class shipments. Of elm, the supply is better, but prices remain at about the same level. Of Quebec birch there is a fair supply, and it has advanced in price, owing to the active demand for this wood in the construction of motor cars. There is no stock of ash in Quebec or any being made this season that we can hear of.

HELP WANTED.

Mill owners, when in need of a superintendent, sawyer, filer, shipper, or in fact any class of skilled help, should remember that the CANADA LUMBERMAN is read regularly by thousands of persons in the lumber business. The "Wanted and For Sale" Department of the Weekly Edition therefore offers not only the most direct way of securing the desired help, but compared with results, it is much cheaper than any other medium that can be employed. A booklet giving the opinions of advertisers who have used the "Wanted and For Sale" Department may be had for the asking.

Slack cooperage stock is firm and likely to advance. Jobbers at Buffalo quote first-class dry elm flour barrel staves at $9.50 to $9.75, first-class basswood heading at 6 to 6¼ cents, and 6-foot coiled hoops at $9.50 to $10.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman—A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

WANTED—WHITE PINE AND HEMLOCK lath for Ohio, New York and Pennsylvania markets; will take rail or water shipments. THE BELCHER-STINE LUMBER CO., 323 Spitzer Building, Toledo, Ohio.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc, apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market continues to show an exceptional degree of strength. The demand for white pine and hemlock is urgent; all offerings are quickly absorbed and holders of stock are not seeking business, believing that everything in sight will be wanted before the new cut is ready for the market. Quick delivery is almost invariably requested, this being an indication of the low stocks carried by retailers. In Toronto trade is quite brisk, as the weather has permitted a continuance of building operations. Sales of the Ottawa Valley production of 1906 have been made at the following advances over last year's prices: Stock boards, 6, 8 and 10, $3 higher, box lumber, $2 to $4; good lumber, $2 to $5, and factory lumber $1.50 to $3 higher. Our Sarnia list this week shows a sharp advance in nearly all grades. Lath have also been marked up at that point up to $4.50 for No. 1 white pine. The shingle market is very quiet.

Hardwoods are showing more activity, the factory demand being somewhat better. When the weather commences to show signs of the approach of spring we may expect a large movement of hardwoods. The lack of snow in the southern part of the province is still interfering with logging.

THE EASTERN PROVINCES.

Though the lumber market of the Eastern Provinces is in a healthy condition, there is very little activity owing to the uncertainty of the log supply. There are plenty of buyers willing to contract for stock, but manufacturers are pursuing a very conservative policy and are refraining from accepting orders which they may not be able to fill. Some clapboards are offering, but they do not seem to be in favor at the present time. The tendency of New Brunswick cedar shingles is towards higher prices. Extras for Boston delivery are selling at $3.45 to $3.50, with especially fine brands bringing $3.60. Clears are worth about $3. Large offerings of spruce lath have broken prices. Standard spruce slab lath are being sold for New York delivery at $4 to $4.15 in either cargo or carload lots, with $4.25 the prevailing quotation for 1⅝ inch.

WESTERN CANADA.

The condition of the lumber trade of Western Canada is more satisfactory than one year ago. The large stocks of lumber and shingles are gradually being disposed of and the outlook is for a strong demand and firm prices during the coming summer season. A large quantity of lumber is expected to be marketed in the new provinces and in Winnipeg. Lists recently issued by manufacturers of white pine show advances. For Winnipeg delivery, the prices of 2 x 4 dimension timber range from $13.50 for 6-ft. to $21 for 24-ft.; 2 x 6, 8 and 10, $16 to $21, and 2 x 12 $17 to $22. No. 2 dimension is $2 less. No. 1 red pine 13 inches and wider ranges from $29.50 for 10 foot to $31 for 18 foot. Pine lath are quoted at $4, and pine shingles, 6 in. clear butts, $1.50.

Red cedar shingles prices have been favorably affected by the scarcity of timber and the closing down of the Washington mills. The conditions to-day are in favor of the manufacturers and mill prices are stronger than they have been for many months.

UNITED STATES.

The manufacturer or dealer who has a large stock of lumber is particularly fortunate, for there has never been a better demand at this season of the year. White pine at the head of the lakes is particularly strong, one of the items most in demand being No. 4 boards, which are reported to have sold lately at $15. Spruce lumber is very active in the Eastern States, the unfavorable logging conditions having created some anxiety in respect to the supply. At best the crop of spruce logs for this season's sawing will be considerably below the average and much less than the operators had hoped to secure. Hemlock is gradually moving towards a higher level. Michigan piece stuff is selling at $16 a thousand and boards at $17.50, while the base price in New York has been advanced to $22. It is reported that several prominent shippers recently withdrew all quotations on hemlock, which step is likely to be followed by a new list showing no small advance. Hardwoods are improving at Eastern points. Elm, ash, and birch are meeting with a ready sale.

GREAT BRITAIN.

Very little change is to be noted in the British lumber market. Business is only moderately active, but the light stocks on hand are a very strong feature. The London stock of deals, for instance, is 1,418,000 pieces, as compared with 2,083,000 pieces a year ago. Reports as to spruce are to the effect that considerable business has been closed, a London firm having recently sold upwards of 40,000,000 feet in one week. The regular liners are keeping London and Liverpool supplied with small lots, which have been bought at £7 10s. to £7 12s. 6d per standard c.i.f. Birch planks bring a higher figure, namely, £7 17s 6d per standard.

STOCKS AND PRICES.

The contract for the supply of lumber for the city of Hamilton has been secured by James Thomson, at $21.78 per thousand feet.

Joseph Vipoad, Nanaimo, B.C., has secured the contract to furnish logs to the Victoria Lumber Company at Chemainus and to the Cowichan Lumber Company at Cowichan Bay.

The recent snowfall in Nova Scotia has been of much benefit to the lumbermen, and active operations have been resumed at all points. While the fall of snow was not very heavy, it is sufficient if it lasts to enable the lumbermen to remove their cut from the forests. The Sheet Harbor Lumber Company have succeeded not only in removing all the logs cut this season, but several thousand that were cut last year and left in the woods. The outlook for the industry has now become much brighter, and the prospects are that the season's operations will be more successful than was anticipated some weeks ago.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, Feb. 28, 1906.—The desire of manufacturers and holders of lumber to keep their stock in the hope of getting higher than current prices for it is making the market in the Ottawa Valley dull. There is not much lumber on hand and it is hardly possible to make large purchases of laths and shingles. The

Office and Yard, 871 DORCHESTER ST. - - P.O. Box 116

shingle and lath mills have all been offered contracts for greater quantities than they can supply, and at the very highest prices. Every new purchaser wants more than he can get in this district, for most of the manufacturers are able to supply only their regular customers. The active demand is on account of large consumption in the United States. One dealer says he has been trying for several days to buy a car of XXXX 18-inch pine shingles, and has not been successful.

Laths are made scarce by the enormous demand in the United States market. The Ottawa Valley is now sending green laths to West Virginia, and as far west as Ohio. The market is very extensi e and prices so uncertain that manufacturers are averse to quote.

In all lines the Ottawa Valley lumbermen are finding themselves with little opposition from the timber producing districts of the Georgian Bay and the Western States, so great is the demand in the West for the product of those places.

English buyers are in Ottawa looking after deals, boards and sidings. They report stocks very low in England. The buying for the British market is putting up the prices to the top notch. Largest sales are being made in the following lines at these prices: 1 in. x 4 in. to 6 in. shipping cull strips 12 to 16 ft. long, $15 to $16 per thousand; 1¼ in. to 1½ in. and 2 in., same widths and lengths, $16 to $18; 1 in. x 7 in. and up shipping cull sidings 12 ft. to 16 ft. long, $18 to $20; 1¼ in., 1½ in. and 2 in., same widths and lengths, $22 to $24; 1 in. x 4 in. to 6 in. good strips 12 ft. to 16 ft. long, $38 to $40; 1¼ in., 1½ in. and 2 in., same widths and lengths, $42 to $45; 1 in. x 7 in. and up good sidings, 12 ft. x 16 ft. long, $42 to $45; 1¼ in., 1½ in. and 2 in., same widths and lengths, $50 to $55; 1 in. x 4 in. and up good shorts, 6 ft. to 11 ft. long, $30 to $32; 1 in. x 4 in. and up cull shorts 6 ft. to 11 ft. long, $13 to $14; 1¼ in., 1½ in. and 2 in. good shorts 6 ft. to 11 ft. long, $40 to $45; mill culls 1 in. x 6 in. and 8 in. from 12 ft. to 16 ft. long, $20; 1 in. x 10 in., same lengths, $22; 1 in. x 12 in., same lengths, $22 to $26.

Though the prices have reached a high notch the supplies are not forthcoming. The shortage of stock in the old country is expected here to be at least sufficient to maintain the high prices. The Britishers are buying in white and red pine and spruce the lines before mentioned, sidings, deals and boards.

Spruce is decidedly firm and is selling from $1 to $2 a thousand more than was the current rate a year ago. Reports have convinced Ottawa lumbermen that the cut of spruce will be curtailed this year. The scarcity of snow in New Brunswick, Nova Scotia and the Northern States, New Hampshire and New York, has stiffened the market.

Generally the log cut in the Ottawa district is expected to prove a fair one. The recent weather has affected operations less than in other Canadian lumbering districts. Just now the conditions in the woods are favorable to hauling and log making. Unless an unexpected change takes place all the logs cut will be got out.

NORTHERN LUMBER PRODUCTION AND STOCKS.

Statistics of the lumber output of the states of Michigan, Wisconsin and Minnesota show a steadily declining tendency in the production of white pine, the aggregate cut last year being the smallest on record. The cut was 3,628,029,000 feet, as compared with 4,220,917,000 feet in 1904 and 4,719,852,000 feet in 1903. The production in 1905 was 1,163,823,000 feet below that of 1903, this being a loss of approximately 25 per cent. in two years. The greatest production of northern pine ever reported was in 1890, when the total was 8,597,623,000 feet. The production last year was only a little more than 40 per cent. of the production in 1890. The following figures show the production in the states of Michigan, Wisconsin and Minnesota during the past twenty years:

Year.	Feet.
1886	7,425,368,443
1887	7,757,916,784
1888	8,254,291,000
1889	8,183,048,000
1890	8,597,623,000
1891	7,879,948,349
1892	8,594,222,802
1893	7,326,263,782
1894	6,821,516,412
1895	7,050,669,235
1896	5,725,763,035
1897	6,233,454,000
1898	6,155,300,000
1899	6,056,508,000
1900	5,458,261,000
1901	5,336,448,000
1902	5,294,395,000
1903	4,791,852,000
1904	4,220,917,000
1905	3,628,029,000

A comparison of the stocks on hand is equally interesting. The quantity at the close of last year was 1,556,645,000 feet, the smallest since the year 1890. The figures for the past five years follow: 1901, 2,388,256,000 feet; 1902, 2,112,719,000 feet; 1903, 1,964,552,000 feet; 1904, 2,171,903,000 feet; 1905, 1,556,645,000 feet.

The shingle output of the states mentioned was 1,465,089 pieces, showing a decrease of 153,969,000 pieces when compared with the returns for 1904. The stocks on hand at the close of last year were 470,951,000 pieces, against 685,865,000 in 1904.

The production of lath last year was 1,051,965,000 pieces, against 1,244,869,000 pieces in 1904. The stocks on hand were

252,818,000 and 358,379,000 pieces for the two years respectively.

The cut of hemlock lumber was 1,195,073,000 feet, against 1,291,-169,000 feet in 1904. Stocks on hand were 358,294,000 feet last year and 577,783,000 feet in 1904.

TIMBER LIMIT TRANSACTIONS.

D. O'Connor, of Temagami, is reported to have been the successful purchaser of timber limits on the White Fish Indian Reserve for which tenders were recently invited. The limit comprises 68 square miles in the Sudbury District, and is covered with pine, spruce, hemlock and tamarac.

Two timber limits were sold at the Crown Lands office, Fredericton, N.B., last week. A two mile berth on Never's Brook, Albert County, went to George McSweeny at the upset price, and a ten mile berth on the Wapskegan was purchased by W. T. Whitehead, M.P.P., also at the upset price.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

WANTED—WHITE PINE AND HEMLOCK lath for Ohio, New York and Pennsylvania markets; will take rail or water shipments. THE BELCHER-STINE LUMBER CO., 323 Spitzer Building, Toledo, Ohio.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc, apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

February 3, 1906.

FOR SALE

7,000 Acres of

TIMBER LANDS

on Manitoulin Island.

Apply to N. DYMENT, Barrie, Ont.

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

10 cars rock elm, No. 1 and 2, 1½".
10 cars rock elm, No. 1 and 2, 2".

CURRENT TRADE CONDITIONS.

ONTARIO.

Conditions in the lumber business continue to favor the seller, no weakness being shown in any class of lumber. The March price lists show a slight advance on pine uppers and mill culls, for which the demand is steadily improving. Hemlock and spruce are also firmer and hardwoods are showing a disposition to sympathize with the woods more generally used for building. There is a very fair demand for birch and the mills are refusing to consider offers which would have been accepted a few months ago. Log hauling in the Northern districts is still in progress, but the roads are breaking up and there is certain to be a portion of the cut left in the woods. Some anxiety is also felt in respect to the drives, as there has been little snow to swell the streams sufficiently for successful driving operations.

THE EASTERN PROVINCES.

Logging conditions in the Eastern Provinces have been more favorable during the last three weeks and operators have made satisfactory progress. The outlook in the lower portion of New Brunswick is that most of the operators will get out their logs, but the cut in the north has been light. As set forth in another column, adverse weather conditions are responsible for a decreased supply of timber in Nova Scotia, as many logs cut during the past winter will be uuable to reach the driving streams this spring. All things considered, prices seem likely to advance from the present basis, as there is a very active demand from the United States and the Argentine Republic. Cedar shingles are showing strength. Most of the large manufacturers are asking $3.50 for Extras for Boston delivery, while some are holding out for $3.60. Clears are worth about $3.

UNITED STATES.

Predictions that with the approach of spring the lumber demand would swell to enormous proportions seem likely to be verified. The demand has been good all winter and now the usual spring activity is exhibiting itself. An advance of $2 a thousand on all fir lumber has been authorized, the manufacturers not wishing to receive new business except at higher values. A further advance in the price of white pine is talked of. The Hardwood Manufacturers' Association issued a new list on February 26th showing prices ranging from 50 cents to $2 higher than those obtaining in January, these advances applying to poplar, red and white oak, ash, cottonwood and soft maple. The general hardwood situation is very satisfactory. Notwithstanding that stocks are larger than one year ago, there is no feeling of uneasiness, as it is recognized that the production last year was very heavy and that the outlook is for a large consumption this season. Ash and birch are moving quite liberally in the Eastern States.

White pine lath are said to be still firmer. Chicago dealers are asking $5.50 for No. 1 in small lots and $4.75 for No. 2; $5 for No. 1 norway and $4.50 for No. 2; $4.50 for No. 1 hemlock and $4 for No. 2.

LATEST FROM BRITISH COLUMBIA.

VANCOUVER, B.C., March 3, 1906. —Owing to the scarcity of logs and the high prices of same, the British Columbia Lumber Manufacturers' Association, at their meeting on March 1st, raised the price of manufactured lumber from $12 to a $13 basis. In some cases the raise was more than a dollar, in others it was less, but the average increase is one dollar.

Mr. J. G. Scott, owing to ill-health, has resigned his position as manager of the Pacific Coast Lumber Company, Vancouver, and Mr. Wm. L. Tait has taken his place. Mr. Scott still retains an interest in the company.

STOCKS AND PRICES.

It is estimated that over 5,000,000 logs will come out of the St. Maurice river, in the province of Quebec, this season.

Gillies Bros., Limited, of Braeside, Ont., have sold four square miles of their Cobalt timbet limit to the Empire Lumber Company, who are now logging it and railing logs to mill at Latchford. They will continue logging during the summer.

During a strong north-easterly gale, 2,000,000 feet of logs boomed at the Carney mill at Owen Sound, Ont., broke loose the other day and were carried out into the bay with the ice. The owners now have a tug at work towing them back. Maitland, Rixon & Company, also of Owen Sound, had a raft of logs broken up from the same cause.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., February 28th, 1906.—Since last writing, logging conditions in Northern Maine and New Brunswick have improved somewhat and the indications are that the end of the season in this line will be marked by the same success which has characterized it throughout. In the lower counties of New Brunswick snow has fallen to such an extent that, by extra exertion, the operators hope to get out all or nearly all their logs.

The condition of the American market for all kinds of New Brunswick long and short lumber continues truly remarkable. The extraordinary values which have been prevalent during the last three months in the long lumber trade show no sign of weakening; rather the tendency seems to be in the opposite direction. Opinions in regard to the immediate future are somewhat at variance. In some cases the conviction is expressed that the existing conditions are unnatural and that the resumption of business at the mills with its accompanying increase in shipments is almost certain to bring a decided weakening of values. On the other hand, there are those who seem satisfied that

the demand during the spring months will keep pace with the receipts and that consequently the present prices, or figures practically the same, will be available for some time to come.

There will be no important quantity of "American" deals offering at this port before May at the earliest, and because of this fact, local manufacturers and dealers are interested not in the immediate present of the market but the future. An inquirer for "American" deals for summer or early fall delivery (f.o.b. St. John) would no doubt, at this date, be furnished with figures closely resembling the following: 10's and 12's, $19.90 to $20.00; 9 inch, $17.00 to $18.00; 6's and 8's, $14.50 to $15.50.

The feature of the last two weeks has been a decided stiffening of values in cedar shingles, due no doubt to light stocks in Boston and vicinity and the considerable demand due to the briskness in building circles which in its turn can be traced to the remarkably favorable weather conditions which have prevailed during the winter months. Local stocks of high grades are practically cleaned up. Non-dutiable Extras could now be bought, for summer delivery, at $3.05 to $3.10 per M. f.o.b. St. John, and non-dutiable Clears at $2.55 to $2.60 per M. Lower grade of dutiable shingles are fairly plentiful (four millions would cover the quantity). 2nd Clears and No. 1's could be bought at St. John at from $1.80 to $1.85 and from 95 cents to $1 per M., respectively.

The Fredericton Boom Company, of Fredericton, N. B., endeavored last week to introduce into the Provincial Legislature a measure with the object of permitting them to increase their rafting tolls, which cover all the logs that come down the St. John River. The measure was energetically opposed by the lumber manufacturers of St. John and Fredericton. After all the arguments had been made the petition was refused. The company claimed a large deficit during the last few years owing to the decreasing dimensions of the logs and the higher price of labor. The lumbermen in rebuttal charged mismanagement and lack of ability as an explanation of the loss. The proposed increase would have amounted to 15 cents per thousand superficial feet.

CONDITIONS IN NOVA SCOTIA.

Messrs. Clarke Bros., of Bear River, N.S., are anticipating higher prices for lumber. In a letter to the CANADA LUMBERMAN they say:

"Regarding the outlook for lumber in the western part of Nova Scotia, we may state that, owing to adverse weather conditions, while preparations were made for a larger cut this year than usual, the quantity liable to come to the mills will be below that of 1905. During the months of January and February we were absolutely without snow, which greatly retarded lumbering operations, and much timber, although yarded in various sections of the country, will be unable to be got to the water this season. The unprecedented demand from the North American market, as well as the increased enquiry from the Argentine Republic, has had a tendency to increase the value of all classes of lumber in this province. Demand is much greater than the supply, and we can see no reason why prices should not advance over present figures. The fact that timber is getting farther away, the increase in wages, and the greater care necessary in the manufacture, makes an increased price absolutely necessary if the lumbering industry is to be continued and a fair return received from the capital invested."

516 HASTINGS ST., VANCOUVER B. C.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

WANTED—WHITE PINE AND HEMLOCK lath for Ohio, New York and Pennsylvania markets; will take rail or water shipments. THE BELCHER-STINE LUMBER CO., 323 Spitzer Building, Toledo, Ohio.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc, apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

Canadian Shipments Wanted

AN OLD ESTABLISHED FIRM OF TIMBER merchants in the North of England desire to get in communication with Canadian manufacturers or shippers of both hard and soft lumber, also doors and mouldings. Reply in first instance to Box 367, CANADA LUMBERMAN.

WANTED

A FIRM MANUFACTURING WOODEN boxes of all kinds in Province of Quebec desires to start a branch factory in Ontario and wants to correspond with party capable of managing same who has $3,000 to $5,000 to invest. Such party must have general knowledge of the box business and good executive and business ability. Intention is to manufacture general line of wooden boxes in addition to line of specialties of which we control the manufacturing rights for Canada.

Address Box 368 CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

There can be no change in the white pine situation until the new cut comes on the market, which will not be for at least two months. In the meantime the advantage is with the seller and he is able to dictate prices within reasonable limits. Many lines are getting quite short and dealers have been able to turn over purchases of last fall at a fair profit. There is not as much uncertainty regarding the future supply as was the case in January, as operators were able during the past four or five weeks to make considerable progress with logging, but the possibility of many of the logs not reaching the mills is still a matter of concern.

The feeling in regard to hardwoods is daily growing more confident. "Prices of all hardwoods will be higher" is the answer given by one mill man to our enquiry as to the outlook. Another manufacturer advises us that he will have little stock for sale, as owing to the absence of snow no logs of any consequence have been secured this year. A good word is now heard even for basswood, and those who have carried their stocks in the hope of getting prices more in keeping with the cost of production may yet reap their reward.

WESTERN CANADA.

As briefly announced in last issue, the British Columbia Lumber & Shingle Manufacturers' Association decided on March 1st to advance the prices of all classes of lumber. Rough lumber is now $12 at the Coast mills, which is still a dollar less than what prevails on Puget Sound. The increase averages about $1 on all grades, though the alterations in the price list are numerous. The reason for the raise is the prevailing high price of logs, which range from $5.75 to $9 per thousand feet. The Mountain Lumber Manufacturers' Association also held a meeting a few days ago at which prices were discussed, and while it was agreed that an advance was inevitable, action was deferred for a time. The outlook for the lumber trade in Western Canada is gradually improving. Stocks of both lumber and shingles at the mills are getting low and consequently price cutting is not being indulged in to any extent.

UNITED STATES.

The lumber market of the United States is not only showing as much strength as at any previous time this year, but there is an urgency of demand which is the result of a fear that a marked shortage will develop in some classes of lumber before many weeks. Buyers of pine and hemlock are plentiful, all grades being in good demand. At Duluth No. 3 and better pine is selling from $22 to $30, as against about $18 a year ago; No. 6 is selling for $8 as compared with $5.50 in March, 1905, and so on all along the line. It is estimated that fully 60 per cent. of the 1906 cut in the Lake Superior district has already been sold. A large wholesale trade is being done at Buffalo and Tonawanda. The annual report of the Secretary of the Lumber Exchange shows the stock in yards at these points to be 186,679,000 feet, a decrease of 15,644,000 feet from the former year.

The hardwood situation is gradually strengthening. Wisconsin hardwoods are selling at the following prices: Birch, $17 to $19; basswood, $18 to $19; rock elm, $19 to $22, all for mill run. Large shipments of birch and basswood are being made to the Eastern States. Soft elm is the slowest item at the present time.

GREAT BRITAIN.

The tone of the British lumber market remains steady, although some dissatisfaction exists on account of the failure of the spring demand to develop upon broad lines. Such transactions as have taken place involving 1906 shipments have been at a further advance, as importers realize that they must pay the price if they are to secure Canadian lumber. Both pine and spruce are stiffening. Contracts which were made a fortnight ago could not now be repeated under at least 10s to 15s advance per standard. Liner parcels have not been offered so freely, which has helped the market. Birch plank are stronger at about £9 per standard ex quay. The British market is, on account of the light stocks, in a splendid position to respond to any improvement in the consumption, but whether this will materialize is a matter of uncertainty. In the meantime Canadian shippers are showing no disposition to close contracts unless they can see a fair margin of profit.

STOCKS AND PRICES.

The tender of D. E. Sprague has been accepted for the supply of lumber for the city of Winnipeg.

The Prince Albert Lumber Company, Prince Albert, Sask., expect to cut 40,000,000 feet of lumber this season. Their limits are on the Red and Shell rivers.

The red cedar shingle market is quite active. The situation on the Coast is summed up in a statement that the longer orders are deferred the high will be the price. Washington advices are to the effect that within ten days an advance to $1.75 for Stars and 1.95 for Clears f.o.b. mill will prevail.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B.C., March 4th, 1906.—Conditions in the various branches of the lumber industry are set forth in a brief interview with Mr. C. M. Beecher, vice-president of the B. C. Mills, Timber and Trading Company, of this city. "Plenty of orders for the export trade are coming in," Mr. Beecher said, "but then this is usually the good time of year for this class of trade. The demand is fairly good, being from all quarters, and the prices are a little better than they have been. The outlook for the industry generally is better than it

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE.

has been. There has been an advance in the price of lumber in the east, south, middle west and on the American Pacific Coast, and it is only right if the prices were raised some here. If they are, it will only be moderately. Certainly the cost of logs is still very high, and the weather of the past week or two has not been conducive to a better supply. The cost of transportation from the coast is a consideration in fixing the price of lumber, and which acts against the manufacturer. Owing to the fact that logging in the past has been conducted on the timber areas more easily accessible, operations have now to be directed to the limits further back, which is another factor in increasing the cost of production. This applies to both fir and cedar."

"In the shingle business," said Mr. Beecher, "things are a little better, though production is still curtailed. If there were no duty on shingles entering the States, or if there were some protection for the manufacturers in Canada, instead of having a double-barreled action against them, there might be some show for the shingle mills. This matter of a duty is a crying injustice. Bolts are still very scarce."

Logs and shingle bolts are still stiff in price, and the high figure will be maintained for a couple of months at least.

Mr. H. B. Gilmour, of this city, agent of the Waterous Machinery Company, returned to-day from a business trip to the Kootenay, where he secured a couple of large orders for saw mill machinery. He reports that the Adolph Lumber Company, of Brandon, are about to erect a mill at Baynes' Lake, the capacity to be about 40,000 feet daily, and that the Mayook Lumber Company are doubling the capacity of their mill at Mayook. The cut will then be about 40,000 per day. Mr. Gilmour also states that the winter has been unusually mild in the interior, with the result that the snow is all gone. This will entail greater cost to millmen in getting out logs for next summer's cut, as horses will now have to be used. Although some predict a shortage in the lumber cut on that account, he does not think it will be very serious. The mills will be running full blast in about another month.

SPRUCE AND OAK PRICES.

At an auction sale held by Foy, Morgan & Company, London, England, on March 1st, the following prices were realized for Canadian spruce and oak:

Spruce.—Ex. Phile, from Quebec, 12 ft. 3 x 9 in. third quality, £9 15s per standard of 1980 ft. Ex. Montreal, from St John, N.B., 9-23 ft. 3 x 9 in. first, second and third quality, £9 per standard; 9-21 ft. 3 x 9, £9; 9-21 ft. 3 x 11, £9; 9-19 ft. 2 x 12-18, £8 5s; 9-19 ft. 3 x 10, £8 10s; 9-24 ft. 3 x 8, £8 10s; 9-23 ft. 3 x 6, £7 15s; 9-24 ft. 3 x 5, £7 5s; 10-22 ft. 3 x 4, £7 5s; 9-20 ft. 2½ x 5, £6 10s; 9-20 ft. 2 x 7-12, £7 10s; 9-21 ft. 2 x 4-6, £7 5s; 3-8 ft. 3 x 7-14, £6 10s; 9-22 ft. 3 x 5-11 in. fourth quality, £6 15s.

Oak Timber.—Ex. THE BARBADOS MARKET.

Under date of February 24th, Messrs. S. P. Musson, Son & Company review the Barbados lumber market as follows: "The only arrival during the fortnight is the schooner "Lewanika" with 325,000 feet of white pine, which had been sold to arrive some time ago, and 25,000 feet spruce which on being placed on offer was sold at $19 round. Stocks of white pine are now sufficient to meet present requirements, but there will probably be an opening for a couple of cargoes a little later. Spruce lumber is in light supply, and with the exception of a cargo now due, we do not know of any on the way, consequently moderate shipments would do well. Although no arrivals of shingles have taken place during the fortnight, the position of the market, which is fully stocked, has not improved to any extent, as demand has been very light for all descriptions. We are expecting a cargo of Laying Cedar, which we are afraid will meet with but poor prices and may have to be stored until conditions improve."

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

WANTED—WHITE PINE AND HEMLOCK lath for Ohio, New York and Pennsylvania markets; will take rail or water shipments. THE BELCHER-STINE LUMBER CO., 323 Spitzer Building, Toledo, Ohio.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned.

AT A BARGAIN, FOUR TO SIX SQUARE miles of White Pine running 30,000 feet of merchantable lumber to the acre. Limits subject to B C timber license laws, easy of access on a river in interior district of B. C. Apply C.E.R., CANADA LUMBERMAN, Toronto, Ont.

FOR SALE

Large Tract of Timber

THE PROPERTY OF

The Canadian Land and Immigration Company of Haliburton, (Limited)

This company has a large tract of well timbered land about 125 miles north-east of Toronto. There are large quantities of Cedar, Hemlock, Spruce, Balsam, Basswood, Beech, Cherry-Birch, Maple, also considerable Pine, Elm and Ash on this tract. It is well served by two railroads. The company are prepared to sell this timber in blocks ranging from 2,000 to 10,000 acres, or more if desired.

There are several good mill sites on the property. This would be a good opportunity for parties who are at present cut out and are looking for a new location.

Maps and plans and further particulars can be had by applying to

W. H. LOCKHART GORDON,
Managing Director,
157 Bay Street, Toronto.

Apply, giving references and stating wages expected, to "Spruce," c/o CANADA LUMBERMAN, Toronto.

CURRENT TRADE CONDITIONS.

ONTARIO.

Conditions continue wholesome in the lumber trade of Ontario, and from every district comes the report of a satisfactory demand. Predictions are made that white pine will be further advanced, but the more conservative manufacturers are counseling a postponement of action in this direction. Nevertheless, the situation is so strong that individual firms are getting prices which represent a new high level, and if there should be no disappointment in respect to the volume of the spring trade, a general advance may be expected before the new cut comes onto the market. Hemlock is showing decided strength on account of the scarcity of dry stock. Dealers who have booked orders in advance of purchase have found when they undertook to secure the stock that the supply was exhausted to a remarkable extent, and in some instances the orders have been filled at a loss. As an indication of price, we might mention a recent sale of over 200,000 feet of inch stock, four inches and wider, at $14 at the mill. Hardwoods, shingles and other branches of the trade are less buoyant, but with a hopeful outlook. The late weather has favored logging operations in the northern part of the province. Lath is entirely in the hands of the seller. Sales of No. 1 white pine have been made in Toronto at $5 wholesale.

EASTERN CANADA.

The spruce market, while firm, is somewhat featureless, as little buying is being done for the British trade. Manufacturers are sold out of dry stock and until the new cut is ready there will not be much activity. The general expectation is for higher prices, which will be brought about mainly by the United States and South American demand. There is more life to the shingle trade. While a fortnight ago New Brunswick Extra cedars were offered at $3.50, it would now be difficult to buy any stock from the larger manufacturers less than $3.60, and some are asking $3.65, Boston delivery. Shingles have been selling too low and should be maintained at the advanced prices.

WESTERN CANADA.

The spring trade in lumber is developing steadily, but there is still plenty of stock to supply the demand. Retail prices have stiffened as a result of the higher prices asked by the manufacturers. A British Columbia lumber firm writes to their Winnipeg agent as follows:

"We beg to advise the following advances: No. 27 E. G. stepping, $5 per M.; No. 26 fir lath, 25 cents; balance of entire fir list, $1; No.'s 53, 54, 55 and 56 cedar, $2; No.'s 57, 58, 59 and 60 cedar, $2.50; No.'s 65 and 66 cedar, $3; No.'s 74 and 75 cedar, $2. Price of cedar timber, dimensions, shiplap and common boards at points taking fir rate $1 per M. less than fir. This advance is more than justified, in fact is made absolutely necessary by the steadily increasing cost of logs, labor and supplies and is only in line with advances made by lumber manufacturers throughout Canada and the United States."

British Columbia shingles are firmer and the demand improving. Within the post fortnight there has been an advance in Washington of 5 cents in both Stars and Clears, putting these at $1.75 and $1.95 f.o.b. mills. This is helping the Canadian trade.

UNITED STATES.

Weather conditions during the past week have not been altogether favorable to business, but prices of all kinds of soft lumber are gradually getting to a higher level. The situation in the Lake Superior district is one of decided strength, there being an urgent demand from large buyers. It is expected that the Northern Pine Manufacturers' Association will immediately put into effect a new list making another advance. A northern Minnesota manufacturer is reported to have sold his entire cut for the season of 1906 at the rate of $24.50 per thousand, mill run, this being an advance of about $5 as compared with the prices realized a year ago. Shipments of northern pine during February were 40 per cent. above those for the same month in 1905. So much for white pine. Quotations for Michigan hemlock are $14.00 for short and $16.00 for long, and it is said that a large percentage of the stock that will be cut in Michigan this year has already been disposed of. Chicago dealers are paying $17.50 for short lengths delivered by water and $1.00 additional for each two feet over sixteen-foot. In the Eastern States hemlock is equally strong, boards being worth $22 at Boston. There is a steady call for spruce lumber at the present high prices, which do not seem to have checked the demand to any extent.

The hardwoods are not as strong as conditions would warrant, and it is thought that the scarcity of dry stock should bring about an appreciation in values. While trade is of average volume, there is not as much snap to the demand as many would like to see. The advance in poplar is helping basswood and there is an increased inquiry for birch and oak.

GREAT BRITAIN.

The stock of pine deals at Liverpool on March 1st last was 10,050 St. Petersburg standards, equal to 19,000,000 feet, as compared with 26,000,000 feet at the same time a year ago. These figures show the reduction in lumber. Of waney pine there was 146,000 cubic feet, against 183,000 cubic feet last year. Buyers are, in view of light stocks, showing a disposition to operate, and recent sales have shown an improvement, but until there is a marked expansion in consumption we do not look for much further advance in prices. Spruce prices have recovered from the recent weakness, which we stated appeared only temporary. There has been more enquiry for red pine deals, which are in line for a good advance when general conditions become favorable.

STOCKS AND PRICES.

The Ottawa Lumber Company have again secured the contract for the supply of lumber for the City of Ottawa for the year 1906.

Downey Bros., of Curryville, N.B., who have been lumbering on the Stannard Lake, have completed their winter's work. Their output consists of 800,000 feet of lumber, ready for market.

THE McLENNAN LUMBER CO. LIMITED, MONTREAL QUE.

Handy Bros., of Saginaw, Mich., have contracted for the entire stock of low grade lumber to be cut the coming season by the Pigeon River Lumber Company at Port Arthur, Ont.

The Fraser River Mills, New Westminster, B.C., have just opened up a new logging camp on Reid Island, about 90 miles up the coast from Vancouver, where they expect to get about 7,000,000 feet.

The City Council of Montreal have awarded the contract to J. T. Marchand & Company for white pine inch boards, tongued and grooved, at $20.50 per thousand feet; pine inch boards, rough, at $19; spruce planks at $32, and yellow pine at $59.50.

Minnesota manufacturers recently put into effect the following advances on white cedar products: Seven-foot posts, 1 cent; 8-foot, 2 cents; 4-inch tens, twelves and fourteens, 2 cents; other sizes, tens, twelves and fourteens, 5 cents; 16, 18 and 20 foot lengths, 10 cents.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., March 12th, 1906.—The raise in the prices of lumber made a week or so ago by the coast manufacturers is, of course, not meeting with unqualified satisfaction from all quarters. It is contended by some that this difference may influence the retailer in the prairie provinces to trade with the mills in Washington state. "Even our own members were not unanimous nor entirely satisfied as to the wisdom of the raise, though all were practically agreed that it was a necessity," stated a member of the British Columbia Lumber and Shingle Manufacturers' Association, when asked about the matter. "The continued scarcity of logs has compelled the manufacturers to increase the price of lumber, however much we regarded it as inexpedient at the present time. It may be when fine weather sets in and logs are plentiful, the figures may be brought down to their former level, but just now with logs selling at very nearly the price received for rough lumber, little margin is left for the millman."

Business is fairly good, and the mills, both on the coast and in the interior, anticipate a busy spring and summer. Not only is domestic trade beginning to be brisk, but the export is well up to the mark. Six ships are now at the Hastings mill in this city, the American barkentine Hawaii, to load for Japan, and the British barque Mozambique, for the United Kingdom, having arrived last week.

Stocks in the mill yards have not diminished during the past two months, in fact have been somewhat added to. With the advent of spring and the continuation of the large building operations in Vancouver, this should decrease in size. There is a fair demand for class timbers and special lumber, even at the increased prices.

The growth and prosperity of the lumber industry in British Columbia is shown by the large number of Eastern Canadians and Americans who are acquiring holdings here. This expansion is noticed both on the coast and in the interior. The Sutton Timber and Trading Company, of Seattle, will have its cedar mill on the west coast of Vancouver Island operating by June 1st. Messrs. E. Ealey, C. Yokey and Rufus Smith, of Michigan, have purchased the limits on Violin lake, near Rossland, from G. M. Annable and associates, of Moose Jaw, and will erect a mill at Trail. James M. W. Hall, his son, H. B. Hall, and his nephew, M. A. Hall, of Boston, and Alfred A. Ames, of Machias, Maine, who were in the province a short time ago, have bought out L. M. Proctor's half interest in the Fernie Lumber Company for $27,000, and are negotiating with Mr. McDougall for the remainder. G. O. Lammars and J. P. McGoldrick, of Stillwater, Minn., who own timber areas and a mill site near Nelson, have been looking over the ground to see if the time is ready to build the mill they started two years ago.

Such indications as these show that many eyes are on this province and that the lumber industry as the main industry will be increasing in proportions during the next few years.

DECISION RESPECTING LUMBER DUTY.

A decision of importance to the lumber trade was handed down on February 28th by the Board of General appraisers at New York in the case of Cleveland-Sarnia Sawmills Company. The Company's protest was against the assessment of duty by the Collector at Port Huron, Mich., on an importation invoiced as lumber at 20 per cent. ad valorem under paragraph 198 of the present tariff act for wood manufactured not specially provided for. It was returned by the collector as pine timber 6 x 8, 6 x 10, and 6 x 12 inches in cross sections, 26 to 28 feet in length. The importers claimed that duty should have been assessed at the rate of $1 to $2 per 1,000 feet, board measure, under paragraph 195, or at one cent per cubic foot under paragraph 194 of said act.

The decision finds that the merchandise is sawn lumber dutiable at $2 per 1,000 feet board measure.

The Fuel & Lumber Company, Toronto, are offering to compromise with their creditors at 33⅓ cents on the dollar. The liabilities are estimated at $21,000.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

CEDAR FOR SALE — 10,000 PCS. ROUND Cedar 8-16 and 25 feet long, at the Spanish boom. Also cedar, pine and spruce lumber for sale here at Larchwood. JAMES McCREARY, Larchwood, Ont.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber market is now feeling the stimulus of the spring demand, and there is an increased trade in retail lots. Buying is still much in evidence, apparently representing an accumulation of stock by certain interests even at the high prices now ruling. Toronto trade is good, being largely the result of building operations. Permits were issued last week to the value of $222,000 and another season of great activity seems assured. Hemlock is being sold in some quantities to Buffalo, where the supply is short. Several grades of pine have advanced in the Ottawa market, culls being now quoted at $14 to $16 at the mill. There is still a brisk enquiry for lath, and contracts for this year's production have been closed at prices which would indicate that the trade expect that present values will be

maintained. All last year's stock has been picked up.

EASTERN PROVINCES.

A very hopeful feeling prevades the lumber trade of the Eastern Provinces. There seems to be no falling off in the demand for lumber for the Eastern States, and signs are visible of an improvement in the British market. British deals are quoted on the basis of $13.25 per thousand feet f.o.b. St. John, and this price is likely to be advanced. With one exception there has been a sharp advance in the price of boards for the United States trade. This exception is clapboards, which are almost at the same figure as one year ago. The past month has witnessed an improved demand for New Brunswick shingles, of which there is a decided scarcity. Some manufacturers are asking as high as $3.75 for Extras, Boston freight rate. Spruce lath is also a little firmer at $4.25 for 1½ inch and $4.35 to $4.50 for 1⅝ inch, Boston delivery.

UNITED STATES.

As forecasted in last issue, the Northern Pine Manufacturers' Association, which is composed of the manufacturers of Wisconsin and Minnesota, have put into effect a new price list making an advance of $1 on dimension, boards, fencing and siding; $2 on inch and thick finish and flooring; 25 cents on white pine lath; 50 cents on No. 2 and mixed lath, and 25 cents on 32 inch lath. The new list brings No. 1 white pine lath to $5 f.o.b. Minneapolis; No. 1 mixed, $4.75; and No. 2, $4.25. The Northwestern Hemlock Manufacturers' Association took similar action at a meeting in Minneapolis on the 16th inst., when all items except sheathing lath were advanced $1. For hemlock lath, the following prices were fixed: No. 1, ⅜ x 1½, 4 ft., $4.25; No. 2, $3.75; 32 inch, $2. The market on both pine and hemlock continues very strong on account of the exceptionally heavy demand and light stocks. Spruce is also in a firm position and sold well ahead of the saws. In Boston the current prices are $25 and $27 for frames, the latter price being for timber running over nine inches. There is a better demand for hardwoods consequent upon the approach of the spring trade. Birch is selling well and there is a call for basswood and maple, but the supply of these is comparatively large.

GREAT BRITAIN.

The light supply of lumber in Great Britain is at last having its natural effect upon prices and importers who were not disposed to consider offers made by shippers a few weeks ago are now anxious to close contracts at higher prices. For an ordinary specification of spruce £8 per standard c.i.f. Liverpool is willingly paid. Red pine deals are not moving very actively, but sales have been made at £8 15s to £9 for 3 x 7 and 8 inch, and £10 5s to £10 15s for 3 x 9 inch. The advance in spruce is expected to bring about an increased inquiry for hemlock, which is now quoted at £6 5s per standard. First class waney pine is said to have realized an advance of 3d per foot above last season's quotations, ruling prices being 3s 8d per foot for 24 x 28, and 2d more for longer stock. Quebec birch is bringing 22d for 16 inch average, 25d for 17 inch, and 2s 4d for 18 inch, and it is reported that some shippers are anticipating 2s 5d for the latter size.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, March 21, 1906.—The British buyers have been in the Ottawa Valley for some time, but the prices they are offering do not tempt the local manufacturers to part with their stock. The keen demand for lumber in the United States has sent the prices up to a mark beyond which the English buyers will go. Instead of manufacturing deals for shipping across the sea it looks as if a vaster quantity of lumber than usual will be manufactured into the thinner sizes this year and sent to the United States. Gilmour & Hughson will cut for the American market xclusively.

The W. C. Edwards Company or J. R. Booth have not disposed of the season's output and they feel disposed to insist on a higher figure than has yet been given before making a sale. The British agents say that all the lumbermen are asking the highest prices in the history of the trade. The prices are more than ten per cent. above the contracts made last season. The only big sales for the 1906 cut are the East Templeton Lumber Company and the John Maclaren Lumber Company, of Buckingham, both sold to Watson & Todd. The Hawkesbury Lumber Company, like Booth and Edwards, has not accepted an offer yet for its output.

The local lumbermen believe the figures on the British market will have to advance before they can keep the Canadian lumber from going almost entirely across the border. On all grades the United States buyers are paying from $1 to $3 more than paid a year ago. Manufacturers and buyers decline to state the exact prices paid for purchases of complete outputs, but they are unanimous in asserting that the market has an upward tendency such as has never been experienced before. The most active demand is for white pine. On account of the bad hauling all season some lumbermen despair of getting out their whole pine cut. The situation is a striking contrast with last season, when the sleighing was good in the woods till March 24th.

Looking back upon the 1906 winter, lumbermen realize that the January and February thaws crippled their operations to what has proved to be a quite serious extent.

Basswood and birch have strengthened considerably and desirable lots are being picked up quickly. Prices are very irregular in birch and only that sawn under the best conditions and in modernly equipped mills command the top prices. The best birch piles are being held at figures that astonish the buyers. The prices are more buoyant than last year on account of the small cut, which is about half what it was in the season of 1905. Some logs could not be taken out owing to the rapid disappearance of the snow. The chief scenes of operations in birch timber during the season were the Gatineau, Parry Sound and Labelle rivers. In open regions along these streams the ground was so bare that hauling operations were hindered during most of the time. The small mills will have a meagre output, as they operate in the most unfavorable districts.

The choicest winter cut basswood is selling for $24 per thousand for mill run, with mill culls out.

The market for shingles is very active, the demand in both the United States and local markets being keen. Building was so buoyant last year as to exhaust the stores and the prices which went upwards never declined. Laths are scarcer still than shingles. The demand is due entirely to a building boom on both sides of the border.

REMOVAL NOTICE.

The Montreal offices of this paper will, on May 1st, be removed from the Alliance Building to Room B 34, Board of Trade Building, St. Sacrament street, where our friends and business acquaintances will always be welcome. The telephone number will remain unchanged, Main 2299.

Greer Bros., of Port Arthur, Ont., have secured a contract to supply 2,000,000 ties within a year for the Grand Trunk Pacific Railway.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMN.)

ST JOHN, N. B., March 20th, 1906.—Reports from logging operations both in the lower counties and the up-river districts tell of a snccessful finishing up of the winter's work as far as hauling is concerned. Conjecture is now rife as to how the driving season will turn out. While it is rather early to say much in this regard, the general opinion among those versed in the matter is that the indications are all quite favorable.

The English market is showing increased strength week by week and the local feeling consequently tends toward higher prices. The prosperous condition of the American markets is having and will have an important effect upon the markets of the United Kingdom. A tangible cause of this effect is found in the fact that, while the present prices or similar figures are available in the United States, American manufacturers who do business in Canada, and particularly those of the Maritime Provinces, will secure as many "American" logs as possible. In some cases large quantities of dutiable lumber will be shipped to the U.S. markets.

Local stocks of "English" are dwindling rapidly and such parcels as are being sent forward by the winter liners are in most cases being brought by rail from portable plants at inland points. None of the local mills will be sawing before mid-May and that means July 1st before any important quantity will be ready to go forward. The receipts from the portable mills mentioned above will have practically ceased with the going of the snow, which can scarcely last more than a week or ten days more at the outside. Thus the quantities of "English" deals available at this port between this date and July 1st will be remarkably light.

Local feeling in regard to the future of the English market is of a decidedly optimistic nature. For delivery during the summer or early fall, no lower quotation on "English" deals than $13 to $13.25 per M. sup. feet, f. o. b. St. John, on a specification containing say 50% 7's and 8's, 35% 9's and 15% wides, two-thirds price for fourths and ends.

Freight rates to the West Coast are quoted at 37s 6d, and are not particularly strong at that figure.

The saw and grist mills of Champoux Bros. at Disraeli, Que., was destroyed by fire last month. The loss is placed at $22,000.

A. F. Holden, Pres. J. M. Diver, Gen'l.-Mgr
F. H. Goff, Vice-Pres. E. C. Barre, Ass't Mgr

LUMBERING OPERATIONS IN NEW BRUNSWICK.

In spite of the drawbacks occasioned by the scarcity of snow, there will be a large output of lumber from Albert county this year. In addition to the stationary mills at Albert and West River, numerous portable mills are in operation. One of the largest operators is P. J. McClellan, of Riverside, who has four crews and two mills almost continuously at work. Near the Standard Lake, Mr. McClellan has a large crew cutting logs that are being hauled to the Wright steam mill at Memel, which is running night and day, making deals, boards and laths. Operations will probably be continued by these crews right through the summer. At Midway Mr. McClellan's portable mill has cut over a million feet, and after sawing a cut for Charles Hawkes, it will be moved to Albert to saw Mr. McClellan's other cut of a million or more from the Crooked Creek work.

W. J. Carnwath is operating at Memel, with a portable mill. He is operating on what was formerly the Stevens property. At the upper end of the parish the Milton Brothers and others are doing a large business.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

WANTED — ALL BAND FILERS AND others interested, to read "The Filer." A comprehensive work on Band Re-Saw Fitting. It will straighten out those Band Saw kinks. $1 00 Postpaid. T. HALL DAVIS, Hampton, Va., U. S. A.

TENDERS FOR PULPWOOD CONCESSIONS

Tenders will be received by the undersigned up to and including the

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc , apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

February 3, 1906.

CARTER, POWELL LAND & LUMBER CO , Limited, Toronto, Ont.

To the Lumber Trade

IN JUSTICE TO OURSELVES AND THE trade we wish to state that the recent failure of Perkins and Pettibone, Louisville, Ky., in no way affects us. We never had any business relations with them of any kind whatever. We never saw a piece of their paper and no one ever saw a piece of our paper. We have always discounted our bills. We owe no man a penny, and were never in better shape than now. PETTIBONE & DOUGLAS, Polo, Ill.

Dodds Anderson Lumber Co.

Tenders will be received by the undersigned up to and including the

15th Day of May, 1906,

for the right to cut the Red and White Pine only on Timber Berths "D" and "E," situated on the Pigeon River in the District of Thunder Bay and Province of Ontario. The former contains an area of 13½ square miles, and the latter an area of 12 square miles, more or less.

Tenderers are asked to say how much they are prepared to pay per thousand feet board measure for the Red and White Pine, inclusive of dues, and must accompany their tenders with a marked cheque in favor of the Provincial Treasurer for $500.00 in respect of each Timber Berth tendered for, to be forfeited in case the berth or berths are not accepted at the price offered, or if tender accepted to be retained and applied on account of the first instalment of purchase money.

The timber to be subject to the Crown Timber Regulations, including the "manufacturing" conditions, except as varied for the purposes of this sale. The party awarded the berths or either of them, will be required to give a bond with satisfactory sureties for the payment of the price and the due performance of all terms and conditions required by the Department. Ground rent shall also be payable at the rate of $5 00 per square mile per annum. The successful tenderer will be allowed until the 30th April, 1911, to cut and remove the timber.

Tenders may be for either or both the berths the highest or any tender not necessarily accepted.

Tenders to be marked "Tenders for Timber Berths," and to be addressed to the Honorable the Minister of Lands and Mines, Toronto.

F. COCHRANE,
Minister of Lands and Mines.

Department of Lands and Mines, Toronto, 29th March, 1906.

N.B.—No unauthorized publication of this notice will be paid for.

WANTED—MILL SITE WITH OR WITHOUT buildings with about 300 to 500 water power; must be accessible to railways and near a town where hands can live. A locality where electric power could be got reasonable would suit. ROBERT HOWARD, Room 3, Liverpool & London & Globe Building, Montreal.

FOR SALE

FIVE MILLION FEET OF LUMBER ON Georgian Bay, about two-thirds to be cut from stock of twenty million, can ship by Rail or Vessel. BOX 370 CANADA LUMBERMAN, Toronto.

WANTED—AT ONCE, AN EXPERIENCED band-saw helper, for two double cut mill, situated near Ottawa, long season Must be quick, reliable and steady. Wages $3.50 per day; mill running. Young man preferred. Apply, stating age and experience, to Box 373, c/o CANADA LUMBERMAN, Toronto.

WANTED

QUOTATIONS ON THE FOLLOWING DRY Stock: One car each 1¼", 1½", 2", 3", 4" Hard Maple; 1¼" Birch and 1¼" Soft Elm. Strictly 1sts and 2nds grade for export. Terms cash. ROBERT BURY & Co., Teeswater, Ont. Lock Box 268.

CURRENT TRADE CONDITIONS.

ONTARIO.

Lumber conditions could not be more satisfactory. Inquiries are plentiful, but the volume of business is restricted by the scarcity of stock. Building operations in Toronto are exceptionally brisk, the value of permits granted during the past three months being approximately $1,900,000, compared with $1,200,000 for the corresponding three months of 1905. There is naturally a heavy demand for building lumber and this promises to increase as the season advances. Prices are strong with little prospect of weakening in the near future. Manufacturers have sold a considerable proportion of the new cut of white pine and dealers whose stocks are running low are urging that their orders be filled immediately upon the resumption of sawing operations. Lath is being bought in some quantities even at the higher prices. Car load lots of No. 1 white pine are bringing $5 in the Ottawa Valley, but the range for the new cut is from $4.25 to $4.50. On account of the light production of logs last winter, the hardwood market has strengthened. There is also some improvement in the demand.

WESTERN CANADA.

The tendency of lumber prices in Western Canada is towards a higher range. The Washington Log & Brokerage Association last week advanced the price of logs 50 cents and $1 per thousand feet. Flooring logs are now quoted at $11, merchantable $8.50, and No. 2 $6. These are the highest quotations ever made on logs in the Puget Sound district. Prices for British Columbia logs are now $9.50, $8 and $6 respectively for first, second and third grades, and even at these prices the supply is by no means plentiful. Coupled with the above facts is an exceptionally brisk demand for lumber in all branches. The spring movement has commenced about two weeks earlier than usual and orders for building materials are being received faster than they can be filled. A manufacturer of lumber, writing to the CANADA LUMBERMAN, says: "The lumber conditions have improved very much in the past two months and I am now looking forward to one of the best years in the history of the lumber business of the West."

UNITED STATES.

So great is the demand for lumber that there is a scarcity of stock in nearly all markets. The high prices have apparently not restricted the consumption, buyers being now more anxious to close contracts than at any previous time this year. Prices have moved in one direction only and that direction upwards. The Oregon pine mills last week added one dollar to the price of Oregon pine, and the cargo mills at Washington are contemplating an advance on foreign cargoes from $13.50 to $15 a thousand feet. The Wisconsin Hardwood Association, at their spring meeting on March 27th, received a most encouraging report as to market conditions, on the strength of which it was decided to advance the price list. The following prices were fixed for hardwoods f.o.b. Wausau: Inch log run ash, $25; inch log run birch, $19; inch log run basswood, $20.50; inch log run soft elm, $20; 1¼ to 2 inch, $21; 1 to 2 inch log run soft maple, $16; inch log run hard maple, $14. Hardwood stocks are considerably lighter than one year ago and the spring demand which is now showing itself promises to clean up the holdings of old stock.

GREAT BRITAIN.

Reports received from the British market speak very hopefully of spruce, which seems to be steadily gaining strength. Some of the larger buyers who have been hanging back have now entered the market, but are finding that they must pay a substantial advance over what they could have bought for a few weeks ago. Quotations are about £8 5s per standard c.i.f. Liverpool and London for summer shipments of New Brunswick spruce, and £8 10s is predicted in the near future. The present price of Quebec spruce is 15s per standard over last year's opening prices, sales having been made at the following figures: Fifth quality, from £7 10s to £7 12s 6d, c.i.f.; 3×9 inch fourths, from £8 10s to £8 12s 6d; 3×9 inch thirds, £9 5s; 3×8 inch thirds, from £8 7s 6d to £8 10s; 3×7 inch thirds, from £8 2s 6d to £8 5s; 3×9 inch firsts, £14 5s. Hemlock deals are selling at £6 5s, but there are very light offerings and £6 10s is predicted.

STOCKS AND PRICES.

The Davidson Lumber Company, of Bridgewater, N. S., are shipping about 50 carloads of lumber a week to the United States and South America.

The bark Stenbiek, carrying 1,500 000 cf lumber from the Fraser River Sawmills, New Westminster, B. C., sailed last week for Valparaiso, Chili.

Three more vessels have been chartered to load lumber at the Hastings mill, Vancouver, B. C., one being for Cape Town, South Africa, and the two others for the United Kingdom.

The Hanbury Manufacturing Company, Brandon, Man., have just completed a successful season's operations in the woods. They expect to cut 5,000,000 feet of lumber at Brandon this year.

It is expected that 45,000,000 feet of logs will come out of the Miramichi river this season. There is still considerable snow in the Miramichi district and prospects for getting out the logs are fairly good.

The Thompson Lumber Company, of Havlock, Out., got out about 30,000 logs last winter, which will produce about 1,500,000 feet of lumber. The logs will be floated to Tucker's Landing, on Belmont Lake, where they are building a saw mill.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, March 29th, 1906.—The waney and square timber from the Temiskaming district will be on the way down the Ottawa river for Quebec about April 10th. Most of it will go by way of Coteau. The quantity is smaller than last year. This timber is sold at a shade higher price than that of the previous year. It includes the cuts on the limits of Ferguson & McFadden, Gillies Bros., Albert Mackey & Graham. The Mackey firm is sending what will probably be its last output of square timber, as the American market will take its cut in future, and it will go out as lumber.

The timber trade has been decreasing so much of late that the Government is contemplating the abolition of the office of cullers at

THE McLENNAN LUMBER CO. LIMITED, MONTREAL QUE

Quebec which has existed about fifty years. All the square timber coming into the harbor for exportation passes the Government cullers and in cases of dispute they give certificates of measurements. But the trade has so diminished that six cullers are enough for the present season. It is possible that legislation will be introduced this session reorganizing the culling system or abolishing the office altogether.

The buyers of the cuts mentioned for this year are W. & J. Sharples and Dobell, Beckett & Company.

Many manufacturers are sold out of lath. On this account the price keeps up and buyers are compelled to pay the remarkably high figure of $5 per thousand for the No. 1 white pine variety. It is not expected that when the mills begin sawing the top prices will keep up, but at present manufacturers are inclined to believe no slump will take place.

The demand for pine mill culls at the Ottawa mills is exceedingly strong and scarcely any other line of lumber has undergone so rapid an advance in price. Spring building operations is the cause of this buoyancy.

The village of Hintonburg, near Ottawa, advertised for tenders for the supply of lumber for the summer's operations and accepted the tender of G. M. Mason at $16 a thousand for two inch hemlock of all widths.

J. M. Kilburn, of Lakefield, Ont., was in Ottawa this week to urge the rapid completion of the Trent canal partly to relieve an unsatisfactory situation with regard to lumber shipping from several Ontario points. In Lakefield, he said, 15,000,000 feet of lumber was produced by one manufacturer and shipped to New York at a cost of $4.87 per thousand feet. If the Trent canal were complete and barge shipments possible $1.50 per thousand could be saved between the mill and Ogdensburg alone.

J. R. Booth was in Montreal the other day to attend a conference of lumbermen with regard to squatting on reserves in Quebec. The lumbermen have lost heavily by speculation of this kind. The squatters do not remain but sell to others. The convention will ask the Quebec Government to legislate against transfers of timber limits upon this system.

The Booth firm did not cut as much timber on the south side of the Ottawa river this year as last. Operations were more successful on the north side, but on the whole there will be a shortage compared with the previous term. It is believed the W. C. Edwards cut will be larger than last season, only a few logs remaining at any of the shanties.

THE BARBADOS MARKET.

Under date of March 10th, Messrs. S. P. Musson, Son & Company report as follows regarding the Barbados lumber market: "The arrivals during the fortnight consist of the schooner "Rescue," from St. John, N.B., with 30,000 feet of white pine and 2,900,000 cedar Laying shingles; barque "James Daley," from Church Point, N.S., to ourselves, with 156,000 feet of spruce and 12,000 feet of birch, and the schooner "Maggie Belle," from Mahone Bay, N.S., with 63,000 feet of white pine and spruce. We placed the white pine ex "Rescue," which was principally second quality and inferior, at $22.67 and $20.10; the deck load of the "Maggie Belle," consisting of white pine and spruce, was sold at $20.60. The cargo of spruce ex "James Daley" had been sold some time ago, to arrive, at $22.50. The market for white pine is fairly well stocked, but arrivals in a few weeks time, if not too heavy, would do well. Spruce is in light stock, and there is room for one or two cargoes. The shingles arrived to a heavily stocked market, and at a time when the demand, which is always light at this time of the year, was abnormally dull, and it was with difficulty that we could induce a buyer to pay $1.50 for the entire lot. The stock of these is larger at present than we have ever known. Long Gaspe are also in fair supply and the demand light."

EASTERN LOG OUTPUT.

At meetings of the Penobscot Lumbering Association and the Mattawamkeag Log Driving Company, held at Bangor, Maine, last week, the general report was that the season 1905-06 had been very favorable for logging on Penobscot waters. In some parts of Maine operations, especially hauling from the yards to the landings, have been greatly impeded on account of lack of snow, but in all parts of the Penobscot River system, except on the lower East branch and the Passadumkeag, conditions have been very favorable with just enough snow for easy hauling, and it is expected that every log will reach the landings.

The log cut of principal branches of the Penobscot is roughly estimated as follows: West branch, 70,000,000 feet, of which 50,000,000 feet is for the Great Northern Paper Co.; East branch, 58,000,000 to 60,000,000 feet, including 13,000,000 feet of logs hung up last year, and of which 8,000,000 will go to pulp mills; Mattawamkeag River, about 12,000,000 feet, all saw logs; Piscataquis, 15,000,000 feet, of which 8,000,000 will go to pulp mills. This would leave a total of 197,000,000, about 107,000,000 feet of saw logs to come to Penobscot boom, for the supply of saw mills at and below Old Town, chiefly at Bangor, as follows: West branch, 45,000,000 to 50,000,000; Mattawamkeag, 18,000,000; Passadumkeag, 12,000,000; Piscataquis, 7,000,000.

TIMBER LIMITS FOR SALE.

The Ontario Government is calling for tenders for the right to cut the red and white pine on timber berths "D" and "E" on the Pigeon River, in the Thunder Bay district. The former is about thirteen and a half and the latter about 12 miles square. Tenderers will be required to pay for the timber by the thousand feet board measure, in addition to ground rent of $5 a year per square mile. The timber is said to be somewhat scattered.

TIMBER LIMIT TRANSACTIONS.

Eddy & Glynn, of Saginaw Mich., have recently sold what is known as timber berth 118, in the Georgian Bay district, to a syndicate of Michigan lumbermen, who we understand will organize a company to carry on a general sawmilling enterprise. The consideration was $400,000. Within the past two months Eddy & Glynn have sold one limit in the Georgian Bay district to the Holt Lumber Company, of Chicago, for $500,000; one to Wells & Company, of Menominee, Mich., for $325,000; and another smaller limit, known as the township of Gilmour, to F. P. Munro & Company, of Pembroke, Ont.

18th Day of April Next

for the right to cut pulp wood on certain areas tributary to the Montreal river, in the District of Nipissing; the Nepigon River, in the District of Thunder Bay; the Rainy Lake, the Wabigoon River, and the Lake of the Woods, all in the District of Rainy River. Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed from time to time for the right to operate a pulp or pulp and paper industry in the areas referred to. Successful tenderers will be required to erect mills on the territories, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for 10 per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreements to carry out conditions, etc The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc, apply to the undersigned.

HON. F. COCHRANE,
Minister of Lands and Mines,
Toronto, Ont.

February 3, 1906.

WE HAVE TAKEN OUT AN UNUSUALLY nice stock of Hardwood Logs this winter, mostly Maple, some Beech; the logs are a very large run and extra good in quality; we are prepared to receive offers for this stock to be cut to order on opening of navigation; state price on cars here. C. BECK MFG. CO., Ltd., Penetanguishene, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

The high price of white pine lumber is not restricting business to any extent. Several large sales have lately been made by the Ottawa valley manufacturers for export to Great Britain, and at prices higher than those which were realized a year ago. Dry stock is so scarce that prices are very firm, with the demand gradually expanding. In Western Ontario there is much interest in hemlock. The new cut is being offered and has found buyers at $13, but there is also a disposition to hold off in the hope that the price may weaken a little when the new stock is ready for the market. The log drives are now the all absorbing question. If they should reach the mills safely, prospective lumber buyers claim that the cut will be large and prices recede, but manufacturers point out that the cost of logging the past winter was excessive and that there will be no break in prices under the good demand now prevailing. Hardwoods are steady, with an improving demand for the lower grades of birch. The shingle market is getting more active and prices are about ten cents higher. B. C. shingles are meeting with a ready sale on account of the scarcity of the white pine variety.

UNITED STATES.

In some portions of the Southern States heavy rains have interfered with the movement of lumber, but in all other districts business continues exceptionally good. There is still a heavy demand for common and coarse lumber, with stocks badly broken. The Northern pine district is carrying practically none

of last year's cut in first hands, and a large proportion of the cut for the coming season has been sold for delivery as soon as manufactured. It is estimated that the cut of logs on the upper Mississippi River and tributaries during the past winter was 480,000,000 feet, which compares with 530,000,000 for the preceding winter. The hemlock market is very firm. Michigan stock is being quoted at about $18 base delivered on the dock at Tonawanda. Among the hardwoods, quite favorable reports are given about basswood, which is at last coming to the front again. The mills are still carrying a fairly heavy stock and consequently prices are not likely to advance very much until this is reduced, but the outlook for basswood is no doubt much brighter than one year ago. Birch is also moving somewhat liberally and the hardwood trade generally is showing more life. Shingles are stronger. In Boston New Brunswick "Extra" cedars are held as high as $3.75 and it is almost impossible to secure a quotation below $3.60.

GREAT BRITAIN.

Our reports this week from the British market deal almost exclusively with spruce, which is demanding a greal deal of attention on account of its manifest strength. For early cargoes of New Brunswick spruce, £8 7s 6d per standard c.i.f. for an ordinary specification is asked, and buyers are being urged to close contracts on the ground that the present outlook is for an advance to £8 10s. At a recent auction sale in London 3 x 9 inch second quality Quebec spruce, 11 feet lengths, sold at £9 10s. Birch planks, on the other hand, are said to be a little easier and this has also been reflected in the price of birch timber. The highest price yet paid this season for the latter is 2s 6d for 20 inch average. Quebec exporters of square and waney pine are reported to have secured the usual number of orders at fair prices. The stock is light and the statistical position consequently quite healthy.

J. J. Sweeney, of Sackville, N.B., has sawn about a million feet of lumber for Frank Maxwell, of that place.

DISCOLORATION IN LUMBER.

We have been requested to solicit the views of the lumber trade as to the best process or means by which lumber can be prevented from discoloring in the muggy weather of the summer months. Many of our readers have no doubt made experiments along this line, and we shall be glad to publish any communications on the subject which may be submitted.

THE LOG PRODUCTION IN QUEBEC.

The winter has been most favorable for banking logs in Eastern Quebec, and nearly all the logs made have been hauled out to the different streams. John Breakey, of Chaudiere Mills, is reported to have made 600,000 logs, part to be converted into sawn lumber, but the bulk will likely be turned into pulpwood. The Beauce Pulp & Lumber Company, of Scott Junction, have made 175,000 saw logs and 15,000 cords pulpwood. These two firms will make a big drive on the Chaudiere river, apart from the quantity made by others operating on the same river.

On the Etchemin river, Henry Atkinson has got out about 60,000 saw logs and 6,000 cords of pulpwood. This, in conjunction with a large part of last year's cut which was only partially driven and did not reach the mills, will make a busy spring on the above river and its branches.

Price Brothers & Company, Limited, with mills at St. Thomas de Montmagny, have made 100,000 saw logs and 35,000 cords of pulpwood, 4 ft. They, like others, were unfortunate last year on the drive, and left the bulk of their cut on the river to be driven this year with this winter's cut.

On the River St. Anne, Mr. Ordway, for his company, had a very successful season, making 225,000 logs, 13 ft. Last year he left some 275,000 logs in the river, all of which he expects to drive to the mill this year and turn into pulpwood, say, 15,000 cords of pulpwood.

Most of the lumbermen in the Gaspe district have completed their logging operations for this season, having been successful in getting everything to the streams, the Calhoun Lumber Company, Limited, being the only exception. At the time of writing they are still at work hauling off from the yards, but expect to finish this work in the course of a few days.

The weather during the logging season was very favorable for this work throughout the entire Gaspe Peninsula, and the average cut of logs will exceed that of last season considerably. The late heavy falls of snow brightened the prospects for successful stream driving. These conditions, together with the buoyant tone of the British and American markets for spruce, tend to inspire a feeling of confidence throughout lumber circles.

It is reported that the York Lumber Company are about to sell their extensive limits and mill plant to the Rathbun Lumber Company, of Deseronto, Ont. The last named firm is reported as being largely interested in the Grand Valley Lumber Company. This being so, will give them very extensive limits in the Gaspe district.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, April 7th, 1906.—Some large contracts have just been closed in the Ottawa Valley for the 1906 output of white pine and red pine. The J. R. Booth firm have sold between 65 per cent. and 75 per cent. of their pine cut to J. Burstall & Company and Robert Cox & Company. The W. C. Edwards Company have disposed of their red and white pine cut to Watson & Todd. The lumbermen say that practically all the deal sales are made, but there still remains the spruce cut to be sold. The English buyers were compelled to pay a high figure and they are said to have closed bargains at five per cent. more than the current rate last year.

There is a keen demand for pine mill culls in Ottawa and prices continue firm. There is also a better market for basswood. Purchasers look for a drop when the mills begin to cut. In the case of lath and shingles the demand continues to such an extent that extraordinary prices have been paid. Now and then purchasers have paid $5 per thousand for the best lath. A common figure is $4.50 for good lots.

The United States wholesalers are buying spruce at from $1 to $3 per thousand more than they paid last year. The outlook is so much better for spruce sales than last year that local manufacturers believe they will be able to dispose of quantities that lay upon their hands when prices were lower. They are holding out for high prices. The Hull Lumber Company curtailed operations last winter in its large limit on the Rogue river on account of the large quantities of logs which remained over from the previous season. The company expct now to be able to clear off all the logs that remained in the water in the dull period.

The Canadian pulp manufacturers and the United States market are

taking the spruce from the Ottawa Valley in large lots. Some of the smallest manufacturers, producing in the neighborhood of 1,000,000 feet of lumber, will have scant supplies of logs owing to the bad season for the hauling operations. The small mills will not likely run the whole summer. Larger manufacturers, however, will be well enough supplied. The Booth mill has had a large delivery of logs by rail, which has been unloaded on the ice near the mill. Mr. Booth does not expect to begin cutting at full blast for a couple of weeks more, as there is still much ice in the way. About mid-summer he will start a large pulp mill in operation which is just now receiving the finishing touches of the builders.

The Edwards Company and Gilmour & Hughson report a large supply of logs and will be active all season.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N. B., April 5th, 1906. —The month has been cold and the ice in the rivers of New Brunswick has wasted but little. This circumstance is very disappointing to the lumber manufacturers of this particular section, who, with one exception, have no logs at hand but must depend upon the bank logs from the brooks and rivers in the neighboring counties. Indications now point to the probability that not before April 25th will any quantity of spruce, large enough to warrant making a start, reach St. John mills. Until the last of May (when the logs from the Tobique, the Aroostook and other far up-river districts will begin to arrive) the local millmen will depend almost entirely upon such purchases as they are able to make of the bank logs mentioned above. The demand for these logs, which are almost exclusively spruce, is naturally very brisk and the greater part of them, while still unavailable because of the ice, have been already bought up. Such lots as are offering day by day are readily disposed of at prices ranging from $12.50 to $13.00 per M ft. for deal logs, two-thirds price for battens.

A feature which is causing much anxiety to local log operators is the possibility that the logs which have been hung in the main St. John since last year, or a part of them, may run out with the ice before the booms are swung at Fredericton. These logs, which are estimated at 50,000,000 feet, are owned almost entirely by St. John and Fredericton parties. If the ice wastes away and melts out gradually, the probabilities are that the logs will be taken care of by the Fredericton Boom Company, as usual, but if the ice remains strong and runs out suddenly because of a sudden rise of water it will be impracticable to swing the booms, and the logs, or a portion of them, will run past Fredericton and be scattered along the river. Arrangements will be made to have crews of men and tugs equipped with booms and lines ready to start from St. John at short notice to round up the logs along the river wherever possible, thus preventing them from going to sea. To take care of logs in this way costs in the vicinity of $3.00 per M feet over and above the usual cost.

A feature of the trade during the fortnight has been the appearance of a tendency toward weakness in the price of spruce lath. The anxiety to buy which has characterized this line of trade during the last few months is no longer conspicuous. The indications tend to the conclusion that any small lots which are available at present could be bought at $2.45 to $2.50, f.o.b. St. John. Such lots are not large enough to be important and are made up of dutiable goods.

A buyer of lath for summer delivery would in all probability be quoted on dutiable lath $2.15 to $2.25 per M, f.o.b. St. John.

Cedar shingles are strong and show a tendency toward still firmer figures. For low grades the manufacturers are quoting the provincial trade from 15 to 20 cents per M higher than last year's prices. The feeling in regard to shingles for export to the United States is of a very optimistic nature and so far this feeling has been fully justified. Non-dutiable Extras and Clears for

All last summer's cut, well manufactured.
Address Box 379, CANADA LUMBERMAN, Toronto, Ont.

E.B. Foss & Company, of Bay City, Mich., are this season stocking the saw mill of G.L. Burtis at Thessalon, Ont. They have also bought considerable lumber at other points on the Georgian Bay.

CURRENT TRADE CONDITIONS.

ONTARIO.

The lumber trade remains about as reported last week. The warmer weather is accelerating building activity and this in turn is emphasizing the shortage in the lumber supply. There is a very urgent demand for white pine of the lower grades and hemlock. There is practically no dry hemlock on the market and consequently prices are nominal. The seller can obtain almost any price he asks. Contracts have been made for green hemlock to be shipped as soon as sawn and we understand that as high as $15 at the mill has been paid. There will no doubt be a large cut of hemlock this season, but present indications are that the consumption will be correspondingly large and that there will be no accumulation of stock beyond reasonable limits. More of this class of lumber is likely to be exported to the Eastern States than in any previous year. The hardwood trade is getting into better shape, with indications of higher prices in the near future.

Shingles are moving quite liberally. B. C. red cedars for Ontario delivery have this week been advanced ten cents, which makes the price $3.15 for XXX and $3.37 for XXXX. Some retail dealers in Toronto have also advanced prices, but action in this respect has not been unanimous.

WESTERN CANADA.

The lumber market of Western Canada is gradually strengthening. There is a good demand for both lumber and shingles and this promises to expand as the season advances. Most of the mills have a considerable number of orders on their books and there is no pressure whatever to sell stock. The conditions are in favor of higher prices, but there is not likely to be such an advance as will restrict consumption. The manufacturers in the Mountain district of British Columbia are expected to raise their prices in the near future. A further advance of 10 cents in B. C. shingles has taken place, bringing the price for XXX for Eastern shipment to $1.95.

UNITED STATES.

On account of the opening of navigation on the Great Lakes, the lumber business is more animated than at any previous time this year.

Efforts are being made to move lumber as quickly as possible to wholesale points, at some of which stocks have been badly broken by the abnormal winter and early spring demand. The price situation is as strong as ever, with no sign of weakening. Dealers are not disposed to load up with exceptionally heavy stocks, but the volume of orders coming to them makes it necessary to keep their yards well supplied if they are not to lose business. The spruce supply is reported as a little larger, but the demand continues excellent. Frames 10 to 12 inch are still quoted at Boston at $27, and 9 inch and under at $25.

The hardwood situation is steadily improving. The Hardwood Record is authority for the statement that there is not one hardwood manufacturer in twenty throughout Wisconsin and Michigan who has not sold a good portion of his entire cut of the season. Fully 75 per cent. of the birch, basswood, maple and beech output is said to have been contracted for, this proportion of advance sales being greater than ever before in the history of the trade. Basswood is doing better, with quotations of $20 to $23 at mill points.

GREAT BRITAIN.

The retail trade of Great Britain does not seem to respond to the strength shown by wholesale transactions. Still, compared with a year ago, business is good, and when consumers become convinced that prices are not likely to recede, they will no doubt contract for their requirements. Whitewood from Sweden and Finland has advanced 25s a standard during the past few months, and this, of course, is making it easier to sell spruce. The stock of lumber on hand is so much less than one year ago that higher prices are predicted. The stock of square and waney pine timber at Liverpool is 64,000 cubic feet less than a year ago. Of Quebec pine deals at Liverpool there is only 8,500 standards, as against 12,000 standards in April, 1905.

At a recent public sale in London 3×9 inch second quality spruce brought 10s per standard and 3×7 inch £8 10s. Laths and flooring are in good demand. The action of the Bank of England in reducing their rate of discount is expected to have a good effect upon the general trade of the country.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., April 9th, 1906.—"The shingle business is fair," remarked Mr. McNair, of the Hastings Shingle Manufacturing Company this morning, when asked concerning conditions. "The demand, while not what might be called brisk, is good from both Canadian and American points. During the winter, when the former market was slack, considerable amounts of shingles were shipped into the United States, notwithstanding the duty. Prices have been advanced locally on the XXX from $1.85 to $2, but they remain at $1.85 for shipping. None of the manufacturers are taking orders too far ahead, as it is probable that a raise in prices will take place this week. Labor and raw material are both scarce and are costing more than formerly, and it is felt that an increase should be made. This will apply particularly to XXX, which may go as high as $2 for shipping. As to the other grades, the prices of these generally depend on the supply and the demand, the XXX being the only real standard."

The lumber industry all through is good, one of the features of the activity being the large number of Americans constantly coming in. They are taking up timber both on the coast and in the interior, some on crown granted land, and some on provincial lands. A number of new mills are spoken of.

"The present good conditions will probably continue all year," a millman stated to-day. "The market just now is fine, and all the mills are kept busy. There has been no objection raised in respect to the recent increase in prices, which was necessitated because of the stringency in the log market and the greater cost of production. The Mountain Lumber Manufacturers' Association will doubtless put up its figures to correspond with those of the coast mills at the next meeting. Logs have gone a trifle higher, and are now at the top notch, running $6, $8.50 and $10 according to the quality. No, I hardly think there will be a plentiful supply of logs this summer, even if the camps are more in number. There is a number of new mills starting up, and they will take any surplus on the present production, and will keep the supply still scarce. It takes as long these days to install a good logging camp as it does to put up a mill, so I do not look for any glut of logs."

In the interior of the province the mills are all preparing for a large cut. The Crow's Nest Pass Lumber Company expect to have 20,000,000 feet of timber ready for the saw by May 1st; the Yale Columbia Lumber Company have just let the largest contract for timber in the Grand Forks district, being for ten million feet to ranchers on the main branch of the Kettle river; The S. H. Bowman Company, of Revelstoke and Compalix, have seven camps going on Fish river, and the Kamloops Lumber Company have cut 11,000,000 feet this winter.

Friends of Mr. George McCormick, of the Kamloops Lumber Company, are congratulating him upon the birth of a little daughter, which took place last week.

The Elk Lumber and Manufacturing Company, of Fernie, have decided to install a factory for the manufacture of furniture. They have experimented with the various woods, and found that they are suitable for furniture purposes. This will be the first factory of its kind in this province, which is deemed rather strange, as there is an abundance of good timber, with high prices for the finished product.

About thirty members of the Washington State Hoo-Hoo came to Vancouver last Thursday night, and on Friday instituted a branch of that famous lumbermen's order here. A large number of members were initiated.

STOCKS AND PRICES.

Logging operations in the Duck and Riding Mountains of Manitoba have been completed for the season. T.A. Burrows, of Grandview, has secured about 15,000,000 feet of logs, John Simmott about 4,000,000 feet, and Mundle and Harper about 2,000,000 each.

The Ontario Government has accepted the tender of A. McPherson & Company, of Longford Mills, for the red and white pine cut along the Temiskaming & Northern Ontario Railway, passing through the Temagami forest reserve, which timber is being cut as a precautionery measure against fire. It is understood that McPherson & Company's offer was $15.10 a thousand feet, the company bearing the expense of removing the timber. The total pine cut will be between 3,000,000 and 5,000,000 feet. The prices offered for the cedar, spruce and other woods cut were considered too low.

The Department of the Interior, Ottawa, are asking for tenders up to Wednesday, May 16th, for a license to cut timber on Berth No. 1258, in the Province of Manitoba, containing an area of 5.38 square miles.

NEW BRUNSWICK LOG OUTPUT.

The prospects for stream driving in New Brunswick are said to be fairly good. There is still considerable snow in the northern part of the province, which is holding well so as to make good water for the driving. Mr. Moore will do the driving for the St. John River Log Driving Company on a contract let last year at 20 cents a thousand, and the affairs of the Fredericton Boom Company will be directed by Lewis H. Bliss, lately appointed agent.

At a recent meeting of the Madawaska Log Driving Company the following estimate of logs to be driven this year to the end of the limits at Grand Falls was prepared:

A. Cushing & Company....	32,000,000
Murray & Gregory.....	10,000,000
John E. Moore.....	2,500,000
Neal McLean.....	4,000,000
W. H. Cunliffe & Sons.....	14,000,000
Charles Miller.....	17,000,000
St. John Lumber Company..	47,000,000
John Kilburn.....	10,000,000
Stetson, Cutler & Company..	8,000.000
Randolph & Baker, Limited.	6,000,000
Scott Brothers.....	2,000,000
John A. Morrison.....	2,500,000
Total.....	155,000,000

This full amount of 155,000,000 will not reach the booms because 30,000,000 of the St. John Lumber Company's cut will be held for their mill above Grand Falls. The remainder is all for mills at Fredericton and between there and St. John, and will therefore be driven to the booms of the Fredericton Boom Company.

While taking off this 30,000,000 lessens the amount to be driven on the lower corporation to 125,000,000 feet, this discrepancy will be all made up and the grand total increased when the lumber cut on Tobique, Salmon and other rivers below Grand Falls is added. The principal operators on Tobique, whose logs are to come down the St. John river, are Hilyard Bros. and N. H. Murchie, while John E. Moore is the principal operator on Salmon river.

THE GLASGOW MARKET.

Calder, Henderson & Livingston's latest market report reviews the Glasgow market as follows:

WANEY WHITE PINE.—A considerable consumption has taken place, but the stock is an average one and ample for all requirments: first class wood of long average is firnly held and is quoted at from 3/6 to 4/ for 18 to 19 inches average. Short girthy wood is difficult to move, and is quoted at from 2/8 to 3/. Price of second class ranges from 2/ to 2/6, but the demand for same is slow.

SQUARE.—There has been little demand. Stocks remain at about an average. Quotations are from 2/8 to 3/ for first class wood 35 to 40 feet average. For the lower qualities there is no demand.

RED PINE—Is seldom asked for, and there is practically no stock on hand. Considering the level that pitch pine has reached, it is probable that enquiry will spring up for red pine later on.

ELM—Has gone well into consumption. Stocks are normal. Prime wood 45 feet average is quoted at from 3/10 to 4/.

ASH.—The stock of this wood is very low, and as there are several enquiries, early parcels would do well.

BIRCH.—Some parcels have arrived against contracts and have been delivered ex quay. The price of 16 inch average rules about 2/ per cubic foot.

DEALS, BATTENS AND BOARDS.—The demand has been quiet, largely on account of the high prices now ruling, which have stopped speculative buying. The stocks of deals of all qualities are exceptionally light, but sidings are much too heavy, more especially when the prospective demand is taken into account.

PINE—Firsts: Stocks show an increase as compared with this date last year, and consist chiefly of 11 inch and wider. Undersized deals are scarce. Broads are quoted at from £34 to £37. 11 inch, £31 to £32. Undersizes, £24 15s. to £26 15s. Good sidings, 1¼, 1½, and 2 inch have come forward freely and the stock is heavy. While quotations have kept steady at from £25 15s. to £28 for 11 to 12 inch average, there have been few sales reported. Seconds: The stock is

LUMBER AND LATH
CACHE BAY, Ont. C. P. R. 26 miles West North Bay

low. Broad deals 14 inch average are quoted at from £22 to £25; 11 inch at from £20 to £22, and undersizes at from £14 to £16. Thirds: There has been a fair demand, but business has been kept back through want of stock. The stock shown in our tables is held by merchants, and no wholesale quotations are being made. Fourths are in the same position as thirds.

RED PINE DEALS.— The demand has been steady and stocks are low. Prices are from £8 10s. to £11, according to quality and specification.

SPRUCE.—The stock is an average one, and is firmly held at £8 5s. for 7 inch to £9 12s. 6d. for 9 inch in third quality.

TIMBER LIMIT TRANSACTIONS.

The Quebec Government have announced a sale of timber limits to take place in Quebec on Thursday, June 21st next. The limits to be sold are situated in the Upper Ottawa, St. Maurice, St. Charles, Lake St. John West, Lake St. John East, Saginaw, Grandville, Rimouski East, Bonaventure West, Gaspe West, Gaspe East and Gaspe Centre districts.

The Rice & Lockwood Lumber Company, of Springfield, Mass., have moved their New York office to the Metropolitan Life Insurance Building, 1 Madison avenue.

The Weekly Lumberman — Published every Wednesday, contains reliable and up-to-date reports of market conditions and tendencies in the principal manufacturing districts and leading domestic and foreign wholesale markets. A weekly medium of information and communication between Canadian timber and lumber manufacturers and exporters and the purchasers of timber products at home and abroad.

The Monthly Lumberman— A 44-page journal, discussing fully and impartially subjects pertinent to the lumber and wood-working industries.

WANTED AND FOR SALE

Advertisements will be inserted in this department at the rate of 15 cents per line each insertion. When four or more consecutive insertions are ordered a discount of 25 per cent. will be allowed. This notice shows the width of the line and is set in Nonpareil type; 12 lines make one inch. Advertisements must be received not later than 4 o'clock p. m. on Tuesday to insure insertion in the current week's issue

WANTED—ALL BAND FILERS AND others interested, to read "The Filer." A comprehensive work on Band Re-Saw Fitting. It will straighten out those Band Saw kinks. $1 00 Postpaid. T. HALL DAVIS, Hampton, Va., U. S. A.

WANTED — TEN THOUSAND CORDS Hard and Soft Wood; also same quantity of Slabs. SIMCOE WOOD AND LUMBER CO., 52 Yonge Street Arcade, Toronto.

FOR SALE

CHOICE LOT OF FIGURED ASH, CHESNnut, Curly Maple, Cherry, Sassasfras, quartered and plain Sycamore 1" and 5/8" with few Sycamore squares, for panneling inside finish, all dry, also 100 acre timber lot. Address, J. C. SCHLEIHAUF, West Lorne, Ont.

WANTED

ASH, BIRCH, BASSWOOD, SOFT ELM, Rock Elm, Hard Maple, Hickory in Logs, lumber and dimension sizes. Spot cash. Inspection at mill. Please quote prices f.o.b. at shipping points. W. J. GORDON, Box 259, Windsor, Ont.

PUBLIC AUCTION

THE FOLLOWING PARCELS OF VALUable Timber Lands and Mill Properties owned in fee simple by the Cookshire Mill Company in Liquidation will be sold by public auction at the Court House, Cookshire, Que., on Wednesday, May 30th, 1906, at 1 o'clock p. m.

Parcel 1. Mill and yards at Cookshire Junction, Que., with 21,257 acres of timber lands in the Townships of Newport, Ditton and Auckland.

Parcel 2. Mill site and yards at Sawyerville, Que., on the Maine Central Railroad, with 4,350 acres of timber lands in the Townships of Newport and Auckland.

Parcel 3. 2,938 acres of timber lands in the Township of Garthby, Que., near Lake Aylmer on the Quebec Central Railroad.

These lands are well timbered with Spruce and Hardwood.

WANTED.

ONE BAND SAWYER FOR SINGLE CUTting band; one bandsaw filer; one rotary sawyer accustomed to steam feed and nigger; one circular saw filer, capable of hammering preferred. Apply to DONALD FRASER & SONS, Cabano, P. Q.

CURRENT TRADE CONDITIONS.

ONTARIO.

It does not appear that the high price of lumber is restricting local building operations in the slightest degree, for the activity in that line is even more pronounced than one year ago. The difficulty of securing suitable lumber, on account of broken stocks, has caused some inconvenience, but usually substitutes have been found. Dimension timber finds a very ready market in the Ottawa Valley district, and at prices which represent a considerable advance. No southern pine of any account is now coming into Ontario, and in the absence of a sufficient supply of white pine, orders for fir are being placed with the British Columbia mills. The market has also tempted one or two Washington manufacturers, whose representatives have recently been in Toronto seeking some of the spring trade. The seller who can make quick delivery usually secures the order.

The lath market continues firm, with much speculation as to the course of prices later in the season when the new cut has to be reckoned with. At present the buyer must be content with whatever price is named. One firm is said to be splitting pickets into lath. In Toronto No. I white pine are retailing at $5.50.

All grades of shingles are stronger, the recent advance in B. C. red cedars having caused a stiffening in the white varieties. The spring trade also is responsible for more activity.

EASTERN CANADA.

The spruce branch of the Eastern lumber trade is in a very satisfactory condition from the standpoint of demand. There has all along been a ready market for United States stock and British buyers are now showing a strong disposition to contract for deals. If the logs should reach the mills in large quantities, there will doubtless be marked activity during the summer and fall months. Prices are quite firm. There has been a very encouraging recovery in the cedar shingle market. For Boston delivery the price of Extras has now reached $3.75 for the product of well-known manufacturers, but there are still some producers who are willing to contract for May delivery at $3.60. Clears are equally strong, being quoted at $3.10 to $3.20 on Boston freight rate.

UNITED STATES.

The lumber market of the United States looks good from every point of view. The figures of building operations for the month of March show an average gain of 54 per cent. in 27 cities over the same month of 1905, while 19 cities showing losses average but 38 per cent. The industries throughout the country are in a prosperous condition, and it appears that there will be a heavy consumption of lumber. When the light stocks are taken into consideration, there is no ground on which to base a prediction of lower prices. Much will depend, of course, upon the outcome of the harvest, and in this connection it may be said that the condition of the winter wheat is almost as good as last year, when there was a record crop. The White Pine Association of Buffalo and Tonawanda took no action last week towards advancing prices, although it was stated at the meeting that business was good and prospects for the season exceedingly bright. New York is still bidding for spruce and is also taking considerable hemlock, the delivery price of the latter being about $22. The hardwoods are moving a trifle more freely on account of an increased demand from the furniture manufacturers. The lath market is still attracting considerable attention. White pine recently brought $6 in Pittsburg, and hemlock almost

as much. Spruce lath are steady at the recent decline. For Boston delivery the price is about $4 to $4 25 for 1½ and $4.25 to 4.50 for 1⅝ inch for slab lath.

GREAT BRITAIN.

At the last public sale in London 3 x 11 inch white pine of third quality, from Montreal, brought £12 15s and £12 10s per standard of 1980 feet, while 3 x 9 inch unassorted Quebec spruce sold readily at £9 10s, Montreal thirds at £9 5s, and Breakey's Quebec thirds at £9 15s. The strength of the spruce situation is generally admitted and for future delivery prices rule about £8 5s per standard c.i.f. London and Liverpool. Some buyers, however, are inclined to adopt a reticent attitude until the position of the log drives in Eastern Canada is more definitely determined. Apparently they are of the opinion that if all the logs reach the mills prices may recede, but in view of the large market in the United States for Canadian spruce, there seems little prospect of lower prices being reached this year. There has arisen a brisk demand for American oak wagon scantling, prices of which have advanced sharply during the past month. Birch timber, on the other hand, is easier, arrivals from the Eastern Provinces having been quite large of late.

STOCKS AND PRICES.

There has been an unusually large cut of logs on the Canaan River, in New Brunswick, this season. West and White are said to have secured 12,000,000 feet between them.

I. R. Todd, of St. Stephen, N.B., has about 3,000 cords of poplar pulp wood to be shipped from Cole's Island and Pickett's Cove, N.B. The wood will go to Yarmouthville, Maine, but may not be shipped this summer on account of high freight rates.

D. D. Glasier & Sons estimate the quantity of loose logs of last year's cut in the St. John river, below Grand Falls, N.B., at 9,000,000 feet. These are expected to come down with the ice. Above Grand Falls there are said to be about 15,000,000 feet of last year's logs in the water.

The F.H. Watkins Lumber Company, 1 Madison avenue, New York, have arranged to handle 20,000,000 feet of Canadian spruce this year, about 12,000,000 of which will be supplied by the Trois Pistoles Pulp & Lumber Company, of Trois Pistoles, Que. They will also handle about 4,000,000 feet of New Brunswick white pine and some spruce lath.

A correspondent at North Bay, Ont., writes the CANADA LUMBERMAN as follows: "I can safely say that no logs of any consequence will be left in the woods in the district this season, but if the weather continues much longer as it is, it will take heavy rains to bring out the drives in small creeks. I am of the opinion that, compared with last year, the cut of pine was greater, and that of the other woods smaller."

Messrs. S. P. Musson, Son and Company refer to the Barbados lumber market as follows: The only arrival during the fortnight has been the schooner Marguerite, from Meteghan, N. S., to ourselves, with 100,000 feet of spruce and hemlock, for which we obtained $23 for shipping and $19 for second quality spruce, while we sold the small lot of hemlock at $18. These small arrivals have not affected the market to any great extent and further receipts of both white pine and spruce would bring about late prices. The schooner Marguerite brought down 10,000 Extra No. 1 cedar laying shingles, for which we obtained $1.67. Stocks of this description are very heavy and demand light on account of the prevailing dry weather.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN)

OTTAWA, April 20th, 1906.—An active market for lumber continues in the Ottawa Valley. The lumbermen who have just been visited by the British buyers report that these purchasers have wakened up to the necessity of paying high for the product of Canadian mills. About one-third of the lumber output of the Ottawa Valley has been sold for export across the Atlantic. Since the deal was disposed of in this way the demand for the stock which is bought by the United States has grown more active and prices are at the top notch. The prospects are that there will be no decline in quotations in the near future. While the prices are considered high, they do not compare with those of the Georgian Bay district and the adjacent states across the border. This condition is understood by the manufacturers of the Ottawa Valley to ensure a continuance of the present buoyancy of the trade. The competition from the West has had the effect in the past of keeping down local prices. It is believed that purchases of lumber in Ottawa at present rates are good holdings.

The quantity of lumber that will be manufactured in Ottawa the coming season will not be enough to meet the the usual demand for domestic and export trade. Ottawa manufacturers will have the whole local field to themselves, for the high prices in the west will keep the product of that district from coming east. Just now large quantities of lumber and lath are going from the Ottawa district to the western dealers.

Spruce is keeping very firm and sales are all at large advances on the ruling prices of a year ago. The usual quantity will be cut in the mills, which have begun the season's operations.

The lath trade is quieter than a fortnight ago. The high prices discouraged buyers and they are now waiting till the saw mills turn out some of the 1906 product. This year's output will not be ready for shipping, however, till about June. Prices for lath in the United States are keen enough, and the Ottawa manufacturers are selling at from $3.50 to $5.00 a thousand, the latter price being paid in very rare cases. The purchasers across the border are more aggressive than in local circles owing to the season there being more advanced. Loca manufacturers assert that lath prices may not go down, despite the new output of the mills. The stocks were never before so thouroughly cleaned out. The prospective demand is also better than last year, and it is possible a high scale of prices will be maintained till near the end of the season. Most all the western mills cutting lath have sold their output ahead at last year's highest prices, so that Ottawa fears little competition from that quarter. The purchasers are among the strongest firms and they will hold the lath till good prices are avialable.

L. P. Rider has retired from the lumber firm of White, Rider & Frost, North Tonawanda, N. Y., and the business will be continued under the name of White, Frost & White.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., April 20th, 1906. —The weather so far during April has been extremely cold and backward, a circumstance which has retarded the opening of the lumber manufacturing season in this section. The ice in the St. John is still strong and it will be at least a fortnight before the logs from even the nearby streams begin to arrive at the local mills.

The outlook for stream driving on the St. John, the Restigouche and Miramichi is spoken of as the most favorable for many years. The cold weather has prevented any wasting of the snow in the woods and when the warm weather comes the volume of water in the streams will be, it is confidently expected, sufficient to drive out both the logs which were cut in the winter just past and those which were hung up from the previous year. If a clean drive is made it is estimated that the total quantity of logs coming down the St. John River this year will be in the vicinity of 150,000,000 feet, of which the much greater part will be spruce.

The local feeling in regard to "English" spruce deals has shown a continuation of the firmness mentioned a month ago and at this date the prospect for the coming summer has the appearance of fully sustaining present values and with every probability of gaining ground. Shipments to Great Britain from St. John during the next two months will consist almost entirely of such parcels as come by rail from inland points. The total volume of these shipments will be far below the average for May and June. Local wharves are entirely clean of deals of all kinds.

That the begining of a period of stimulus in the "English" deal trade has arrived is generally believed and all indications lead to the conclusion that the prices available during the coming summer and fall will show a material advance on the average figures which prevailed last year.

For summer delivery a specification of "English" spruce deals containing say 50 per cent 7's and 8's, 35 per cent 9's and 15 per cent wides, could not be bought less than from $13.50 to $13.75 per M. sup feet, f.o.b. St. John.

For one inch spruce boards the outlook is very encouraging. Trade in this line has been somewhat draggy during the past two years, and local stocks have during that period augmented considerably. At this date about 500,000 sup. feet are to be seen on local wharves. Compared with an average price for some years of $10.00 per M feet, $11.00 to $11.25 is now asked for dutiable goods.

Freight rates on deals to the West Coast of Great Britain have been steadily weakening, and rock bottom has recently been reached, charters having been made at 35s per standard.

RED CEDAR SHINGLES.

The recent advance in the price of British Columbia red cedar shingles did not come as a surprise. Owing to the high cost of logs the manufacturers have found it absolutely necessary to advance prices in order to realize a margin of profit. We understand that some attempts have been made to break the market, but until there is a change in conditions this will not be easily accomplished. Considering the excellent quality of B.C. red cedar shingles and the consequent preference given to them by carpenters, the present price is none too high ; indeed, in comparison with other timber products, they might reasonably be expected to advance a little further.

The log supply is the key to the present situation. As the demand for logs increases, the scarcity of men for woods operations becomes more acute, and this is causing an advance in wages. Logs are now selling at $7, $8 and $10 delivered, and there appears to be no immediate relief. The log scale which went into effect on Puget Sound on March 26th fixed the following prices for merchantable logs, 27-inch top :

Up to 40 feet	$ 8.50
42 to 50 feet	9.00
52 to 60 feet	10.50
62 to 70 feet	12.00
72 to 80 feet	14.00
82 to 90 feet	16.00
92 to 100 feet	18.00

The E. H. Heaps Timber Company, the Paterson Timber Company and the British Columbia Flume Company are all actively at work in getting out logs, and will in the near future have a moderate supply on hand. These and more will be required if the present demand for shingles should continue, which now seems very probable.

Ontario is likely to consume more than an average quantity of red cedar shingles this year, as very extensive building operations are under way and the production of white pine shingles is annually decreasing. Buyers are looking to British Columbia for red cedars and to New Brunswick and the eastern part of Quebec for white cedars. Competition between these two sections of the Dominion promises to be more keen in the future, although at the present time but a very small quantity of New Brunswick shingles is coming into Ontario.

Red cedar shingles are higher in price in Washington than in British Columbia. Conditions at Seattle, Wash., are described as follows by the Mississippi Valley Lumberman:

As predicted last week, shingle prices have advanced on an average of nearly five cents on all grades. The rising market is attributed to the car shortage, which continues to be felt, particularly in the southwestern portion of the state, and the effect of the strikes and lockouts. At Ballard the mills are still closed and, while the manufacturers have announced a determination to begin next week with green crews, it is problematical with what degree of success. The shingle mill trouble alone has removed at least 30 per cent. of the daily supply of Stars from the market.

One of the most conservative men in the business here, in speaking of the market, said: "Stars are strong at the advance and the market all round is stiff. The car shortage continues to strengthen prices and while there is an opportunity for even better prices, I do not think a prediction to that effect would be justified."

CONDITIONS OF SALE.

No limit will be adjudged at less than the minimum price fixed by the department.

The limits will be adjudged to the highest bidder on payment of the purchase price, in cash or by cheque accepted by a duly incorporated bank.

Failing payment, they will be immediately re-offered for sale.

The annual ground rent of three dollars per mile is also payable immediately.

Those timber limits, when adjudged, will be subject to the provisions of all timber regulations now in force or which may be enacted hereafter.

Plans of limits offered for sale are open for inspection in the Department of Lands and Forests, in this city, and at the office of the Crown lands and timber agents in the different agencies in which said limits are situated, up to the day of sale.

N. B.—No account for publication of this notice will be recognized if such publication has not been expressly authorized by the department.

ADELARD TURGEON,
Minister of Lands and Forests

CURRENT TRADE CONDITIONS.

ONTARIO.

Favorable weather has permitted building operations to proceed without interruption and consequently there has been no cessation in the urgent demand for lumber. That the demand is urgent cannot be disputed, for everywhere the remark is heard that it is more difficult to find lumber than to secure orders. Notwithstanding that prices are high, a large percentage of the coming season's cut of white pine and hemlock has been contracted for. Prices of pine are from two to three dollars higher than one year ago, but excepting developments of a very unfavorable character, firmness is likely to characterize the market for months to come. Many consumers are waiting for the new cut of hemlock, and in Western Ontario there is quite a pronounced shortage. The buying of hardwoods is gradually becoming more persistent and dealers who have been carrying large stocks are getting them worked off. Basswood and birch are being substituted in some instances for woods which are less plentiful.

A few car loads of new lath have arrived in Toronto, almost green from the saw, but presumably for immediate use. The payment of the consequent heavy freight rate was justified, evidently, by the conditions.

EASTERN CANADA.

The strength of the spruce lumber market is shown by the fact that $13.50 per thousand feet has been paid for bank logs at St. John. If the situation were not strong, no such price could be obtained. It is only natural, however, to expect that this price, which has been paid for bank logs only, will decline as soon as the drives commence to reach the mills. American spruce deals are selling at $15.00 to $15.50 for 6 to 8 inch and $19.00 to $20.00 for 10 and 12 inch.

Spruce lath are weaker and can be secured on contract at $2.25 f.o.b. St. John. The improvement in cedar shingles has been maintained, but we have heard of no quotations above $3.75 for Extras on Boston freight rate.

UNITED STATES.

The lumber situation has not changed in favor of the consumer. The activity is more pronounced at some points than at others, but everywhere conditions are satisfactory. In Chicago many items of dimension are scarce, many yards being entirely out of 2 x 10 and 2 x 12, which are quoted at $27. No.4 and 5 boards are also very scarce and prices are at the highest ever known in that market. Building continues quite active. White pine culls have sold ot Marinette, Wis., at $17. Hemlock is in great demand. At Boston boards are worth $22 and a few sales have been made at $23. In the Saginaw Valley the price is $19 and $20 boards and $17 and $18 for ordinary dimension piece stuff. The hardwood market is in excellent condition and steadily expanding in various sections of the country. There is a disposition to expect an advance in the lower grades of hardwood, which are comparatively cheap. Birch is being utilized for low grade ship-lap and sheathing. Maple, birch and basswood are quite active in the Eastern States. The demand for shingles is increasing, while stocks are low. Lath are not quite as strong as they have been. No. 1 white pine are held in Chicago at $5.25 to $5.50, and No. 1 hemlock at $4.75.

GREAT BRITIAN.

Business in Great Britian continues to show signs of improvement, although building is not yet what might be called active. There is steady buying of lumber at current prices, as when the new shipments arrive they will doubtless he held at higher prices than dealers are now asking for lumber in stock. Pine deals which have lately arrived via United States shipping ports have been readily taken, and in some instances at advanced prices. The stock at all the leading ports is now so small that buyers are anxious to cover their requirements. Manchester has a very small stock of 3 x 7 inch spruce. Quebec logs are finding a ready sale owing to the market being almost bare of this class of timber.

STOCKS AND PRICES.

In Cleveland No. 1 white pine lath are selling at $5.75 and No. 2 at $5.25.

The log output of the Saskatchewan river, Alberta Territory, this spring will be the largest in its history.

F. E. Sayre, of Hartland, N.B., cut about 5,000,000 feet of logs on the Becaguimac river the past winter.

W. & A. McArthur, of Little Current, Ont., have about 25,000,000 feet of logs for this season's cut.

The Sun Wing Railway Company, of China, are understood to have placed an order with a British Columbia firm for 260,000 railroad ties.

The Sawyer-Goodman Company, of Marinette, Wis., have purchased 3,000,000 feet of pine lumber in the Georgian Bay district, which is expected to reach Marinette this week.

Embree & Thompson, of Oxford, N.S., have closed their season's business at Debeit, having taken out about 700,000 feet of logs. C. O. Black, also of Oxford, has a cut of 4,000,000 feet.

Elwood Burtt has started his mill at Burtt's Corner, N.B., and expects to cut 7,000,000 feet of lumber this year. The Scott Lumber Company, Fredericton, N.B , have also resumed operations.

Clairmonte, Man & Company say of the Barbados lumber market: White pine and spruce is in fair stock but the demand continues good. Last sales of white pine were at $27.76 per thousand feet for first quality and $20.76 for second quality; spruce, $23 for firsts and $19.60 for seconds. Last sales of Gaspe Long cedar shingles were at $4.26 to $4.37. A cargo of nearly 3,000,000 Cedar Laying sold at $1.50. No late sale of Spruce Laying.

Messrs. Cant & Kemp, of Glasgow, Scotland, say that the import of birch has been considerable and has been largely disposed of from the ship's side, although some of the later consignments, chiefly parcels of smaller wood, have found their way into store. The demand for large sized timber remains good and quotations are on a basis of 1s. 7d. per cubic foot string measure for 14 inch average. An extensive business has been done in planks, although the stock has been

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., April 24th, 1906.—Lack of labor is seriously handicapping operations in all branches of the lumber industry. Not only in the mills, but in the woods, is this condition felt, and there is hardly any prospect of immediate alleviation. Shingle prices are pretty stiff at the increased figure, owing to this and the continued scarcity of bolts. Though the fine weather has facilitated operations in the woods, bolts are still insufficient, and it is not unlikely that they may go a little higher. They are now $4.50. The possibility of another raise in the prices of the finished product is considered by all manufacturers.

Orders in the shingle business are coming mostly from the United States. "The prices there are better than in Canada", said a large local manufacturer this morning, "and nearly all the mills are cutting for the export trade. Business is fairly good in this branch of the industry."

The lack of labor condition also applies to the lumber branch. The mills might be said to be overwhelmed with orders, and local people find it difficult to secure what is required for immediate use.

The City Council of Vancouver have had to consider the necessity of giving orders to outside mills to get the lumber to lay three-plank walks, as they are behind in this work. No mill but what is cutting full time, with good business ahead. This applies not only to the domestic trade, but to the foreign as well. All subsidiary concerns are also operating full time, such as wood pipe works, and some of these have all the business they can attend to for some time ahead.

Prices continue good, and are very firm at the increased figures. Logs have not become more plentiful with the better weather, and it is not probable that the supply will be such for some months at least as to cause a drop in the cost.

Prosperity in the industry, which is marked after the depressing conditions of a year or so ago, is bringing American millmen to the coast, and there is continued talk of new establishments. Most of these are spoken of for Vancouver, though preparation is being made in the north for the business which will come when the G. T. P. and other railways will give access into new districts. Some of the wise ones are even looking ahead to the time when the Panama canal will have been opened, and greater facilities for export to the Eastern States will be provided. All this is giving a better value to timber limits, and choice holdings are commanding a good figure.

Mr. Mike King, the well known timberman, was one of those who had a narrow escape in the disaster at San Francisco. He was in the Lick hotel, and was wakened by the shock. Hearing a crash, he quickly drew the pillows and bed clothes over himself, and none too soon, as a portion of a brick chimney fell on his head. Had he not been shielded, he might have been killed, or at least injured so that he could not have escaped.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN)

ST. JOHN, N. B., April 26th, 1906. —Since last writing there has been considerable activity in local lumber manufacturing circles. Several mills have resumed sawing and the manner in which bank logs have been coming along leads to the hope that they will be able to continue until the logs from the up-river districts begin to arrive. In the meantime the demand for these bank logs is extremely brisk and as high as $13.50 per M for deal logs has been paid at St. John. Values in this line will drop to somewhere in the vicinity of $10.50 per M as soon as the up-river logs are close at hand.

The danger of the logs which have been hung up in the St. John River since last year running out with the ice has been somewhat dissipated owing to the fact that the ice in the river above Fredericton has melted gradually and is running out piecemeal instead of in a mass as was feared. Some half a million feet has already, it is estimated, run past the booms at Fredericton but these are being taken care of lower down the river. Considering the quantity of logs involved local interested parties consider themselves lucky. The Fredericton Boom Company are having the booms at their rafting works swung with all possible dispatch and ina day or two, it is expected, rafting operations will be in full swing.

Since last mentioned the spruce lath market in the United States has shown no sign of stiffening; rather the inclination seems to be in the opposite direction. Large receipts and a tendency to wait on the part of buyers as long as possible, in the hope of a more favorable schedule, has taken away the stimulus necessary to support the high figures which have been prevalent. An inquirer would be quoted on dutiable stock for June delivery $2.25 to $3.30 per M f.o.b. St. John and on non-dutiable $2.50 to $2.55 per M.

The spruce deal market in the United States continues in a flourishing condition and all indications lead to the conclusion that dealers have accepted the present prices as a sign that values in this line have reached a higher level. While it is felt that there may be a certain amount of fluctuation, the opinion seems to be deeply-rooted that the prices available at present are not so unnatural or phenomenal as at

first sight they would appear and that the normal figure today is considerably higher than before the recent boom in prices. An inquiry for "American" spruce deals of any of the local manufacturers would result in quotations closely resembling the following:

10's and 12's, $19.50 to $20.00; 9 inch, $17.50 to $18.00; 6's and 8's, $15.00 to $15.50 (f.o.b. St. John.)

Freight rates to the United States by schooner have stiffened during the last few weeks. The prevailing rates are now as follows:

New York City: Long lumber $3.50, lath 70 cents.

Boston: Long lumber $2.75, shingles 27-1/2 cents.

KLOCK BROS' OPERATIONS.

Messrs. Klock Bros., who own a large and valuable area of pine and spruce timber limits at the head waters of the Rouge River and N. E. Branch of the Lievre, have put in supplies this winter for next seasons' operations. It is their intention to take out a raft of waney and square pine and float same to L'Annonciation, where it will be loaded on the C.P.R. cars and conveyed to Montreal or Quebec for export. We understand that overtures have been made by timber merchants for the purchase of the cut, but so far we have not learned of any contract being closed. This will be the first raft for many years on the Upper Rouge.

The Rouge is an excellent river for driving and no difficulty is anticipated in the floating of the timber.

Messrs Klocks have cut a fine road of about 23 miles from the Eddy Manufacturing Company's camps near the Butte River, and it is now considered that this is the best route to travel to reach the Manouan and the surrounding country, which will shortly be traversed by the Transcontinental Railway.

We offer this valuable property at a great bargain. Address THE ONTARIO LUMBER COMPANY, Limited, Rooms 35 and 36, Home Life Building, Toronto, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

This week finds the condition of the lumber market but little changed, the remarkable strength which it has exhibited for many weeks past being still in evidence. The stock lists sent out by the different manufacturers show, better than anything else, the extent to which the old cut of lumber has passed out of first hands. This, combined with active building operations, is largely responsible for the present high prices. The demand has been running to the lower grades of pine to such an extent that mill culls are entirely out of the market and in the Ottawa Valley they have advanced to a new high point. While confidence is shown in most directions, there also seems to be some uncertainty as to the future course of prices. The argument is advanced that there is no probability of a higher range being reached and that it is dangerous to stock up heavily at prevailing prices. There is no doubt, however, that most of the manufacturers who make a practice of selling their cut in advance have already done so, and others have pledged their stock to their regular customers. It would seem to be a question, therefore, as to the extent to which the lumber has passed into the hands of parties who are able to keep the market up. There has of late been some very good buying of hardwoods but prices continue about stationary. Lath has been largely contracted for in advance. A dealer who visited a number of mills in Western Ontario states that he fouud but one manufacturer who had not placed his cut under contract.

EASTERN CANADA.

The retail lumber dealers at Montreal are exceptionally busy on account of the activity in building, the present outlook being that the expenditure in that direction will show a substantial increase over last year. Dry lumber is scarce and prices very firm. Conditions throughout the whole of Eastern Canada are very favorable. While log driving on the head waters of the St. John River has only commenced, recent rains have caused the water to rise considerably and the drives are starting off with good prospects of reaching the mills. All the lumber manufactured seems

likely to find a market. New Brunswick cedar shingles are selling quite freely around $3.70 for extras, Boston delivery.

The Longshoremen's Association at St. John has demanded 40 cents an hour for loading deals during the summer, while the shippers have refused to pay more than 35 cents. A deadlock exists, although the shippers say they can get all the men they want.

WESTERN CANADA.

Extensive building operations throughout Western Canada is creating a large demand for lumber and the mills are now operating to their full capacity to meet the requirements. It is improbable, however, that any decided shortage will develop, as the mills now in operation and under construction represent a very large output. The improved conditions in both local and export trade may bring about a further advance in prices unless the log market should become easier.

Genelle Bros., of the Yale-Columbia Lumber Company, have just let the contract to ranchers for cutting 10,000,000 feet of logs on a branch of the Kettle river. This company have also two camps at Westbridge, which will cut about 8,000,000 feet. Other concerns in the Mountain district of British Columbia are conducting equally active operations.

UNITED STATES.

The shipping of lumber by vessel is now quite active, and Buffalo, Tonawanda, Cleveland, Bay City and Saginaw are receiving considerable quantities from Ontario. The abnormal demand during the winter and early spring left the stocks in wholesale yards somewhat broken. There is a very liberal demand for white pine, but for the first time this year the report is heard that the market is a little easier. Whether this is an actual condition, or whether it has been inspired by certain dealers who are short of stock and anxious to bring prices down for the purpose of buying, cannot be definitely determined at the moment. There is no doubt that prices are high, but until there is falling off in the demand and a greater accumulation of lumber than at present exists, it will be difficult to induce holders to part with their stock at prices under those now existing. An indication of strength is shown by the prices fixed for stray logs by the Lumbermen's Board of Trade of Stillwater, Minn., which are as follows: Logs under 50 feet, $12.00; over 50 feet and not exceeding 100, $15.00; over 100 feet and under 150 feet, $18.00; larger logs, $20.00 a thousand feet. Pine piece stuff is exceptionally firm. Hardwoods are improving. In the Saginaw Valley elm, basswood and birch are active. Thick ash is scarce.

GREAT BRITAIN.

Although the demand for lumber in Great Britain is still somewhat restricted, inquiries are becoming more numerous and gradually consumers are being educated up to the changed basis of values. Considerably more business would no doubt result were it not for the difference in the prices now asked as compared with those ruling one year ago. The trade generally seems to be expecting a light import of Canadian pine this year. Representatives of spruce shippers are asking £8 10s to £8 15s for first-class specifications, and from £8 5s to £8 7s 6d for lower qualities. Waney pine is very firm and it is said that several importers who are in the market for a considerable quantity have not been able to obtain their requirements.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.)

OTTAWA, May 4, 1906.—There is a very active demand in the Ottawa Valley for pine. Pine mill culls are sought for in such large quantities by local buyers that the prices have jumped two or three dollars a thousand in the last fortnight. Scarcely any of this class of lumber is now selling less than ten dollars per M. Hemlock is almost impossible to get and is being purchased only in odd car lots and it looks as if there would be a small output this season. Owing to the small quantity of ash cut last year the manufacturers are becoming alarmed lest their stock will run short before the season is over. The sales are chiefly to the Canadian trade and much of the wood is used in carriage manufacture. All the available elm is picked up quickly.

Spruce is reported plentiful and the demand for it is quieter than for any of the other lines of lumber sold in the Ottawa Valley.

Dealers are optimistic about the basswood trade this year. There is a keen demand in the Ottawa Valley and the prospect is that it will continue during the season. It is believed the trade in this line will afford a striking contrast with 1905, when there was a sharp slump in basswood.

Birch is being eagerly looked for and buyers are willing to pay more than the prices which ruled this time a year ago. Birch is rather scarce. The wholesale dealers are learning that the hauling season of last winter resulted in a large quantity of logs being left in the woods.

While the lumber manufacturers report an upward tendency in the price of their output, they assert that there is little increase in the net profit for them. Every year the cost of getting logs to the mills increases substantially on account of higher wages, and the operations in the woods are said to be 50 per cent. more expensive than they were ten years ago. Each year good trees become less available and the hauling is growing to be a

THE McLENNAN LUMBER CO. LIMITED, MONTREAL, QUE.

bigger problem. Shanty supplies, including food, are more costly and on the whole very much larger sums are expended by the lumbermen during the winters than a decade ago. At the present time there is a search for river drivers in Ottawa and wages range from $2.50 to $4.00 per day, the latter figure being paid for men to go to British Columbia.

Mr. David McNicoll, general manager of the Canadian Pacific Railway Company, who was in Ottawa the other day, said his company found it very difficult to get large timber. The C.P.R. requires this stock for car building, and owing to the difficulty of procuring the proper kind of lumber the Montreal shops have recently been closed for brief periods. The company just now are procuring their lumber in British Columbia, and Mr. McNicoll reports that the demand in that province is so keen that it is not easy to get supplies for the east. There is such activity in car building in the United States, says the general manager, that it is no longer possible to get lumber in the south. The lumber from British Columbia is being rushed across the continent with the greatest speed, for the C.P.R. shops are turning out an average of $100,000 worth of cars per week. The Grand Trunk Pacific and other railways have similar experience in getting timber for car building and the demand is likely to last owing to the great scarcity of cars in the country.

It is feared that low water will affect the drives in the Ottawa river. The nature of the March and April weather permitted the usual spring thaw to pass off without creating the freshets that help lumbermen to get out their logs. Unless exceptionally heavy rain comes the situation will be quite serious. The logs are still nearly all in the creeks and the ice is rapidly going from the swamps. Lumbermen estimate that the water is very much lower in the chief streams than it was a year ago. At all points the drives are started but are not making much progress, for the ice is still an obstruction at some places. Mr. J. R. Booth has logs coming in from the Black river on the Quebec side and on his farthest limit at Sturgeon Falls the log drivers are very active.

Though there is an exceedingly strong demand for lath, it is not probable the Ottawa mills will produce any more than last year. No new lath machines are being installed. The equipment in the mills is just about equal to handling the refuse from the saws which is set apart for that purpose. The highest manufacturer's price at the present time for lath is $4.50 a rhousand and this is paid only in rare cases.

The price for railway ties shows an upward tendency. The Booth mill will make the usual quantity this season from cedar and tamarac brought to the mill by rail. The output is eagerly sought for new railway lines and repairs. Before the sale of the Canada Atlantic Railway to the Grand Trunk, the Booth firm disposed of its ties to the Canada Atlantic, but now the output goes into the general market. The prospective large purchases of ties for the Grand Trunk Pacific has not yet affected the trade.

Lath are still selling in Chicago at $5.25 to $5.50 for No. 1 white pine and $4.75 for No. 2.

STOCKS AND PRICES.

P. G. Mahoney, of Melrose, N. B., expects to ship between five and six million feet of lumber from along the N.B. & P.E.I. Railway, about two millions of which was held over from last year. This will be in addition to a cut of several million feet at Bathurst.

The Charlton Sawmill Company, of Collingwood, Ont., have purchased a half interest in 6,000,000 feet of logs taken out the past winter by Burton Bros., of Barrie. The logs are expected to reach Collingwood this week, when the mill there will resume operations.

Chicago quotations on hemlock are as follows: 2 x 4, 12 and 14 foot, $20; 16 foot, $21; 18 foot, $23; 2 x 6, 10, 12 and 14 foot, $19.50; 16 foot, $21; 18 foot, $21.50; 2 x 8 and 2 x 10, 12 and 14 foot, $20; 16 foot, $21; 18 foot, $23; 2 x 12, 10, 12 and 14 foot, $21.50; 16 foot, $22; 18 foot,

The first vessel to reach the Saginaw river with lumber this season was the "Maine," from Parry Sound, Ont., with 267,626 feet. The schooner "G. K. Jackson" also arrived last week from Parry Sound with 533,154 feet of lumber and 106,400 lath; the schooner "J. L. Ketchum" from Little Current with 465,979 feet; the steamer "Ogemaw" from Algoma Mills with 504,673 feet; the schooner "Katie Brainard" from Algoma Mills with 461,963 feet of lumber and 24,000 lath, and the schooner "C. J. Filmore" from Thessalon with 499,125 feet of lumber and 100,000 lath.

SUSPENSION OF LUMBER DUTY.

The United States Congress have suspended the duty on lumber intended for use in the rebuilding of San Francisco. The resolution bringing this about reads as follows:

"Whereas, in view of the fact that there is a shortage in structural steel and other building material in this country to meet the needs of the people of San Francisco and other California cities destroyed or damaged by earthquake shocks on April 19th and in the conflagration that followed, and that everything should be done to facilitate the reconstruction of the stricken cities; therefore, be it resolved that the duty on structural steel and other necessary material intended for use in buildings to be constructed in said cities be and it is hereby declared to be suspended for the period of one year." The above resolution will mean something to the lumbermen of British Columbia. Many of the mills, however, have already placed under contract their output for months to come and will consequently not be in a position to take full advantage of the situation. Present indications are that the large domestic and foreign demand will cause a further advance in the price of British Columbia lumber.

All payments in cash. References given and required. Address, X.Y.Z., TIMBER TRADES JOURNAL OFFICE, 164 Aldersgate Street, London England

CURRENT TRADE CONDITIONS.

ONTARIO.

The supply of dry lumber is rapidly diminishing and will soon have disappeared from the market entirely. It is now largely in the hands of dealers, who are endeavoring to so manipulate it as to supply the requirements of their customers until the new cut is ready. In a few instances, where the specifications have been difficult to meet, still higher prices have been obtained, but the market as a whole is no stronger than last month. Speculation pertains entirely to the new cut, and opinions are divided as to the effect of the general resumption of sawing operations which will occur very shortly. It is true that the demand is excellent and that a large percentage of the season's production has already passed out of first hands, but it usually happens that during the summer period the buyer is able to find plenty of stock to purchase. This will probably be the case this year if most of the logs reach the mills. Hardwoods are firm at the advance, with no further rise anticipated for the present. The supply is plentiful, but as the input of logs was light, the conditions are likely to be more favorable for the hardwood manufacturer later in the year.

EASTERN CANADA.

The outlook for the lumber trade for Eastern Canada has been improved by recent heavy rains, which

are likely to give quite an impetus to stream driving operations. The bulk of the 15,000,000 feet of logs hung up in the St. John river above Grand Falls have now reached the booms and will be available for sawing. Bank logs are selling at $12 per thousand for merchantable spruce, $9 for battens, and $6 for hemlock. There is very little dry spruce lumber for sale and the mills are refusing orders daily, so that the prospects for the coming season are exceptionally bright. New Brunswick cedar shingles are selling around $3.70 for Boston delivery. A few sales have been made at $3.75, but so far as can be learned there has been no advance on this quotation.

WESTERN CANADA.

The lumber trade of Western Canada continues quite active, with an increased retail demand. The mills have more business than they can handle, as is evidenced by another advance last week in the price of rough lumber at Vancouver, bringing it up to $15. Owing to the high cost of logs, there must be a very small margin of profit even at this figure, and a further advance is not improbable. The shingle market is steady. An event of considerable market interest was the conference of shingle manufacturers held at Seattle, Wash., last week, at which seven representatives of British Columbia mills were present. At this conference it was agreed, in order to prevent the periodical demoralization of the shingle market, to close down the shingle mill for ninety days during the coming winter.

UNITED STATES.

The settlement of the labor difficulties in the coal mining districts and on the Great Lakes has removed the fear of any serious labor troubles in the United States this spring and has consequently improved the lumber outlook to some extent. The market has maintained its firm tone remarkably well considering that new stock is rapidly getting into shipping condition and that this is the season of the year when price recessions may be expected. In the Duluth district offerings of No. 4 and 5 pine boards are said to have been made at a slight decline from the high point, but this is no indication of general weakness.

The cargo shipments from Duluth between April 20th and May 7th were 30,000,000 feet, which is the heaviest movement ever witnessed from that point in the same period. All grades of pine used in building are in active demand in the Eastern States. The Pennsylvania producers of hemlock have made another advance of 50 cents on all lengths but the 14 foot. Hardwoods are moving satistactorily, although certain intereats are said to be holding orders back in the hope that when the larger quantities of stock come on the market they will be able to purchase to better advantage. Sales of basswood are being made at $28 for firsts and seconds, $18 for common, and $21 to $23 for log run, at mill points. Log run soft elm is being sold at $20 at the mill. There is a good demand for birch and maple.

GREAT BRITAIN.

Several representatives of Quebec shippers haverecently returned from Great Britain and give a very favorable report of the lumber market. While there is a disposition in some quarters to doubt the maintenance of present prices, this is having no effect on shippers and buyers invariably are meeting the market in the case of pine and spruce deals and waney timber. For ordinary spruce, with 50 per cent. 7 and 8 inch, the price is about £8 5s per standard of 1,980 feet. Considerable limes have been placed during the past month, but several merchants have not yet covered their requirements. Whether they will be able to buy to better advantage is a question, but present indications are not in their favor. Birch logs and planks have arrived quite freely of late and prices are a little easier. Importers are discouraging consignment stock, as the demand for birch is not sufficiently strong to keep prices even where they are under such a condition. The stock of birch logs at Liverpool is 81,000 cubic feet, as compared with 47,000 feet at same time in 1905 and 64,000 feet in 1904.

STOCKS AND PRICES.

The following are ruling quotations for hemlock at Detroit, Mich.: Piece stuff—12 foot, 2 x 4 to 2 x 12, $23. 12 foot 4 x 4, 4 x 6, and 6 x 8, $23; 18 and 20 foot, $27; 22 foot, 2 x 4 to 2 x 12, $29; 24 foot, 4 x 4, 4 x 6, 6 x 6 and 6 x 8, $30; 26 foot, 2 x 4 to 2 x 12, $31. Boards—6-inch merchantable, 10 to 16 foot, $23; 8 and 10 inch merchantable, 10 to 18 foot, $23; 12 inch, $26; roof boards, $16.

Under date of April 28th, Messrs. S. P. Musson Son, & Co. say of the Barbados markett: There have been no arrivals since our last, and as the demand for all descriptions of lumber is always good at this season, stocks of both white pine and spruce are being used up and there is a good opening for one or two cargoes of both kinds, which should easily bring late quotations. The schooner "Evolution" from Halifax arrived a few days ago with 1,700,000 Cedar Laying shingles, which have not yet been sold. The market is heavily stocked with all descriptions and the demand has been abnormally light.

Harry Burns, of Fredericton, N. B., has a portable mill on the Henry Cockburn limits, where he has sawn 400,000 feet of hemlock boards, which have been sold to the Alexander Gibson Railway & Manufacturing Company at about $11 per thousand.

BRITISH COLUMBIA LETTER.

(Correspondence of the CANADA LUMBERMAN.)

VANCOUVER, B. C., May 7th, 1906.—An important conference of shingle manufacturers was held in Seattle on Friday and Saturday, 4th and 5th instant, which was attended by representative men from this city. These were Messrs. E.H. Heaps, J.G. Woods, James McNair, Robert McNair, Thomas Kirkpatrick, H. H. Spicer and R. H. H. Alexander, secretary of the B.C. Lumber and Shingle Manufacturers' Association. Matters of trade interest were discussed, the most important action decided upon being a 90-day shut down next winter, beginning with December 1st. This was practically agreed to by the manufacturers from Vancouver.

"The meeting was a very successful one," said Mr. James McNair, "and the combination mills showed more of an inclination to co-operate with us in curtailing the output. The most favorable conditions do not obtain in the shingle industry at present. Bolts are high, at $4.40 to $4.75, and the labor market is restless. There is a lot of railway construction and other work going on and men are in demand. The fine weather has not brought a plentiful supply of bolts, and though we operate camps of our own, I often doubt if it is the most profitable method. The price for XXX is $1.95. Some of the product is being shipped to the States, but the major portion goes to the Canadian market."

All is bustle in the lumber part of the industry. The shortage of logs has prevented mills from working much overtime to enable them to catch up with behind orders, and all of the plants are busy. On top of it all comes the announcement of the partial abrogation of the duty on lumber, insofar as it affects San Francisco, and arrangements are being made to charter boats for this trade. An instance of what business is offering is in the withdrawal from the Northwest of the travellers of the Bowman Lumber Company. That concern has all it can attend to this summer, and has called off its trade solicitors. The Yale-Columbia Lumber Company, of Cascade, B.C., is to operate four mills this summer, and has already enough orders for nearly its entire output. J. Williams, of Seattle, offered an order for a million feet of lumber, to be shipped to Nome, to the Nanaimo Lumber Company, but it could not be taken.

Prices were advanced another dollar on Thursday last. Rough lumber is now quoted at $15. "It will probably go even higher," said a millman this morning. "With logs quoted at $8, $10 and $13, with no prospect of a reduction in price, I cannot see how rough lumber can be sold profitably at less than $17."

The Nanaimo Lumber Company is filling an order for the C.P.R. for lumber for passenger coaches. It is being shipped to Montreal and is all 60 feet in length, of various sizes. The material is intended for some of the new cars, which are to be the most handsome yet turned out by that railway company.

THE GLASGOW MARKET.

The following review of the Glasgow market is abstracted from Edmiston & Mitchells' monthly timber circular of April 30th :

The consumption of pine goods continues to be disappointingly small, and though the stock of deals is now reduced to a comparatively low point, that of sidings is somewhat large, in view of the almost immediate opening of the Quebec season. No doubt the bulk of these are not of specially good quality, but until they are got quit of they will have a depressing effect on the market. The position of spruce, which a month ago showed evidence of weakening under the pressure of ex quay selling, has firmed up again, with every prospect of prices being maintained, as both the stock on hand and the import are alike meagre.

Birch logs have been arriving too freely both from Quebec and the lower ports, and as a consequence a number of the recently arrived shipments have gone into store. The import of birch logs into Glasgow for the years 1904 and 1905 amounted to 4500 loads altogether, whereas the import for the first four months of this year is nearly 4000 loads already. If shipments continue on the same scale any longer, birch will reach the unsaleable stage shortly.

As to the future of the market generally, the determining factor as regards prices will be the extent of the import during the summer, and granted that it is moderate, as is generally anticipated will be the case, values are pretty certain to be well maintained.

Scottish shipbuilders launched during April 32 vessels of 39,627 tons, of which 18 of 31,657 tons were built in Clyde yards. The Clyde total for the first four months of this year is about 20,000 tons more than for the same period in 1905, but while this is so far satisfactory, there is a regrettable absence of fresh orders being placed. The amount of new work placed since the year began is unfortunately far below the tonnage launched.

WHITE PINE.—There has been no import during the month, and the movement from stock has been on a small scale. Prices keep firm and stocks are moderate.

OAK.—There are some good enquiries in the market, and deliveries from stock have been fairly good. Stock of first class is small, but of second class timber ample. Prices are firmer.

ELM.—The demand has been quiet during the month, but a few transactions are reported in second quality timber. First class rock is scarce, and early imports should meet a ready market at good prices.

QUEBEC BIRCH.—The import for

CACHE BAY, Ont.
C. P. R. 26 miles West North ay

April amounted to about 1350 logs, some of which formed deliveries against contracts, but the bulk of it was consigned. The position of the market is not at all satisfactory, as all the principal birch buyers are well supplied for months ahead, and any pressure to make sales will cause a sharp drop in values. Recent shipments are finding their way into store, which is by no means a favorable symptom so early in the season.

Lower Port Birch.—The import for April is about 1500 logs, mostly 14 to 15 inch average, about two-thirds of which were disposed of from the ship's side and the balance stored. Prices are decidedly easier than they were, the supplies having, so far as the year has gone, considerably exceeded the demand.

Birch Plank.—The April import amounted to about 400 standards, and was mostly disposed of ex quay. Prices have ranged from £7 15s. to £8 5s. ex quay.

ASH.—A few very small shipments have come to hand during the month, and were sold at fair prices considering the quality which in most cases was very middling. Prime logs, 15 to 16 inch average, are asked for, and a few consignments of such would meet with prompt sale.

DEALS, &C.—The import during the month has been a small one, consisting chiefly of spruce deals and pine sidings. The spruce has met with a ready sale ex quay, but the bulk of the sidings have had to be stored. Prices continue firm. Current values are as under :—

Broad First Pine Deals.—£33 to £35 ; 11-inch, £30 to £32 ; ends and non-dimensions, £23 to £25 10s.

Second Pine Deals.—11-inch and up, £20 to £22 ; ends and non-dimensions, £14 to £15.

Third Pine Deals.—11-inch and up, £12 to £14 ; ends and non-dimensions, £10 to £10 10s.

Red Pine Deals.—9 and 11 inch, £9 10s. to £10 10s.; narrows, £8 to £9.

Address GARDNER BROS. & Co., Walkerville, Ont

Timber Limit

FOR SALE

Fifty square miles in the Swan River District, Province of Manitoba. Apply to

HERBERT MATTHEWS,
41 and 42 Merchants' Bank Building,
Winnipeg, Man.

STOCK COOPERAGE STOCK.

The following are ruling prices at Buffalo for slack cooperage stock:

STAVES.—No. 1 elm flour barrel, $9.00 to $9.50; No. 2 elm barrel, $5.50 to $6.00; Mill run hardwood staves, $6.50 to $7.00. HEADING.—No. 1 basswood, 5¾ to 9¼; No. 2 basswood, 4 to 4½; Mill run hardwood, 5 to 5½.

CURRENT TRADE CONDITIONS.

ONTARIO.

The only complaint that is heard about the lumber market is the difficulty of finding dry stock. The stringency will soon be relieved, however, but it will be some time before the mills will be able to dispose of the numerous orders on their books and which have been accumulating for many weeks. United States buyers have this spring been more numerous than ever, and this competition is helping to keep prices firm. There is no doubt that the pine and hemlock situation is very strong and that there is an urgent and wide-spread demand which is by no means confined to Canada. There may be a lull in the retail trade during the summer months, but this will not affect the manufacturers, who have already sold much of their output. Our Ottawa prices this week show advances in good pine strips and several of the lower grades, a most unusual occurrence at this time of the year. The strength of the market is clearly shown by a recent quotation given by an Ottawa valley manufacturer of $19 for No. 1 mill culls ten inches wide. Conditions in hardwoods are seasonable, with a more general movement of basswood than has been witnessed for some time.

EASTERN CANADA.

The progress made by the log drives is being watched by lumbermen with keen interest, as the course of lumber prices will depend very largely upon this question. The outlook at present is very favorable, and it appears that not only the logs cut last winter, but in addition those which were hung up the previous season, are likely to reach the mills and be available for sawing. Prospective buyers argue that the larger production of lumber will have a tendency to weaken prices, but manufacturers contend that values are already low and that all the lumber manufactured will easily find a market. With the heavy demand from the United States and the improved conditions in Great Britain, there is not likely to be an accumulation of stock at the mills this year. The deal market is firmer, average specifications bringing $14 f.o.b. St. John, N. B. There is no change in cedar shingles,

although the offerings appear to be more liberal.

UNITED STATES.

The demand for white pine lumber is not quite so pronounced as it was one month ago, which may be due to the fact that farmers have been engaged in spring seeding. The situation as a whole, however, is very encouraging to holders of stock. The iron and steel industry is prosperous, building is active, and the winter wheat prospects have seldom been better. There is little disposition to advance prices of lumber, as such action might restrict the consumption and bring about a reaction in values later in the season, when the supply becomes more plentiful. Present prices give the manufacturers of white pine, hemlock and spruce a fair profit. Hardwoods could advance somewhat without being considered too high, and it is probable that during this year some appreciation will take place. Wisconsin manufacturers report a steady improvement in the demand. No. 1 and 2 common basswood are probably the best sellers, but birch, soft elm and maple are moving.

The new supply of pine lath is being absorbed without causing a decline in prices as was predicted. No. 1 pine lath is selling in Saginaw, Mich., at $5.50 and hemlock at $4.75. Spruce lath in the Eastern States is a little weaker, Boston quotations being $4.25 for 1⅝ inch and $4 for 1½ inch.

GREAT BRITAIN.

The British lumber market still lacks buoyancy and the demand does not show as much activity as many would like to see. It is steadily improving, however, as is shown by the following remarks by Messrs. Churchill & Sim, who have had a wide experience in the London trade. After making an exception of deals in the lower qualities, both redwood and whitewood, the firm add :—"It is becoming daily more evident that practically all other sizes and classes of wood must gradually appreciate in price as the year draws on, and that the supplies will be barely sufficient to meet the most moderate estimates of what will be required."

The duration of supply at London at the present rate of consumption is shorter than it has been since 1900. For deals and battens in the aggregate, the duration is only 1.97 months, as against 2.54 last year; for boards 3.47, against 3.68 in 1905; and for floorings 2.94, against 3.35 last year. Stocks of 7 x 3 inch and 7 x 2½ inch spruce at Manchester are extremely low and prices firmer than ever and the same may be said of nearly all other lumber. It is to be doubted if there is a fair specification of 3 x 9 and 11in. spruce in stock at any of the larger ports on the West Coast. There is, generally speaking, a good stock of 3 x 8. This latter size is not being so freely used as it was formerly. Birch is in a weaker position than any other Canadian wood on account of the closing down of the tin plate mills in South Wales, where it is used extensively for box-making.

STOCKS AND PRICES.

It is estimated that over 50,000,000 feet of logs are already in the booms at Fredericton, N. B., about 50 per cent. of these being new logs.

The timber stocks of W. Southern & Sons, builders, Salford, Eng., were sold at auction at Manchester recently, when Canadian lumber brought the following prices: Spruce 3 to 4 by 7 to 11 fetched £8 10s., 3 by 7 £9 5s., 3 by 7 to 11, £10 and £9 12s. 6d., 3 by 6 and 7 £8 7s. 6d.; spruce battens 2½ by 7, £8 15s.

Yard prices for lumber, etc., at Detroit are as follows: White pine, 1 x 4, No. 4, $23; 1 x 12, No. 4, $28; 1 x 4 to 1 x 10, No. 2, $25; 1 x 12, No. 2, $38; 2 x 4 to 2 x 8, No. 2, rough or worked, $35; No. 1 white pine lath, $5.50; No. 2, $5; No. 1 Norway, $5; No. 1 hemlock, $5; No. 2 hemlock, $4.50; 18 inch XXXX white pine shingles, $4.50; C. B. white pine shingles, $3.25.

The cut of logs on the Little river, Sunbury County, N. B., the past winter was 4,500,000 feet, all for the Cushing Sulphite Fibre Company, of St. John. On the Newcastle stream A. McNutt Thorutt, of Newcastle, took out about 800,000 feet, which will be sold to St. John parties. Peter Jeffrey has 400,000 feet, which will go to the Sayer & Holly mill at Chipman. J. O. Miller's cut of 400,000 feet will be manufactured at his own mill. On the Oromocto river Smith Bros., of Blissville, will have about 4,000,000 feet of lumber to manufacture.

MOUNTAIN LUMBER MANUFACTURERS ASSOCIATION.

A meeting of the Mountain Lumber Manufacturers' Association was held at Calgary, Alta., May 10th. Twenty-five members were present, representing practically all the large firms in British Columbia east of the coast. After a full discussion of the situation, it was decided to make an all-round advance on lumber of about $1 per thousand. Mr. G. P. Wells, Secretary of the Association, points out that the demand for lumber is out of proportion to the visible supply and that the manufacturers would have been justified in making the advance greater than they did. It was shown at the meeting that there had been a great rise within a year in the cost of labor and supplies and that the cost of production had been increased very much. Another matter discussed was the adoption of a uniform system of grading. It is proposed to have standard rules and to appoint an inspector to see that these rules are maintained.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N.B., May 18th, 1906. —The attention of the local lumber people is just now fixed upon the driving of the logs. So far, the season in this regard has been all that could be desired and excellent work has been done and is being done at the head of the St. John. Day by day reports are coming in of large and important drives having reached safe water and it is expected and hoped that a clean drive will be made. The freshet on the St. John has been somewhat higher than usual, is still gaining a little and the indications are that a sufficient volume of water for driving purposes will be available for a considerable period. On the Restigouche and Miramichi equally favorable conditions prevail and reports from those directions tell of a quick and thorough driving.

Since last mentioned the "English" spruce deal trade has shown no marked change, although local prices seem to have a tendency toward firmness and the ideas of local interested parties in this regard are slightly higher than was the case a month ago. This circumstance is probably chiefly due to the optimistic opinions expressed on all sides, opinions which indications seem to fully justify and which, so far during the season, events have shown to be correct. It is doubtful if the local output of "English" will be, all things considered, so much greater this year than was the case last year. With the mills just fairly started, the season of manufacturing has already been curtailed by six weeks. While the danger of scarcity of logs bids fair to be removed, it is by no means a certainty—last year several millions of logs hung in the St. John River many miles below the point which is usually considered the beginning of safe water. Another circumstance which has a direct influence upon the output of "English" deals is the strong values prevalent in the American market, in view of which it is safe to say that local American manufacturers will have their mills saw for the English market only when scarcity of American logs renders it unavoidable.

Local stocks of "English" are augmenting very slowly and it will be, at the earliest, July 1st before any important quantity will be ready for shipment from this port.

At this date an inquirer for "English" spruce deals would be quoted $13.75 to $14 per thousand superficial feet, f. o. b. St. John, on a specification containing 50 per cent. 7's and 8's, 35 per cent. 9's and 15 per cent. 11's and wides, ⅔ price for fourths and ends.

Freight rates to the West Coast are quoted at 35s per standard and show little indication of firmer figures materializing in the immediate future, although it is probable that August or September will see an advance; to what extent it is somewhat early to say.

NEW BRUNSWICK LOG DRIVES.

A dispatch from Fredericton, N.B., dated May 18, says: Favorable reports continue to come to hand from the drives on the head-waters of the St. John river, and it is quite likely that most of the logs will be in safe water very shortly. The continued fine weather is causing the water in the river to fall quite rapidly, it having gone down over a foot in the last three days.

The following reports received over Western Union wires indicate the condition of affairs at other points.

Edmunston — River fell about three inches, logs running, cold weather.

Woodstock — Water fell about four or five inches, few logs running, fine and warm.

Boiestown—Weather fine water about the same, everything favorable here.

Word comes from the Lepreaux to the effect that Cornelius Hagerman is having a serious time with Gregory & Dunn's drive of about three million feet on the Lepreaux river. He started operations about April 20th, but had to drive two lakes which handicapped him greatly. In one of these lakes he was compelled to abandon four thousand pieces. He is now working on the main river but the water is falling fast and he will have trouble getting the drive out.

A gentleman who came down from up river yesterday reports that the St. John Lumber Company are holding about twenty-five million feet of logs in their booms at Van-Buren and Grand Isle. The bulk of them belong to down river operators and will be held until the company gets through sorting.

A telegram from Boiestown states that the drives on Rocky Brook, the Sisters and Cain's river are all in. The driving conditions in that section were never more favorable.

It is reported that from 1,500 to 2,000 joints of bank logs and "pick ups" arrived at Springhill last week and that operations are being carried on there on a larger scale this season than for some time past. About 40 men are employed and rafts are being made up as fast as possible for shipment. Several rafts have already gone forward to St. John, while a great many have been used by the local mills. Logs are said to have dropped in price at St. John during the past few days and are now said to be worth about $12 per thousand, whereas they were $13.

SPRUCE LUMBER CONDITIONS.

The position of spruce in Boston and adjacent markets is reviewed by the Lumberman's Review as follows:

"The spruce situation can be

classed as just about steady, with a moderate to large amount of buying in progress throughout New England retail points. Stocks in the yards are only moderate, and as lumber is now moving out freely again, there will probably be some lively scrambling for stock before the big water mills go into operation for the season. Out in the west end of Massachusetts and Connecticut, where the chief reliance for prompt supplies is the mills on the Connecticut River, there will be nothing to offer from that source until the new drives, amounting to about 66,000,000 feet, are driven from Northern New Hampshire and put through the big mills at Mt. Tom and other points. In this eastern end of the territory and along Long Island Sound the interior mills will be called upon to supply most of the lumber until the big drives on the Kennebec, Androscoggin, Penobscot and St. John Rivers are driven to the mill booms. These drives are almost entirely spruce, and never reach the mills until late in June, and very frequently run well into the fall before the drives get through. Scarcely any of the big tidewater mills carried over any logs from last season, the only mill conspicuously fortunate in this regard being one located in Bangor, which had carried over about 8,000,000 feet. Many of the mills at interior points are still sold well ahead of their saws. They have practically no lumber in their mill yards, and under these circumstances it is difficult to see where the incentive is to come from to encourage manufacturers to book orders at prices any lower than have prevailed during the past year. The present basis of quotations is $25 for schedule stock, up to and including 9 inch, and $27 for stock over 9 inch. All of the operators have a very full cut of logs in the streams, and should successful drives result and the logs reach the mills before July 1, the question as to the probable advance of spruce this season would be settled then and there.

Also a 30 x 12 double surfacer (new), found it too heavy for my work. A splendid tool, weight about 9,000 lbs., will sell for cash or on terms, or will take lumber in payment. G. W. MURRAY, Royal Planing Mills, Winnipeg, Manitoba.

Timber Limit

FOR SALE

Fifty square miles in the Swan River District, Province of Manitoba. Apply to

HERBERT MATTHEWS,
41 and 42 Merchants' Bank Building,
Winnipeg, Man.

Timber Limit For Sale

SEALED TENDERS WILL BE RECEIVED by the undersigned, until July 3rd, for the purchase of Timber Berth No. 90, North Shore of Lake Huron, containing approximately fifteen million feet of pine, mostly virgin timber, and ten million feet of large size hemlock. Timber all on south half of berth, short haul to Whitefish River and Georgian Bay, making easy of operation. In close proximity to proposed Manitoulin Railway.

For further particulars apply to TRADERS BANK, North Bay, Ont.

CURRENT TRADE CONDITIONS.

ONTARIO.

There exists among the manufacturers a strong feeling of confidence in the stability of the lumber market, this being based on the continued good demand. Buyers are still plentiful and even at this season of the year are displaying some eagerness to cover their requirements. The knowledge that much of the white pine and hemlock production has already been contracted for, thus reducing the quantity available for purchase, has made buyers more anxious than usual and has greatly strengthened the situation from a manufacturer's standpoint. Toronto dealers are enjoying a large trade in building lumber, but there does not seem to be much disposition to advance prices. "We are making a profit," said a prominent dealer, "and will not increase present prices unless compelled to do so by the mill men, and we are hoping that the manufacturers will see the wisdom of encouraging consumption by keeping prices within reason." Hardwoods are featureless and less active than pine, but the higher prices ruling for the past two months have in most instances been maintained. Some offerings of birch are being made at a slight concession.

EASTERN CANADA.

The movement of lumber in Montreal is very active owing to extensive building operations, which promise to continue throughout the season. The new lumber coming on the market is being readily absorbed and prices generally are firm. There is some weakness in birch timber for export, the demand this spring having been disappointing. The spruce trade of New Brunswick and Nova Scotia is good. A manufacturer writes us as follows: "We are finding an unexampled and energetic demand for all lumber products this spring. We cannot see how prices can go any lower, as both United States and English buyers are willing to buy on contract for this season's delivery at high prices. We have closed a number of contracts ourselves with deliveries ending only with the year's end, and these at higher prices than we ever sold at before." The situation in respect to spruce is very strong and points towards higher prices. The log drives are making satisfactory progress, rafting operations having commenced at the Douglas boom at Fredericton, N.B. The cut of logs in the province of Quebec last winter was large.

UNITED STATES.

The lumber trade is somewhat irregular but with a firm undertone. Changes are this week made in our Buffalo price list, all in the nature of an advance. The demand for the lower grades of pine is still urgent, and where the supply is short substitutes are being purchased. Many of the large white pine mills have placed under contract their entire season's production of box boards, this being the result of the exceptional activity existing in the box industry. The East is buying hardwoods quite freely, as in comparison with the soft woods, they are cheap. Birch and basswood are leading in point of demand, and elm is doing better than earlier in the year. Maple flooring sells readily and is steadily gaining in price.

GREAT BRITAIN.

The timber trade of Great Britain has as yet been little influenced by the general expansion shown in other branches of industry and some doubt is now expressed as to the maintenance of the present level of prices for the rest of the year. The weakness of birch timber is a disturbing factor. It seems that a considerable quantity of birch has been received on consignment, much of it arriving at a time when the market was not in a position to take it, and the result being a drop in prices. The weakness of birch timber has affected boards of that variety, but there are many dealers who believe that the present is a very favorable time to accumulate a stock of birch. The position in respect to pine and spruce is doubtless strong; 3x9 to 3x11 inch spruce deals are very scarce, and Manchester and Bristol Channel ports are short of 3x7 inch. A cargo of spruce from Halifax, N. S., recently brought £8 5s to £8 7s 6d per standard c. i. f. Liverpool, which shows that prices are not weakening.

STOCKS AND PRICES.

H. C. Mackey is loading three scows with deals at Fredericton, N. B., for Gilman Bros. & Burden, of Pokiok. He has engaged to load 40 scows for them during the next few weeks. The lumber will be sent to St. John and shipped to Old Country by W. Malcolm Mackay.

A western lumber firm write the CANADA LUMBERMAN as follows: "Up to the present time this year we have experienced a very good demand for lumber. There was practically no let-up in the trade during seeding time, and we look for a continuance of good trade to follow. As it will be some time before any opinion can be passed on the coming crop, we do not think this question has any bearing on the condition of trade at this particular time."

J. L. Black & Sons, of Sackville, N. B., are loading the schooner Alma with a cargo of scantling for New York. The barque Gler is due at Cape Tormentine to load for them a cargo of deals for Liverpool and they will load another barque at the Cape later in the season. They expect to load four or five vessels at Point du Chene this summer, two of which are now on the way from Great Britain. Messrs. Black & Sons will saw at their Aboushagan mills and this with what they cut last winter will make between four and five million feet for shipment this season.

THE OTTAWA VALLEY.

(Correspondence of the CANADA LUMBERMAN.

OTTAWA, May 25, 1906.—English buyers are in the Ottawa Valley picking up small lots of lumber for export. They are paying considerably more than they paid for similar purchases a year ago. The keen demand for white pine and spruce which became noticeable about a month ago is keeping up. The output is going largely to the American market. A large quantity is going into local quarters too, and this trade will become more active when people begin to go after the new cut. There seems to be an increased demand for common stock. Manufacturers attribute this situation partially to conditions in the United States but more particularly to the state of the Canadian market. The local consumption of this class of lumber is increasing at a rapid rate and promises to remain a strong factor in holding common grades at steady high prices.

Owners of large timber limits are becoming interested in the active

demand for railway ties. A few years ago the timber which would make ties was not much appreciated, as it was scarcely considered profitable to go into that kind of lumbering. At present large railway companies are searching in the Ottawa Valley for all the ties they can procure, and there is a noticeable dearth of them. Limit holders now place a considerable value on the class of timber that will make ties.

Spruce prices have reached so high a notch for local consumption that English exporters who usually bought at this time of the year are handling very little of the Ottawa Valley spruce output.

Manufacturers report that hemlock is nearly all bought up at good prices, but basswood is not quite so active as last month.

The price of lath is exceedingly high and buyers are complaining that there is no justification for the state of the market. They have to pay twice as much as a year ago. The manufacturers say the demand warrants the high prices. In addition to this they add that wages is soaring up continually and that they are making no more profit than under old conditions.

A mild strike occurred in one of the big mills last week and higher wages was paid without any interruption in the work.

The drives are reported to be making satisfactory progress in the upper streams. The average of arrivals in the Ottawa river is earlier than last year. The Sheppard and Morse Company have just run 200,000 pieces out of the Montreal river into the Ottawa and on June 1st expect to have 100,000 logs out of the Kippewa. Nearly all these logs are white pine, about ten per cent being spruce and red pine.

NEW BRUNSWICK LETTER.

(Correspondence of the CANADA LUMBERMAN.)

ST. JOHN, N. B., May 25th, 1906. —At this date the outlook for the log drives on the St. John River is not so encouraging as was the case a fortnight ago. The freshet has fallen off with unlooked for rapidity and reports from up-river districts tell of difficult driving and the probability of hang-ups of considerable dimensions, the exact figures in regard to which it is impossible to obtain at this early date. Logs are arriving at St. John in quantities barely sufficient to keep the mills in cut. Cedar is particularly scarce and some of the mills are running at only half their capacity.

The cedar shingle market presents a very encouraging prospect to the manufacturer. The demand in the U. S. market continues strong and such lots of N. B. shingles as have been offered have been readily disposed of at the reigning values. At St. John and in the vicinity, stocks of high grades are very light — one and one quarter millions would cover the entire supply of "Extras" and "Clears". The province trade is very brisk and promises to easily take care of all the lower grades that will be offered.

The prospects for the manufacture of shingles during the balance of the season point to the conclusion that the output will be somewhat smaller than usual. With the wharves cleared of all high grades early in the year, and the late date of the commencement of sawing, the volume of cedar shingles for shipment has already been decreased sufficiently to place the quantity below the average. Also, it is doubtful if the logs will come along rapidly enough to keep the mills in cut, a condition which was conspicuous last year during June and July and which resulted in a curtailment of the output by more than one half during those months.

Local values in cedar shingles are strong and show every indication of continuing so. At present writing a buyer of shingles for delivery during the summer would be quoted from $3.15 to $3.25 per M on "Extras" and $2.65 to $2.75 per M on "Clears", f. o. b. St. John.

The spruce lath trade is marked by considerable uncertainty and much diversity of opinion exists in regard to actual value. There is no doubt that values in this line have been steadily losing ground during the past two months, but the general impression seems to be that when conditions have become more settled, it will be found that the goods in question will be worth at least as much as shown in recent quotations. Local values range from $2.55 to $2.65 per M for non-dutiable slab lath and $2.30 to $2.40 per M for dutiable, f. o. b. St. John. No important quantity of lath will be available at this port before July 1st.

Freight rates to the United States have a tendency towards firmness. For the present quotations in this line are as follows: New York, lath, 70c.; Boston shingles 27½c.

It has been persistently rumored during the past week that an increase of wages, amounting to 25 per cent., will be asked by the mill crews in and about St. John during the next few days. Failing to receive a favorable answer to their demands, it is said that the men will go out. A local paper is responsible for this statement. The employers claim that they know nothing of the matter but there is little doubt that such a contingency may arise at any moment. Should it materialize, the probabilities are that it would mean a tie-up of every mill in this city for an indefinite period, as it is unlikely that the petition of the men will be granted.

CANADIAN LUMBER WANTED

We solicit consignments of long and short lumber from the Maritime Provinces and are prepared to purchase White Pine and Hardwoods in Ontario and Quebec.
